 - (f) (i) the proceeds are immediately available to the New Issuer, without limitation (ii) each Security Holder is treated as if the Substitution of the Issuer had not taken place and (iii) the competent supervisory authority or resolution authority has granted its prior consent (if and to the extent required by law).

However, the Variation may not itself give rise to any right of the Issuer to redeem the varied Securities. The Issuer shall give not less than 30 nor more than 60 days' prior notice of the Variation to the Paying Agent and the Securities Holders in accordance with § 6 of the General Conditions (the "**Variation Notice**"). or other ongoing payments payable to reflect the reduction of the redemption amount payable, and any further modification of the Terms and Conditions of the Securities that the Relevant Resolution Authority may decide in accordance with applicable laws and regulations relating to the resolution of the Issuer and/or entities of the Group incorporated in the relevant Member State.

- (3) *Manner of payment, discharge:* All payments shall be made to the Principal Paying Agent. The Principal Paying Agent shall pay the amounts due to the Clearing System to be credited to the respective accounts of the depository banks and to be transferred to the Security Holders. The payment to the Clearing System shall discharge the Issuer from its obligations under the Securities in the amount of such payment.
- (4) *Interest of default:* If the Issuer fails to make payments under the Securities when due, the amount due shall bear interest on the basis of the legal interest rate ('*Saggio degli Interessi legali*'), pursuant to Section 1284 CC, without prejudice to any other mandatory provisions under Italian law. § 7

Market Disruptions

- (1) *Postponement:* Notwithstanding the provisions of § 8 of the Special Conditions, if a Market Disruption Event occurs on an Observation Date, the respective Observation Date shall be postponed to the next following Calculation Date on which the Market Disruption Event no longer exists.

Any Payment Date relating to such Observation Date shall be postponed if applicable. Interest shall not be payable due to such postponement.
- (2) *Discretionary valuation:* Should the Market Disruption Event continue for more than 30 consecutive Banking Days, the Calculation Agent shall determine acting in accordance with relevant market practice and in good faith the respective Reference Price required for the calculations or, respectively, specifications described in the Terms and Conditions of these Securities. Such Reference Price shall be the reasonable price determined in accordance with prevailing market conditions at 10:00 a.m. (Milan local time) on this 31st Banking Day, taking into account the economic position of the Security Holders.

If within these 30 Banking Days traded Derivatives of the Underlying expire or are settled on the Determining Futures Exchange, the settlement price established by the Determining Futures Exchange for the there traded Derivatives will be taken into account in order to conduct the calculations or, respectively, specifications described in the Terms and Conditions of these Securities. In that case, the expiration date for those Derivatives is the respective Observation Date.

§ 8

Adjustments, Type of Adjustment, New Index Sponsor and New Index Calculation Agent, Replacement Specification, Notifications

- (1) *Adjustments:* If an Adjustment Event occurs the Calculation Agent is authorised to adjust the Terms and Conditions of these Securities (the "**Adjustment**"); whether an Adjustment is to be made shall be determined by the Calculation Agent acting in accordance with relevant market practice and in good faith.

The goal of the Adjustment is to appropriately consider the economic impact of the circumstance that triggered the Adjustment Event, so that the economic characteristics of the Securities remain as unchanged as possible, taking into account the interests of the Security Holders as well as the Issuer ("**Adjustment Goal**"). A subsequent adverse change of the value of the Securities resulting from the Adjustment cannot be ruled out.

The Calculation Agent determines all Adjustments according to this § 8 acting in accordance with relevant market practice and in good faith, taking into account the Adjustment Goal. It will only make an Adjustment if such Adjustment is reasonable for the Security Holders as well as for the Issuer, in particular if the circumstance that triggered the Adjustment Event has not only an insignificant impact on the economic characteristics of the Securities; whether this is the case shall be determined by the Calculation Agent acting in accordance with relevant market practice and in good faith.
- (2) *Type of Adjustment:* In the context of an Adjustment the Calculation Agent may undertake in particular the following measure in accordance with paragraph (1) above:

Replacement of the Underlying: The Calculation Agent may replace the Underlying by a Replacement Underlying and if necessary redefine the Product and Underlying Data. As a "**Replacement Underlying**" another index can be considered which is comparable to the original index with respect to the represented constituents, the consideration of returns and distributions of the constituents included in the index (e.g. dividends) and, if applicable, fees and costs included in the index. If the Calculation Agent designates a Replacement Underlying, from the Adjustment Date on (as defined in paragraph (5) below), every reference to the Underlying in these Terms and Conditions shall be a reference to the Replacement Underlying, unless the context requires otherwise.
- (3) *New Index Sponsor and New Index Calculation Agent:* If the Underlying is no longer determined by the Index Sponsor but rather by another person, company or institution (the "**New Index Sponsor**"), then all calculations or, respectively, specifications described in these Terms and Conditions shall occur on the basis of the Underlying as determined by the New Index Sponsor. In this case, any reference to the replaced Index Sponsor in these Terms and Conditions shall be deemed to refer to the New Index Sponsor.

If the Underlying is no longer calculated by the Index Calculation Agent but rather by another person, company or institution (the "**New Index Calculation Agent**"), then all calculations or, respectively, specifications described in these Terms and Conditions shall occur on the basis of the Underlying as calculated by the New Index Calculation Agent. In this case, any reference to the replaced Index Calculation Agent in the Terms and Conditions shall be deemed to refer to the New Index Calculation Agent.
- (4) *Replacement Specification:* If a published price of the Underlying as required pursuant to the Terms and Conditions of these Securities is subsequently corrected and the correction (the "**Corrected Value**") will be published by the Index Sponsor or, respectively, Index Calculation Agent after the original publication, but still within one Settlement Cycle, then the Calculation Agent will notify the Issuer of the Corrected Value without undue delay and shall again specify the respective value by using the Corrected Value (the "**Replacement Specification**") and publish it pursuant to § 6 of the General Conditions.
- (5) *Notifications:* All Adjustments as described in this § 8 and undertaken by the Calculation Agent as well as the designation of the time of the first application (the "**Adjustment Date**") take place by notification of the Securities Holder according to § 6 of the General Conditions. Hereby reference is made to the aforementioned notifications.

