SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in sections A – E (A.1 – E.7).

This Summary contains all the Elements required to be included in a summary for this type of securities and issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the Summary because of the type of securities and issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the Summary with the specification of 'Not applicable'.

A. INTRODUCTION AND WARNINGS

| A.1 | Warning | This Summary should be read as an introduction to the Base Prospectus. The investor should base any decision to invest in the relevant Securities on consideration of the Base Prospectus as a whole. Additional Conditional Amount (k)

The payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

“Additional Conditional Amount Payment Event (k)” means that the Reference Price on the respective Observation Date (k) is equal to or lower than the relevant Additional Conditional Amount Payment Level (k).

[“Additional Conditional Amount Payment Level (k)” means the respective Additional Conditional Amount Payment Factor (k) multiplied by R (initial).]

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

Redemption on the Final Payment Date

If no Barrier Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Maximum Amount.

If a Barrier Event has occurred [and R (final) is equal to or greater than the

The payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

"Additional Conditional Amount Payment Event (k)" means that the Reference Price on the respective Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

["Additional Conditional Amount Payment Level (k)" means the respective Additional Conditional Amount Payment Factor (k) multiplied by R (initial).]

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

  (i) If the Reference Price on the relevant Observation Date (k) is greater than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Up and (ii) the difference of (1) the Reference Price on the relevant Observation Date (k) divided by R (initial) and (2) one.

  (ii) If the Reference Price on the relevant Observation Date (k) is less than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Down and (ii) the difference of (1) one and (2) the Reference Price on the relevant Observation Date (k) divided by R (initial).

- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

[The Additional Conditional Amount is not less than the Minimum
Additional Conditional Amount. [The Additional Conditional Amount is not greater than the Maximum Additional Conditional Amount.]
[The Additional Conditional Amount is not less than the Minimum Additional Conditional Amount and is not greater than the Maximum Additional Conditional Amount.]

Redemption on the Final Payment Date
If (1) a Lock-in Event has occurred on any Observation Date (k) or (2) if no Lock-in Event and no Barrier Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount.

If no Lock-in Event and a Barrier Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount multiplied by \( R \) (final) divided by \( R \) (initial).

"Barrier Event" means that any published price of the Underlying is equal to or lower than the Barrier in the case of continuous observation during the Barrier Observation Period. [the Reference Price on any Barrier Observation Date is equal to or lower than the Barrier.]

"Barrier Observation Period" is specified in the Annex to this Summary.

"Barrier" is an amount expressed in the currency of the Underlying, which is specified as the Barrier Level times \( R \) (initial).

"Additional Conditional Amount Payment Event (k)" means that the Reference Price on the respective Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

The value of the Securities during the term of the Securities depends decisively on the value of the Underlying (as defined in C.20), subject to the effect of other price-influencing factors (such as expected volatility, interest rate, dividend yield). If the value of the Underlying rises, the value of the Securities regularly rises. If the value of the Underlying falls, the value of the Securities regularly falls.

[The Security Holder is not exposed to the influence of exchange rate movements (Quanto).]

Additional Conditional Amount (k)
The payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k) [and on the occurrence of a Lock-in Event (as defined below)].

"Additional Conditional Amount Payment Event (k)" means that the Reference Price on the respective Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

"Additional Conditional Amount Payment Level (k)" means the respective Additional Conditional Amount Payment Factor (k) multiplied by \( R \) (initial).]
If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

[If a Lock-in Event has occurred on any Observation Date (k) the Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k) and on any subsequent Additional Conditional Amount Payment Date (k), regardless if an Additional Conditional Amount Payment Event has occurred or not.]

Redemption on the Final Payment Date

If (1) a Lock-in Event has occurred on any Observation Date (k) or (2) if no Lock-in Event and no Barrier Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount.

If no Lock-in Event and a Barrier Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount multiplied by and R (final) divided by R (initial).

"Barrier Event" means that any published [price] [rate] of the Underlying is [equal to or] lower than the Barrier in the case of continuous observation during the Barrier Observation Period. [the Reference Price on any Barrier Observation Date is [equal to or] lower than the Barrier.] [any Reference Price during the Barrier Observation Period is [equal to or] lower than the Barrier.] [R (final) is [equal to or] lower than the Barrier.]

"Lock-In Event" means that the Reference Price on the respective Observation Date (k) is [equal to or] higher than the Lock-in Level (as specified in the table in the Annex to this Summary).

[The "Barrier" is an amount expressed in the currency of the Underlying, which is specified as the Barrier Level times [R (initial)] [the Strike].]

The [Barrier] [Barrier Level] [and] [the Barrier Observation Date] [and] [the Barrier Observation Period] [is] [are] specified in the Annex to this Summary.

[Product Type 11: In the case of Twin-Win Geared Put Cash Collect Securities, the following applies:

The value of the Securities during the term of the Securities depends decisively on the value of the Underlying (as defined in C.20), subject to the effect of other price-influencing factors (such as expected volatility, interest rate, dividend yield). As far as the price of the Underlying is equal to or greater than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield), the value of the Securities generally rises, if the price of the Underlying rises or falls. If the price of the Underlying is lower than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield),

28
the value of the Securities generally rises, if the price of the Underlying rises, and falls, if the price of the Underlying falls.

[The Security Holder is not exposed to the influence of exchange rate movements (Quanto).]

Additional Conditional Amount (k)

The payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

"Additional Conditional Amount Payment Event (k)" means that the Reference Price on the respective Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

["Additional Conditional Amount Payment Level (k)" means the respective Additional Conditional Amount Payment Factor (k) multiplied by R (initial).]

• If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).
  (i) If the Reference Price on the relevant Observation Date (k) is greater than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Up and (ii) the difference of (1) the Reference Price on the relevant Observation Date (k) divided by R (initial) and (2) one.
  (ii) If the Reference Price on the relevant Observation Date (k) is less than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Down and (ii) the difference of (1) one and (2) the Reference Price on the relevant Observation Date (k) divided by R (initial).

[The Additional Conditional Amount is not less than the Minimum Additional Conditional Amount.]

[The Additional Conditional Amount is not greater than the Maximum Additional Conditional Amount.]

• If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

Redemption on the Final Payment Date

If R (final) is equal to or greater than the Strike, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount.

If R (final) is lower than the Strike, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount multiplied with the sum of 1 and the Participation Factor multiplied by the quotient of (1) the difference of R (final) and Strike and (2) R (initial).

[The "Strike" is an amount expressed in the currency of the Underlying]
which is specified as the Strike Level times R (initial).

[The "Participation Factor" is 1/Strike Level.]

The Strike [Strike Level] [and] [the Participation Factor] [is] [are] specified in the Annex to this Summary.

[Product Type 12: In the case of Geared Put Cash Collect Securities, the following applies:

The value of the Securities during the term of the Securities depends decisively on the value of the Underlying (as defined in C.20), subject to the effect of other price-influencing factors (such as expected volatility, interest rate, dividend yield). If the value of the Underlying rises, the value of the Securities regularly rises. If the value of the Underlying falls, the value of the Securities regularly falls.

[The Security Holder is not exposed to the influence of exchange rate movements (Quanto).]

Addition Conditional Amount (k)

The payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

"Additional Conditional Amount Payment Event (k)" means that the Reference Price on the respective Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

["Additional Conditional Amount Payment Level (k)" means the respective Additional Conditional Amount Payment Factor (k) multiplied by R (initial).]

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).
- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

Redemption on the Final Payment Date

If R (final) is equal to or greater than the Strike, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount.

If R (final) is lower than the Strike, redemption is made by payment of the Redemption Amount which corresponds to the sum of the Nominal Amount and the Participation Factor multiplied by the quotient of (1) the difference of R (final) and Strike and (2) R (initial).

The "Strike" is an amount expressed in the currency of the Underlying which is specified as the Strike Level times R (initial).

The "Participation Factor" is 1/Strike Level. The Strike [Strike Level] [is] [are] specified in the Annex to this Summary.

[Product Type 13: In the case of Geoscope Lock-in Cash Collect Securities, the following applies:}

The value of the Securities during the term of the Securities depends decisively on the value of the Underlying (as defined in C.20), subject to the effect of other price-influencing factors (such as expected volatility, interest rate, dividend yield). If the value of the Underlying rises, the value of the Securities regularly rises. If the value of the Underlying falls, the value of the Securities regularly falls.

[The Security Holder is not exposed to the influence of exchange rate movements (Quanto).]

Additional Conditional Amount (k)

The respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k). If a Lock-In Event has occurred on an Observation Date (k), the Maximum Additional Amount shall be paid on the corresponding Additional Conditional Amount Payment Date (k). Moreover, on all Additional Conditional Amount Payment Dates (k) following this Additional Conditional Amount Payment Date (k) the Maximum Additional Amount shall be paid regardless of the performance of the Underlying (k).

"Lock-in Event" means that the Geometric Average Performance of the Underlying (k) on an Observation Date (k) is [equal to or] higher than the Lock-in Factor (as specified in the table in the Annex to this Summary).

"Geometric Average Performance of the Underlying (k)" means the nth (when "n" depends on the respective D (k)) root of the Performance of the Underlying (k), where the Performance of the Underlying (k) is the quotient between the Reference Price on the respective Observation Date (k), as the numerator, and R (initial) as denominator. D (k) is specified in the Annex to this Summary.

Redemption on the Final Payment Date

If (1) a Lock-in Event has occurred on any Observation Date (k), redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount.

If no Lock-in Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount multiplied by and R (final) divided by R (initial). The Redemption Amount in this case is not less than the Minimum Redemption Amount (as specified in the table in the Annex to this Summary).]

[Product Type 14: In the case of Barrier Geoscope Lock-in Cash CollectSecurities, the following applies:

The value of the Securities during the term of the Securities depends decisively on the value of the Underlying (as defined in C.20), subject to the effect of other price-influencing factors (such as expected volatility, interest rate, dividend yield). If the value of the Underlying rises, the value of the Securities regularly rises. If the value of the Underlying falls, the value of the Securities regularly falls.

[The Security Holder is not exposed to the influence of exchange rate movements (Quanto).]

Additional Conditional Amount (k)
The respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k). If a Lock-In Event has occurred on an Observation Date (k), the Maximum Additional Amount shall be paid on the corresponding Additional Conditional Amount Payment Date (k). Moreover, on all Additional Conditional Amount Payment Dates (k) following this Additional Conditional Amount Payment Date (k) the Maximum Additional Amount shall be paid regardless of the performance of the Underlying (k).

"Lock-in Event" means that the Geometric Average Performance of the Underlying (k) on an Observation Date (k) is [equal to or] higher than the Lock-in Factor (as specified in the table in the Annex to this Summary).

"Geometric Average Performance of the Underlying (k)" means the nth (when "n" depends on the respective D (k)) root of the Performance of the Underlying (k), where the Performance of the Underlying (k) is the quotient between the Reference Price on the respective Observation Date (k), as the numerator, and R (initial) as denominator. D (k) is specified in the Annex to this Summary.

Redemption on the Final Payment Date
If (1) a Lock-in Event has occurred on any Observation Date (k) or (2) if no Lock-in Event and no Barrier Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount.

If no Lock-in Event and a Barrier Event has occurred, redemption is made by payment of the Redemption Amount which corresponds to the Nominal Amount multiplied by and R (final) divided by R (initial). The Redemption Amount in this case is not less than the Minimum Redemption Amount (as specified in the table in the Annex to this Summary).

"Barrier Event" means that [any published [price] [rate] of the Underlying is [equal to or] lower than the Barrier in the case of continuous observation during the Barrier Observation Period.] [the Reference Price on any Barrier Observation Date is [equal to or] lower than the Barrier.] [any Reference Price during the Barrier Observation Period is [equal to or] lower than the Barrier.] [R (final) is [equal to or] lower than the Barrier.]

[The "Barrier" is an amount expressed in the currency of the Underlying, which is specified as the Barrier Level times [R (initial)] [the Strike].]
The [Barrier] [Barrier Level] [and] [the Barrier Observation Date] [and] [the Barrier Observation Period] [and] [the Averaging Observation Dates relating to a Barrier Observation Date (b)] [is] [are] specified in the Annex to this Summary.

[Product Type 15: In the case of Sprint [Cap] Securities, the following applies:
The value of the Securities during the term of the Securities depends decisively on the value of the Underlying (as defined in C.20), subject to the effect of other price-influencing factors (such as expected volatility, interest rate, dividend yield). If the value of the Underlying rises, the value of the Securities regularly rises. If the value of the Underlying falls, the value of the Securities regularly falls.
The redemption on the Final Payment Date depends on R (final) (as defined in C.19). If R (final) is greater than the Strike, the Security Holder participates, in proportion to the Participation Factor, in the Performance of the Underlying with regard to the Strike. [In the case of Sprint Cap Securities, the following applies: The payment is not greater than the Maximum Amount.]
[Strike corresponds to R (initial) x Strike Level.
[The Strike [Level] is specified in the Annex to this Summary.]]
[The Security Holder is not exposed to the influence of exchange rate movements (Quanto).]
["Quanto Element" means the conversion of the Redemption Amount from the Underlying Currency into the Specified Currency with a conversion factor of 1:1.]
[No currency hedging element is provided for the Securities (Compo).]

**Redemption on the Final Payment Date**
The Securities are redeemed on the Final Payment Date by payment of the Redemption Amount, determined as follows:

- If R (final) is greater than the Strike, the Redemption Amount is determined using the following formula:
  \[
  \text{Redemption Amount} = \text{Nominal Amount} \times (\text{Strike Level} + \text{Participation Factor} \times (\text{Performance of the Underlying} - \text{Strike Level})).
  \]

  [In the case of Sprint Cap Securities, the following applies: However, the Redemption Amount is not greater than the Maximum Amount.]

- If R (final) is equal to or less than the Strike, then the Redemption Amount is equal to the Nominal Amount multiplied by the Performance of the Underlying.

Performance of the Underlying means the quotient of R (final), as the numerator, and R (initial), as the denominator.

[In the case of Sprint Cap Securities, the following applies: The "Maximum Amount" corresponds to Nominal Amount x Cap Level]

[The Redemption Amount [and the Maximum Amount] will be [multiplied] [divided] by a FX conversion factor.]

The Participation Factor [and][.] [the Strike [Level]] [and][.] [the Maximum Amount] [and][.] [the Cap Level] [is][are] specified in the Annex to this Summary.]

In the case of Securities with initial average observation, the following applies:

"R (initial)" means the equally weighted average (arithmetic mean) of the Reference Prices (as specified in the table in the Annex to this Summary) specified on the Initial Observation Dates (as specified in the table in the Annex to this Summary).

In the case of Securities with [best] [worst]-in observation, the following applies:

"R (initial)" means the [highest] [lowest] Reference Price (as specified in the table in the Annex to this Summary) on [each of the Initial Observation Dates (as specified in the table in the Annex to this Summary)] [each [Insert relevant date(s)]] between the Initial Observation Date (as specified in the table in the Annex to this Summary) (including) and the Last Day of the [Best] [Worst]-in Period (as specified in the table in the Annex to this Summary) (including).

In the case of Securities with final Reference Price observation, the following applies:

"R (final)" means the Reference Price (as defined in the table in the Annex to this Summary) on the Final Observation Date.

In the case of Securities with final average observation, the following applies:

"R (final)" means the equally weighted average (arithmetic mean) of the Reference Prices (as defined in the table in the Annex to this Summary) specified on the Final Observation Dates.

In the case of Securities with [best] [worst]-out observation, the following applies:

"R (final)" means the [greatest] [lowest] Reference Price (as defined in the table in the Annex to this Summary) on [each of the Final Observation Dates] [each [Insert Relevant Date(s)]] between the First Day of the [Best] [Worst]-out Period (including) and the Final Observation Date (including).

In the case of Closed End [Leverage] Securities and Open End [Leverage] Securities, the following applies:

"Relevant Reference Price" means the Reference Price (as defined in the table in the Annex to this Summary) on the respective Observation Date immediately preceding the respective Redemption Date or the respective Call Date [or Final Payment Date], as the case may be.

["Reference Price" means the Reference Price as specified in the Annex to this Summary.]

### D. RISKS

<table>
<thead>
<tr>
<th>D.2</th>
<th>Key information on the key risks that are specific to the Issuer</th>
</tr>
</thead>
</table>

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the securities may decline in value and that they may sustain a **total loss** of their investment.

- **Macroeconomic risk**
  Risks from a deterioration in the macroeconomic development and/or the financial markets and from geopolitical uncertainties.

- **Systemic risk**
  Risks from disruptions or the functional collapse of the financial system or parts of it.

- **Credit risk**
  (i) Risks from changes in the credit rating of a contracting party (borrower, counterparty, issuer or country); (ii) Risks from a deterioration of the overall economic situation and negative effects on the demand for credit and the solvency of the borrowers of HVB Group; (iii) Risks from a decrease in value of credit collateral; (iv) Risks from derivative/trading business; (v) Risks from intra-group credit exposures; (vi) Risks from exposures to sovereigns / public sector.

- **Market risk**
  (i) Risk of potential losses that can arise in response to adverse changes in market prices, other price-influencing parameters or trading-related events; (ii) Risk for trading and banking books from a deterioration in market conditions; (iii) Interest rate and foreign currency risk.

- **Liquidity risk**
  (i) Risk that the HVB Group will not be able to meet its payment obligations on time or in full; (ii) Risks from the procurement of liquidity; (iii) Risks from intra-group liquidity transfers; (iv) Market liquidity risk.

- **Operational risk**
  (i) Risk of losses resulting from inadequate or failed internal processes, systems, human errors or external events; (ii) IT risks; (iii) Legal and tax risks; (iv) Compliance risk (v) Business continuity management risk.

- **Business risk**
  Risks of losses arising from unexpected negative changes in the business volume and/or margins.

- **Real estate risk**
  Risk of losses resulting from changes in the market value of the real estate portfolio of HVB Group.

- **Financial investment risk**
  Risk of losses resulting from fluctuations in the measurement of HVB Group's equity interest.

- **Reputational risk**
  Risk of negative effects on the income statement caused by adverse reactions by stakeholders due to a changed perception of HVB Group.

- **Strategic risk**
  (i) Risk that results from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment; (ii) Risks arising from the strategic orientation of HVB Group’s business model; (iii) Industry specific risk; (iv) Risks arising from a change in HVB’s rating.
### Regulatory risks
- (i) Risks arising from changes to the regulatory and statutory environment of HVB Group;
- (ii) Risks in connection with the International Financial Reporting Standards 9 (IFRS 9);
- (iii) Risks in connection with potential resolution measures or a reorganisation proceeding.

### Pension risk
Risk that the pension provider will have to provide additional capital to service the vested pension commitments.

### Risks arising from outsourcing activities
Cross-risk-type, which affects the following risk types in particular: operational risk, reputational risk, strategic risk, business risk, credit risk, market risk and liquidity risk.

### Risks from concentrations of risk and earnings
Risks from concentrations of risk and earnings indicate increased potential losses and represent a business-related strategy risk for HVB Group.

### Risks from the stress testing measures imposed by ECB
The business performance of HVB and HVB Group could be negatively affected in case of a poor stress test performance by HVB, HVB Group, UniCredit S.p.A. or one of the financial institutions with which they do business.

### Risks from inadequate risk measurement models
It is possible that the internal models of HVB and HVB Group could be rated as inadequate following investigations or verification through the regulatory authorities, or that they could underestimate existing risks.

### Unidentified/unexpected risks
HVB and HVB Group could incur greater losses than those calculated with the current methods or losses previously left out of its calculations entirely.

#### D.6 Key information on the key risks that are specific to the securities

In the opinion of the Issuer, the key risks described below may, with regard to the Security Holder, adversely affect the value of the Securities and/or the amounts to be distributed (including the delivery of any quantity of Underlyings or its components to be delivered) under the Securities and/or the ability of Security Holders to sell the Securities at a reasonable price prior to the final payment date of the Securities.

