Pro-forma financial information

The table below presents selected pro-forma financial information of the UniCredit Group for the financial year ended at December 31, 2024. The figures are based on the Pro-Forma Consolidated Condensed Financial Information which were prepared, in accordance with Annex 20 of the Commission Delegated Regulation (EU) 2019/980, supplemented by the Guidelines on disclosure requirements under the Prospectus Regulation 32-382-1138, published by ESMA and with CONSOB notice No. DEM/1052803 of July 5, 2001, exclusively for illustrative purposes, by providing an illustration of the estimated retroactive effects of the planned acquisition of BPM on the financial performance of the UniCredit Group (the “**Pro-Forma Consolidated Condensed Financial Information**”).

The Pro-forma financial information contained in the Pro-Forma Consolidated Condensed Financial Information represents a simulation, provided merely for illustrative purposes, of the possible effects that might result from (i) the acquisition and subsequent potential Merger of BPM into UniCredit (disregarding any potential integration of a stake in Anima Holding S.p.A. (“**Anima**”) by BPM pursuant to the BPM Offer), and (ii) the acquisition and subsequent potential Merger of BPM into UniCredit also taking into account the incidental acquisition by BPM of a controlling stake in Anima in accordance with the various scenarios that might materialize pursuant to the terms of the BPM Offer (together, the “**Acquisitions**”). More specifically, as the pro-forma data were prepared to retroactively reflect the effects of subsequent transactions, despite compliance with the generally accepted rules and the use of reasonable assumptions, there are limitations inherent in the nature of these pro-forma figures and, by their very nature, they are unable to offer a representation of the prospective economic performance and financial position of the UniCredit Group. The Pro-Forma Consolidated Condensed Financial Information included in this Summary have been examined by the KPMG, who issued their own report on March 28, 2025.

What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment. The following risks are key risks specific to the Issuer:

Risks associated with the completion of the acquisition of BPM, the consequent process of integration and potential failure to realize the expected synergies: The Offer's terms provide for the Issuer to pay a consideration equal to 0.175 New Shares in exchange for each tendered share of BPM (without prejudice to the adjustments that will be described in the Offer Document). The New Shares will originate from a share capital increase of up to 278,000,000 UniCredit shares, without option rights. With the Offer, the Issuer aims at acquiring the entire share capital of BPM to proceed with its Merger by incorporation (subject to the approval of the competent corporate bodies and authorizations by competent authorities) in pursuit of continued integration, synergy and growth of the UniCredit Group. The nature of the Offer - and of the envisaged transactions connected with it - is such that investors should take into account several risks associated with any forecasts concerning the Issuer's performance in the context of its own strategic targets, those of the Offer itself and the wider economic background. For instance, the acquisition of the BPM Group may not reflect the scope and timing it is expected to be characterized by, also given the different possible scenarios concerning adherence to the Public Exchange Offer. In addition, if the estimated implementation costs of the Offer and the integration measures are materially exceeded, the targets and future outcomes on which the Offer is based may not be realized. In particular, should the Issuer acquire a certain percentage of BPM (in any case higher than the Threshold Condition or 50% + 1 of the shares of BPM in case the Threshold Condition is waived) without, however, carrying out the Merger, the Issuer estimates that approximately 85% of the estimated cost and revenues synergies could be achieved, amounting to an overall value of approximately Euro 1 billion before tax, including revenues synergies of approximately Euro 300 million, and cost synergies of approximately Euro 700 million. It should be noted that the revenues and cost synergies expected from the transaction have been estimated regardless of the outcome of the BPM Offer and thus do not take into account any synergies which may be extracted from the integration of Anima and BPM, considering that the Issuer had no access to the detailed assumptions underlying any potential synergies deriving from the integration of Anima and BPM.