Early redemption at the option of the Issuer

- (1) The Securities may be early redeemed at any time in whole but not in part, at the option of the Issuer, upon the occurrence of the MREL Disqualification Event, but subject to compliance with the then applicable MREL Requirements (including, without limitation, the Issuer having obtained the prior permission of the competent supervisory authority or the resolution authority, in each case to the extent required by provisions of law), upon not more than 60 days' nor less than 30 days' prior notice of such early redemption, at their Optional Redemption Amount, in accordance with the MREL Requirements.

"MREL Requirements" means the laws, regulations, requirements, guidelines, rules, standards and policies relating to minimum requirements for own funds and eligible liabilities applicable to the Issuer and/or the Group, from time to time, (including any applicable transitional or grandfathering provisions), including, without limitation to the generality of the foregoing, any delegated or implementing acts (such as regulatory technical standards) adopted by the European Commission and any regulations, requirements, guidelines, rules, standards and policies relating to minimum requirements for own funds and eligible liabilities adopted by the Federal Republic of Germany or the Republic of Italy, a relevant resolution authority or the European Banking Authority from time to time (whether or not such requirements, guidelines or policies are applied generally or specifically to the Issuer and/or the Group), as any of the preceding laws, regulations, requirements, guidelines, rules, standards, policies or interpretations may be amended, supplemented, superseded or replaced from time to time.

"MREL Disqualification Event" means that, at any time, all or part of the outstanding nominal amount of Securities is or will be excluded fully or partially from the eligible liabilities available to meet the MREL Requirements provided that: (a) the exclusion of a Series of such Securities from the MREL Requirements due to the remaining maturity of such Securities being less than any period prescribed thereunder, does not constitute a MREL Disqualification Event; (b) the exclusion of all or some of a Series of Securities due to there being insufficient headroom for such Securities within a prescribed exception to the otherwise applicable general requirements for eligible liabilities does not constitute a MREL Disqualification Event; and (c) the exclusion of all or some of a Series of Securities as a result of such Securities being purchased by or on behalf of the Issuer or as a result of a purchase which is funded directly or indirectly by the Issuer, does not constitute a MREL Disqualification Event.

- (2) The Optional Redemption Amount will be paid pursuant to the provisions of § 6 of the Special Conditions.
- (3) Any notice in accordance with this paragraph (3) shall be given by a notice in accordance with § 6 of the General Conditions. It shall be irrevocable, must specify the date fixed for redemption and must set forth a statement that the redemption is made in accordance with this § 9.

What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment. The following risks are key risks specific to the Issuer:

Risks associated with the impact of current macroeconomic uncertainties and the effects of the COVID-19 pandemic outbreak and recent geopolitical tensions with Russia: The financial markets and the macroeconomic and political environment of the countries in which UniCredit operates were impacted by the viral pneumonia known as "Coronavirus" (**COVID-19**) outbreak and this has had and could continue to have a negative impact on the performance of the Group. The valuation of certain assets has become complex and uncertain as a result of the lockdown measures and other restrictive measures put in place by governments for the containment of COVID 19 pandemic, even though progressively lifted. Moreover, macroeconomic uncertainty increased as a result of the heightened geopolitical tension between Russian Federation and Ukraine. The Russia-Ukraine crisis has caused a sharp rise in commodities prices and inflationary pressure, further global supply-chain disruption, a tightening of financial conditions, heightened uncertainty, and a sharp drop in consumer confidence. As inflation builds up as a result of the increase in energy price and the supply disruptions, ECB is changing its monetary stance and market is repricing interest rate expectations. The outlook is surrounded by risks, also related to a cessation of gas supply from Russia. As a consequence, the expectations regarding the performance of the global economy remain therefore still uncertain in both the short and medium term. The macroeconomic context in which the Group functioned in 2021 was characterized by the encouraging signs of recovery compared with the prior year, supported by the governmental measures sustaining the economy, by vaccination campaigns and by the progressive slowing-down of the lockdown measures. The current environment continues to be characterized by highly uncertain elements, such as geopolitical tensions with Russia, with the possibility that the slowdown of the economy could generate a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement. On 9 December 2021 UniCredit presented to the financial community its new Strategic Plan, which included a set of strategic and financial objectives that considered the underlying scenario and resulted from the assessment performed in the previous months. The macro assumptions underlying the Strategic Plan exclude (macro assumptions consider the recent and still existing impacts of COVID with a gradual normalisation over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years) unexpected materially adverse developments such as the worsening of the COVID-19 pandemic and Russia-Ukraine conflict, situations that UniCredit is monitoring closely. The evaluations processes, such as Deferred Tax Assets, whose recoverable amount depends on cash flows projections, might be subject to a change not foreseeable at the moment and from which could derive possible negative effects, including significant ones, on the bank's financial and economic situation.

Risks connected with the Strategic Plan 2022 – 2024: On 9th December 2021, UniCredit presented to the financial community in Milan the 2022-2024 Strategic Plan called "UniCredit Unlocked" (the "**Strategic Plan**" or "**Plan**") which contains a number of strategic, capital and financial objectives (the "**Strategic Objectives**"). "UniCredit Unlocked" delivers strategic imperatives and financial ambitions based on six pillars. Such strategic imperatives and financial ambitions regard: (i) the growth in its regions and the development of its client franchise, changing its business model and how its people operate; (ii) the delivery of economies of scale from its footprint of banks, transforming the technology leveraging Digital & Data and embedding sustainability in all that UniCredit does; (iii) driving financial performance via three interconnecting levers. UniCredit's ability to meet the strategic objectives and all forward-looking statements relies on a number of assumptions, expectations, projections and provisional data concerning future events and is subject to a number of uncertainties and other factors, many of which are outside the control of UniCredit. Macro assumptions exclude (macro assumptions consider the recent and still existing impacts of COVID with a gradual normalisation over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years) unexpected materially adverse developments such as the worsening of the COVID-19 pandemic, a situation that UniCredit is monitoring closely. The six pillars are: (i) optimise, through the improvement of operational and capital efficiency; (ii) invest, with targeted growth initiatives, including ESG; (iii) grow net revenues; (iv) return; (v) strengthen thanks to revised CET1 ratio target and decrease of Gross NPE ratio; and (vi) distribute consistently with organic capital generation. For all these reasons, investors are cautioned against making their investment decisions based exclusively on the forecast data included in the strategic objectives. Any failure to implement the strategic objective or meet the strategic objectives may have a material adverse effect on UniCredit's business, financial condition or results of operations.