- **Potential conflicts of interest**
The risk of conflicts of interest (as described in E.4) is related to the possibility that the Issuer, distributors or any of their affiliates, in relation to certain functions or transactions, may pursue interests which may be adverse to or do not regard the interests of the Security Holders.

- **Key risks related to the Securities**

  **Key risks related to the market**

Under certain circumstances a Security Holder may not be able to sell his Securities at all or at an adequate price prior to their redemption. Even in the case of an existing secondary market it cannot be ruled out that the Security Holder may not be in a position to dispose of the Securities in the case of an unfavourable development of the Underlying [or its components] or of a currency exchange rate, e.g. if such development occurs outside of the trading hours of the Securities.

The market value of the Securities will be affected by the creditworthiness of the Issuer and a number of other factors (e.g., exchange rates, prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability of the Securities...
and Underlying-related factors) and may be substantially lower than the Nominal Amount or the purchase price.

Security Holders may not rely on being able to sufficiently hedge against price risks arising from the Securities at any time.

**Key risks related to the Securities in general**

The Issuer may possibly fail to perform its obligations under the Securities in whole or in part, e.g., in case of an insolvency of the Issuer or due to governmental or regulatory interventions. Such risk is not protected by a deposit protection scheme or any similar compensation scheme. The competent resolution authority may apply resolution tools which include, among others, a "bail-in" instrument (e.g., conversion of Securities into equity instruments or write down). Application of a resolution tool may materially affect the rights of the Security Holders.

An investment into the Securities may be illegal or unfavourable for a potential investor or not suitable, with regard to his knowledge or experience and his financial needs, goals and situation. The real rate of return of an investment into the Securities may be reduced or may be zero or even negative (e.g., due to incidental costs in connection with the purchase, holding and disposal of the Securities, future money depreciation (inflation) or tax effects). The redemption amount may be less than the Issue Price or the respective purchase price and, under certain circumstances, no interest or ongoing payments will be made.

The proceeds from the Securities may possibly not be sufficient to make interest or principal payments arising from a financing purchase of the Securities and require additional capital.

**Risks related to Underlying-linked Securities**

*Risks arising from the influence of the Underlying [or its components] on the market value of the Securities*

The market value of the Securities and the amounts payable under the Securities significantly depend on the price of the Underlying [or its components]. It is not possible to predict the price development of the Underlying [or its components] in the future. Additionally, the market value of the Securities will be affected by a number of Underlying-related factors.

*Risks arising from the fact that the observation of the Underlying [or its components] occurs only at specified dates or times or periods*

Due to the fact that the observation of the Underlying [or its components] may occur only at specified dates, times or periods, amounts payable under the Securities may be considerably lower than the price of the Underlying [or its components] may have suggested.

*In case of Open End Securities and Open End Leverage Securities, the following applies:*

*Risks due to open-end structure*

Securities will be issued without a fixed term. Security Holders have no right for repayment until the Issuer’s Regular Call Right or the Redemption Right of Security Holder has been exercised.

*In case of Cash Collect Securities, Short Cash Collect Securities, Twin-Win Cash Collect Securities, Twin-Win Lock-in Cash Collect Securities, Lock-in Cash Collect Securities, Twin-Win Geared Put Cash Collect Securities, Geared Put Cash Collect Securities, Geoscope Lock-In Cash Collect Securities and Barrier Geoscope Lock-in Cash Collect Securities, the following applies:*

*Risks related to a conditional minimum payment*
The Securities provide for a conditional minimum payment in connection with the redemption. The Security Holder may lose all or a substantial portion of the amount invested if the price of the Underlying [or its components] develops unfavourably for the Security Holder or if the Securities are terminated, called or sold before the Final Payment Date of the Securities.

Risks related to conditional payments: Impact of threshold or limits
The payment and/or the extent of such amounts depend on the performance of the Underlying [or its components].

Certain amounts only may be payable if certain thresholds or limits have been reached or if certain events have occurred.

[A [best-in] [and] [worst-in][best-out][worst-out] observation applies. The [highest][lowest] reference price during an observation period will be applicable regarding the determination of [limits and thresholds] [and the [highest][lowest] reference price during an observation period will be applicable regarding] [the final observation of the Underlying] which might have a negative effect on the payments to be made under the Securities.]

[In case of Short Cash Collect Securities, Cash Collect Securities, Twin-Win Cash Collect Securities, Twin-Win Lock-in Cash Collect Securities, Lock-in Cash Collect Securities and Barrier Geoscope Lock-in Cash Collect Securities, the following applies:]

Risks related to Barrier Events
If a Barrier Event occurs, in particular, a conditional minimum payment [In case of Cash Collect Securities, the following applies: and/or conditional ongoing payment] may forfeit [In case of Securities with physical delivery, the following applies: Physical Settlement may occur] and the Security Holder may lose his invested capital in total or in part.

[In case of Short Cash Collect Securities, Cash Collect Securities, Sprint [Cap] Securities, Twin-Win Geared Put Cash Collect Securities and Geared Put Cash Collect Securities, the following applies:]

Risks related to a Strike
The Security Holders may participate either to a lesser extent in a favourable performance or to a greater extent in an unfavourable performance of the Underlying [or its components].]

[In case of Open End Securities, Sprint [Cap] Securities, Cash Collect Securities with Participation Factor, Twin-Win Geared Put Cash Collect Securities and Geared Put Cash Collect Securities, the following applies:]

Risks in relation to a participation factor
The Security Holder may participate to a lesser extent in a favourable performance of the Underlying [or its components] or to a greater extent in an unfavourable performance of the Underlying [or its components].]

[In case of Open End Securities, Open End Leverage Securities, Closed End Securities and Closed End Leverage Securities the following applies:]

Risks relating to the deduction of fees
The respective fee may have a material influence on the Redemption Amount and may reduce it to zero even in the case of a favourable performance of the Underlying [or its components].

[Security Holders must be aware that there might be a subsequent rise of the respective fees up to the specified maximum amount.]

[When calculating the Redemption Amount, the deduction of fees can lead to a disproportional participation in the unfavourable performance of the Underlying [or its components].]]
In case of Discount [Classic] Securities, Short Cash Collect Securities, Cash Collect Securities, Sprint Cap Securities, the following applies:

Risks related to a Maximum Amount
The potential return from the Securities may be limited.

In case of Discount [Classic] Securities, Closed End Securities, Closed End Leverage Securities, Open End Securities and Open End Leverage Securities, and Cash Collect Securities with physical delivery, the following applies:

Risks related to a Ratio
A ratio may result in the Security being in economic terms similar to a direct investment in the relevant Underlying [or its components], but being nonetheless not fully comparable with such a direct investment.

In case of Closed End Securities, Closed End Leverage Securities, Open End Securities and Open End Leverage Securities, the following applies:

A ratio can lead to the Security Holder to participate either to a lesser extent in a favourable performance or to a greater extent in an unfavourable performance of the Underlying [or its components].

Reinvestment Risk
Security Holders may only reinvest the principal received due to an early repayment of the Securities to less favourable conditions.

Currency and Currency Exchange Rate risk with respect to the Underlying or its components
Since the Underlying [or its components] is denominated in a currency other than the Specified Currency, there is a Currency Exchange Rate risk.

In case of Short Cash Collect Securities, the following applies:

Risks relating to reverse structures
If the price of the Underlying [or its components] rises, the value of the Securities falls and the Redemption Amounts decreases.

In case of Closed End Securities, Closed End Leveraged Securities, Open End Securities, Open End Leveraged Securities, the following applies:

Risks relating to fixed rate Securities
The market value of the fixed rate Securities may be very volatile, depending on the volatility of interest rates on the capital market.

Risks arising from an Issuer's Regular Call Right
Securities that contain a regular call right of the Issuer may be redeemed by the Issuer in his sole discretion on certain call dates. If the price of the Underlying [or its components] is unfavourable at the respective observation date, the respective Security Holder may suffer a partial or total loss of their invested capital.

Risks arising from the Redemption Right of the Security Holders
Securities that contain a redemption right of the Security Holders may be redeemed by the Security Holders on certain redemption dates. If the price of the Underlying [or its components] is unfavourable at the respective observation date, the respective Security Holder may suffer a partial or total loss of their invested capital.

Risks related to Adjustment Events
Adjustments may have a substantial negative impact on the value and the future performance of the Securities as well as on the amounts to be distributed under the Securities. Adjustment events may also lead to an
extraordinary early termination of the Securities.

*Risks related to Call Events*

Upon the occurrence of a Call Event the Issuer has the right to extraordinarily call the Securities at their market value. If the market value of the Securities at the relevant time is lower than the Issue Price or the purchase price, the respective Security Holder will suffer a partial or total loss of its invested capital even if the Securities provide for a conditional minimum payment.]

*Risks related to Market Disruption Events*

The Calculation Agent may defer valuations and payments and make determination in its reasonable discretion [acting in accordance with relevant market practice and in good faith]. Security Holders are not entitled to demand interest due to such delayed payment.

*Risks arising from negative effects of hedging arrangements by the Issuer on the Securities*

The entering or the liquidation of hedging transactions by the Issuer may, in individual cases, adversely affect the price of the Underlying [or its components].

*In case of Securities with physical delivery, the following applies: Risks related to Physical Settlement*

The Securities might be redeemed at the Final Payment Date of the Securities by delivery of a quantity of Underlyings.

**Key risks related to the Underlying [or its components]**

*General risks*

*No rights of ownership of the Underlying [or its components]*

The Underlying [or its components] will not be held by the Issuer for the benefit of the Security Holders, and as such, Security Holders will not obtain any rights of ownership (e.g., voting rights, rights to receive dividends, payments or other distributions or other rights) with respect to the Underlying [or its components].

*In case of Securities with a share or with an index related to shares as Underlying, the following applies:*

**Key risks related to shares**

The performance of share-linked Securities [(i.e. Securities related to indices as Underlying and shares as index components)] depends on the performance of the respective shares, which may be subject to certain factors. Dividend payments may have an adverse effect on the Security Holder. [The holder of the depository receipts may lose the rights to the underlying shares certified by the participation certificate which may result in the depository receipts becoming valueless.]

[The underlying shares are issued by [UniCredit S.p.A., a] [another] company belonging to the UniCredit Group, to which also the Issuer of the Securities belongs to (Group Shares).]

[There is an increased risk of loss due to the possible combination of credit and market risk.]

[There is a sector related risk of loss, since both, the Issuer of the Securities and the issuer of the Underlying belong to the same economic sector and/or country.]

[There is a risk of loss arising from potential conflicts of interest on group level, since the Issuer of the Securities and the issuer of the Underlying are under joint control (Group Shares).]
In case of Securities with an index as Underlying, the following applies:

Key risks related to indices

The performance of index-linked Securities depends on the performance of the respective indices, which largely depend on the composition and the performance of their index components. [The index sponsor exclusively develops and determines the investment strategy and implements the investment strategy, in accordance with the guidelines of the index description, within its broad discretion. Neither the Issuer, the Calculation Agent, the index calculation agent nor any independent third party reviews the investment strategy.] [The Issuer neither has influence on the respective index nor the index concept.] [The Issuer also acts as sponsor or calculation agent of the index. This may lead to conflicts of interest.] In general, an index sponsor does not assume liability. Generally, an index may at any time be altered, terminated or replaced by any successor index. [The index sponsor and/or any key persons may at any time discontinue their contribution with regard to the implementation of the investment strategy.] [If the index sponsor discontinues its activities, in principle, neither the Issuer nor any third person will continue to implement the investment strategy. As a consequence, the Issuer may extraordinarily call the Securities.] [Security Holders do not or only partly participate in dividends or other distributions in relation to the index components.] [If the index entails a leverage factor, investors bear an enhanced risk of losses.] [Indices may be affected disproportionately negative in the case of an unfavourable development in a country, region or industrial sector.] [Indices may include fees which negatively affect their performance.] [Due to regulatory measures in the future the index, inter alia, may not be used as Underlying of the Securities or only subject to changed conditions.]

In case of Securities with a future contract or with an index related to futures contracts as Underlying, the following applies:

Key risks related to futures contracts

The performance of futures contract-linked Securities ([i.e. Securities related to indices as Underlying and futures contracts as index components]) primarily depends on the performance of the respective futures contract which is subject to certain influencing factors. Differences in the prices between different contract terms (e.g. in the case of a roll over) may adversely affect the Securities. Furthermore, prices of futures contracts may differ substantially from the spot prices. In addition, futures contracts are subject to similar risks as compared to a direct investment in the underlying reference assets.

In case of Securities with a commodity or with a futures contract on commodity or an index related to commodities as Underlying, the following applies:

Key risks related to commodities

The performance of commodity-linked Securities [(i.e. Securities related to indices as Underlying and commodities as index components)] [(i.e. Securities related to commodity future contracts as Underlying)] is depending on the performance of the respective commodity, which is subject to certain influencing factors. An investment in commodities is associated with higher risks than investments in other asset classes. The trading on a global basis almost non-stop in various time zones may lead to different prices in different places, which are not all relevant for the calculation of the Securities.

In case of Securities with a fund share or with an index related to fund shares as Underlying, the following applies:
**Key risks related to fund shares**

The performance of fund-linked Securities [(i.e. Securities related to indices as Underlying and fund shares as index components)] is depending on the performance of the respective fund share, which is subject to certain influencing factors. The performance of a fund share is decisively dependent on the success of the relevant investment fund's investment activities and the assets acquired by the investment fund (and the risk associated therewith) as well as on the investment fund’s fees. Furthermore, fund shares may be associated with a valuation risk, a risk of a suspension of the redemption of fund shares, a risk of wrong decisions or misconduct by the fund management and a risk of certain portfolio management techniques (such as leverage, short sales, securities lendings or repurchase agreements). Fund shares and investment funds are subject to material tax risks, regulatory risks or other legal risks. [Investment funds within the form of exchange traded funds (ETF) are subject to the risk of not fully replicating the performance of the original benchmark, the risk that an ETF may not or only be traded at a lower price and, in case of the use of a synthetic replication technique, the credit risk relating to swap counterparties.]

*In case of Securities with a Reference Strategy Index with components consisting of securities as Underlying, the following applies:*

**Key risks related to securities**

The performance of Securities linked to a reference strategy index with components consisting of one or more securities (such securities referred to as "Index Component Securities"), primarily, depends on the performance of and the payments under the respective Index Component Securities. In particular, Index Component Securities bear the risk of no active trading market, the risk of dependency from an underlying, the risk of complex structures and the risk of a lack of creditworthiness of the issuer of the Index Component Securities and lack of its ability and willingness to perform its duties.

*In the case of Securities linked to Currency Exchange Rates, the following applies:*

**Key risks related to currency exchange rates**

The performance of currency-exchange-rate-linked-Securities primarily depends on the performance of the respective currency exchange rate, which is subject to certain influencing factors. The trading on a global basis almost non-stop in various time zones may lead to different prices in different places, which are not all relevant for the calculation of the Securities. The currency exchange rates displayed on different sources of information may also vary. As a result, a currency exchange rate favourable for the investor might not be used for the calculation or, as the case may be, specification of the Redemption Amount. [The indirect determination of a relevant currency exchange rate via a computation of two other currency exchange rates may result in an increased currency exchange rate risk and have a negative effect on the Securities.]

The Securities are not capital protected. Investors may lose the value of their entire investment or part of it.

The Issuer or any of its affiliates may act[s] as a calculation agent or paying agent.

Besides, conflicts of interest in relation to the Issuer or the persons entrusted with the offer may arise for the following reasons:

- The Issuer specifies the Issue Price.
- The Issuer and one of its affiliates act as Market Maker of the Securities (however, no such obligation exists).
- Distributors may receive inducements from the Issuer.
- The Issuer, any Distributor and any of their affiliates act as Calculation Agent or Paying Agent in relation to the Securities.
- From time to time, the Issuer, any Distributor and any of their affiliates may be involved in transactions on their own account or on the account of their clients, which affect the liquidity or the price of the Underlying or its components.
- The Issuer, any Distributor and any of their affiliates may issue securities in relation to the Underlying or its components on which already other securities have been issued.
- The Issuer, any Distributor and any of their affiliates may possess or obtain material information about the Underlying or its components (including publicly not accessible information) in connection with its business activities or otherwise.
- The Issuer, any Distributor and any of their affiliates may engage in business activities with the issuer of the Underlying or its components, its affiliates, competitors or guarantors.
- The Issuer, any Distributor and any of their affiliates may also act as a member of a syndicate of banks, as financial advisor or as bank of a sponsor or issuer of the Underlying or its components.
- [The Issuer or one of its affiliates acts as index sponsor, index calculation agent, index advisor or index committee.]
- [The Issuer or one of its affiliates acts as an investment advisor or manager of a fund used as Underlying.]
- [The Underlying is issued by [UniCredit S.p.A., a] [another] company belonging to the UniCredit Group (Group Shares), to which also the Issuer of the Securities belongs to.]

Risk Factors

The following is a disclosure of Risk Factors that, in the opinion of UniCredit Bank AG as issuer (the "Issuer"), are material with respect to the Issuer and to the securities issued under this base prospectus (the "Base Prospectus") (the "Securities") in order to assess the risk associated with these Securities. Moreover, further risks that are currently unknown or currently believed to be not material may also have a negative impact on the value of the Securities. Potential investors should be aware that the Securities may decline in value and that the sum of amounts distributed under the Securities may be below the value that the respective Security Holder spent for the purchase of the Securities (including any Incidental Costs) (the "Purchase Price"). As a result, the respective Security Holder may sustain a partial loss (e.g. in the case of an unfavourable performance of the Underlying or its Components) or total loss (e.g. in the case of a substantially unfavourable performance of the Underlying or of an insolvency of the Issuer) of his investment.

The Base Prospectus, including these risk factors, and relevant final terms of the Securities (the "Final Terms") do not replace a professional consultation with a potential investor’s house bank or financial adviser. However, potential investors should carefully consider these Risk Factors before making a decision to purchase any Securities in any case.

Potential investors should consider all information provided in (a) this Base Prospectus and in any supplements thereto, (b) the registration document of UniCredit Bank AG dated 17 April 2018 (the "Registration Document"), the information of which is incorporated herein by reference at different parts of the Prospectus, (c) all documents the information of which is incorporated in the Base Prospectus by reference, and (d) the relevant Final Terms. An investment in the Securities is only suitable for investors, who understand the nature of such Securities and the extent of the incorporated risk and who have sufficient knowledge, experience and access to professional advisors (including their financial, legal and tax advisors) in order to form their own legal, tax and financial opinion upon the existing risks in relation to the Securities. Furthermore, potential investors should be aware that the risks described below may arise separately or cumulatively in combination with other risks and may possibly have mutually reinforcing effects. The order of the risks described below does not imply any statement about the likelihood of occurrence of each risk or the degree of influence of such risk factor on the value of the Securities.

"Security Holder" means the holder of a Security.

In the opinion of the Issuer, the significant risks described below may adversely affect the value of the Securities and/or the amounts to be distributed (including the delivery any quantity of the Underlying to be delivered) under the Securities and/or the ability of Security Holders to sell the Securities at a reasonable price prior to the final payment date of the Securities:

A. Risks related to the Issuer

The risk factors related to the Issuer included in the Registration Document of UniCredit Bank AG dated 17 April 2018 are hereby incorporated by reference into this Base Prospectus. A list setting out the information incorporated by reference is provided on page 313 et seq.

Potential investors should consider the information within the section entitled "Risk Factors" of the Registration Document. This section contains information on risks which may affect the assets, liabilities and the financial position of the Issuer and its ability to fulfil its obligations arising from the Securities.