Risks associated with the UniCredit Group's activities in different geographical areas: Despite the Group's business being materially connected to Italy and, therefore, to the state of its economy (Italy accounted for approximately 45% of the Group's revenues in 2024, computed as sum of Italy, Germany, Central Europe including Austria, Eastern Europe and Russia) the UniCredit Group is also present in Germany (accounting for approximately 22% of the Group's revenues in 2024), in Central Europe (accounting for approximately 17% and covering Austria, Czech Republic and Slovakia, Hungary and Slovenia) in Eastern Europe (accounting for approximately 11% of the Group's revenues in 2024 and covering Croatia, Bulgaria, Romania, Bosnia and Herzegovina and Serbia). UniCredit also has marginal activities in Russia (accounting for approximately 5% of the Group's revenues in 2024). BPM's more pronounced presence in certain regions of Italy means that, especially following a potential Merger, any changes in the macroeconomic environment/geopolitical developments of the country, any trends in the prices of commodities and energy, or high interest rates on sovereign bonds might cause significant negative impacts on the UniCredit Group's business. The UniCredit Group's geographical spread will also continue to expose it (even post-Merger) to risks and uncertainties of a varying nature and magnitude affecting each of the various countries in which it operates and which could be more complex in relation to countries outside the European Union. Central and eastern European countries in particular have historically experienced volatile capital and foreign exchange markets, often coupled with political, economic and financial instability (at present potentially increased due to the Ukrainian crisis). The evolution of the geopolitical landscape remains under continuous monitoring by UniCredit, with current factors including recent and constantly evolving U.S. trade policy decisions, that could have potential implications on global trade relationships both with upsides (e.g. new trade partnerships) and downsides (e.g. impact on export/import) as possible outcomes. This area is at the early stage of evolution and potential impacts, if any, on UniCredit's primary geographies will be duly taken into account as part of the normal processes of the risk management framework. At the Registration Document Date, the Issuer's presence in Russia exposes it to the specific risks connected to the ongoing Ukrainian crisis. Such risk exposure also requires the Issuer to constantly employ a significant amount of resources for the dynamic management of risks and ongoing assessment of the possible effects of the geopolitical crisis, while maintaining an overall prudent and sustainable approach to distributions. With regards to the assets and liabilities of Russian subsidiaries, the Group holds investments in Russia through AO UniCredit Bank and its subsidiaries OOO UniCredit Garant, and OOO UniCredit Leasing. The line-by-line consolidation determined the recognition of total assets as of December 31, 2024, in the form of investments in Russia to be equal to Euro 5,597 million, as opposed to Euro 8,668 million as of December 31, 2023. Such a difference in total assets is mainly attributable to a reduction in financial assets at amortized cost. As of December 31, 2024, the foreign exchange revaluation reserve arising from the conversion of assets and liabilities in EUR is equal to Euro - 3,243 million. The negative delta for Euro 456 million in comparison with the same figure for year-end 2023 (Euro - 2,787 million) is mainly due to the depreciation of the Russian Ruble over the same period. Any theoretical event of loss of control over AO UniCredit Bank – including a nationalization – would determine the derecognition of net assets having a carrying value of Euro 5.5 billion. Such value includes the deconsolidation effects and embeds the negative revaluation reserve, mainly linked to foreign exchange, equal to Euro -3.3 billion. As a consequence, the overall impact on UniCredit's capital ratio is lower than the consolidated carrying value of AO UniCredit Bank and it is confirmed in line with the extreme loss scenario already disclosed to the market (-47 bps of the CET1 ratio as of December 2024 or -55bps including impact from threshold deduction, if it were applicable at the time the event occurs). This event, if occurred in 2024, would have led UniCredit to report a positive stated FY24 Group result of Euro 4.2 billion, instead of Euro 9.7 billion.

Risks connected with forecasts and estimates concerning UniCredit, BPM and the expected post-Merger process of integration and expected synergies: The forecasts and estimates regarding the UniCredit Group's future performance ambition (2025-27 Ambitions) are subject to uncertainties and other factors largely outside UniCredit's control. Expected synergies arising from the integration of BPM depend on UniCredit's ability to react to market and business changes during the combination, successfully and safely control the business integration process, and define and implement a new strategy, organizational and governance model. Estimates on the one-off costs of integration and the cost and revenues synergies may turn out to be imprecise or not materialize at all, and there might also be significant discrepancies between forecast and actual values. Based on (a) the UniCredit net profit ambitions for 2027 and (b) the standalone net profit estimates for 2027 from broker consensus for BPM and Anima (average retrieved from FactSet on March 20, 2025) and assuming (i) completion of the BPM Offer, (ii) completion of the Offer and the Merger and (iii) realization of the full revenues and cost synergies in 2027, the combined group would have a combined net profit of approximately Euro 12.8 billion in 2027. With particular reference to the targets and expected synergies, these have also been set by reference to estimates concerning the one-off costs of integration relating to the acquisition and the following cost and revenues synergies arising once BPM has been integrated into the Issuer's Group. In particular, the Issuer expects estimated revenues synergies of approximately Euro 300 million before tax per year and estimated cost synergies of approximately Euro 900 million before tax per year. UniCredit expects 50% of both costs and revenues synergies to materialize in 2026 and to be then fully realized in 2027. The one-off costs of the integration process have been estimated at approximately Euro 2 billion before tax, expected to be mostly concentrated at the initial stage of the process. Given the uncertainty characterizing any forecast data and the assumptions they are based on, including those retrieved from FactSet and broker consensus estimates, the results actually achieved by UniCredit (including net profit) could significantly diverge from the identified forward-looking trends.