Credit risk and risk of credit quality deterioration: The activity, financial and capital strength and profitability of the UniCredit Group depend, among other things, on the creditworthiness of its customers. In carrying out its credit activities, the Group is exposed to the risk that an unexpected change in the creditworthiness of a counterparty may generate a corresponding change in the value of the associated credit exposure and give rise to the partial or total write-down thereof. The current environment continues to be characterised by highly uncertain elements, with the possibility that the slowdown of the economy, jointly with the termination of the safeguard measures, such as the customer loans moratorium, generates a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged in the income statement. UniCredit's Loan Loss Provisions ("**LLPs**"), excluding Russia, increased Q/Q and decreased by 71.7 per cent Y/Y to Euro 108 million in 2Q22. Therefore, the cost of risk, excluding Russia, increased by 5 bps Q/Q and decreased by 26 bps Y/Y to 10 bps in 2Q22. As at 30 June 2022, Group gross NPE ratio, excluding Russia, was equal to 2.8 per cent, decreasing compared to 31 March 2022 in which the gross NPE ratio was equal to 3.6%. As at 30 June 2022 Group Net NPE ratio, excluding Russia, decreasing compared to 31 March 2022 and is equal to 1.5%. UniCredit's LLPs, excluding Russia, in 1H22 amounted to Euro 161 million decreased by 69.7 per cent H/H. Therefore the CoR was equal to 7 bps. In the context of credit activities, this risk involves, among other things, the possibility that the Group's contractual counterparties may not fulfil their payment obligations, as well as the possibility that Group companies may, based on incomplete, untrue or incorrect information, grant credit that otherwise would not have been granted or that would have been granted under different conditions. Other banking activities, besides the traditional lending and deposit activities, can also expose

the Group to credit risks. "Non-traditional" credit risk can, for example, arise from: (i) entering derivative contracts; (ii) buying and selling securities currencies or goods; and (iii) holding third-party securities. The counterparties of said transactions or the issuers of securities held by Group entities could fail to comply due to insolvency, political or economic events, a lack of liquidity, operating deficiencies, or other reasons. The Group has adopted procedures, rules and principles aimed at monitoring and managing credit risk at both individual counterparty and portfolio level. However, there is the risk that, despite these credit risk monitoring and management activities, the Group's credit exposure may exceed predetermined risk's levels pursuant to the procedures, rules and principles it has adopted.

Liquidity Risk: The main indicators used by the UniCredit Group to assess its liquidity profile are (i) the Liquidity Coverage Ratio (LCR), which represents an indicator of short-term liquidity subject to a minimum regulatory requirement of 100% from 2018 and which was equal to 171% in June 2022, whereas at 31 December 2021 was equal to 182% (calculated as the average of the 12 latest end of month ratios), and (ii) the Net Stable Funding Ratio (NSFR), which represents the indicator of structural liquidity and which in June 2022 was above the internal limit set at 102%, as at 31 December 2021, within the risk appetite framework. Liquidity risk refers to the possibility that the UniCredit Group may find itself unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The activity of the UniCredit Group is subject in particular to funding liquidity risk, market liquidity risk, mismatch risk and contingency risk. The most relevant risks that the Group may face are: i) an exceptionally high usage of the committed and uncommitted lines granted to corporate customers; ii) an unusual withdrawal of sight deposits by UniCredit's retail and corporate customers; iii) the decline in the market value of the securities in which UniCredit invests its liquidity buffer; iv) the capacity to roll over the expiring wholesale funding and the potential cash or collateral outflows the Group may suffer in case of rating downgrades of both the banks or the sovereign debt in the geographies in which it operates. In addition to this, some risks may arise from the limitations applied to the cross-border lending among banks. Due to the financial market crisis, followed also by the reduced liquidity available to operators in the sector, the ECB has implemented important interventions in monetary policy, such as the "Targeted Longer-Term Refinancing Operation" (TLTRO) introduced in 2014 and the TLTRO II introduced in 2016. It is not possible to predict the extension of the duration and the amounts with which these liquidity support operations can be repeated in the future, with the result that it is not possible to exclude a reduction or even the cancellation of this support. This would result in the need for banks to seek alternative sources of borrowing, without ruling out the difficulties of obtaining such alternative funding as well as the risk that the related costs could be higher. Such a situation could therefore adversely affect UniCredit's business, operating results and the economic and financial position of UniCredit and/or the Group.

Basel III and Bank Capital Adequacy: The Issuer shall comply with the revised global regulatory standards (**Basel III**) on bank capital adequacy and liquidity, which impose requirements for, inter alia, higher and better-quality capital, better risk coverage, measures to promote the build-up of capital that can be drawn down in periods of stress and the introduction of a leverage ratio as a backstop to the risk-based requirement as well as two global liquidity standards. In terms of banking prudential regulations, the Issuer is also subject to the Bank Recovery and Resolution Directive 2014/59/EU of 15 May 2014 (**BRRD**), implemented in Italy with the Legislative Decree. 180 and 181 of 16 November 2015 as amended by Directive (EU) 2019/879, the "**BRRD II**" (implemented in Italy by the Legislative Decree No. 193 of November 8, 2021), as well as the relevant technical standards and guidelines from EU regulatory bodies (i.e. the European Banking Authority (EBA)), which, inter alia, provide for recovery and resolution mechanisms and Minimum Requirement for Own Funds and Eligible Liabilities (MREL) for credit institutions.