B. Risks related to potential conflicts of interest

The Issuer, a financial institution or a financial intermediary with whom the Issuer has entered into a distribution agreement (the "Distributor") or any of their affiliates may, in connection with the below mentioned functions or transactions, as the case may be, pursue interests, which may be adverse to the interests of the Security Holders or do not take them into account (the "Conflicts of Interest").
**RISK FACTORS**

1. General potential conflicts of interest

*Potential conflicts of interest related to the Issue Price*

The Securities will be offered at a price determined by the Issuer (the "Issue Price"). The Issue Price is based on internal pricing models of the Issuer and may be higher than the market value of the Securities. The Issue Price may contain, beside upfront, management or other fees, an additional premium that may not be obvious to the Security Holders. Such an additional premium depends on several factors, particularly on the volume of the Securities of each series as well as current and expected market conditions and market outlooks as of the time of the issuance of the Securities. The premium will be added to the original mathematical value of the Securities and may differ between each issue of the Securities as well as from the premiums charged by other market participants.

*Potential conflicts of interest related to market maker activities*

The Issuer, any of its affiliates and any other company that the Issuer has appointed as market maker (each a "Market Maker"), may, but is not obliged to, undertake market making activities for the Securities. "Market Making" means that the Market Maker, under normal market conditions, continuously quotes bid and offer prices at which it is willing to trade the Securities in a certain volume. Through Market Making the liquidity and/or the value of the Securities may substantially be influenced. The prices quoted by a Market Maker may, to the detriment of the investor, substantially deviate from the mathematical (intrinsic) value of the Securities and usually do not correspond to the prices which would have been formed without Market Making and in a liquid market.

*Potential conflicts of interest related to Distributors and inducements*

From the Issuer Distributors may receive certain inducements in form of turnover-dependent placement- and/or management fees. Placement fees are one-off payments which, alternatively, may be granted by the Issuer in the form of an appropriate discount on the Issue Price. On the other hand, payment of management fees is recurring and dependant on the volume of the outstanding Securities at the given point of time placed by the relevant Distributor. The amount of the relevant inducement will be agreed between the Issuer and the relevant Distributor, may be subject to change and may differ with respect to the individual Distributor and Series of Securities.

*Potential conflicts of interest related to the function as calculation agent or paying agent*

The Issuer, any Distributor or any of their affiliates may act as a calculation agent or paying agent in relation to the Securities. In this function, the relevant entity may, *inter alia*, calculate amounts to be distributed under the Securities and make adjustments or other determinations, as described in the Final Terms, i.e. by exercising its reasonable discretion (§ 315 German Civil Code, Bürgerliches Gesetzbuch, "BGB") if the governing law of the Securities is German law or, respectively, by acting in accordance with relevant market practice and in good faith if the governing law of the Securities is Italian law. The aforementioned calculations, adjustments and determinations may adversely influence the value of, and/or the amounts to be distributed under the Securities and may be adverse to the interests of the respective Security Holder.

2. Potential conflicts of interest related to Underlying-linked Securities

The Securities are linked to the performance of an underlying (the "Underlying") and/or, its components. "Components" are, in case of an index as Underlying, the relevant components of the index. In this context, the following additional conflicts of interest may exist:

*Potential conflicts of interest related to additional transactions*

The Issuer, any Distributor or any of its affiliates may from time to time, without regard to the interests of the Security Holders, participate in transactions involving shares or other securities, fund shares, futures contracts, commodities, indices, currencies or derivatives for their own account or for the account of their customers. Additional transactions may result in further liquidity constraints of the Underlying or its Components, in particular, following hedging transactions in Underlyings or its Components with an already restricted liquidity.
Potential conflicts of interest related to the issuance of additional securities linked to the same Underlying or to its Components

The Issuer, any Distributor and any of its affiliates may issue securities with respect to the Underlying or its Components on which securities already have been issued. This increases the offer and, therefore, may limit the possibility to trade the Securities in case of limited demand. An issuance of such new competing securities may, therefore, adversely affect the tradability of the Securities.

Potential conflicts of interest related to Underlying-related information

In the course of their business activities or otherwise, the Issuer, any Distributor or any of their affiliates may be in possession of or may acquire important Underlying-related information (also not publicly available) over the term of the Securities. The issuance of Securities does, in particular, not create any obligation to disclose such information (whether or not confidential), which is related to the Underlying or to its Components, to the Security Holders, or to consider such information in the course of the issuance of the Securities.

Potential conflicts of interest related to business activities

The Issuer, any Distributor or any of their affiliates may, without regard to the interests of the Security Holders, deal with other issuers, any of their affiliates, competitors or any guarantor and engage in any kind of commercial or investment banking or other business activities. Any such action may, with respect to the Security Holders, adversely affect the price of the Underlying or its Components.

Potential conflicts of interest related to other functions of the Issuer

The Issuer, any Distributor and any of their affiliates may, without regard to the interests of the Security Holders, act as a member of a syndicate of banks, as financial advisor or as a bank of another issuer. In the course of the aforementioned functions actions may be taken or recommendations may be made which, with respect to the Security Holders, may adversely affect the Underlying or its Components.

C. Risks related to the Securities

In the following the material risk factors related to the Securities are described.

1. Risks related to the market

Risk that no active trading market for the Securities exists

There is a risk that the Securities may not be widely distributed and no active trading market (the “Secondary Market”) may exist and may develop for the Securities.

The Issuer is not obliged to make applications for the Securities to be admitted to the regulated market of any stock exchange or to be listed on any other exchange, market or trading system within the European Economic Area. Even if the Issuer makes such application, there is no assurance that such applications will be accepted or that an active trading will develop or be maintained. If the Securities are not traded on any stock exchange or any other market or trading system, pricing information for the Securities may in addition be more difficult to obtain.

Neither the Issuer nor any Distributor or any of its affiliates is obliged to undertake any Market Making activities. There is also no obligation to appoint a Market Maker or to continue a Market Making during the whole term of the Securities. If there is no Market Maker, or Market Making is only made to a limited extent, the Secondary Market in the Securities may be very limited.

Neither the Issuer nor any Distributor can therefore assure that a Security Holder will be able to sell his Securities at an adequate price prior to their redemption. Even in the case of an existing Secondary Market it cannot be excluded that the Security Holder may not be in a position to dispose of the Securities in the case of an unfavourable development of the Underlying or its Components or of a Currency Exchange Rate, e.g. if such development occurs outside of the trading hours of the Securities.

Risk related to a possible repurchase of the Securities

The Issuer may, but is not obliged to, purchase Securities at any time and at any price in the open market, by tender offer or private agreement. Any Securities purchased in this way by the Issuer may
be held, resold or cancelled. A repurchase of Securities by the Issuer may adversely affect the liquidity of the Securities.

Risk related to the offering volume

The issue volume described in the Final Terms does not allow any conclusion on the volume of the Securities actually issued or outstanding at any time and thus on the liquidity of a potential Secondary Market.

Risks related to a sale of the Securities

Prior to the redemption of the Securities, the Security Holders may only be able to realise the value, represented by the Securities, through a sale of the Securities in the Secondary Market. The price at which a Security Holder may be able to sell his Securities may be substantially lower than the Purchase Price. In the case of a sale of the Securities at a certain point of time at which the market value of the Securities is below the Purchase Price paid, the respective Security Holder will be suffering a loss. Costs associated with the sale of the Securities in the Secondary Market (e.g. order fees or trading venue fees) may in addition increase the loss.

Risks related to market value-influencing factors

The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclic conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors (as described in Risks arising from the influence of the Underlying or its Components on the market value of the Securities). In addition, changes in the composition of the member states of the European Union (EU), e.g. an exit of the United Kingdom of Great Britain and Northern Ireland according to the referendum of 23 June 2016, may have a negative impact on the stability, the existence and the functioning of the EU and its institutions. Uncertainties and possible economic burdens resulting from such attempts may arise not only in the relevant member states, have significant impact on the economic development of single member states and the EU as a whole and result in distortions as well as in increased volatilities in the financial markets. These factors may be mutually reinforcing or neutralising.

Risks related to the spread between bid and offer prices

During extraordinary market situations or the occurrence of technical disruptions, the Market Maker for the Securities may temporarily suspend the quotation of bid and offer prices for the Securities or increase the spread between bid and offer prices. Should the Market Maker in special market situations be unable to conclude transactions to hedge against price risks resulting from the Securities, or when such transactions are very difficult to conclude, the spread between the bid and offer prices may be expanded in order to limit its economic risk.

Currency and Currency Exchange Rate risk with respect to the Securities

If the Securities are denominated in a currency (the "Specified Currency") other than the currency of the jurisdiction where a Security Holder is domiciled or where the Security Holder seeks to receive funds, there is a Currency Exchange Rate risk (as described in Currency Exchange Rate risk). Currencies may also be devalued or replaced by a different currency whose development cannot be predicted.

Currency Exchange Rate risk

Exchange rates between currencies (the "Currency Exchange Rates") are determined by factors of supply and demand in the international currency markets and are influenced by macro-economic factors, speculations and interventions by the central banks and governments as well as by political factors (including the imposition of currency controls and restrictions). In addition there are other factors (e.g. psychological factors) which are almost impossible to predict, (e.g. a crisis of confidence in the political regime of a country) and which also may have a material impact on a Currency Exchange Rate. Currencies may be very volatile. There may be an increased risk in connection with currencies of countries whose standard of development is not comparable to the standard of the Federal Republic of Germany or of other industrialized countries (the "Industrialized Countries"). In
the case of any irregularities or manipulations in connection with the fixing of Currency Exchange Rates, this may have a material adverse effect on the Securities.

*Risks related to hedging transactions with respect to the Securities*

Security Holders may not rely on being able to sufficiently hedge against price risks arising from the Securities at any time. Their ability to make transactions to preclude or limit such price risks will depend on, *inter alia*, the relevant prevailing market conditions. In some cases there may be no suitable transactions available at a certain point of time or Security Holders may conclude transactions only at a market price that is disadvantageous to them.

2. *Risks related to the Securities in general*

*Credit risk of the Issuer*

The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer’s insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. Such risk is not protected by a statutory deposit protection, the deposit protection scheme of the Association of German Banks (*Einlagensicherungsfonds des Bundesverbandes deutscher Banken*), the Compensation Fund of German Banks (*Entschädigungseinrichtung deutscher Banken GmbH*) or any similar compensation scheme.

In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his capital, even if the Securities provide for conditional minimum payment at their maturity.

*Possible limitations of the legality of purchase and lack of suitability of the Securities*

There is the risk, that an investment in the Securities is illegal, unfavourable or not suitable for a potential investor.

The purchase, holding and/or disposal of certain Securities may, for certain investors, be prohibited, limited or associated with adverse regulatory or other consequences. *Inter alia* cannot be ruled out that the specific investor is restricted or not entitled to invest in the Securities due to supervisory regulations or that the investment is attached to special reporting or notification requirements (e.g. with respect to certain funds).

Additionally, the purchase or holding of Securities may be excluded or unsuitable under civil law agreements (e.g. if eligibility as trustee stock (*Mündelsicherheit*) is required) or may not be fully consistent with all investment policies, guidelines and restrictions applicable to it.

An investment in the Securities requires detailed knowledge of the features of the relevant Security. Thus, potential investors should have experience with investing in structured securities and the risks associated therewith. An investment in the Securities is only suitable for investors who

- have sufficient knowledge and experience in financial and business affairs to evaluate the merits and risks as well as the suitability of an investment in structured securities;
- have the ability to evaluate the merits and risks in the context of their financial situation on the basis of appropriate analytical tools or, in case of lack of knowledge, have the possibility to take respective professional advice;
- are able to bear the economic risk of an investment in structured securities for an indefinite period; and
- are aware that it may, during a substantial period of time or even at all, not be possible to sell the Securities.

Under consideration of the characteristics of the Securities and the substantial risks inherent in purchasing the Securities, the Securities may also not be an economically appropriate investment.
As a result, each potential investor must determine, based on its own independent review and, if applicable, professional advice, if the purchase, holding and disposal of the Securities fully complies with the investor's legal requirements, knowledge and experience and financial needs, objectives and circumstances (or if the investor is acquiring the Securities in a fiduciary capacity, the trustee).

**Risks arising from financial markets turmoil, the Resolution Directive as well as governmental or regulatory interventions**

Turmoil in the international financial markets may also in the future adversely affect inflation, interest rates, the Underlying and its Components, the amounts to be distributed under the Securities or the value of the Securities and result in extensive governmental and regulatory interventions.

As a reaction to the financial market crisis which begun in 2007, the European and the German legislator enacted or planned several directives, regulations and laws which might affect the Security Holders. In particular, Directive 2014/59/EU of the European Parliament and of the Council of 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms (the "Resolution Directive") and the law for the recovery and resolution of institutions and financial groups (German Recovery and Resolution Act, **Sanierungs- und Abwicklungsgesetz**) implementing the Resolution Directive into national German law contain additional or amended regulatory provisions which may affect the Issuer and the Securities issued. Besides, the Regulation (EU) No. 806/2014 of the European Parliament and the Council of 15 July 2014 establishing uniform rules and a uniform mechanism for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism and a Single Resolution Fund (the "**SRM Regulation**"), provides certain resolution tools.

The German Recovery and Resolution Act and the SRM Regulation provide tools which enable the competent supervisory or resolution authorities to restructure or dissolve credit institutions and investment firms if there is a potential default risk regarding the respective credit institution or investment firm and provided that the default risk may not be prevented by other effective means and the application of the tool serves the public interest. These resolution tools, in accordance with the Resolution Directive, include among others a "bail-in" instrument enabling the competent resolution authority to convert relevant capital instruments or certain eligible liabilities into shares or common equity tier 1 capital instruments or to write them down in whole or in part. By suspension, modification and termination (in whole or in part) of the rights under the Securities, the resolution tools may materially affect the rights of the Security Holders. The extent to which the claims resulting from the Securities forfeit due to the "bail-in" instrument, depends on a number of factors, on which the Issuer potentially has no influence.

If the resolution conditions are met, the competent resolution authority may as an alternative to a resolution issue a transfer order pursuant to which the Issuer would be forced to transfer its shares or assets and liabilities in whole or in part to a so-called bridge bank or an asset management company. In the context of a transfer order, the Issuer as initial debtor of the Securities may be replaced by another debtor (which may have a fundamentally different risk tolerance or creditworthiness than the Issuer). Alternatively, the claims may remain towards the initial debtor, but the situation regarding the debtor's assets, business activity and/or creditworthiness may not be identical to the situation prior to the transfer order.

With respect to insolvency proceedings opened on or after 1 January 2017, § 46f of the German Banking Act (**Kreditwesengesetz**, the "**KWG**") provides that, in the case of an insolvency proceeding of the Issuer, claims arising from certain standard unsecured debt securities (such as fixed or floating rate bearer bonds), including securities that were issued prior to 1 January 2017, will be satisfied only after other senior debt obligations have been satisfied (so called non-preferred debt securities).

With the amending directive (EU) 2017/2399 to the Resolution Directive dated 12 December 2017 (the "**Resolution Directive Amending Directive**") the European legislator regulated the ranking of unsecured debt instruments of an institution in case of insolvency proceedings of such institution. According to the Resolution Directive Amending Directive unsecured senior liabilities resulting from debt securities with a maturity of at least one year which do not contain embedded derivatives and are not derivatives themselves have a lower ranking in an insolvency than other unsecured senior liabilities. The relevant contractual documentation and, where applicable, the prospectus must explicitly refer to the lower ranking of these senior non-preferred debt liabilities in insolvency proceedings.
RISK FACTORS

proceedings. The Resolution Directive Amending Directive has been implemented by an amendment to § 46f KWG with effect as from 21 July 2018. For debt securities issued prior to this date, the statutory rules for non-preferred debt securities pursuant to the former version of § 46f para. 5 to 7 KWG will still apply and remain unchanged.

The Issuer may be subject to a restructuring or reorganisation procedure pursuant to the German Act on the Reorganisation of Credit Institutions (Kreditinstitute-Reorganisationsgesetz, the "KredReorgG"). While a restructuring procedure generally may not interfere with rights of creditors, the reorganisation plan established under a reorganisation procedure may provide for measures that affect the rights of a creditor of the credit institution such as a Security Holder even if such creditor does not consent to such measures, including a reduction of existing claims or a suspension of payments. The Security Holders’ rights may be adversely affected by the reorganisation plan which might be adopted irrespective of their particular voting behaviour by a majority vote.

It was planned that pursuant to the Regulation of the European Parliament and of the Council on structural measures improving the resilience of EU credit institutions, which are considered to be systemically important, such credit institutions shall be restricted by the competent authorities with regard to their business activities, including a prohibition of proprietary trading and the separation of certain trading activities. The draft of this regulation was published by the European Commission on 29 January 2014. This draft was withdrawn on 24 October 2017. However, it cannot be precluded that similar measures will be planned in the future and could in the future - in comparison to the German Bank Separation Act (Trennbankengesetz) – have further impairments in relation to the Issuer’s ability to meet its obligations under the Securities.

The aforementioned measures may result in a default of all claims under the Securities and thus to a total loss of the investment of the Security Holder. There may be negative effects in the market value of the Securities even before the execution of such rights. In addition, the Issuer's assets may be affected under these measures, which may further adversely affect the ability of the Issuer to meet its payment obligations under the Securities.

It is generally not or only partly possible to predict future market turmoil, regulatory measures and further legislative projects.

Risks related to debt financing the purchase of the Securities

If the purchase of the Securities will be financed by uptake of foreign funds, the proceeds from the Securities may possibly not be sufficient to make interest or principal payments arising from a financing purchase of the Securities and require additional capital. Therefore, in such a case, potential investors should make sure in advance that they can still pay the interest and principal payments on the loan also in the event of a decrease of value or a payment delay or default with regard to the Securities. The expected return should be set higher since the costs relating to the purchase of the Securities and those relating to the loan (interest, redemption, handling fee) have to be taken into account.

Risks related to Incidental Costs

In connection with the purchase, holding and disposal of the Securities, incidental costs (the "Incidental Costs") may be incurred beside the purchase or sale price of the Securities. These Incidental Costs may significantly reduce or even eliminate any profit from the Securities.

If the purchase or sale of the Securities is not agreed between the purchaser and the Issuer or the Distributor, as the case may be, at a fixed price (the "Fixed Price"), commissions which are either fixed minimum commissions or pro-rata commissions, depending on the order value, will be charged upon the purchase and sale of the Securities. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, for example domestic dealers or brokers in foreign markets, potential investors may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third-party costs).

In addition to such Fixed Price and the costs directly related to the purchase of the Securities (direct costs), potential investors must also take into account any other costs in connection with the holding of
the Securities. These include for example custody fees and additional costs if other foreign or domestic entities are involved in the custody.

Before investing in the Securities, potential investors should inform themselves about any Incidental Costs incurred in connection with the purchase, holding or sale of the Securities.

**Inflation risk**

Security Holders are exposed to the risk that the real yield from an investment in the Securities is reduced, equal to zero or even negative due to future money depreciation (the "Inflation"). The higher the rate of inflation rises, the lower is the real yield on a Security. If the inflation rate is equal to or higher than the nominal yield, the real yield is zero or even negative.

**Risks related to taxation**

The return on the Securities may be reduced through the tax impact on an investment in the Securities. Potential investors and sellers of Securities should be aware that they may be required to pay taxes or other charges or duties in accordance with the laws and practices of the country where they are individually assessed for tax, to which the Securities are transferred to, in which the Securities are held or in which the paying agent is situated, or of any other jurisdiction. In some jurisdictions, no official statements, rulings and/or guidelines of the tax authorities or court decisions may be available for innovative financial instruments such as the Securities. The laws and practices with respect to taxes are subject to change. Potential investors are advised to ask for their own tax advisors' advice on their individual taxation with respect to the acquisition, sale or redemption of the Securities. Only these advisors are in a position to duly consider the specific situation of the potential investor.

**Risks regarding US withholding tax**

For the Security Holder there is the risk that payments on the Securities may be subject to US withholding tax pursuant to section 871(m) of the US Internal Revenue Code of 1986 or subject to the US withholding tax pursuant to the so called Qualified Intermediary Regime and/or the Foreign Account Tax Compliance Act ("FATCA").