Credit risk and risk of credit quality deterioration: The financial and capital strength, as well as the profitability of the UniCredit Group also depend on the creditworthiness of its customers. An unexpected change in the creditworthiness of a counterparty exposes the Group to the risk of a change in the value of the associated credit exposure, requiring it to be partially or totally written down. Such credit risk is inherent in, and material to, the traditional activity of providing credit. As at December 31, 2024, UniCredit's non-performing exposures (NPEs) amounted to Euro 11.2 billion (with a gross NPE ratio of 2.6%), down by 4.6% Y/Y, while as at December 31, 2023 they amounted to Euro 11.7 billion, with a gross NPE ratio of 2.7%. The

stock of LLPs as at December 31, 2024, was equal to Euro 5.1 billion with a coverage ratio of 45.87%. In terms of NPEs: (i) Euro 3.1 billion were classified as bad loans (coverage 69.33%), (ii) Euro 7.3 billion were classified as unlikely to pay (coverage 37.44%), (iii) Euro 0.8 billion were classified as impaired past due (coverage 32.47%).

As at December 31, 2024, the Group's net NPEs stood at Euro 6 billion, slightly decreased compared to the value of Euro 6.2 billion recorded as at December 31, 2023 (equal to, respectively, 1.4% and 1.4% of total exposures of the Group). The UniCredit Group's CoR increased by 2 bps to 15 bps as at December 31, 2024. On the other hand, as at December 31, 2024 the amount of the Group's overlays on performing exposures is of approximately Euro 1.7 billion. The UniCredit Group is also exposed to the non-traditional counterparty credit risk arising in the context of negotiations of derivative contracts and repurchase transactions (repos) on a wide range of products if a counterparty becomes unable to fulfil its obligations towards the UniCredit Group. As to the Group's securitizations relevant for credit risk purposes, UniCredit acts as originator (SRT securitizations, of which 27 are synthetic, 14 are true sales and 10 on NPEs exposures), sponsor (with its asset-backed commercial paper program for Euro 5.9 billion in 2024), sponsor (for its Asset-Backed Commercial Paper ("ABCP") program in UCB GmbH) and investor (total exposure of Euro 19.64 billion in 2024, of which (i) Euro 9.34 billion relates to rated positions, and (ii) Euro 10.3 billion relates to unrated senior exposures of private securitisations of banking and automotive sector clients). Furthermore, the size of the BPM investor portfolio is relatively small compared to the UniCredit Group's one, and even though UniCredit does not envisage a deterioration of the Group risk profile following the integration of BPM, the Issuer would only be able to provide a complete evaluation of any impact on credit risk (including that relating specifically to securitizations) only after the completion of the transaction.

Liquidity risk: The UniCredit Group is and will be, in a post-Merger configuration, exposed to the possibility of being unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The liquidity risks specific to the activities of UniCredit concern funding/market liquidity and mismatch/contingency risks. As of December 31, 2024, the Liquidity Coverage Ratio (LCR) of the UniCredit Group was equal to 144% whereas at December 31, 2023 it was equal to 154% (calculated as the average of the 12 latest end of month ratios). As of December 31, 2024, the Net Stable Funding Ratio (NSFR) was above 128%. Comparing values of such metrics for 2024 between UniCredit and BPM: (i) LCR: 144% for UniCredit and 132% for BPM; (ii) NSFR: 128% for UniCredit and 126% for BPM; (iii) loan to deposit ratio (LTD): 85% for UniCredit, 79% for BPM (even though not fully comparable); (iv) Current accounts and demand deposits over total financial liabilities at amortized cost due to customers: 73% for UniCredit and 96% for BPM.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Protection Performance Securities with Cap (Non-Quanto)

Underlying: onemarkets Fidelity World Equity Income Fund - M (ISIN: LU2503841731 / Reference Price: Net Asset Value (per fund share))

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (Testo Unico della Finanza). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Term

The Securities will be issued on 20 May 2025 in Euro (EUR) (the "**Specified Currency**") as up to 19,000 Certificates. The Securities have a defined term.