Should UniCredit not be able to meet the capital/MREL requirements imposed by the applicable laws and regulations, it may be required to maintain higher levels of capital/eligible liabilities which could potentially impact its credit ratings, and funding conditions and which could limit UniCredit's growth opportunities.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Garant Performance Securities

Underlying: UC European Sector Rotation Risk Control Index (ISIN: DE000A26RYX6 / Reference Price: Closing price)

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (*Testo Unico della Finanza*). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Nominal Amount

The Securities will be issued on 27 September 2022 in Euro (EUR) (the "**Specified Currency**"), with a Nominal Amount of EUR 1,000.00 per Security (the "**Nominal Amount**").

General

The value of the Securities during their term depends mainly on the price of the Underlying. In principle, the value of the Securities rises if the price of the Underlying rises and falls if the price of the Underlying falls.

Interest

The Securities do not bear interest.

Redemption

Provided that no Conversion Event has occurred, the Securities will be redeemed on the Final Payment Date at the Redemption Amount following an automatic exercise.

At the Final Payment Date the Redemption Amount is equal to the Nominal Amount multiplied by the total of (i) the Floor Level and (ii) the Performance of the Underlying multiplied by the Final Participation Factor. The Redemption Amount will not be lower than the Minimum Amount.

Additional definitions and product terms

Performance of the Underlying means the difference of (i) the quotient of R (final) as the numerator and R (initial) as the denominator and (ii) the Final Strike Level.

R (final) means the Reference Price on the Final Observation Date.

R (initial) means the Reference Price on the Initial Observation Date.

Final Observation Date:	21 September 2026
Final Participation Factor:	100%

Final Payment Date:	28 September 2026
Final Strike Level:	100%
Floor Level:	100%
Initial Observation Date:	23 September 2022
Minimum Amount:	EUR 1,000.00
Optional Redemption Amount:	Nominal Amount

Conversion of the Securities by the Issuer: Upon the occurrence of one or more conversion events (e.g. an Index Replacement Event (e.g. the calculation of the Underlying is discontinued) occurs and no suitable Replacement Underlying is available or can be determined) (the "**Conversion Event**") the Issuer may convert the Securities and redeem them on the Final Payment Date by payment of the Settlement Amount. The "**Settlement Amount**" is the market value of the Securities, with accrued interest for the period until the Final Payment Date at the market rate of interest being traded at such time for liabilities of the Issuer with the same remaining term as the Securities within ten Banking Days following the occurrence of the Conversion Event, as determined by the Calculation Agent. The Settlement Amount is in any case not less than the Minimum Amount.

Early redemption at the option of the Issuer: The Securities may be redeemed at any time in whole but not in part, at the option of the Issuer at their Optional Redemption Amount on or after the date specified in a notice published on the Issuer's website on giving notice to the Paying Agent and the Security Holders, if the Issuer determines that all or part of the outstanding nominal amount of Securities is or will be excluded fully or partially from the eligible liabilities available to meet the MREL Requirements (MREL Disqualification Event).

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities (in particular the relevant Underlying and/or all prices of the Underlying which have been specified by the Calculation Agent) if an adjustment event (e.g. a change to the relevant Index Concept (for example, a change in the composition of the Index not previously anticipated)) (the "**Adjustment Event**") occurs.

Status of the Securities: The obligations of the Issuer under the Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations (other than obligations ranking junior to the senior notes from time to time (including non-preferred senior notes and any further obligations permitted by law to rank junior to the senior notes following the Issue Date), if any) of the Issuer, present and future and, in the case of the senior notes, *pari passu* and rateably without any preference among themselves.

Where will the Securities be traded?

Admission to trading: Application will be made for the Securities to be admitted to trading with effect from 27 September 2022 on the following markets: Regulierter Markt der Börse München (*Regulated Market of the Munich Stock Exchange*)

Listing: Application to listing will be made as of 27 September 2022 on the following markets: Regulierter Markt der Börse München (*Regulated Market of the Munich Stock Exchange*)

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying. However, the market value of the Securities will be affected by a number of additional factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors.

Risks related to the Redemption Amount: The Securities will be redeemed at their maturity at the Redemption Amount. The Redemption Amount may be less than the Issue Price or the purchase price. This means, the Security Holder only achieves a return if the Redemption Amount exceeds the individual purchase price of the Security Holder.

Risks arising from missing ongoing payments: The Securities, do not bear interest or grant any other conditional or unconditional rights for ongoing payments which could compensate possible losses of principal.

Risks related to the regulation of benchmarks: The Securities make reference to a Benchmark (the "**Benchmark**") within the meaning of Regulation (EU) 2016/1011 (the "**Benchmark Regulation**") and therefore there is a risk that the Benchmark may not be used as reference value of the Securities from a certain point in time. In such event, the Securities could be de-listed, adjusted, converted or otherwise impacted. Any changes to a Benchmark as a result of the Benchmark Regulation could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with the Benchmark Regulation. Potential investors should be aware that they face the risk that any changes to the relevant Benchmark may have a material adverse effect on the value of and the amount payable under the Securities.

Risks related to indices: The performance of Securities linked to indices depends on the performance of the respective index. Changes in the price of the components of the index and changes to the composition of the index or other factors may have an adverse effect on the performance of the index.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.

Liquidity risk: There is a risk that the Securities may not be widely distributed and no active trading market may exist and may develop for the Securities. The Issuer may, but is not obliged to, purchase Securities at any time and at any price in the open market, by tender offer or private agreement. Any Securities purchased in this way by the Issuer may be held, resold or cancelled. A repurchase of Securities by the Issuer may adversely affect the liquidity of the Securities. The Issuer cannot therefore assure that a Security Holder will be able to sell his Securities at an adequate price prior to their redemption.

Welches sind die zentralen Risiken, die für die Emittentin spezifisch sind?

