## Note 2 - Significant accounting policies

### 2.a - Presentation of the financial statements

The Fund's financial statements are prepared in accordance with generally accepted accounting principles in Luxembourg.

### 2.b - Valuation of investments

The value of the assets of any Sub-Fund is determined according to the following principles:

- Assets that are officially listed on a stock exchange are valued at the latest available price. If an asset is listed on several stock exchanges, the most recently available price on the stock exchange that is the main market for such asset is applied.
- Assets which are not listed on a stock exchange but which are traded on another regulated market which operates regularly and is recognised and open to the public are valued at a price which may not be lower than the bid price and not higher than the offering price at the time of valuation, and which the Management Company of the Fund considers to the best possible price at which the assets can be sold.
- If an asset is not listed or traded on a stock exchange or on another regulated market or if, with regard to assets which are listed or traded on a stock exchange or other market as mentioned above, the prices in accordance with the provisions contained in (a) or (b) above do not reasonably reflect the actual market value of the assets in question, such assets shall be valued at the actual market value of the assets in question, such assets shall be valued at the realisable value as determined in good faith by the Management Company of the Fund in application of generally recognised valuation regulations that are verifiable by auditors.
- The pro rata interest on assets will be included in so far as it is not expressed in the price.
- The settlement value of forwards or options which are not traded on stock exchanges or other organised markets will be determined in accordance with the directives of the Management Company on a basis which shall be applied consistently with regard to all different types of contracts. The liquidation value of futures, forwards or options traded on stock exchanges or other organised markets is calculated on the basis of the latest available settlement prices for such contracts on the stock exchanges or organised markets on which such futures, forwards or options are traded by the Sub-Fund. If a future, forward or option cannot be settled on a day for which the Net Asset Value is determined, the valuation basis for such a contract is determined by the management in appropriate and reasonable manner.
- Swaps are valued at present value.

## **Note 2 - Significant accounting policies**

### **2.b - Valuation of investments**

- Cash is valued at nominal value plus pro rata accrued interest. Fixed-term deposits may be valued at the respective yield price, provided that a corresponding contract between the financial institution holding the deposits in safekeeping and the Management Company stipulates that such deposits may be called at any time and that, in the event of calling, the liquidation value shall correspond to such yield price.
- Shares or units of UCITS or other UCIs are valued at the latest Net Asset Value determined and obtainable. If redemption has been suspended for investment units or if no redemption prices are set, these units and any other assets are valued at the realisable value which the Management Company determines in good faith on the basis of the probable realisable value.
- All assets not denominated in the currency of the relevant Sub-Fund are converted at the most recently available exchange rate into the relevant currency of the Sub-Fund. Gains or losses on foreign exchange transactions are shown net.
- All other securities or other assets are valued at their appropriate realisable value as determined in good faith by the Management Company and according to a procedure specified by the Management Company.

If share classes are created, the resulting calculation of the Net Asset Value will be made separately according to the criteria set out above. However, the composition and allocation of assets is always undertaken separately for the Sub-Fund as a whole.

In the event that the valuation of an asset in accordance with the above principles is rendered impossible, incorrect or not representative, the Board of Directors is entitled to use other generally recognised and auditable valuation principles in order to reach a fair valuation of that asset.

### **2.c - Investment portfolio income**

Dividends are taken into income on the date upon which the relevant securities are first listed as ex-dividend. Interest income on bonds is accrued on a daily basis.

### **2.d - Net realised profits or losses on sales of investments**

## Note 9 - Dividend distributions

Each Sub-Fund may offer distributing shares and non-distributing shares. Distributing Shares and non distributing Shares issued within the same Sub-Fund will be represented by different Classes. Such Classes may confer the right to dividend distributions or not. When "D" is included in a Share Class name, it is an indication that such Class of Shares is an annually distributing income and capital Class of Shares.

When "FQD" is included in the denomination of Share Class, the Fund pre-announces a target dividend paid on a quarterly basis. A target dividend is an amount that the Sub-Fund aims to pay but does not guarantee. Target dividends may be stated as a specific currency amount or as a percentage of NAV. Note that in order to meet a targeted dividend amount, a Sub-Fund may end up paying out more money than it actually earned in dividends, meaning that in effect Shareholders are getting some of their capital back as a dividend.

The table here below shows the overview of paid distributions during the last six months until 30 December 2024.

**Information concerning the transparency of securities financing transactions and of reuse of cash collateral (regulation EU 2015/2365, hereafter "SFTR")**

Obligations with regards to securities financing transactions - Regulation on the transparency of securities financing transactions (SFTR)

On 23 December 2015, the Regulation (EU) 2015/2365 about the transparency of securities financing transactions and the further use as well as the amendment of Regulation (EU) No 648/2012 (SFTR) was published in the Official Journal of the European Union.

The SFTR essentially regulates obligations with regards to "securities financing transactions" (SFT). The SFTR provides additional reporting obligations for the conclusion, amendment or termination of SFT in addition to the reporting obligations already in place based on EMIR (which, however, are not applicable to SFT in principle).

As at 31 December 2024, the Sub-Funds onemarkets PIMCO Global Short Term Bond Fund used financial instruments included in the scope of application of the SFTR 2015/2365 regulation.