General

The value of the Securities during their term depends mainly on the price of the Underlying. In principle, the value of the Securities rises if the price of the Underlying rises and falls if the price of the Underlying falls.

Interest

The Securities do not bear interest.

Redemption

Provided that no Conversion Event has occurred, the Securities will be redeemed on the Final Payment Date at the Redemption Amount following an automatic exercise.

At the Final Payment Date the Redemption Amount is equal to the Calculation Amount multiplied by the total of (i) the Floor Level and (ii) the Performance of the Underlying (final) multiplied by the Final Participation Factor. The Redemption Amount will not be lower than the Minimum Amount and not higher than the Maximum Amount.

Additional definitions and product terms

Performance of the Underlying (final) means the difference of (i) the quotient of R (final) as the numerator and R (initial) as the denominator and (ii) the Final Strike Level.

R (final) means the Reference Price on the Final Observation Date.

R (initial) means the Reference Price on the Initial Observation Date.

Final Observation Date:	13 May 2031
Calculation Amount:	EUR 1,000.00
Final Participation Factor:	100%
Final Payment Date:	20 May 2031
Final Strike Level:	100%
Floor Level:	100%
Initial Observation Date:	16 May 2025
Maximum Amount:	EUR 1,450.00
Minimum Amount:	EUR 1,000.00

Optional Redemption Amount:

Calculation Amount

Conversion of the Securities by the Issuer: Upon the occurrence of one or more conversion events (for example, a Fund Replacement Event (for example a material change with respect to the risk profile of the Fund Shares or the Fund) occurred and no suitable Replacement Underlying is available or can be determined) (the "**Conversion Event**") the Issuer may convert the Securities and redeem them on the Final Payment Date by payment of the Settlement Amount. The "**Settlement Amount**" is the market value of the Securities, with accrued interest for the period until the Final Payment Date at the market rate of interest being traded at such time for liabilities of the Issuer with the same remaining term as the Securities within ten Banking Days following the occurrence of the Conversion Event, as determined by the Calculation Agent. The Settlement Amount is in any case not less than the Minimum Amount.

Early redemption at the option of the Issuer: The Securities may be redeemed at any time in whole but not in part, at the option of the Issuer at their Optional Redemption Amount on or after the date specified in a notice published on the Issuer's website on giving notice to the Paying Agent and the Security Holders, if the Issuer determines that all or part of the series of Securities is or will be excluded fully or partially from the eligible liabilities available to meet the MREL Requirements (MREL Disqualification Event).

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities if an adjustment event (for example, the reduction of the number of Fund Shares of a shareholder in the Fund for reasons outside the control of the shareholder) or Fund Replacement Event (for example, a material change with respect to the risk profile of the Fund Shares or the Fund) (the "**Adjustment Event**") occurs.

Status of the Securities: The obligations of the Issuer under the Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations (other than obligations ranking junior to the senior notes from time to time (including non-preferred senior notes and any further obligations permitted by law to rank junior to the senior notes following the Issue Date), if any) of the Issuer, present and future and, in the case of the senior notes, *pari passu* and rateably without any preference among themselves.

Where will the Securities be traded?

Admission to trading: Application will be made for the Securities to be admitted to trading with effect from 20 May 2025 on the following markets: Regulierter Markt der Börse München (*Regulated Market of the Munich Stock Exchange*)

Listing: Application to listing will be made as of 20 May 2025 on the following markets: Regulierter Markt der Börse München (*Regulated Market of the Munich Stock Exchange*)

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to sell the Securities at a specific time or for a specific price. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying. However, the market value of the Securities will be affected by a number of additional factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors.

Risks related to the Redemption Amount: The Securities will be redeemed at their maturity at the Redemption Amount. The Redemption Amount may be less than the Issue Price or the purchase price. This means, the Security Holder only achieves a return if the Redemption Amount exceeds the individual purchase price of the Security Holder. A participation in a favourable performance of the Underlying beyond the Maximum Amount is excluded.

Risks arising from missing ongoing payments: The Securities, do not bear interest or grant any other conditional or unconditional rights for ongoing payments which could compensate possible losses of principal.

Risks related to Fund Shares as Underlying: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the fund shares specified as Underlying. In particular, the investment activity of the investment fund can have a material adverse effect on the price of the relevant fund shares for the Security Holder.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.