Potenzielle Anleger sollten sich darüber im Klaren sein, dass im Falle des Eintritts eines der unten genannten Risiken die Wertpapiere an Wert verlieren können und sie einen Totalverlust ihrer Anlage erleiden können. Bei den folgenden Risiken handelt es sich um Schlüsselrisiken, die spezifisch für die Emittentin gelten:

Risiken im Zusammenhang mit den Auswirkungen derzeitiger makroökonomischer Unwägbarkeiten und den Folgen des Ausbruchs der COVID-19-Pandemie und geopolitischen Spannungen mit Russland: Die Finanzmärkte und das makroökonomische und politische Umfeld der Länder, in denen UniCredit tätig ist, wurden von dem Ausbruch der als "Coronavirus" ("COVID-19") bekannten viralen Lungenentzündung beeinflusst. Dies hatte und könnte weiterhin nachteilige Auswirkungen auf die Entwicklung der Gruppe haben. Die Bewertung bestimmter Vermögenswerte ist trotz der fortschreitenden Öffnungen aufgrund der Lockdown-Maßnahmen und anderer restriktiver Maßnahmen, die von Regierungen zur Eindämmung der COVID-19-Pandemie ergriffen wurden, komplex und unsicher geworden. Darüber hinaus nahm die makroökonomische Unsicherheit infolge der verschärften geopolitischen Spannungen zwischen der Russischen Föderation und der Ukraine zu. Die Russland-Ukraine-Krise hat zu einem starken Anstieg der Rohstoffpreise und zu Inflationsdruck, einer weiteren Unterbrechung der globalen Versorgungskette, einer Verschärfung der finanziellen Bedingungen, erhöhter Unsicherheit und einem starken Rückgang des Verbrauchervertrauens geführt. Da die Inflation infolge des Anstiegs der Energiepreise und der Versorgungsunterbrechungen ansteigt, ändert die EZB ihren geldpolitischen Kurs und der Markt bewertet die Zinserwartungen neu. Die Aussichten sind mit Risiken behaftet, auch im Zusammenhang mit der Unterbrechung der Gaslieferungen aus Russland. In der Folge bleiben die Erwartungen hinsichtlich der Entwicklung der Weltwirtschaft daher weiterhin sowohl kurz- als auch mittelfristig ungewiss. Der makroökonomische Kontext, in dem die Gruppe im Jahr 2021 tätig war, war durch die ermutigenden Anzeichen einer Erholung im Vergleich zum Vorjahr gekennzeichnet, die durch die staatlichen Maßnahmen zur Stützung der Wirtschaft, durch Impfkampagnen und durch die allmähliche Lockerung der Lockdown-Maßnahmen gestützt wurde. Das aktuelle Umfeld ist nach wie vor von großen Unsicherheiten, wie geopolitischen Spannungen mit Russland, geprägt. Dabei besteht die Möglichkeit, dass die Verlangsamung der Wirtschaft zu einer Verschlechterung der Qualität des Kreditportfolios führt, gefolgt von einem Anstieg der notleidenden Kredite und der Notwendigkeit, die in der Gewinn- und Verlustrechnung zu erfassenden Rückstellungen zu erhöhen. Am 9. Dezember 2021 stellte UniCredit der Finanzwelt ihren neuen Strategic Plan vor, der eine Reihe von strategischen und finanziellen Zielen enthält, die das zugrundeliegende Szenario berücksichtigten und das Ergebnis der in den vorausgegangenen Monaten durchgeführten Beurteilung waren. Die dem Strategic Plan zugrundeliegenden Makro-Annahmen (die Makro-Annahmen gehen bei den jüngsten und noch bestehenden Auswirkungen von COVID von einer allmählichen Normalisierung in den kommenden Jahren aus. Das Szenario nimmt nicht an, dass sich die derzeitige COVID-Situation in den kommenden Jahren besonders ungünstig entwickeln wird.) schließen unerwartete, wesentlich nachteilige Entwicklungen wie die Verschlimmerung der COVID-19-Pandemie und des Russland-Ukraine-Konflikts aus, Situationen, die UniCredit genau beobachtet. Die Bewertungsverfahren, zum Beispiel für latente Steueransprüche, deren realisierbarer Wert von Cashflow-Prognosen abhängt, können derzeit nicht vorhersehbare Veränderungen unterliegen, aus denen sich mögliche, auch erhebliche, nachteilige Auswirkungen auf die finanzielle und wirtschaftliche Lage der Bank ergeben könnten.

Risiken im Zusammenhang mit dem Strategic Plan 2022 – 2024: Am 9. Dezember 2021, präsentierte UniCredit der Finanzwelt in Mailand den 2022-2024 Strategic Plan mit der Bezeichnung "UniCredit Unlocked" (der "Strategic Plan" oder "Plan"), der eine Reihe von strategischen, kapitalbezogenen und finanziellen Zielen enthält (die "Strategischen Ziele"). UniCredit Unlocked enthält strategische Vorgaben und finanzielle Ziele, die sich auf sechs Säulen stützen. Die strategischen Vorgaben und finanziellen Ziele sehen vor: (i) das Wachstum in den Regionen und die Entwicklung des Kundenstamms, die das Geschäftsmodell und die Arbeitsweise der Mitarbeiter verändern; (ii) die Erzielung von Skaleneffekten aus ihrem Bankennetzwerk, die Umgestaltung der Technik zur Stärkung von Digitalisierung und Daten und die Verankerung von Nachhaltigkeit in allen Aktivitäten von UniCredit; (iii) Förderung der finanziellen Leistungsfähigkeit über drei miteinander verbundene Hebel. Die Fähigkeit von UniCredit, die strategischen Ziele und alle Prognosen zu erreichen, hängt von einer Reihe von Annahmen, Erwartungen, Projektionen und vorläufigen Daten über künftige Ereignisse ab, die einer Reihe von Unsicherheiten und anderen Faktoren unterliegen, von denen viele außerhalb der Kontrolle von UniCredit liegen. Makro-Annahmen (die Makro-Annahmen gehen bei den jüngsten und noch bestehenden Auswirkungen von COVID von einer allmählichen Normalisierung in den kommenden Jahren aus. Das Szenario nimmt nicht an, dass sich die derzeitige COVID-Situation in den kommenden Jahren besonders ungünstig entwickeln wird.) schließen unerwartete, wesentlich nachteilige Entwicklungen wie die Verschlimmerung der COVID-19-Pandemie aus, eine Situation, die UniCredit genau beobachtet. Die sechs Säulen sind: (i) Optimierung durch Verbesserung der Betriebs- und Kapitaleffizienz; (ii) Investitionen, mit gezielten Wachstumsinitiativen, einschließlich ESG; (iii) Steigerung der Nettoerträge; (iv) Rendite; (v) Stärkung dank überarbeitetem CET1-Quotenziel und Rückgang der Brutto-NPE-Quote; und (vi) konsequente Ausschüttungen bei organischem Kapitalaufbau. Aus all diesen Gründen werden die Anleger davor gewarnt, ihre Investitionsentscheidungen ausschließlich auf der Grundlage der in den strategischen Zielen enthaltenen Prognosedaten zu treffen. Sollte es nicht gelingen, das strategische Ziel umzusetzen oder die strategischen Ziele zu erreichen, könnte dies erhebliche nachteilige Auswirkungen auf die Geschäftstätigkeit, die Finanzlage oder das Ergebnis von UniCredit haben.