Section 871(m) of the U.S. Internal Revenue Code ("IRC") and accompanying regulations can require the Issuer to withhold up to 30% of the amount of a dividend paid on an U.S. Underlying referenced in the Securities if a payment (or deemed payment) on the Securities is considered to be contingent upon, or determined by reference to, the payment of such dividend. The withholding tax is imposed only if the performance of the Securities bears a relationship to the performance of the U.S. Underlying that meets or exceeds specified thresholds. Pursuant to these U.S. rules, payments (or deemed payments) under certain equity-linked instruments that refer to the performance of U.S. equities or certain indices that contain U.S. equities as an Underlying or a Component are treated as dividend equivalents ("Dividend Equivalents") and are subject to U.S. withholding tax of 30% (or a lower income tax treaty rate).

The withholding tax is imposed even if pursuant to the terms and conditions of the Securities, no actual dividend-related amount is paid or an adjustment is made. Investors may not be able to determine any connection to the payments to be made in respect of the Securities to the actual dividends.

The withholding tax may be withheld by the Issuer or the custodian of the Security Holder. In withholding this tax, the Issuer will regularly apply the general tax rate of 30% to the payments subject to US provisions (or deemed payments) and not any lower tax rate pursuant to any potentially applicable double taxation agreements. In such case, an investor's individual tax situation can therefore not be taken into account. A double taxation may occur in relation to payments made under the Securities.

The determination made by the Issuer or the custodian of the Security Holder of whether the Securities are subject to this withholding tax is binding for the Security Holder. However, it cannot be excluded that the United States Internal Revenue Service (the "IRS") comes to a different assessment which may be relevant. The rules of section 871(m) of the IRC require complex calculations in respect of the Securities that refer to US equities and application of these rules to a specific issuance of Securities issue may be uncertain. Consequently, the IRS may determine they are to be applied even if the Issuer
RISK FACTORS

or the custodian of the Security Holder initially assumed the rules would not apply. There is a risk in such case that Security Holder is nonetheless subject to withholding tax.

There is also the risk that section 871(m) of the IRC must also be applied to Securities that were not initially subject to withholding tax. This case could arise in particular if the Securities' economic parameters change such that the Securities are in fact subject to tax liability and the Issuer continues to issue and sell these Securities.

The Issuer or the custodian of the Security Holder is entitled to deduct from payments made under the Securities any withholding tax accrued in relation to payments made under the Securities. If IRC section 871(m) requires withholding on a payment, none of the Issuer, a paying agent nor any other person will be obliged to pay additional amounts to the Security Holders in respect of the amount withheld. As a result of the deduction or withholding, Security Holders will receive less interest or principal than expected. In the worst case, payments to be made in respect of the Security would be reduced to zero or the amount of tax due could even exceed the payments to be made in respect of the Security (the latter situation may also arise if the Securities were to expire worthless and no payment was made to investors).

Payments on the Securities may be subject to a US withholding tax pursuant to the Qualified Intermediary ("QI") and/or FATCA rules. Should, for example as a consequence of a non-compliance with certain certification, information reporting requirements with respect to its US accounts, other specified requirements by the Issuer or the documentation requirements by the Security Holder, a withholding of taxes on interest, capital or other payments under the Securities occur in connection with such withholding taxation, then neither the Issuer, nor the Paying Agent or any other person will be obliged to pay a compensation to the Security Holder. As a consequence, the Security Holder may receive a lower amount than without any such withholding or deduction.

In case of Open End Securities and Open End Leverage Securities the withholding tax in accordance with section 871(m) of the IRC applied to dividend payments made in relation to the underlying or its components reduces the reference price and, therefore, the redemption amount paid under the Securities (see section Risks related to a Ratio).

Risk related to Securities with subscription period

In the case of Securities with a subscription period, the Issuer reserves the right to refrain from engaging in the issue prior to the issue date and to early terminate or extend the subscription period. In this case, the Initial Observation Date may be postponed. In addition, the Issuer has the right, in its sole discretion, to reject subscription orders from potential investors in whole or in part.

Risks related to the Redemption Amount

The Securities will be redeemed at their maturity, or in case of Closed End Securities, Closed End Leverage Securities, Open End Securities and Open End Leverage Securities following the exercise of the Security Holder’s Redemption right or the Issuer’s Regular Call Right, as the case may be, at the Redemption Amount (the "Redemption Amount") specified in the Final Terms. The Redemption Amount may be less than the Issue Price or the Purchase Price. This means, the Security Holder only achieves a return (subject to the influence of exchange rate and inflation risk) if the Redemption Amount, including ongoing payments, if specified in the relevant Final Terms (see also Risks arising from missing ongoing payments), exceeds the individual Purchase Price of the Security Holder. The Redemption Amount may also be lower than the nominal amount of the Securities or even zero.

Risks arising from missing ongoing payments

Unless otherwise specified in the applicable Final Terms, the Securities do not bear interest or grant any other unconditional rights for ongoing payments which could compensate possible losses of principal.

Risks in connection with a later determination of features

The Final Terms may provide that either the Issue Price or other features of the Securities (e.g. the Ratio in case of Closed End Leverage Securities or Open End Leverage Securities or certain fee adjustments in case of Closed End Securities or Open End Securities) may be determined by the Issuer or published at any point of time after the production of the Final Terms. Depending on the time and manner of any such determination, investors in the relevant Securities bear the risk that the potential
return which is achievable from an investment in the relevant Securities do not match the expectations of the investor at the time of purchase or the risk profile does not match the risk expectations of the investor.

3. Risks related to Underlying-linked Securities

Amounts to be distributed under the Securities will be determined by reference to an Underlying or its Components using a payment formula and other conditions, as specified in the Final Terms (the “Underlying-linked Securities”). This brings in addition to the risks that arise in connection with the Securities themselves, further significant risks which are not associated with a similar investment in a conventional fixed or floating rate bond with a claim for repayment of the nominal amount or a direct investment in the Underlying or its Components. Potential investors should only invest in the Securities if they have fully understood the applicable payment formulas.

Risks arising from the influence of the Underlying or its Components on the market value of the Securities

In addition to the risks described in Risks related to market value-influencing factors, the market value of Underlying-linked Securities will be influenced by a number of additional factors.

The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying or its Components, as the case may be. It is not possible to predict how the price of the Underlying or its Components will develop in the future. The market value of the Securities may be subject to substantial fluctuations, since it will primarily be influenced by changes in the price of the Underlying or its Components. The price of the Underlying or its Components may also depend on a number of inter-related factors, including cyclical, economic, financial and political events and their general effect on capital markets and on the relevant stock exchanges.

Whilst the market value of the Securities is linked to the price of the Underlying or its Components and may be adversely influenced by it, not any change may be equally influencing.

In addition, the market value of the Securities inter alia is influenced by the variations in the intensity of the fluctuation of values (volatility) of the Underlying or its Components, the interference (correlation) between various Components of the Underlying, if any, and changes in the expected and actual dividend or other payments under the Underlying or its Components. Moreover, even the failure of an expected change in the price of the Underlying or its Components may adversely affect the market value of the Securities. These factors can reinforce or negate each other.

Risks arising from the fact that the observation of the Underlying or its Components occurs only at specified dates or times or periods

The amounts to be distributed under the Securities may be considerably lower than the price of the Underlying or its Components may have suggested. The observation of the price of the Underlying or its Components relevant for the calculation of amounts to be distributed under the Securities only occurs on one or more dates or during a specified period, as specified in the relevant Final Terms. In addition, in the Final Terms may be specified that for an observation of the price of the Underlying or its Components only a certain point of time is relevant. Any prices of the Underlying or its Components favourable for the relevant Security Holder that are outside of these dates, times or periods, will not be regarded. In particular, at a high volatility of the Underlying or its Components, this risk can significantly increase.

Risks due to open-end structure

Open End Securities and Open End Leverage Securities will be issued without a fixed maturity. Instead, they will be valid for an indefinite period of time until the call right of the Issuer or the redemption right of the Security Holder is exercised. The Security Holders have no right that the Securities will be redeemed until the aforementioned rights are exercised and will be able to realise the value of the Securities only by Secondary Market sales.

Risks related to a conditional minimum payment

If the Final Terms provide for a conditional minimum payment on the final payment date of the Securities (in case of Short Cash Collect Securities, Cash Collect Securities, Twin-Win Cash Collect

59
Securities, Twin-Win Lock-in Cash Collect Securities, Lock-in Cash Collect Securities, Twin-Win Geared Put Cash Collect Securities, Geared Put Cash Collect Securities, Geoscope Lock-In Cash Collect Securities and Barrier Geoscope Lock-in Cash Collect Securities), such minimum payment will not be made if (i) the price of the Underlying or its Components develops so unfavourably for the Security Holder that a specific event (e.g. a Barrier Event) occurs, or (ii) – even if such a specific event has not yet occurred, i.e. the conditions for the conditional payment are still fulfilled – where the Securities are terminated, called or sold before their final payment date. Then, the actual Redemption Amount (case (i)) or the Termination Amount, Cancellation Amount or selling price of the Securities (case (ii)) may be significantly lower than such conditional minimum payment or may even be zero and the Security Holder may lose all or a substantial portion of the amount invested.

Risks related to conditional payments: Impact of thresholds or limits

In case where the conditional payment of amounts is specified in the Final Terms, the payment and/or the extent of such amounts depend on the performance of the Underlying or its Components. Potential investors should be aware that in case of an unfavourable performance of the Underlying or its Components no payment of any conditional amount may occur or that any amount may also be very low or even zero or that the payment of a conditional amount may irretrievably lapse for the remaining term of the Securities.

If specified in the Final Terms, certain amounts only may be payable if certain thresholds or limits have been reached (e.g. the Strike in case of Twin-Win Geared Put Cash Collect Securities and Geared Put Cash Collect Securities) or a Lock-In Event in case of Twin-Win Lock-in Cash Collect Securities, Lock-in Cash Collect Securities, Geoscope Lock-In Cash Collect Securities and Barrier Geoscope Lock-in Cash Collect Securities) or if certain events have occurred which in turn depend on having reached a threshold or limit. If the respective threshold or limit, as specified in the Final Terms, has not been reached or if the event has not occurred, the respective Security Holder is not entitled to receive the amount specified in the Final Terms. Thresholds or limits may in particular have a significant influence on the market value of the Securities and amounts to be distributed under the Securities. Investors should only invest their capital into the Securities if they completely understood the mechanism of the applicable pay-out formula.

Risks related to Barrier Events

If in case of Short Cash Collect Securities, Cash Collect Securities, Twin-Win Cash Collect Securities, Twin-Win Lock-in Cash Collect Securities, Lock-in Cash Collect Securities and Barrier Geoscope Lock-in Cash Collect Securities a barrier event (the "Barrier Event"), as specified in the Final Terms, occurs, in particular, a conditional minimum payment may forfeit, a payment under the Securities may be limited, a more advantageous pay-out formula may be disapplied and/or Physical Settlement may occur (as described in Risks related to Physical Settlement). In any case the Security Holder may lose his invested capital in total or in part.

The occurrence of a Barrier Event depends on the performance of the Underlying or its Components.

In the case of Cash Collect Securities, Twin-Win Cash Collect Securities, Twin-Win Lock-in Cash Collect Securities, Lock-in Cash Collect Securities, Twin-Win Geared Put Cash Collect Securities, Geared Put Cash Collect Securities, Geoscope Lock-In Cash Collect Securities and Barrier Geoscope Lock-in Cash Collect Securities with Additional Conditional Amount and with consideration of a Barrier Event, the occurrence of the Barrier Event may, if so specified in the Final Terms, trigger the lapse of the chance to receive payment of Additional Conditional Amounts even if an Additional Conditional Amount Payment Event occurs after the occurrence of the Barrier Event.

The risk that a Barrier Event occurs depends on whether the Final Terms provide for a date-related barrier observation, a daily barrier observation or a continuous barrier observation (intra day). A daily barrier observation and a continuous barrier observation may even increase the risk of an occurrence of a Barrier Event. The risk of the occurrence of a Barrier Event increases as closer the underlying barrier (which may also lie at or above the initial price of the Underlying) lies to the current price of the Underlying. The risk also depends on the length of the respective barrier observation period, on the number of dates on which the Barrier Event may occur and on the volatility of the Underlying or its Components.
**RISK FACTORS**

**Risks related to a Strike or a Strike Level**

In case of *Short Cash Collect Securities, Cash Collect Securities, Sprint (Cap) Securities, Twin-Win Geared Put Cash Collect Securities and Geared Put Cash Collect Securities* a strike (the "Strike"), as specified in the Final Terms, and/or, in case of *Sprint (Cap) Securities*, in addition a strike level (the "Strike Level") can lead to the Security Holders participate either to a lesser extent in a favourable performance of the Underlying or its Components or to a greater extent in an unfavourable performance of the Underlying or its Components. The Strike and/or Strike Level may be a threshold at which the Securities participate in the development of the price of the Underlying or its Components and/or may, as a mathematical factor within the payment formula, lead to a reduced payment to the Security Holders. **Security Holders may potentially be exposed to an increased risk of loss of their invested capital.**

**Risks in relation to a participation factor**

In the case of *Sprint (Cap) Securities, Cash Collect Securities with Participation Factor, Twin-Win Geared Put Cash Collect Securities and Geared Put Cash Collect Securities* a participation factor (including a Participation Factor Up and a Participation Factor Down) can lead to the Security Holders participate either to a lesser extent in a favourable performance of the Underlying or its Components or to a greater extent in an unfavourable performance of the Underlying or its Components.

In the case of *Open End Securities* with a futures contract as Underlying a participation factor (Participation Factor Current and Participation Factor New) can lead to the Security Holders participate either to a lesser extent in a favourable performance of the Underlying or its Components or to a greater extent in an unfavourable performance of the Underlying or its Components. To compensate price differences following a roll over of the underlying the Calculation Agent is entitled to adjust the participation factor.

Participation in a favourable performance of the Underlying or its Components is generally reduced if applying a participation factor (including a Participation Factor Up, a Participation Factor Down, a Participation Factor Current and a Participation Factor New) less then 1 or 100%. A participation in an unfavourable performance of the Underlying or its Components is generally increased if applying a participation factor (including a Participation Factor Up, a Participation Factor Down, a Participation Factor Current and a Participation Factor New) greater then 1 or 100%. **There is an enhanced risk for the Security Holder of a total loss of the invested capital.**

**Risks relating to the deduction of fees**

In the case of *Open End and Closed End Securities and Open End Leverage and Closed End Leverage Securities* a deduction of fees (e.g. Index Calculation Fee, Management Fee, Quanto Fee, Short Selling Fee) can be specified in the Final Terms. The respective fee will be collected continuously during the term of the Securities and deducted from the Redemption Amount. The respective fee may have a material influence on the Redemption Amount and may reduce it to zero even in the case of a favourable performance of the Underlying or its Components. **There is an enhanced risk for the Security Holder of a total loss of the invested capital.**

The Calculation Agent is entitled to adjust the fees during the term of the Securities to not insignificant changes of the market conditions if provided in the Final Terms. Security Holders must be aware that there might be a subsequent rise of the respective fees up to the maximum amount (as specified in the Final Terms).

When calculating the Redemption Amount, the deduction of fees can lead to a disproportional participation in the unfavourable performance of the Underlying or its Components. The participation (leverage) increases depending on the amount of the collected fees and therefore with an increasing term of the Securities. The extent of this effect may not be evident for a potential investor at the time of the purchase of the Securities. Potential investors should therefore be aware that in this case there may be the same risks as stated under **Risks in relation to a participation factor**.

**Risks related to a Maximum Amount**

A maximum amount (the "Maximum Amount"), as specified in the Final Terms (in the case of *Discount Securities, Short Cash Collect Securities, Cash Collect Securities, Sprint Cap Securities*) has the consequence that the potential return from the Securities is limited in contrast to a direct
investment in the Underlying or its Components. A participation in a favourable performance of the Underlying or its Components beyond the Maximum Amount is excluded.

**Risks related to a Ratio**

A ratio (the "Ratio"), as specified in the Final Terms, may result in the Security being in economic terms similar to a direct investment in the relevant Underlying or its Components, but being nonetheless not fully comparable with such a direct investment. In respect of the Security Holders, the application of a Ratio may result in a reduced participation in a favourable development of the Underlying or its Components or in an increased participation in an unfavourable development or the Underlying or its Components, as the case may be.

In the case of Open End and Closed End Securities and Open End Leverage and Closed End Leverage Securities a Ratio, as defined in the Final Terms, can lead to the Security Holders to participate either to a lesser extent in a favourable performance of the Underlying or its Components or to a greater extent in an unfavourable performance of the Underlying or its Components. A continuous deduction of the fees from the Ratio can be specified in the Final Terms, as stated in **Risks relating to the deduction of fees**. In addition, in case of Open End Securities and Open End Leverage Securities a Dividend Tax Deduction which reflects taxes levied on dividend payments of the Underlying or its components may be deducted from the Ratio if specified in the Final Terms (see also **Risks regarding US withholding taxes**).

**Reinvestment Risk**

The Security Holders are exposed to the risk that they may only reinvest the principal received due to an early repayment of the Securities to less favourable conditions.

**Risks relating to reverse structures**

In case of Short Cash Collect Securities a reverse structure applies, i.e. the value of the Securities falls and the Redemption Amount decreases if the price of the Underlying or its Components rises.

**Risks relating to fixed rate Securities**

Potential investors in Closed End Securities, Closed End Leveraged Securities, Open End Securities and Open End Leveraged Securities bearing interest at a fixed rate ("Fixed-Rate Securities") should be aware that the fair market value of the Fixed-Rate Securities may be very volatile, depending on the volatility of interest rates on the capital market (the "Market Rate of Interest"). The performance of the Market Rate of Interest may depend on a number of interrelated factors, including economic, financial and political events and their general effect on capital markets and on the respective stock exchanges. It is not possible to predict how the Market Rate of Interest will change over time. While the interest rate of Fixed-Rate Securities is specified in the Final Terms for the term of the Securities, the Market Rate of Interest is subject to daily changes. If the Market Rate of Interest rises, this normally causes the fair market value of the Fixed-Rate Securities to fall. If the Market Rate of Interest falls, the fair market value of the Fixed-Rate Securities normally rises.

**Currency and Currency Exchange Rate risk with respect to the Underlying or its Components**

If the Underlying or its Components are denominated in a currency other than the Specified Currency, there is a Currency Exchange Rate risk (as described in **Currency Exchange Rate risk**), as long as it is not excluded in the relevant Final Terms. Currencies may also be devalued or replaced by a different currency whose development cannot be predicted.

In cases where the conversion of amounts payable under the Securities is not made directly by application of one Currency Exchange Rate but indirectly by application of two different Currency Exchange Rates (so called Cross Rate option), an increased Currency Exchange Rate risk exists. In such cases, the currency of the Underlying will at first be converted into a third currency before it will then be converted into the Specified Currency. Thus, as the amounts to paid at redemption and, if applicable, at early redemption depend on two different Currency Exchange Rates, investors might suffer higher losses of interest and/or principal, as it would otherwise be the case.

**Risks related to Adjustment Events**

In the case of the occurrence of an adjustment event (the "Adjustment Event"), as specified in the Final Terms, the calculation agent is entitled to carry out adjustments according to the Final Terms in
its discretion and/or to replace the Underlying or its Components, as the case may be. Although these adjustments aim at retaining the economic situation of the Security Holders unchanged to the largest extent possible, it cannot be guaranteed that such an adjustment only leads to a minimal negative economic impact. Adjustment Events may have a substantial negative impact on the value and the future performance of the Securities as well as on the amounts to be distributed under the Securities and can change the structure and/or the risk profile of the Securities. If such adjustments in accordance with the Final Terms are impossible or not reasonable for the Issuer and/or the Security Holders, the Issuer may call the Securities and redeem them at their market value. As a result, the Security Holder is exposed to the risks as described in Risks arising from Call Events.