Kreditrisiko und Risiko der Verschlechterung der Kreditqualität: Die Tätigkeit, die Finanz- und Kapitalkraft und die Rentabilität der UniCredit Gruppe hängen unter anderem von der Kreditwürdigkeit ihrer Kunden ab. Bei der Ausübung ihrer Kreditgeschäfte ist die Gruppe dem Risiko ausgesetzt, dass eine unerwartete Veränderung der Kreditwürdigkeit einer Gegenpartei zu einer entsprechenden Veränderung des Wertes des damit verbundenen Kreditengagements führt und eine teilweise oder vollständige Abschreibung desselben zur Folge hat. Das gegenwärtige Umfeld ist nach wie vor durch ein hohes Maß an Ungewissheit gekennzeichnet, wobei die Möglichkeit besteht, dass die Verlangsamung der Wirtschaft zusammen mit der Beendigung der Schutzmaßnahmen, wie z. B. dem Moratorium für Kundenkredite, zu einer Verschlechterung der Qualität des Kreditportfolios führt, gefolgt von einem Anstieg der notleidenden Kredite und der Notwendigkeit, die in der Gewinn- und Verlustrechnung zu verbuchenden Rückstellungen zu erhöhen. Die Risikovorsorge im Kreditgeschäft (*Loan Loss Provisions – LLPs*) der UniCredit (ohne Russland) stieg im zweiten Quartal 2022 gegenüber dem Vorquartal (Q/Q) und sank gegenüber dem Vorjahr (Y/Y) um 71,7 Prozent auf 108 Millionen Euro. Daher stiegen die Risikokosten (ohne Russland) im 2. Quartal 22 gegenüber dem Vorquartal um 5 Basispunkte (Q/Q) und sanken gegenüber dem Vorjahr um 26 Basispunkte (Y/Y) auf 10 Basispunkte. Zum 30. Juni 2022 lag die Brutto-NPE-Quote der Gruppe (ohne Russland) bei 2,8 Prozent und sank damit gegenüber dem 31. März 2022, als die Brutto-NPE-Quote bei 3,6 Prozent lag. Zum 30. Juni 2022 sank die Netto-NPE-Quote der Gruppe (ohne Russland) im Vergleich zum 31. März 2022 und lag bei 1,5 %. Im ersten Halbjahr 2022 lagen die LLPs der UniCredit (ohne Russland) bei 161 Millionen Euro und sanken gegenüber dem vorhergehenden Halbjahr um 69,7 Prozent (H/H). Aus diesem Grund lagen die Risikokosten (*Cost of Risk – CoR*) bei 7 Basispunkten. Im Rahmen der Kreditaktivitäten beinhaltet dieses Risiko unter anderem die Möglichkeit, dass die Vertragspartner der Gruppe ihren Zahlungsverpflichtungen nicht nachkommen, sowie die Möglichkeit, dass Unternehmen der Gruppe auf der Grundlage unvollständiger, unwahrer oder falscher Informationen Kredite gewähren, die andernfalls nicht oder zu anderen Bedingungen gewährt worden wären. Neben dem traditionellen Kredit- und Einlagegeschäft können auch andere Bankgeschäfte die Gruppe einem Kreditrisiko aussetzen. Ein "nicht-traditionelles" Kreditrisiko kann beispielsweise entstehen durch: (i) den Abschluss von Derivatekontrakten; (ii) den Kauf und Verkauf von Wertpapieren, Währungen oder Waren; und (iii) das Halten von Wertpapieren Dritter. Die Gegenparteien dieser Transaktionen oder die Emittenten von Wertpapieren, die von Gruppenunternehmen gehalten werden, könnten aufgrund von Zahlungsunfähigkeit, politischen oder wirtschaftlichen Ereignissen, mangelnder Liquidität, operationellen Unzulänglichkeiten oder anderen Gründen ausfallen. Die Gruppe hat Verfahren, Regeln und Grundsätze zur Überwachung und Steuerung des Kreditrisikos sowohl auf der Ebene der einzelnen Gegenpartei als auch auf Portfolioebene eingeführt. Es besteht jedoch das Risiko, dass trotz dieser Kreditrisikoüberwachungs- und -managementaktivitäten das Kreditengagement der Gruppe die gemäß den von ihr angenommenen Verfahren, Regeln und Grundsätzen festgelegten Risikogrenzen überschreitet.