Risks related to Call Events

The Issuer has the right to extraordinarily call the Securities at their market value upon the occurrence of a call event (the "Call Event"), as specified in the Final Terms. A further participation of the Securities on a favourable development of the price development of the Underlying or its Components will cease. If the market value of the Securities at the relevant time is lower than the Issue Price or the Purchase Price, the respective Security Holder will suffer a partial or total loss of its invested capital even if the Securities provide for a conditional minimum payment. Furthermore, the Security Holder bears the risk that the expectations for an increase in the market value of the Securities will no longer be met because of such extraordinary early termination. In this case, the Security Holder is also exposed to a reinvestment risk.

Risks arising from an Issuer's Regular Call Right

In case of Closed End Securities, Closed End Leveraged Securities, Open End Securities and Open End Leveraged Securities, Securities contain a regular call right of the Issuer (the "Regular Call Right") and may be redeemed by the Issuer on certain call dates (the "Call Dates") as specified in the Final Terms, by giving notice to the Security Holders. The Security Holder bears the risk that his expectations on an increase in the market value of the Securities will not be met due to the regular call. At the time of the exercise of the Regular Call Right (i.e. the respective observation date), the price of the Underlying or its Components may be substantially lower than its price at the time of the purchase of the Securities by a Security Holder. From the time of the exercise of the Regular Call Right the remaining term of the Securities is limited until the respective Call Date. The price of the Underlying on the corresponding observation date is decisive for the determination of the payment in relation to the Regular Call Right. In this case, the Security Holders may not be able to hold the Securities until the price of the Underlying or its Components has recovered and thus may suffer a partial or total loss of their invested capital. The exercise of the Regular Call Right lies within the Issuer’s sole discretion, the call date chosen by the Issuer might be unfavourable from the Security Holders’ perspective. As of the respective Call Date of the Securities, the Security Holders no longer have a possibility to participate in any further performance of the Underlying or its Components. In this case, the Security Holders bear the reinvestment risk (as described in Reinvestment Risk).

Risks arising from the Redemption Right of the Security Holders

In case of Closed End Securities, Closed End Leveraged Securities, Open End Securities and Open End Leveraged Securities, Security Holders may demand redemption of the Securities (the "Redemption Right") on certain redemption dates (the "Redemption Dates") as specified in the Final Terms by transmission of a duly filled redemption notice (as described in the Final Terms). At the time of the exercise of the Redemption Right, the price of the Underlying or its Components may be substantially lower than its price at the time of the purchase of the Securities by a Security Holder. From the time of the exercise of the Redemption Right the remaining term of the Securities is limited to the respective Redemption Date. The price of the Underlying on the corresponding observation date is decisive for the determination of the payment in relation to the Redemption Right. In this case the Security Holders may not be able to hold the Securities until the price of the Underlying or its Components has recovered and thus may suffer a partial or total loss of their invested capital. As of the respective Redemption Date of the Securities, the Security Holders no longer have a possibility to participate in any further performance of the Underlying or its Components. In this case, the Security Holders bear the reinvestment risk (as described in Reinvestment Risk). Furthermore, some time may pass between the date of the exercise of the Redemption Right and the respective following observation date. Between the date of the exercise of the Redemption right and
the respective following observation date the price of the Underlying or its Components may fall resulting in an amount payable under the Securities which is significantly lower than amount expected by the Security Holder at the time of the exercise of the Redemption Right. The time delay may even be substantially longer in case of a Market Disruption occurring at the respective observation date.

*Risks related to Market Disruption Events*

If a market disruption event (the "Market Disruption Event"), as specified in the relevant Final Terms, occurs the relevant calculation agent may defer valuations of the Underlying or its Components, as provided in the Final Terms, and, after a certain period of time, determine such valuations in its discretion. These valuations may, to the detriment of the Security Holder, differ substantially from the actual price of the Underlying or its Components. In general market disruption events also lead to delayed payments (including deliveries of the Underlying, if so specified in the relevant Final Terms) on the Securities. In this case, Security Holders are not entitled to demand interest due to such delayed payment.

*Risks arising from negative effects of hedging arrangements by the Issuer on the Securities*

The Issuer may use a portion or the total proceeds from the sale of the Securities on transactions to hedge against price risks of the Issuer resulting from the Securities. The entering or the liquidation of hedging transactions by the Issuer may, in individual cases, adversely affect the price of the Underlying or its Components.

*Risks related to Physical Settlement*

The Final Terms may specify that the Securities will be redeemed at the final payment date of the Securities either by payment of the Redemption Amount or by delivery of a quantity of the Underlying (the "Physical Settlement"). In this case, the relevant method of settlement depends on the conditions specified in the Final Terms and the performance of the Underlying or its Components and will be determined by the relevant Calculation Agent at the end of the term of the Securities.

In the case of a Physical Settlement the market value of the quantity of Underlyings to be delivered is not known prior to the final payment date of the Securities and may be substantially below the value of the invested capital and may even be zero. In this case the Security Holder would suffer a total or partial loss of its invested capital.

Security Holders are not entitled and the Issuer is not obliged to execute any rights from the Underlying to be delivered until they are transferred to the Security Holder. The price of such shares may continue to develop negatively in the period from the date at which the value of the Underlyings to be delivered will be determined and such transfer and only the Security Holder bears the risk of such price movements.

All costs, incl. possible custody fees, exchange turnover taxes, stamp taxes, transaction fees, other taxes or levies, incurred as a result of the delivery of the Underlying, have to be borne by the respective Security Holder. Furthermore, upon sale of the Underlying delivered transaction costs may arise. These fees and costs may be material and may substantially reduce the proceeds from the Securities or increase a possible loss of the Security Holder’s invested capital.

Furthermore, Security Holders should not assume that they will be able to sell the quantity of Underlying delivered for a specific price, in particular not for a price corresponding to, or being greater than, the value of capital invested for the acquisition of the Securities.

The Underlying delivered may be subject to selling and transfer restrictions or may not be liquid for other reasons.

Should the delivery of Underlying become economically or actually difficult or impossible for whatever reason, the Final Terms may specify that the Issuer has the right to pay a supplemental cash amount instead.

The Underlying will be delivered at the Security Holder's own risk. This means that neither the Issuer nor the Paying Agent nor any other person or entity different to the Security Holders is liable if the Underlying get lost or destroyed during their delivery to the Security Holders.
D. Risks related to the Underlying or its Components

The Underlying may be a share (including a Depository Receipt (as defined below)), a unit or a share in an investment fund (each a "Fund Share" fund share, an index (including a Reference Strategy Index), a commodity, a futures contract or a Currency Exchange Rate. The asset classes described below (including, but not limited to, shares, Fund Shares, indices, futures contracts and/or commodities) may also be the Component of an index as Underlying or the reference asset of a futures contract and thus may have an indirect influence on the Securities. The Underlying and its Components are subject to particular risks, which are described below and must be observed.

1. General risks

Past performance no indication for a future performance

The past performance of an Underlying or its Components provides no indication of its future performance. The amounts to be distributed under the Securities may therefore be substantially lower than the price of the Underlying or its Components may in advance have suggested.

No rights of ownership of the Underlying or its Components

The Underlying or its Components will not be held by the Issuer for the benefit of the Security Holders, and as such, Security Holders will not obtain any rights of ownership (such as voting rights, rights to receive dividends or other distributions or other rights) with respect to the Underlying or its Components. Unless not specified otherwise in the relevant Final Terms, the Securities are linked to the price development of the Underlying or its Components and there will be no compensatory consideration of dividends and other payments of the Underlying or its Components. Neither the Issuer nor any of its affiliates is obliged to acquire or hold the Underlying or its Components. If either the Issuer or any of its affiliates holds the Underlying or its Components, neither the Issuer nor any of its affiliates is restricted from selling, pledging or otherwise conveying all rights, titles and interests in or with regard to the Underlying or its Components or any derivative contracts linked to it by virtue solely of having issued the Securities.

Risks associated with foreign jurisdictions

If the Underlying or any of its Components is subject to the jurisdiction of a country whose legal system is not comparable with the legal system of the Federal Republic of Germany or other Industrialized Countries, investing in such Securities involves further legal, political (e.g. political changes) and economical (e.g. economic downturns) risks. In foreign jurisdictions possibly expropriation, taxation equivalent to confiscation, political or social instability or diplomatic incidents may occur. Transparency requirements, accounting, auditing and financial reporting standards as well as regulatory standards may in many ways be less strict than in Industrialized Countries. Financial markets in these countries may have much lower trading volumes than developed markets in Industrialized Countries and the securities of many companies are less liquid and their prices are subject to stronger fluctuations than those of similar companies in Industrialized Countries.

Risks related to the purchase of Securities for hedging purposes

The Securities may not be a perfect hedge against price risks arising from the Underlying or its Components. Any person intending to use the Securities to hedge against such price risks is subject to the risk that the price of the Underlying or its Components, other than expected, develops in the same direction as the value of the Securities. In addition, it may not be possible to liquidate the Securities at a certain date at a price which reflects the actual price of the respective Underlying or its Components. This particularly depends on the prevailing market conditions. In both cases, the Security Holder may suffer a loss from both, his investment in the Securities and his investment in the Underlying or its Components, whose risk of loss he actually wanted to hedge.

2. Risks related to shares

Similar risks to a direct investment in shares

The performance of Securities linked to shares (including Depository Receipts, as defined below) (the "Share-linked Securities") primarily depends on the performance of the respective share. The performance of a share may be subject to factors like the dividend or distribution policy, financial prospects, market position, corporate actions, shareholder structure and risk situation of the issuer of
the share, short selling activities and low market liquidity as well as to cyclical, macro-economic or political influences. In particular, dividend payments lead to a fall in the share price and, therefore, may have an adverse effect on the Security Holder and its investment in the Securities. Accordingly, an investment in Share-linked Securities may bear similar risks to a direct investment in the respective shares. Corporate actions and other events in relation to the share or the issuer of the share may result in adjustments to the Securities (as described in Risks related to Adjustment Events) or in an extraordinary early termination of the Securities (as described in Risks related to Call Events). Disruptions regarding the trading of the shares may lead to Market Disruption Events (as described in Risks related to Market Disruption Events).

Risks related to Depository Receipts

Depository receipts (the "Depository Receipts"), e.g. in the form of American Depository Receipts (ADRs) or Regional Depository Receipts (RDRs), may bear additional risks compared with risks related to shares. Depository Receipts are participation certificates in a portfolio of shares normally held in the country of incorporation of the issuer of the underlying shares and represent one or more shares or a fraction of such shares. For Depository Receipts, the legal owner of the underlying share portfolio is the custodian bank, which is at the same time the issuing agent of the Depository Receipts. Depending on the jurisdiction in which the Depository Receipts will be issued and to which jurisdiction the custody agreement is subject, it cannot be ruled out that the respective jurisdiction does not recognise the holder of the Depository Receipts as the actual beneficial owner of the underlying shares. Especially in the event of insolvency of the custodian bank or foreclosure against it, it is possible that shares underlying the Depository Receipts are restricted or that these shares may be sold to realise their value in the case of foreclosure against the custodian bank. If that is the case, the holder of the Depository Receipts loses the rights to the underlying shares certified by the participation certificate and the Depository Receipt becomes worthless.

Risks related to dividend payments

Dividend payments of the Underlying usually lead to a fall in its price and, therefore, may have an adverse effect on the Security Holder and its investment in the Securities. In particular, dividend payments may adversely affect the price of Securities. Furthermore, the Underlying may approach a certain limit or lead to the occurrence of an event relevant for the Securities and, therefore, negatively affect the payments of amounts under the Securities.

Risks related to Group Shares

In case of shares issued by UniCredit S.p.A. (a company of UniCredit Group) or shares issued by another company belonging to the UniCredit Group (the same group as the Issuer of the Securities) (both types of shares referred to as the "Group Shares"), there are the following additional risks:

Combination of Credit and Market Risk

The Issuer of the Securities and the issuer of the Group Shares may be exposed to the same risks, inter alia, resulting from a group-wide organization, management and business strategy. Risks materialising with the Issuer of the Securities or the issuer of the Underlying or another entity of the group may simultaneously affect both, the Issuer of the Securities as well as the issuer of the Underlying.

If the creditworthiness of UniCredit S.p.A., the holding entity of the group, (the "Holding Company") is reduced, this may result in a simultaneous reduction of the creditworthiness of the issuer of the Underlying as well as of the Issuer of the Securities. Such reduction of the Holding Company’s rating would likely result in falling prices of the Underlying and, in addition, in a reduction in the market value of the Securities due to a reduced creditworthiness of the Issuer.

If the Holding Company were to become insolvent, the Issuer of the Securities and the issuer of the Group Shares would probably also become insolvent. In this case, there is an increased risk that the Security Holder will only receive significantly limited payments from the insolvency assets of the Issuer with regard to amounts payable under the Securities. On the one hand, the Security Holder's claims against the Issuer of the Securities would be subject to the insolvency rate applicable to claims of equal priority. On the other hand, the amounts payable under the Securities would decrease due to the loss in value of the Underlying as a result of the insolvency of the issuer of the Underlying.
RISK FACTORS

Sector related risks

If both, the Issuer of the Securities and the issuer of the Group Shares belong to the same economic sector and/or country, a general negative performance of this sector or country might have a cumulated negative impact on the price development of the Securities.

Risks arising from special conflicts of interest on group level

The Holding Company will not consider the interests of Security Holders in its exercise of control with respect to the issuer of the Group Shares and the Issuer of the Securities. Since both, the Issuer of the Securities and the issuer of the Group Shares are under joint control of the Holding Company, conflicting interests at the Holding Company’s level might have negative effects on the overall performance of the Securities. E.g., if the Holding Company is interested in rising prices of the Group Shares, this might have a negative impact on the holders of Put Securities. On the other hand, if the Holding Company is interested in falling prices of the Group Shares, this might have a negative impact on the holders of Call Securities.

3. Risks related to indices

Similar risks to a direct investment in index components

The performance of Securities linked to indices (the "Index-linked Securities") depends on the performance of the respective index. The performance of an index depends primarily on the performance of its components (the "Index Components"). Changes in the price of the Index Components may have an effect on the index and, likewise, changes to the composition of the index or other factors may also have an effect on the index. Accordingly, an investment in an Index-linked Security may bear similar risks to a direct investment in the Index Components. Generally, an index may at any time be altered, terminated or replaced by any successor index. This may result in adjustments to the Securities (as described in Risks related to Adjustment Events) or in an extraordinary early termination of the Securities (as described in Risks related to Call Events). Disruptions regarding the trading of the shares may lead to Market Disruption Events (as described in Risks related to Market Disruption Events).

No influence of the Issuer on the index

If neither the Issuer nor any of its affiliates act as index sponsor, the Issuer neither has influence on the index nor on the method of calculation, determination and publication of the index (the "Index Concept") or its modification or termination.

If neither the Issuer nor any of its affiliates act as index sponsor, Index-linked Securities are not in any way sponsored, endorsed, sold or promoted by the respective index sponsor. Such index sponsor makes no warranty or representation whatsoever, express or implied, either as to the results to be obtained from the use of the index or the prices at which the index stands at a particular time. Such index is composed, calculated (if so) and determined by its respective index sponsor independently from the Issuer of the Securities. Such index sponsor is not responsible or liable for the issuance, the administration, the marketing or the trading of the Securities.

Risks arising from special conflicts of interests in relation to indices

If the Issuer or any of its affiliates acts as index sponsor, index calculation agent, advisor or as a member of an index committee, or in a similar position, this may lead to conflicts of interest. In relation to such function, the Issuer or any of its affiliates may, inter alia, calculate the price of the index, carry out adjustments (e.g. by exercising its discretion) to the Index Concept, replace the Index Components and/or determine the composition and/or weighting. These measures may have an adverse effect on the performance of the index, and thus on the value of the Securities and/or the amounts to be distributed under the Securities.

Risks related to Strategy Indices

Strategy indices (the "Strategy Indices") represent hypothetical rule-based investment strategies (i.e., no actual trading or investment activities take place) conducted by an index sponsor. As a general rule, Strategy Indices entitle the index sponsor to extensively exercise its discretion when calculating the index which may lead under certain circumstances to a negative performance of the index.
Risks related to Reference Strategy Indices

Reference Strategy Indices replicate a (hypothetical) reference portfolio which is based on an investment strategy and actively implemented, on a continuous basis, by an Index Sponsor (ongoing composition and weighting of the Reference Strategy Index). The reference portfolio only consists of data sets; no actual trading and investment activities are carried out with regard to the reference portfolio. In addition to the general risk factors related to indices, the following needs to be observed:

(i) Risks related to the investment strategy and exercise of discretion

The Index Sponsor exclusively develops and determines the investment strategy. The investment strategy may not be established on the market or may even be completely unknown (see also Risks of unrecognized or new indices). The investment strategy may not or only to a certain extent be disclosed to the investors. It is likely that historical information which may allow conclusions about the economic success of the investment strategy are not available. Even in case of the availability of such historic information, it is not possible to draw mandatory conclusions about the future economic success of the investment strategy. Neither the Issuer, the Calculation Agent, the Index Calculation Agent nor any independent third party reviews the index description, the investment strategy, the competence of the Index Sponsor or the quality of its decisions taken during the continuous implementation of the index concept. The investment strategy may prove to be unsuccessful or may not be feasible due to the prevailing market conditions.Primarily, Security Holders rely on the capabilities of the Index Sponsor and its implementation of the investment strategy.

The index description specifies the method of calculation, determination and publication of the price of the Reference Strategy Index (the "Index Concept") and the guidelines for the Index Sponsor, conferring a broad discretion on the Index Sponsor in relation to the active management of the reference portfolio. Decisions by the Index Sponsor may have a negative effect on the development of the Index.

(ii) No influence of the Issuer, the Calculation Agent or the Index Calculation Agent

Neither the Issuer, the Calculation Agent nor the Index Calculation Agent has any influence on the investment strategy and the composition of the Index; they have no possibility to make adjustments to the Reference Strategy Index. If the Index Sponsor, for whatever reason, is unable to perform its duties in relation to the continuous implementation of the investment strategy or in case of any other disruption affecting the implementation of the investment strategy or index calculation, the Issuer may early terminate the Securities (as described in Risks related to Call Events).

(iii) Risks related to the Index Sponsor and key persons

The capability and reliability of the Index Sponsor and the responsible key persons are decisive for the performance of the Reference Strategy Index due to the development of the Index Concept and the investment strategy by the Index Sponsor and due to the broad discretion of the Index Sponsor in relation to the continuous implementation of the investment strategy. There is a risk that the Index Sponsor (e.g. as a result from regulatory restrictions) is obliged to suspend its activities, that key persons leave or discontinue their activities (for whatever reason) and the expertise with regard to the implementation of the investment strategy may be lost. There is an additional risk that key persons incorrectly exercise their discretion or even act fraudulently. Neither the Issuer, the Calculation Agent, the Index Calculation Agent nor an independent third party reviews the index description, the investment strategy, the competence of the Index Sponsor or the quality of its decisions taken during the continuous implementation of the investment strategy. In principle, it is intended that neither the Issuer, the Calculation Agent nor the Index Calculation Agent replaces the Index Sponsor and continues the implementation of the investment strategy.

(iv) Risks related to the components of the Reference Strategy Index

Securities linked to a Reference Strategy Index replicate the performance of the components forming part of the Reference Strategy Index, which may be long and/or short positions in shares (including Depository Receipts), Fund Shares (including ETF), futures contracts, commodities or other securities. Accordingly, an investment in Securities linked to a Reference Strategy Index may bear similar risks to a direct investment in these asset classes (see respective risk factors for these asset classes). A
Reference Strategy Index may also use leverage and may, therefore, be subject to the risks described in Risks related to Leverage Indices.

(v) Risks related to the re-allocation and re-weighting of the Reference Strategy Index

Changes to the composition and weighting of the Reference Strategy Index by the Index Sponsor may result in a loss of value of the Reference Strategy Index, resulting from exit commissions when reducing or dissolving existing components, subscription commissions when increasing or adding new components as well as costs and fees, even though the reference portfolio is only hypothetical. Furthermore, it cannot be excluded that changes to the Reference Strategy Index’ composition may result in a decrease of its value due to a future unfavourable performance of the newly selected components. Oppositely, the Index Sponsor may not be obliged to change the composition or weighting and, therefore, may refrain from any changes, even though the components develop unfavourable for a certain period, resulting in a reduction of the value of the Reference Strategy Index.

In addition, the Index Sponsor may re-allocate, re-weight, reduce or dissolve components in its reasonable discretion (§315 BGB) or acting in accordance with relevant market practice and in good faith if certain events occur and/or certain limits are reached. In such case, the Security Holder does not participate in a positive performance of such components. Possibly, the Reference Strategy Index may not replicate other assets and only consists of a cash component.

(vi) Risks related to adjustments of the Reference Strategy Index

In the case of the occurrence of certain events, the Index Sponsor may be entitled to carry out adjustments with regard to the Index Concept or the investment strategy in its reasonable discretion (§ 315 BGB) or acting in accordance with relevant market practice and in good faith. Although these adjustments aim at retaining the economic situation of the Security Holders unchanged to the largest extent possible, it cannot be guaranteed that such an adjustment only leads to a minimal negative economic impact. Adjustments may have a substantial negative impact on the performance of the Reference Strategy Index, the future performance of the Securities as well as on the amounts to be distributed under the Securities and can change the structure and/or the risk profile of the Securities. If such adjustments are impossible or not reasonable for the Issuer and/or the Security Holders, the Issuer and/or the Calculation Agent may extraordinarily early terminate the Securities. As a result, the Security Holder is exposed to the risks as described in Risks arising from Call Events.

(vii) Risks related to the regulation of benchmarks

There is a risk, that due to the application of the regulation of the European Parliament and of the Council on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds ("Benchmark Regulation") the Reference Strategy Index must be amended, discontinued or may not be available as an Underlying for the Securities, in particular, in the absence or discontinuation of the admission, recognition or registration of the Index Sponsor as administrator of the Reference Strategy Index or the registration of the Reference Strategy Index. In particular, the application of the Benchmark Regulation may adversely change the future performance of the Reference Strategy Index or cause the Index Sponsor to change the conditions of the Index Concept of the Reference Strategy Index or to discontinue the Reference Strategy Index (see also below Risks related to the regulation of benchmark indices).

(viii) Re-qualification risk

It cannot be excluded that Securities linked to a Reference Strategy Index and/or the Issuer and/or the investment strategy and/or the Index Sponsor may in any way be subject to the regulation of investment funds and/or other collective investments. This may materially restrict the issuance and offer of the Securities and may result in negative effects for the Security Holders when buying, holding or selling the Securities as well as with regard to the tax treatment of the payments received under the Securities.

Further risk factors related to specific Reference Strategy Indices may be included in the Base Prospectus by way of a supplement pursuant to § 16 WpPG which will be published.

Risks related to Price Indices

In the case of price or price-return indices (the "Price Indices"), dividends or other distributions paid out with respect to Index Components will not be considered when calculating the price of the index
and consequently have a negative impact on the price of the index, because the Index Components will as a rule be traded with a discount after the pay-out of dividends or distributions. This has the effect that the price of the Price Index does not increase to the same extent or falls to a greater extent than the price of a comparable total return / performance index (the "Total Return Index"), which reflects gross payments, or Net Return Index, which reflects net payments.

*Risks related to Net Return Indices*

In the case of net return indices (the "Net Return Indices"), dividends or other distributions paid out or made on the Index Components will be considered when calculating the price of the index as net payments after deduction of an average tax rate, as specified by the relevant Index Sponsor. This tax deduction has the effect that the price of the net return index does not increase to the same extent or falls to a greater extent than the price of a comparable Total Return Index.

*Risks related to Short Indices*

In the case of short indices (the "Short Indices"), as a rule, the price of the index develops in a reverse manner to the market or long index to which it refers. This means that the price of the Short Index generally rises when the prices of the market or long index to which it refers fall, and that the price of the Short Index falls when the prices of the market or long index to which it refers rise.

*Risks related to Leverage Indices*

Leverage indices (the "Leverage Indices") consist of two different components, the underlying (i.e. stock, index, commodity, futures contract or exchange rate) to which the Leverage Index refers (the "Reference Underlying") and the leverage factor (the "Leverage Factor"). The performance of the Leverage Index is linked to the per cent performance per day of the Reference Underlying by applying the Leverage Factor. Depending on the respective Leverage Factor, the daily price of the Leverage Index falls or rises to a greater extent than the price of the respective Reference Underlying.

If the Leverage Index has exceeded a certain threshold due to extraordinary price movements during a trading day, the Leverage Index may be adjusted intra-daily in accordance with the relevant Index Concept. Such adjustment may lead to a reduced participation of the Leverage Index in a subsequent increase in price of the Reference Underlying.

In the case of Securities linked to a Leverage Index, Security Holders may to a greater extent be suffering a loss of the invested capital.

*Risks related to Distributing Indices*

In the case of distributing indices (the "Distributing Indices") dividends or other distributions, made from the Distributing Index, will usually result in a discount on the price of Distributing Index. This has the effect that the price of the Distributing Index in a longer term does not rise to the same extent or falls to a greater extent than the price of a comparable Net Return Index or Total Return Index.

*Risks related to Excess Return Indices*

In the case of excess return indices, the investor indirectly invests in futures contracts and thus is exposed to the same risks as described in Risk related to futures contracts. The performance of the Index Components is only considered in excess (that means relative) to a benchmark or interest rate.

*Risks in relation to country or sector related indices*

If an index reflects the performance of assets only of certain countries, regions or sectors, this index is affected disproportionately negatively in the case of an unfavourable development in such a country, region or industrial sector.

*Currency risk contained in the index*

Index Components may be listed in different currencies and therefore exposed to different currency influences (this particularly applies to country or sector related indices). Furthermore, it is possible that Index Components are converted first from one currency to the currency which is relevant for the calculation of the index, and then converted again in order to calculate and determine the amounts to be distributed under the Securities. In such cases, Security Holders are confronted with several currency and Currency Exchange Rate risks, which may not be obvious for a Security Holder.
Adverse effect of fees on the index level

If the index composition changes in accordance with the relevant Index Concept, fees may arise that are subject of the index calculation and which reduce the level of the index and the payment of amounts under the Securities (for Distributing Indices). This may have a negative effect on the performance of the index and the payments under the Securities. Indices which reflect certain markets or sectors may use certain derivative financial instruments. This may lead to higher fees and thus a lower performance of the index than it would have been the case with a direct investment in these markets or sectors.

Risks arising from to the publication of the index composition which is not constantly updated

For some indices its composition will not entirely be published or only with retardation on a website or in other public media specified in the Final Terms. In this case the composition exposed might not always correspond with the current composition of the respective index used for calculating the amounts payable under the Securities. The delay may be substantial and, under certain circumstances last for several months. In this case the calculation of the index may not be fully transparent to the Security Holders.

Risks of unrecognized or new indices

In the case of a not recognized or new financial index, there may be a lower degree of transparency relating to its composition, maintenance and calculation than it would be the case for a recognized financial index, and there may in some circumstances be less information available about the index. In addition, subjective criteria may play a much greater role in the composition of the index in such cases, and there may be a greater degree of dependence on the agent responsible for the composition, maintenance and calculation of the index than it would be the case for a recognized financial index. Furthermore, particular investors (e.g. Undertakings for Collective Investment in Transferable Securities (UCITS) or insurance companies) may be subject to specific administrative restrictions relating to the purchase of Securities linked to such index which have to be considered by these investors. Finally, the provision of indices, the contribution of input data to indices and the use of indices may from time to time be subject to regulatory requirements and restrictions which may affect the ongoing maintenance and availability of an index.

Risks related to the regulation of benchmark indices

The Underlying may be an index that qualifies as a benchmark (the "Benchmark Index") within the meaning of Regulation (EU) 2016/1011 of the European Parliament and of the Council dated 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "Benchmark Regulation"). According to the Benchmark Regulation, a Benchmark Index could not be used as such if its administrator does not obtain authorisation or is based in a non-EU jurisdiction which (subject to applicable transitional provisions) does not satisfy the "equivalence" conditions, is not "recognised" pending such a decision or is not "endorsed" for such purpose. Consequently, it might not be possible to further utilise a Benchmark Index as underlying of the Securities. In such event, depending on the particular Benchmark Index and the applicable terms of the Securities, the Securities could be de-listed, adjusted, redeemed prior to maturity or otherwise impacted.

Any changes to a Benchmark Index as a result of the Benchmark Regulation could have a material adverse effect on the costs of refinancing a Benchmark Index or the costs and risks of administering or otherwise participating in the setting of a Benchmark Index and complying with the Benchmark Regulation. Such factors may have the effect of discouraging market participants from continuing to administer or contribute input data to certain Benchmark Indices, trigger changes in the rules or methodologies used to determine certain Benchmark Indices, adversely affect the performance of a Benchmark Index or lead to the disappearance of certain Benchmark Indices. Potential investors should be aware that they face the risk that any changes to the relevant Benchmark Index may have a material adverse effect on the value of and the amount payable under the Securities. Furthermore, the methodology of a Benchmark Index might be changed in order to comply with the terms of the Benchmark Regulation, and such changes could have an adverse effect on the Security Holders, including but not limited to an unfavorable adjustment of the published price or its volatility.
Consequently, it might become necessary to also adjust (as described in Risks related to Adjustment Events) or even terminate the Securities (as described in Risks related to Call Events).

4. Risks related to futures contracts

Similar risks to a direct investment in futures contracts

The performance of Securities linked to futures contracts (the "Futures contract-linked Securities") primarily depends on the performance of the respective futures contract. The performance of a futures contract may be subject to factors like the price of the reference asset underlying the futures contract, limited liquidity of the futures contract or the reference asset underlying the futures contract, as the case may be, speculations and cyclical, macro-economic or political influences. Accordingly, an investment in Futures contract-linked Securities may bear similar risks to a direct investment in the respective futures contracts or reference asset underlying the respective futures contract (see also the risks as described in Risks related to commodities). Changes in the contract specification made by the relevant determining futures exchange may result in adjustments to the Securities (as described in Risks related to Adjustment Events) or in an extraordinary early termination of the Securities (as described in Risks related to Call Events). Disruptions regarding the trading of the futures contracts may lead to Market Disruption Events (as described in Risks related to Market Disruption Events).

Futures contracts are standardised transactions

Futures contracts are standardised forward transactions, which reference as so called commodity future contracts commercial good (e.g. oil, wheat or sugar) or as so called financial future contracts on bonds (e.g. sovereign bonds) or other reference assets ("Futures Reference Assets").

A futures contract represents a contractual obligation to buy or sell a fixed amount of the Futures Reference Assets on a fixed date at an agreed price. Futures contracts are traded on futures exchanges and are standardised with respect to the contract amount and Futures Reference Assets (e.g. type and quality in case of commodities as well as issuer, term, nominal amount and coupons in case of bonds), as well as to delivery location and dates (if applicable). Futures contracts are normally traded at a discount or premium compared with the spot prices of their underlying reference assets.

No parallel development of spot and futures prices

Prices of futures contracts may differ substantially from the spot prices of the underlying reference assets. The price of a futures contract does not always develop in the same direction or at the same rate as the spot price of the underlying reference asset. As a result, the price of the futures contract may develop substantially unfavourable for Security Holders even if the spot price of the underlying reference asset remains constant or develops favourably for Security Holders.

Risks related to futures contracts with different contract dates

The prices of futures contracts with different contract dates and overlapping terms can differ, even if all other contract specifications are identical. If the prices of longer-term futures contracts are higher than the prices of the shorter-term futures contracts this is called 'contango'. If the prices of shorter-term futures contracts are higher than the prices of the longer-term futures contracts this is called 'backwardation'. If the Final Terms provide for an observation of futures contracts with different contract dates (e.g. in the case of a roll over), these price differences might have negative effects on the value of the Securities and the amounts to be paid under the Securities, since not the most favourable futures contract for the Security Holder might be of relevance.

Risks with respect to a Roll-Over

In order to trade futures contracts on an exchange, they are standardised with respect to their term (e.g. 3, 6, 9 months). This may require a subsequent replacement of the futures contracts by futures contracts (under consideration of transaction costs related thereto), which have a later contract date, but otherwise has identical contract specifications as the initial futures contract (the 'Roll-Over'). Such a Roll-Over can be repeated several times, as a result of which the associated transaction costs are incurred several times. Differences in the prices and settlement prices of the futures contract (as described in Risks related to futures contracts with different contract dates) together with the related transaction costs may be compensated by a respective adjustment (e.g. of the rate at which the respective Security directly or indirectly participates in the performance of the underlying futures contract). Therefore, over time Securities may participate to a greater extent in an unfavourable
underlying future’s performance for the respective Security Holder or to a lesser extent in a favourable underlying future’s performance for the respective Security Holder.

5. **Risks related to commodities**

*Similar risks as a direct investment in commodities*

The performance of Securities linked to a commodity (the "**Commodity-linked Securities**") primarily depends on the performance of the respective commodity. The performance of a commodity may be subject to factors like supply and demand; speculations in the financial markets; production bottlenecks; delivery difficulties; hardly any market participants; political turmoil; economic downturns; political risks (exporting restrictions, war, terrorist actions); unfavourable weather conditions; natural disasters. Changes in the trading conditions at the relevant reference market or other events, affecting the commodity may result in adjustments to the Securities (as described in **Risks related to Adjustment Events** or in an extraordinary early termination of the Securities (as described in **Risks related to Call Events**). Disruptions regarding the trading of a commodity may lead to Market Disruption Events (as described in **Risks related to Market Disruption Events**).

*Higher risks than other asset classes*

An investment in commodities is associated with higher risks than investments in other asset classes like e.g. bonds, currencies or stocks; because prices in this asset category are subject to greater fluctuations (volatility) and markets may be less liquid than e.g. stock markets. Changes to bid and offer volumes may have a higher impact on the price and volatility. Commodity markets are also characterised by, among others, the fact that there are only a few active market participants what increases the risk of speculation and pricing inaccuracies.

*Risks arising from the trading in various time zones and on different markets*

Commodities (e.g. oil, gas, wheat, corn, gold, silver) are traded on a global basis almost non-stop in various time zones on different specialised exchanges or markets or directly among market participants (over the counter). This may lead to a publication of different prices for a commodity in different price sources. The Final Terms specify which exchange or market and which timing apply regarding the specification of the price of the relevant commodity. The prices of a commodity displayed at the same time on different price sources can differ e.g. with the result that a more favourable price, which is displayed on a price source, is not used for the calculations or determinations in respect of the Securities.

6. **Risks related to fund shares**

6.1 **Structural risks in the case of fund shares as the Underlying**

*Similar risks to a direct investment in Fund Shares*

The market price development of Securities linked to a Fund Share, in principle, depends on the performance of the relevant Fund Share or the relevant Fund Shares. The performance of a Fund Share is decisively dependent on the success of the relevant investment fund's investment activities. The latter are affected in turn to a very great extent by the choice of assets acquired by the investment fund and the extent to which the investment risks associated with the acquisition of assets for the investment fund materialise. Therefore, an investment in a Security can be subject to a similar risk to a direct investment in Fund Shares. Events affecting the Fund Share may result in adjustments to the Securities (as described in **Risks related to Adjustment Events** or in an extraordinary early termination of the Securities (as described in **Risks related to Call Events**). Disruptions regarding the trading of a commodity may lead to Market Disruption Events (as described in **Risks related to Market Disruption Events**).

*Legal and tax risk*

The legal environment and the publication, accounting, auditing and reporting requirements applying to an investment fund, as well as the tax treatment applying to its members, may change at any time in a way that can neither be predicted nor influenced. In addition, any change may have a negative impact on the value of the investment fund used as the Underlying for the Securities.

In this context, investment funds operating in accordance with the requirements of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of
laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities ("UCITS") are normally subject to stricter requirements relating to risk diversification and the type of permitted assets than investment funds operating in accordance with the requirements of Directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on managers of alternative investment funds ("AIFs"). However, this does not entail a guarantee that the investments made will be safer or that the investment activities will be financially successful.

In contrast to UCITS, AIFs are permitted to concentrate their fund investments on a single asset or a few assets, and to invest in complex assets and assets for which there are no properly functioning and transparent markets on which credible prices are quoted at which those assets can be sold at any time or at least on particular dates. This may be associated with substantial risks, which may have adverse effects on the value of the investment assets and thus on the payments under the Securities.

The distribution of Fund Shares may be subject to restrictions in the respective jurisdiction, which may also apply to the Securities linked to Fund Shares. As a result, a delivery of Fund Shares (as Underlying) at the maturity of the Securities may not be admissible or an investment into the Securities must even be reversed. A Security Holder may be exposed to the risk of not participating in a favourable development of the Underlying, an additional cost burden and a loss of the invested capital.

**Risks resulting from commissions and fees**

Investment funds usually have to bear certain management and custody fees and further fees and expenses regardless of their performance. These fees usually accrue even if an investment fund's assets decrease in value. Moreover, the regulations of an investment fund typically provides for a performance fee or allocation to its general partner, manager or person serving in an equivalent capacity over and above a basic asset-based management fee. Performance fees or allocations could create an incentive for a manager to choose riskier or more speculative investments than would otherwise be the case. In addition, because performance-based fees or allocations are generally calculated on a basis that includes unrealised appreciation as well as realised gains, an investment fund may pay performance-based compensation to a manager on gains that will never be realised. Certain fund managers may invest on the basis of short-term market considerations. Their turnover rate is expected to be significant, potentially involving substantial brokerage commissions and fees.

In addition, some investment funds may charge fees in relation to the issuance or redemption of their Fund Shares. Prospective Security Holders should be aware that any of these fees may have a negative impact on payments, if any, under the Securities.

**Risks resulting from a potential liquidation or merger**

It cannot be excluded that an investment fund chosen as an Underlying is being liquidated or dissolved prior to the maturity of the Securities stated in the Final Terms. Such a liquidation or dissolution may have negative impacts on the value of the Securities. In this case the Issuer or the Calculation Agent is additionally entitled to adjust the terms and conditions of the Securities (e.g. by selecting a successor fund) or, to terminate the Securities prematurely.

**Risks relating to valuations of the net asset value and estimates**

The Issuer or the Calculation Agent, as the case may be, must to rely on the valuation of the relevant assets by the respective investment fund or its contracted service providers. Such valuations are revised from time to time, sometimes materially, and may not be indicative of what the actual fair market value would be in an active, liquid or established market and subject the fund managers to a conflict of interest where their fees are based on such valuations. The valuations provided by investment funds with respect to their illiquid investments and by less liquid sub funds of their overall net asset values may be particularly uncertain. The investment funds' management fees and incentive fees, as well as the amounts due to investors upon share redemption and other financial calculations, may be determined on the basis of estimates. The manager or advisor of an investment fund is usually under no or only limited obligation to revise such estimates.

**Risks resulting from potential conflicts of interest of the persons involved**

The structure of investment funds may in individual cases result in conflicts of interest for the persons involved, especially with regard to Investment Advisors and Portfolio Managers (and any persons or
entities affiliated with them). Apart from their mandate for an investment fund, Investment Advisors or Portfolio Managers may also service other customers which in individual cases may lead to conflicts of interest if certain investment opportunities only have a limited volume. Furthermore, Investment Advisors or Portfolio Managers may also act for other investment funds which pursue similar investment objectives or act as or represent the counterparty in transactions involving the purchase or sale of financial instruments for a fund. Apart from that, Investment Advisors or Portfolio Managers may concurrently be acting for companies whose investment instruments are recommended to the relevant investment fund for purchase. Conflicts of interest may also occur if Investment Advisors or Portfolio Managers act on behalf of customers who want to sell or purchase the same financial instruments as the investment fund which is managed or advised by them. In particular cases, further conflicts of interest may arise which could have an effect on the performance of an investment fund.