Liquiditätsrisiko: Die wichtigsten Indikatoren, die von der UniCredit Gruppe zur Bewertung ihres Liquiditätsprofils verwendet werden, sind (i) die Liquiditätsdeckungsquote (*Liquidity Coverage Ratio, LCR*), die einen Indikator für die kurzfristige Liquidität darstellt, für die ab 2018 eine aufsichtsrechtliche Mindestanforderung von 100 % gilt, und die im Juni 2022 171 % betrug, während sie am 31. Dezember 2021 bei 182 % lag (berechnet als Durchschnitt der zwölf letzten Monatsendquoten), und (ii) die strukturelle Liquiditätsquote (*Net Stable Funding Ratio, NSFR*), die den Indikator für die strukturelle Liquidität darstellt und im Juni 2022 über dem internen Limit von 102 % lag, wie am 31. Dezember 2021, das im inneren des Rahmens für die Risikotragfähigkeit festgelegt wurde. Das Liquiditätsrisiko bezieht sich auf die Möglichkeit, dass die UniCredit Gruppe nicht in der

Lage sein könnte, ihren gegenwärtigen und zukünftigen, erwarteten und unvorhergesehenen Zahlungs- und Lieferverpflichtungen nachzukommen, ohne ihr Tagesgeschäft oder ihre Finanzlage zu beeinträchtigen. Die Geschäftstätigkeit der UniCredit Gruppe unterliegt insbesondere dem Finanzierungsliquiditätsrisiko, dem Marktliquiditätsrisiko, dem Inkongruenzrisiko und dem Eventualrisiko. Die wesentlichsten Risiken, mit denen die Gruppe konfrontiert sein könnte, sind: i) eine außergewöhnlich hohe Inanspruchnahme der zugesagten und nicht zugesagten Kreditlinien für Firmenkunden; ii) ein ungewöhnlicher Abfluss von Sichteinlagen von UniCredits Privat und Geschäftskunden; iii) ein Marktwertverlust der Wertpapiere, in denen UniCredit ihre Liquiditätspuffer anlegt; iv) die Fähigkeit, die auslaufende Finanzierung am Großkreditmarkt zu verlängern, und die eventuellen Abflüsse von Barmitteln oder Sicherheiten, die die Gruppe im Falle einer Rating-Herabstufung sowohl der Banken als auch der Staatsschulden in den Ländern, in denen sie tätig ist, erleiden könnte. Darüber hinaus können sich einige Risiken aus den Beschränkungen ergeben, die für die grenzüberschreitende Kreditvergabe zwischen Banken gelten. Aufgrund der Finanzmarktkrise und der damit einhergehenden geringeren Liquidität für die Akteure des Sektors hat die EZB wichtige geldpolitische Maßnahmen ergriffen, wie die 2014 eingeführte "Targeted Longer-Term Refinancing Operation" ("TLTRO") und die 2016 eingeführte TLTRO II. Es ist nicht möglich, die Verlängerung der Dauer und die Beträge vorherzusagen, zu denen diese Liquiditätshilfen in der Zukunft wiederholt werden können, so dass eine Verringerung oder gar die Streichung dieser Hilfen nicht ausgeschlossen werden kann. Dies würde dazu führen, dass die Banken nach alternativen Finanzierungsquellen suchen müssten, wobei die Schwierigkeiten bei der Beschaffung solcher alternativen Finanzierungen und das Risiko, dass die damit verbundenen Kosten höher sein könnten, nicht auszuschließen sind. Eine solche Situation könnte sich daher nachteilig auf die Geschäftstätigkeit, die Betriebsergebnisse sowie die wirtschaftliche und finanzielle Lage von UniCredit und/oder der Gruppe auswirken.

Basel III und die Angemessenheit der Eigenkapitalausstattung von Banken: Die Emittentin muss die überarbeiteten globalen Regulierungsstandards ("Basel III") für die angemessene Eigenkapitalausstattung und Liquidität von Banken einhalten, die unter anderem höhere und hochwertigere Eigenkapitalanforderungen, eine bessere Risikodeckung, Maßnahmen zur Förderung des Aufbaus von Kapital, das in Stressphasen abgerufen werden kann, und die Einführung einer Leverage Ratio als Ergänzung zu den risikobasierten Anforderungen sowie zwei globale Liquiditätsstandards vorsehen. In Bezug auf die bankenaufsichtsrechtlichen Vorschriften unterliegt die Emittentin auch der Richtlinie 2014/59/EU vom 15. Mai 2014 über die Sanierung und Abwicklung von Kreditinstituten ("BRRD"), umgesetzt in Italien durch die Gesetzesdekrete 180 und 181 vom 16. November 2015 – wie durch die Richtlinie (EU) 2019/879 geändert, die "BRRD II" (in Italien umgesetzt durch das Gesetzesdekret Nr. 193 vom 8. November 2021 und die einschlägigen technischen Standards und Leitlinien der EU-Aufsichtsbehörden (d.h. der Europäischen Bankenaufsichtsbehörde (EBA)), die u.a. Sanierungs- und Abwicklungsmechanismen sowie Mindestanforderungen an Eigenmittel und berücksichtigungsfähige Verbindlichkeiten (*Minimum Requirements for Own Funds and Eligible Liabilities* – MREL) für Kreditinstitute vorsehen. Sollte UniCredit nicht in der Lage sein, die durch die geltenden Gesetze und Vorschriften auferlegten Kapital-/MREL-Anforderungen zu erfüllen, könnte sie gezwungen sein, ein höheres Niveau an Kapital und berücksichtigungsfähigen Verbindlichkeiten aufrechtzuerhalten, was sich möglicherweise auf ihre Kreditwürdigkeit und ihre Finanzierungsbedingungen auswirken und die Wachstumsmöglichkeiten von UniCredit einschränken könnte.

Der "**Abrechnungsbetrag**" ist der Marktwert der Wertpapiere, zuzüglich aufgelaufener Zinsen für den Zeitraum bis zum Finalen Zahltag zu dem Marktzinssatz, der zu diesem Zeitpunkt für Verbindlichkeiten der Emittentin mit derselben Restlaufzeit wie die Wertpapiere innerhalb von zehn Bankarbeitstagen nach Eintritt des Umwandlungsereignisses gehandelt wird, wie von der Berechnungsstelle ermittelt. Der Abrechnungsbetrag ist in jedem Fall nicht kleiner als der Mindestbetrag.

Anpassung der Wertpapierbedingungen: Die Berechnungsstelle kann eine Anpassung der Wertpapierbedingungen vornehmen (insbesondere den betreffenden Basiswert und/oder alle von der Berechnungsstelle festgestellten Kurse des Basiswerts), wenn ein Anpassungsereignis (z. B. eine Änderung des maßgeblichen Indexkonzepts (zum Beispiel eine nicht vorhergesehene Änderung in der Zusammensetzung des Index)) (das "**Anpassungsereignis**") eintritt.

Welches sind die zentralen Risiken, die für die Wertpapiere spezifisch sind?

Kreditrisiko der Emittentin und Risiken im Zusammenhang mit Abwicklungsmaßnahmen in Bezug auf die Emittentin: Die Wertpapiere stellen unbesicherte Verbindlichkeiten der Emittentin gegenüber den Wertpapierinhabern dar. Jede Person, die die Wertpapiere erwirbt, verlässt sich daher auf die Kreditwürdigkeit der Emittentin und hat in Bezug auf ihre Position unter den Wertpapieren keine Rechte oder Ansprüche gegenüber einer anderen Person. Die Wertpapierinhaber unterliegen dem Risiko einer vollständigen oder teilweisen Nichterfüllung der Verpflichtungen, die die Emittentin aus den Wertpapieren zu erfüllen hat, zum Beispiel im Falle der Insolvenz der Emittentin. Je schlechter die Kreditwürdigkeit der Emittentin ist, desto höher ist das Risiko eines Verlustes. Im Falle der Realisierung des Kreditrisikos der Emittentin kann der Wertpapierinhaber einen Totalverlust seines Kapitals erleiden, selbst wenn die Wertpapiere bei ihrer Fälligkeit einen Mindestbetrag vorsehen. Darüber hinaus können die Wertpapierinhaber von Abwicklungsmaßnahmen in Bezug auf die Emittentin betroffen sein, wenn die Emittentin ausfällt oder auszufallen droht. Die Verbindlichkeiten der Emittentin aus den Wertpapieren sind nicht besichert, durch Dritte garantiert oder durch ein Einlagensicherungs- oder Entschädigungssystem geschützt.

Risiken im Zusammenhang mit marktwertbeeinflussenden Faktoren: Der Marktwert der Wertpapiere sowie die aus den Wertpapieren ausschüttbaren Beträge hängen in erster Linie vom Kurs des Basiswerts ab. Der Marktwert der Wertpapiere wird jedoch von einer Reihe weiterer Faktoren beeinflusst. Dies sind unter anderem die Kreditwürdigkeit der Emittentin, die jeweils geltenden Zinssätze und Renditen, der Markt für ähnliche Wertpapiere, die allgemeinen wirtschaftlichen, politischen und konjunkturellen Bedingungen, die Handelbarkeit und gegebenenfalls die Restlaufzeit der Wertpapiere sowie weitere basiswertbezogene marktwertbeeinflussende Faktoren.

Risiken im Zusammenhang mit dem Rückzahlungsbetrag: Die Wertpapiere werden bei ihrer Fälligkeit zum Rückzahlungsbetrag zurückgezahlt. Der Rückzahlungsbetrag kann niedriger sein als der Emissionspreis oder der Kaufpreis. Das bedeutet, dass der Wertpapierinhaber nur dann eine Rendite erzielt, wenn der Rückzahlungsbetrag den individuellen Kaufpreis des Wertpapierinhabers übersteigt.

Risiken, die sich aus ausbleibenden laufenden Zahlungen ergeben: Die Wertpapiere werden nicht verzinst oder gewähren irgendwelche anderen bedingten oder unbedingten Rechte auf laufende Zahlungen, die mögliche Kapitalverluste ausgleichen könnten.

Risiken im Zusammenhang mit der Regulierung von Benchmarks: Die Wertpapiere beziehen sich auf eine Benchmark (die "**Benchmark**") im Sinne der Verordnung (EU) 2016/1011 (die "**Benchmark-Verordnung**") und es besteht daher das Risiko, dass die Benchmark ab einem bestimmten Zeitpunkt nicht mehr als Referenzwert für die Wertpapiere verwendet werden kann. In einem solchen Fall könnten die Wertpapiere von der Börse genommen, angepasst, umgewandelt oder anderweitig negativ beeinflusst werden. Jede Änderung einer Benchmark infolge der Benchmark-Verordnung könnte erhebliche negative Auswirkungen auf die Kosten der Refinanzierung einer Benchmark oder die Kosten und Risiken der Verwaltung oder sonstigen Beteiligung an der Festlegung einer Benchmark und der Einhaltung der Benchmark-Verordnung haben. Potenzielle Anleger sollten sich darüber im Klaren sein, dass sie dem Risiko ausgesetzt sind, dass sich Änderungen der jeweiligen Benchmark wesentlich nachteilig auf den Wert und den aus den Wertpapieren zahlbaren Betrag auswirken können.

Risiken in Verbindung mit Indizes: Die Wertentwicklung von Wertpapieren, die an Indizes gebunden sind, hängt von der Entwicklung des jeweiligen Index ab. Kursänderungen der Indexbestandteile und Änderungen in der Zusammensetzung des Index oder andere Faktoren können sich negativ auf die Wertentwicklung des Index auswirken.

Risiken im Zusammenhang mit möglichen Interessenkonflikten: Es kann zu Interessenkonflikten in Bezug auf den jeweiligen Emittenten oder die mit dem Angebot betrauten Personen kommen, die zu einer Entscheidung zu Ungunsten des Wertpapierinhabers führen können.

Liquiditätsrisiko: Es besteht das Risiko, dass die Wertpapiere nicht weit verbreitet sind und kein aktiver Handelsmarkt für die Wertpapiere besteht und sich entwickelt. Die Emittentin ist berechtigt, aber nicht verpflichtet, Wertpapiere jederzeit und zu jedem Preis auf dem freien Markt, durch ein

Übernahmeangebot oder eine private Vereinbarung zu erwerben. Die Emittentin kann die auf diese Weise erworbenen Wertpapiere halten, weiterverkaufen oder entwerten. Ein Rückkauf von Wertpapieren durch die Emittentin kann sich nachteilig auf die Liquidität der Wertpapiere auswirken. Die Emittentin kann daher nicht gewährleisten, dass ein Wertpapierinhaber in der Lage sein wird, seine Wertpapiere vor deren Rückzahlung zu einem angemessenen Preis zu verkaufen.