The Issuer may, among other things, act as prime broker or as Custodian Bank to the investment funds used as Underlying for the Securities. Such services may include the extension of loans by the Issuer to one or more such investment funds. In connection with any such provision of services or extensions of credit, the Issuer will receive commissions for its prime brokerage services and/or payments in respect of such extensions of credit, which may affect the value of the relevant investment fund. To the extent that the Issuer provides prime brokerage services and/or extensions of credit, the Issuer will also have custody of the relevant fund’s underlying assets and will possess a lien on and security interest in such assets to secure the investment fund’s obligations to the Issuer. Often these assets will not be registered in the investment fund’s names, but rather directly in the name of the Issuer. In the event of an insolvency or other event of default with respect to an investment fund, the Issuer as secured creditor will be entitled to, and prospective Security Holders should assume that it will, take action to realise upon and liquidate such assets in its capacity as secured creditor without taking into consideration the interests of any holder of Fund Shares and of the Security Holders. This may adversely affect the value of the relevant fund and, consequently, the value of the Securities.

No passing on of rebates or other fees paid by the investment fund to the Issuer

The Issuer may receive rebates or other fees on its investment in an investment fund. These rebates or other fees will not be distributed to the Security Holders but are used by the Issuer to finance the earnings mechanism of the Securities or otherwise.

Custody risks

The investment fund’s assets are usually held in custody by one or more custodians or sub-custodians. This may result in a potential risk of losses resulting from a breach of duties to exercise due care, wrongful use or the possible insolvency of the custodian or sub-custodian (if any).

Valuation risks

Not all investment funds may produce regular valuations at specified intervals. Without a reliable valuation of the investment fund share, it may not be possible to determine the value of the Securities. Even where regular valuations of an investment fund are provided, the valuation and/or publication of such values may be suspended in certain circumstances. Furthermore, the net asset value of an investment fund may rely to a considerable extent (or even completely) on estimated values which may prove later to be incorrect. Fees and commissions incurred by the investment fund may nonetheless be calculated on the basis of the estimated net asset values and may not be corrected subsequently.

Risks resulting from the possible effects of redemptions of Fund Shares

Substantial redemption requests could require a fund to liquidate its assets more rapidly than otherwise intended pursuant to its investment program to raise liquidity for making payments to holders of Fund Shares in connection with a redemption request. As result, and due to a reduction of the fund’s asset portfolio, the fund may be less diversified. In addition, costs (e.g. transaction costs) have a more significant impact on the value of the fund.

Substantial redemption requests may, in certain circumstances, even lead to a premature dissolution of the fund. In addition, the redemption of Fund Shares could be contemporarily suspended by the fund.
Specific risks affecting closed investment funds

The legal environment and requirements for closed investment funds (qualifying as AIFs) are less strict and provide less protection for investors than is the case for UCITS. In the case of closed investment funds, capital commitments may be subject to capital drawdown requirements arising over time with the result that the investment of the full amount of a capital commitment could be financed over a number of years. The capital commitment may also be subject to a time limit and the relevant investment fund may not be required to pay its capital commitment in full. In consequence of the nature of the various types of capital commitments, there can be no guarantee that the full amount of the capital commitment will in fact be drawn down in due course or at all.

Risks resulting from potential cross liability

If the investment fund is a sub-fund within an umbrella structure, the performance of the investment fund is subject to the additional risk that a sub-fund is liable in general towards third parties for the liabilities of another sub-fund within the umbrella structure.

If the Underlying is a Fund Share of a certain class of shares of an investment fund, the performance of the Underlying is subject to the additional risk that this class of shares is liable in general towards third parties for the liabilities of another class of shares of the investment fund.

6.2. General risks from investment activities in the case of Fund Shares as the Underlying

Market risks

The development of the prices and market values of the assets which are held by an investment fund is particularly dependent on the developments of the financial markets which themselves are influenced by the general condition of the world economy and the political parameters in the relevant countries. The general development of prices, in particular on securities exchanges, may also be affected by irrational factors such as sentiments, opinions and rumors.

Currency risks

An investment fund's income denominated in currencies other than the currency of that investment fund is subject to movements in the exchange rates of the currencies of the investments. This risk depends on the fluctuations of those currencies against the domestic currency of the investment fund and can result in further profits or losses for the investment fund in addition to those generated by the movement in price of the relevant asset.

Risks due to lack of liquidity of the assets and financial instruments purchased

The markets for some assets and financial instruments have only limited liquidity and depth. This may represent a disadvantage for an investment fund investing in those assets, both from the point of view of realising the sale of investments and of the investment process, leading to higher costs and possibly to lower returns.

Counterparty risks

Not all investment funds are subject to restrictions relating to the contractual partners (counterparties) with which they enter into transactions for investment purposes. As a consequence, they are exposed to a certain extent to a general risk of non-payment (counterparty or issuer risk). Even if utmost care is exercised in the selection process, losses as a consequence of an (impending) default of a counterparty cannot be ruled out.

Concentration risks

Investment funds which concentrate their investment activities on a small number of assets, markets or industry sectors generally have a more pronounced earnings and risk profile than investment funds with widely diversified investments. In addition to higher potential profits, this may result in higher risk and increased volatility. As an example, regional investment funds or country funds are subject to a higher risk of losses because they depend on the performance of particular markets and do not attempt to diversify risk more widely by investing in a variety of markets. Likewise, sector funds such as commodity, energy or technology funds entail an increased risk of losses because they do not aim to diversify risk with a wider range of investments across different sectors either.
6.3. Specific risks relating to Fund Management in the case of Fund Shares as the Underlying

Risks due to dependence on the fund managers

The financial success of an investment fund is crucially dependent on the abilities, experience and expertise of the respective fund managers. If the fund managers responsible for investing the assets of the investment fund or the persons responsible for managing the fund are no longer available to administer the portfolio, this may have a negative effect on the financial performance of the relevant investment fund. Moreover, subjective (rather than systematic) decisions by the persons responsible for managing the fund may generate losses or prevent profits. Furthermore, it cannot be ruled out that the fund managers of an investment fund fail to adhere to the agreed investment strategies.

Risks in the event of limited disclosure of investment strategies

It may happen, especially in the case of AIFs, that an investment fund's investment strategy is disclosed only to a limited extent. In this event, it is not possible to analyse and review the investment fund's investment strategy given that it has not been disclosed, or disclosed only partially.

Risks due to possible changes of investment strategies

The investment strategy of an investment fund may change over time. The fund managers may therefore no longer follow the same investment strategy in the future that they applied in the past. In addition, in some cases the specific details of the particular investment strategy may be proprietary, and consequently investors in the investment fund will not have access to the full details of those methods or be able to check whether those methods are being followed. In particular, an investment fund may seek to engage in increasingly less liquid investments in an effort to achieve above-average risk-adjusted returns.

Risks arising from misconduct by the fund managers

Misconduct on the part of its fund managers may result in the respective investment fund being exposed to claims for damages by third parties or suffering substantial losses up to and including the total loss of the assets under management. This includes, for example, failure to observe the agreed investment strategies, misappropriation of fund assets, issuing false reports about the investment activities or the discovery of other forms of misconduct. There is also the possibility of breaches of securities laws due to the improper use of confidential information or the falsification of information that is significant for valuation purposes, which could result in some circumstances in substantial liability for damages to third parties or liabilities in connection with payments out of realised income or penalties imposed on the investment fund itself.

6.4. Specific risks arising from assets purchased in the case of Fund Shares as the Underlying

Specific risks involved with investments in assets with low credit ratings

If an investment fund invests directly or indirectly in assets with a low credit rating (such as, for example, in securities with a rating below investment grade or distressed securities or loans), this will entail significant risks of loss for the relevant investment fund. Investments of this nature may be negatively affected by statutory provisions and other applicable regulations relating, for example, to insolvency proceedings, fraudulent transfers and other voidable transfers or payments, lender liability and the forfeiture of certain rights. In addition, the market prices of these assets are subject to abrupt and unpredictable market movements and above-average price volatility, while the spread between the bid and offer price of such securities may be larger than is usual in other securities markets.

Specific risks involved with investments in volatile and illiquid markets

If an investment fund invests in markets that are volatile or whose liquidity cannot be guaranteed, it may be impossible or expensive (especially in the event that trading is suspended or in the event of or daily price fluctuation limits in the trading markets or in other cases) for that investment fund to liquidate its positions with a contrary market movement. Alternatively, it may not be possible in certain circumstances for a position to be opened or liquidated immediately (in the event that there is insufficient trading volume in the respective market or in other cases). Moreover, the market prices, if available, of investments subject to statutory or other restrictions on transfer or for which there is no liquid market generally display higher volatility, and in some circumstances it may be impossible to sell the investments at the desired time or to realise their fair value in the event of sale. Investments in
Specific risks involved with investments in other investment funds (Fund of Funds)

Where an investment fund ("Fund of Funds") invests in other investment funds ("Target Funds"), specific risks apply. The Target Funds in a Fund of Funds portfolio generally invest independently from each other and may from time to time hold economically converse positions. Moreover, the Target Funds may compete with each other for the same positions in certain markets. There can be no guarantee that the selection of a number of Target Funds will be more successful than the selection of only a single Target Fund. The portfolio of a Fund of Funds may also be composed of only a few Target Funds and/or may be focused on particular strategies. Such a concentration on only a few investment managers and/or investment strategies involves particularly high risks and may lead to larger losses than in the case of a broad diversification of assets.

The fund managers of the respective Target Funds act independently from each other. It may therefore happen that different investment funds may pursue the same or opposite investment strategies. This can lead to an accumulation of existing risks and to the neutralisation of potential opportunities to generate profits. In general, the investment manager of a Fund of Funds is not in a position to control the management of the Target Funds.

The Fund of Funds must bear not only its own administration and management fees but also the administration and management fees of the Target Fund. There is therefore generally a doubling of the fees borne by the fund. A Fund of Funds normally pays substantial charges (including the Target Fund managers’ fees based on assets under management and performance-related allocations or fees) which, if incurred, are payable irrespective of the overall profitability of the Fund of Funds (as opposed to the profitability of the individual Target Fund). The fees and expenses incurred by a Fund of Funds reduce the net asset value and therefore the performance of such a Fund of Funds. Consequently, the value of a Fund of Funds does not fully reflect the total performance of the Target Funds it is invested in.

Target Funds and their respective fund managers may be subject to varying levels of regulation. Certain investments in funds and accounts opened and maintained may not be subject to comprehensive government regulation.

Specific risks involved with investing exclusively in another investment fund (Feeder Fund)

Where an investment fund ("Feeder Fund") invests its assets more or less exclusively in another investment fund ("Master Fund"), the value of the investment may, if the Feeder Fund has a relatively small share in the Master Fund, be dependent on the actions of the other investors holding a larger share in the Master Fund, since they have a majority of the votes. Multiple Feeder Funds investing in the same Master Fund can result in an increased risk of conflicts of interest, especially for tax reasons. If a large shareholder redeems its shares in the Master Fund, the expense ratio for the remaining investors will increase. Furthermore, as the redemption of shares will lead to the sale of a significant portion of the Master Fund’s assets, the remaining portfolio will be less diversified.

6.5 Specific risks due to particular portfolio management techniques in the case of Fund Shares as the Underlying

Risks of raising debt capital

Where debt capital is raised for the account of an investment fund, this creates an additional layer of indebtedness which may have a negative impact on the performance of the relevant investment fund in the event that the portfolio value falls and returns are negative. This also applies to debt capital raised in the case of investment vehicles in which an investment fund invests directly or indirectly. If the returns and the growth in value of investments financed with debt are less than the costs of raising that debt, the net asset value of the relevant investment fund will fall. Accordingly, any event that has a
negative effect on the value of an investment made by the investment fund or the underlying investment vehicles will be magnified to the extent that debt has been employed. The cumulative effects of using debt in a market moving against an investment financed with debt could result in a substantial loss, which may be greater than if debt capital had not been employed.

**Risks involved with short sales**

If the investment strategy of an investment fund includes short sales (i.e. the sale of assets that are generally not in the seller's possession at the date of sale), this is done in the expectation of buying the relevant asset (or an exchangeable asset) at a lower price at a later date. Firstly, the asset sold must be borrowed to enable it to be delivered to the purchaser. The asset to be returned to the lender is purchased. A short sale of this nature will generate a loss if the value of the relevant asset increases between the date of the short sale and the date at which the asset is purchased. A short sale therefore theoretically incorporates an unlimited risk with respect to an increase in the price of the relevant asset, which could theoretically result in unlimited losses. There can also be no guarantee that the assets needed to cover a short position will be available for purchase. In addition, there are regulations in some markets prohibiting short sales at a price below the most recent selling price, which may prevent short sales being executed at the most favorable time.

**Risks involved with lending securities and with entering into sale and repurchase transactions**

In order to generate additional income, investment funds may lend securities to broker-dealers, major banks or other recognised institutional borrowers of securities or enter into sale and repurchase transactions which involve the sale of securities held by the investment fund with a simultaneous agreement that the investment fund will repurchase such securities at an agreed price and date. The investment funds earn income from these transactions, which are generally collateralised by cash, securities or documentary credits. An investment fund might suffer a loss if the borrowing financial institution does not meet its obligations under the loan or sale and repurchase transaction. There is a risk that the securities lent may not be available to the investment fund again at the proper time and that it may therefore lose the opportunity to sell the securities at a desirable price.

**Specific investment risks involved with synthetic investment strategies**

Specially structured derivative instruments (such as swap contracts) may also be used in managing investment funds, in order to benefit synthetically from the financial performance of an investment in particular assets or baskets of assets. Transactions of this nature involve particular risks. If an investment fund enters into a transaction with respect to a derivative instrument in which it undertakes to take over the payments from a particular asset or a basket of assets, in some circumstances it may not be able to increase or reduce its position during the term of that instrument. Moreover, synthetic derivative instruments are generally highly illiquid and it may not be possible to terminate them prior to the respective final payment date, or it may be possible to do so only by incurring contractual penalties. The use of synthetic derivative instruments does not convey any rights of ownership or control or other rights that would be acquired in the event of a direct investment in the underlying assets.

**Risks involved with entering into hedging transactions**

The portfolio managers of an investment fund may make use of a variety of derivative financial instruments, such as options, interest rate swaps, caps and floors, futures and forward contracts, both for investment purposes and for hedging purposes (hedging transactions). Hedging transactions entail particular risks including possible default by the counterparty to the transaction, illiquidity, and, if the respective portfolio manager's or advisor's assessment of particular market movements is incorrect, the risk that the use of hedging transactions could result in greater losses than would have been the case without those transactions. Nonetheless, with respect to certain investment positions, an investment fund may not be sufficiently hedged against market fluctuations; in that case, an investment position could generate a greater loss than would have been the case if the investment fund had hedged the position adequately. Moreover, it should be noted that an investment fund's portfolio will always be exposed to certain risks that cannot be hedged, such as credit risk (relating both to particular securities and to counterparties).
Specific risks associated with exchange traded funds

Exchange traded funds ("ETFs") generally aim to replicate the performance of a particular index, basket or individual asset ("ETF-Benchmark"). However, the constitutional documents or the investment program of an ETF allow the ETF-Benchmark to be replaced in certain circumstances. As a result, the ETF might not continuously replicate the performance of the original ETF-Benchmark. ETFs may either replicate the performance of an ETF-Benchmark fully by investing directly in the assets included in the relevant ETF-Benchmark or use synthetic replication techniques like swaps or other sampling techniques. The value of ETFs is therefore particularly dependent on the value and performance of the assets and securities used to replicate the ETF-Benchmark. Nevertheless, differences between the unit price of the ETF and the actual value of the ETF-Benchmark cannot be ruled out.

In contrast to other funds ETFs are generally not actively managed. Instead, investment decisions are predetermined by the relevant ETF-Benchmark and its constituent assets. A negative performance of the ETF-Benchmark usually results in a decline of the ETFs net asset value and the unit price determined on the relevant exchange. Moreover, the replication of an ETF-Benchmark typically entails additional risks such as the risk that some ETF-Benchmark constituents may be illiquid or the credit risk relating to swap counterparties; in particular, ETFs using derivatives to replicate or hedge positions may incur disproportionately high losses in the case of an unexpected negative performance by the ETF-Benchmark due to the leverage effect.

There can be no guarantee in the case of ETFs that an admission to trading or quotation can be maintained at all times. The unit price of an ETF is composed of the total value of all the securities in its portfolio, less any liabilities, i.e. the net asset value. A decline in the unit price or value of the fund's securities or other investments while replicating the performance of an ETF-Benchmark will result in losses for the fund and the fund units. Even a wide spread of investments and broad diversification cannot exclude the risk of a decline in the unit prices due to the negative development of particular markets. The unit price of an ETF is determined on the basis of supply and demand. This unit price may differ from the final net asset value published by the investment fund. Divergences may therefore arise between the unit price and the actual net asset value during trading hours.

7. Risks related to securities

The performance of Securities linked to a Reference Strategy Index with components consisting of one or more securities (such securities referred to as "Index Component Securities"), primarily, depends on the performance of and the payments under the respective Index Component Securities.

In particular, Index Component Securities are subject to the risks described in parts "C. Risks related to the Securities", "1. Risks related to the market" and "2. Risks related to the Securities in general". Inter alia, there is a risk that no active trading market for the Index Component Securities may exist or that the Index Component Securities may not be sold at an adequate price.

In case of structured Index Component Securities the performance and amounts to be distributed may primarily depend on complex pay-out formulas, the reaching of certain thresholds and limits, the occurrence or non-occurrence of events, the reference to one or more underlyings or other factors. Furthermore, structured Index Component Securities may provide for a significantly increased (leveraged) participation in the performance of its underlying(s) (Index Component Securities can be subject to the risks defined in "Risks related to the Underlying or its Components"). It is not possible to predict how the price of the Index Component Securities or amounts to be distributed under the Index Component Securities will develop in the future. In addition, Index Component Securities may be exposed to the risk of a worthless expiration. The price of the Index Component Securities and amounts to be distributed under the Index Component Securities may even be zero in case of an unfavourable development of its underlying(s) or due to the structure of the Index Component Securities.

The performance of the Index Component Securities and amounts to be distributed under the Index Component Securities depend, in addition, on the creditworthiness of the issuer of the Index Component Securities and its ability and willingness to perform its duties. The Security Holder is exposed to the economic and business risk of the issuer of the Index Component Securities. Payments under the Index Component Securities may rank behind other obligations of the issuer of the Index
Component Securities due to statutory or contractual provisions (e.g. following a restructuring) or may be subject to a deferral, write-down, conversion or expiration or be accounted as non-interest bearing. Payments under the Index Component Securities, in general, constitute unsecured obligations and are not guaranteed or protected by a statutory deposit protection. Due to these circumstances, the price of the Index Component Securities and amounts to be distributed under the Index Component Securities may even be zero.

Accordingly, an investment in Securities linked to a Reference Strategy Index with components consisting of one or more securities (Index Component Securities) may bear similar risks to a direct investment in the respective securities. Any events affecting the Index Component Securities may result in adjustments to the Reference Strategy Index or in an extraordinary early termination of the Securities (as described in Risks related to Call Events).

8. Risks related to Currency Exchange Rates

For all Securities with a Currency Exchange Rate as Underlying (the "Currency-Exchange-Rate-linked Securities") the same risks apply as described in section Currency and Currency Exchange Rate risk with respect to the Securities and Currency Exchange Rate risk. In addition, potential investors should also consider the following risk factors with respect to Currency Exchange Rates as Underlying:

Similar risks as a direct investment in currencies

Currency-Exchange-Rate-linked Securities are linked to one or more specified currencies. Payments depend on the performance of the underlying currency/ies and may be substantially lower than the amount the Security Holder has initially invested. An investment in Currency-Exchange-Rate-linked Securities may bear similar market risks as a direct investment in the respective underlying currency/ies. This might especially be the case if the underlying currency is the currency of an emerging market. Such risk may in particular result from a high volatility (exchange rate fluctuations). Therefore, potential investors should be familiar with foreign currencies as investment asset class.

Risks arising from different price sources

The Currency Exchange Rates displayed at the same time on different price sources may differ e.g. with the result that the price, which is displayed on a price source used for the continuous observation, is not used for the calculation or determination of the Differential Amount.

Risk arising from an indirect determination of the relevant Currency Exchange Rate

Potential investors should consider that the relevant Final Terms may specify that the reference price relevant for the calculation or specification of the Redemption Amount is not determined directly from the Currency Exchange Rate defined as Underlying, but indirectly via a computation of two Currency Exchange Rates (e.g. AUD/EUR and EUR/GBP) ("Cross Currency Exchange Rate"). This Cross Currency Exchange Rate may differ materially from the reference price used for the calculation or specification of the Redemption Amount published by a recognized financial information provider or by a central bank. This may have a negative effect on the Securities.

In case of Currency-Exchange-Rate-Linked Securities, Security Holders may be subject to an increased risk of substantial loss of the capital invested.
GENERAL INFORMATION ON THE BASE PROSPECTUS

This document constitutes a base prospectus (the "Base Prospectus") according to Art. 5 (4) of Directive 2003/71/EC, in the version valid at the date of the Base Prospectus, (the "Prospectus Directive") in connection with § 6 of the German Securities Prospectus Act, in the version valid at the date of the Base Prospectus (Wertpapierprospektgesetz, the "WpPG") in connection with the Commission Regulation (EC) No 809/2004, in the version valid at the date of the Base Prospectus relating to securities with single-underlying (without capital protection) (the "Securities") issued from time to time by UniCredit Bank AG ("HVB" or the "Issuer") under the Euro 50,000,000,000 Debt Issuance Programme (the "Programme").

This Base Prospectus is to be read together with the information provided in (a) the registration document of UniCredit Bank AG dated 17 April 2018 (the "Registration Document"), whose information is incorporated herein by reference, (b) the supplements to this Base Prospectus in accordance with § 16 WpPG, if any (the "Supplements") (c) all other documents whose information is incorporated herein by reference (see "General Information– Information incorporated by reference in this Base Prospectus" below) as well as (d) the respective Final Terms (the "Final Terms").

No person has been authorised to give any information or to make any representation not contained in or not consistent with this Base Prospectus or any other information supplied in connection with the Programme and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer.

Neither this Base Prospectus nor any other information supplied in connection with the Programme constitutes a recommendation, an offer or invitation by or on behalf of the Issuer to any person to subscribe for or to purchase any Securities. The delivery of this Base Prospectus does not imply that the information contained herein concerning the Issuer is correct at any time subsequent to the date of this Base Prospectus or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date indicated in the document containing the same. The Issuer will be obliged to supplement this Base Prospectus pursuant to § 16 WpPG. Investors should read inter alia the most recent non-consolidated or consolidated financial statements and interim reports, if any, of the Issuer when deciding whether or not to purchase any Securities.

The distribution of this Base Prospectus and the offer or sale of Securities may be restricted by law in certain jurisdictions. Persons into whose possession this Base Prospectus or any Securities come must inform themselves about any such restrictions. In particular, there are restrictions on the distribution of this Base Prospectus and the offer or sale of Securities in the United States of America and on the offer or sale of the Securities in the European Economic Area (see "General Information – Selling Restrictions" below). The Securities have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act") and are subject to U.S. tax law requirements. Subject to certain exceptions, Securities may not be offered, sold or delivered within the United States of America or to U.S. persons (see "General Information – Selling Restrictions" below).
RESPONSIBILITY STATEMENT

UniCredit Bank AG having its registered office at Arabellastraße 12, 81925 Munich, Germany accepts responsibility for the information contained in this Base Prospectus. UniCredit Bank AG declares that the information contained in this Base Prospectus is, to the best of its knowledge, in accordance with the facts and that no material information has been omitted.
CONSENT TO THE USE OF THE BASE PROSPECTUS

The Issuer may consent to the use of the Base Prospectus to all financial intermediaries (general consent) or to only one or several specified financial intermediaries (individual consent) or to no financial intermediary (no consent) and will designate its decision in the Final Terms.

In case of a consent, the following applies:

The Issuer consents to the use of the Base Prospectus, any supplement thereto as well as the relevant Final Terms by financial intermediaries in the member states, in which the Base Prospectus has been notified, to the extent such member states have been specified as offering countries during the offer period specified in the Final Terms and the Issuer assumes the liability for the content of this Base Prospectus also with regard to any subsequent resale or final placement of the Securities.

The Issuer's consent to the use of the Base Prospectus may be given under the condition that

(i) each financial intermediary complies with the applicable selling restrictions and the terms and conditions of the offer and

(ii) the consent to the use of the Base Prospectus is not revoked

In addition, the Issuer’s consent to the use of the Base Prospectus may be given under the condition that the financial intermediary using the Base Prospectus commits itself to comply any information and notification requirements under investment laws and regulations with regard to the Underlying or its Components. This commitment is made by the publication of the financial intermediary on its website stating that the prospectus is used with the consent of the Issuer and subject to the conditions set forth with the consent.

Furthermore, in connection with the consent to the use of the Base Prospectus the Issuer may impose the condition that the financial intermediary using the Base Prospectus commits itself towards its customers to a responsible distribution of the Securities. This commitment is made by the publication of the financial intermediary on its website stating that the prospectus is used with the consent of the Issuer and subject to the conditions set forth with the consent.

Apart from that, the consent is not subject to further conditions.

Information on the terms and conditions of the offer by any financial intermediary is to be provided at the time of the offer by the financial intermediary.

Any further financial intermediary using the Base Prospectus shall state on its website that it uses the Base Prospectus in accordance with this consent and the conditions attached to this consent.

New information with respect to financial intermediaries unknown at the time of the approval of the Base Prospectus or the filing of the Final Terms, as the case may, will be published and will be found on the website of the Issuer (www.onemarkets.de) under "Rechtliches", "Zustimmung zur Prospektverwendung" (or any successor website which the Issuer will publish in accordance with § 6 of the General Conditions).
DESCRIPTION OF THE ISSUER

The following information regarding the Issuer are hereby incorporated by reference into this Base Prospectus:

GENERAL INFORMATION ON THE SECURITIES

Features of the Securities

General

The Securities will be issued as non-par value notes or certificates or as notes or certificates with Nominal Amount, as specified in the Final Terms. The method of calculating the redemption amount of the Securities and the provisions as to whether, in cases where the Underlying are shares, physical delivery of the Underlying is made, are linked to the value of the Underlying at one or more certain dates, times or periods.

Under this Base Prospectus Securities of the product types mentioned below in section "Product types" may be issued for the first time, a public offer of Securities which has already started may be continued, the issue volume of Securities the offer of which has already started may be increased and an application for admission of Securities to trading on a regulated or other equivalent market may be made.

Continuance of public offer or increase

In case of Securities, which have been publicly offered or admitted to trading for the first time before the date of this Base Prospectus (the "Previous Products"), the Final Terms may specify that they are to be read in conjunction with this Base Prospectus as well as along with another base prospectus which is specified in the Final Terms (a "Previous Prospectus"), of which the description of the Securities (if so specified in the Final Terms) and the conditions of the Securities are incorporated by reference into this Base Prospectus. In this respect, the description of the Securities (if so specified in the Final Terms) and the conditions of the Securities of the relevant product type are not printed in this Base Prospectus, but have to be read in the respective Previous Prospectus (see sections "Description of the Securities incorporated by reference in the Base Prospectus" and "Conditions of the Securities incorporated by reference in the Base Prospectus").

In addition, all Securities of the product types set out in this Base Prospectus, which have been issued or continued under the Base Prospectus of UniCredit Bank AG dated 22 May 2017 and the Base Prospectus of UniCredit Bank AG dated 8 February 2018 and the Base Prospectus of UniCredit Bank AG dated 18 May 2018 for the issuance of securities with Single-Underlying (without capital protection), or Securities, the public offer of which has been continued under the Base Prospectus of UniCredit Bank AG dated 22 May 2017 and the Base Prospectus of UniCredit Bank AG dated 8 February 2018 and the Base Prospectus of UniCredit Bank AG dated 18 May 2018 for the issuance of Securities with Single-Underlying (without capital protection), and the public offer of which shall be continued under this Base Prospectus, are identified by their ISIN in the section "Continued Offerings" of this Base Prospectus. For this purpose, (i) the conditions of the Securities and (ii) the form of Final Terms, each as set out in the Base Prospectus of UniCredit Bank AG dated 22 May 2017 and the Base Prospectus of UniCredit Bank AG dated 8 February 2018 and the Base Prospectus of UniCredit Bank AG dated 18 May 2018 for the issuance of Securities with Single-Underlying (without capital protection), are hereby incorporated by reference into this Base Prospectus. A list setting out the information incorporated by reference is provided on page 313 et seq. The Final Terms of the specified Securities are published on the website of the Issuer under www.onemarkets.de and may be inspected by searching for the relevant ISIN.

Form of the Securities

Securities governed by German law:

The Securities are bearer debt instruments (Inhaberschuldverschreibungen) pursuant to § 793 of the German Civil Code (Bürgerliches Gesetzbuch, "BGB").

The Securities will be represented by a global note without interest coupons.

The Security Holders are not entitled to receive definitive Securities.

Securities governed by Italian law:

The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (Testo Unico della Finanza).

The Securities will be represented by book entry.

The Security Holders are not entitled to receive definitive Securities.

Underlying

The Underlying of the Securities may either be a Share, a Fund Share, an Index, a commodity, a futures contract or a currency exchange rate.

The term "Share" also comprises shares of UniCredit S.p.A. or shares of other entities belonging to the same Group as the Issuer (the "Group Shares"). provided that such shares are admitted to trading on a regulated market, and securities with the form of depository receipts (e.g. American Depository Receipts (ADRs) or Regional Depository Receipts (RDRs) (respectively "Depository Receipts")). "Group" means the UniCredit Group, to which UniCredit S.p.A. is the holding company (the "Holding Company"). The Group and the Holding Company are further described in the Section "Description of the Issuer" of this Base Prospectus.

The term "Fund Share" may refer to a unit or a share in an investment vehicle (fund), including exchange traded funds ("ETF").

A "Futures Contract" refers to a future contract on commodities.

An "Index" may refer to assets or financial instruments of another asset category (e.g. Shares, Fund Shares, Indices, commodities and/or Futures Contracts).

Index may be the Index described in the section "Description of indices composed by the Issuer or by any legal entity belonging to the same group", sub-section "A. Descriptions of indices incorporated by reference" or sub-section "B. Descriptions of indices set out in this Base Prospectus" or another Index.
which is not composed by the Issuer or any legal entity belonging to the same group. Further Indices which are composed by the Issuer or any legal entity belonging to the same group of the Issuer may be included in the Base Prospectus by way of a supplement pursuant to § 16 WpPG.

In case of Closed End Securities (Product Type 2) and Open End Securities (Product Type 4) the Index in the above sense may also be a "Reference Strategy Index". A Reference Strategy Index replicates a (hypothetical) reference portfolio which is based on an investment strategy and actively implemented, on a continuous basis, by an Index Sponsor (ongoing composition and weighting of the Reference Strategy Index). The reference portfolio only consists of data sets; no actual trading and investment activities are carried out with regard to the reference portfolio. The investment strategy (e.g. investment universe, strategy, allocation, analysis) is developed and determined by the Index Sponsor; neither the Issuer, the Calculation Agent, the Index Calculation Agent nor an independent third party contributes to its development or conducts any review. The index description specifies the method of calculation, determination and publication of the price of the Reference Strategy Index (the "Index Concept") and the guidelines for the Index Sponsor, conferring a broad discretion on the Index Sponsor in relation to the active management of the reference portfolio. I.e., the sole decision on the composition and weighting of the reference portfolio is reserved to the Index Sponsor. The Index Sponsor, the Issuer, the Calculation Agent and/or the Index Calculation Agent enter into an index sponsoring agreement as the legal basis for the application of the Reference Strategy Index as Underlying of the Securities.

A Reference Strategy Index may, inter alia, consist of the following index components:

- Shares (including Depository Receipts),
- Indices,
- commodities,
- Futures Contracts
- Fund Shares (including ETF) and
- structured securities.

Thereby, the Index may be a buying position (long) or selling position (short).

A Reference Strategy Index may, inter alia, consist of the following features:

- index components which are traded in foreign currencies,
- a participation factor (leverage),
- a periodical (re-)allocation or weighting,
- events or limits as a condition for certain (re-)allocation or weighting,
- adjustment in case of a distribution made by the index components,
- adjustments in case of the occurrence of certain events,
- events (e.g. Trigger Event), which result in a suspension of the index calculation or a liquidation of the reference portfolio and
- a deduction of (fixed or variable) fees and commissions.

Details regarding the respective Reference Strategy Index will be included in the Base Prospectus by way of a supplement pursuant to § 16 WpPG. In particular, a supplement might include (further) information regarding the Risk Factors, the General Conditions on the Securities, the Securities Description and the index description. Information about the past and future performance of the Reference Strategy Index and its volatility will be published on the website which is specified in the Final Terms.

In any above-mentioned case, the Underlying constitutes a single underlying.
The following table illustrates potential Underlyings in relation to the respective Product Types ("X" = potential Underlying, "---" = no potential Underlying). The Underlying will be specified in the Final Terms.

The Underlying is the main influencing factor on the value of the Securities. In general, the Security Holders participate in any positive as well as in any negative performance of the Underlying during the term of the Securities.

The deduction of any fees or other price-influencing factors may also influence the actual performance of the Securities.

Neither the Issuer nor any affiliated entity is in any way obliged to buy or hold the Underlying or its components. The issuance of the Securities does neither limit the Issuer nor its affiliated entities to dispose of, encumber or transfer any rights, claims or assets with regard to the Underlying or its components or with regard to derivative contracts linked thereto.

The Securities may be linked to an index which is used as a benchmark (the "Benchmark Index") to determine the payments under the Securities or the value of the Securities, to which Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 ("Benchmark Regulation") is applicable. In this case, the Issuer is subject to certain requirements regarding the use of the respective Benchmark Index and corresponding disclosure obligation in relation to this Base Prospectus, inter alia, regarding the specification whether an administrator of the Benchmark Index (the "Benchmark Administrator") is authorized or registered in accordance with the Benchmark Regulation (the "Authorized or Registered Benchmark Administrator"). However, during a transitional period (not ending before 1 January 2020), in the course of which authorization or registration of the respective Benchmark Administrator shall occur, certain Benchmarks Indices, in particular such Benchmarks Indices already in existence before 1 January 2018, may be used without authorization or registration of the respective Benchmark
Administrator unless the competent authority has rejected an application of the Benchmark Administrator for authorisation or registration. During the transitional period the Issuer expects to receive no or only limited relevant information, *inter alia*, in relation to the Benchmark Administrator’s authorization or registration status. Investors should note that during the transitional period relevant information may not be included in the Base Prospectus in whole or in part, although the Issuer acts in line with any requirements set out in the Benchmark Regulation and the WpPG. If available, the Final Terms will specify with respect to a Benchmark Index whether or not an Authorized or Registered Benchmark Administrator exists.

**Term**

The Securities (other than the Product Types 4 and 5) have a fixed term, which may be reduced in certain circumstances (e.g. if the Issuer extraordinarily calls the Securities). In case *Closed End Securities* and *Closed End Leverage Securities* (Product Types 2 and 3) the Security Holder and/or the Issuer, in addition, may ordinarily call the Securities.

*Open End Securities* and *Open End Leverage Securities* (Product Types 4 and 5) do not have a fixed term. Instead they will continue indefinitely until the Security Holders’ exercise their Redemption Right or the Issuer exercises its Regular Call Right. Following such exercise the term of the Securities is limited.

**Quanto elements**

Non-Quanto Securities are Securities where the Currency of the Underlying is the same as the Specified Currency. Quanto Securities are Securities where the Currency of the Underlying is not the same as the Specified Currency and where a currency hedging element is provided. In the case of Quanto Securities, one unit of the Currency of the Underlying corresponds to one unit of the Specified Currency. In the case of Quanto Securities with physical delivery, the quantity of the Underlying to be delivered is increased or reduced before delivery according to the exchange rate development in order to offset any exchange rate losses or gains during the term of the Securities.

**Compo elements**

Compo Securities are Securities where the Currency of the Underlying is not the same as the Specified Currency and where no currency hedging element is provided. Exchange Rate movements will be taken into account when specifying the Redemption Amount.

In case of Compo Securities with *Cross Rate* two exchange rates are taken into consideration when specifying the Redemption Amount whereby the Currency of the Underlying shall be converted to a third currency and the third currency in turn shall be converted to the Specified Currency.

In case of all Compo Securities the Security Holder therefore is exposed to the full exchange rate risk upon maturity and, in the case of a premature sale of the Securities, during the term of the Securities.

**Limitation of the rights**

Upon the occurrence of one or more Adjustment Events, as specified in the relevant Final Terms, the Calculation Agent will in its reasonable discretion (§ 315 BGB) (if the Securities are governed by German law) or, respectively, by acting in accordance with relevant market practice and in good faith (if the Securities are governed by Italian law) adjust the Terms and Conditions of these Securities and/or all prices of the Underlying or its components determined by the Calculation Agent on the basis of the Terms and Conditions of the Securities, pursuant to the relevant Final Terms, in such a way that the economic position of the Security Holders remains unchanged to the greatest extent possible.

In case of *Closed End Securities* (Product Type 2) and *Open End Securities* (Product Type 4) with a Reference Strategy Index as Underlying, an adjustment may be made by the Index Sponsor on the level of the Reference Strategy Index in accordance with the index description in case of the occurrence of one or more adjustment events (as defined in the index description).

Upon the occurrence of one or more Call Events (the "Call Events"), as specified in the relevant Final Terms, the Issuer may call the Securities extraordinarily pursuant to the Final Terms and redeem the Securities at their Cancellation Amount. The "Cancellation Amount" is the fair market value of the
Securities on the day specified in the relevant Final Terms, determined by the Calculation Agent in its reasonable discretion (§ 315 BGB) (if the Securities are governed by German law) or, respectively, by acting in accordance with relevant market practice and in good faith (if the Securities are governed by Italian law) under then prevailing circumstances.

Obvious typing and calculation errors or similar obvious errors in the Terms and Conditions entitle the Issuer to rescission vis-à-vis the Security Holders. The Issuer may combine the declaration of rescission with an offer to continue the Securities under amended Terms and Conditions. Furthermore, the Issuer is entitled to correct or amend incomplete or inconsistent provisions in the Terms and Conditions in its reasonable discretion (§ 315 BGB) (if the Securities are governed by German law) or, respectively, by acting in accordance with relevant market practice and in good faith (if the Securities are governed by Italian law). If in such case a public offer has not yet been closed or admittance of the Securities for trading on a regulated or other equivalent market is planned, the Issuer will publish a corrected version of the Final Terms of the respective Securities and, if the legal requirements are fulfilled (in particular, a material inaccuracy of the Base Prospectus), publish in advance a supplement to this Base Prospectus pursuant to § 16 WpPG.

**Waiver Right**

If specified in the relevant Final Terms, each Security Holder has the right to waive the automatic exercise of the exercise right of the Securities held by it by submission of a duly completed waiver notice.

**Governing law of the Securities**

The Securities, as to form and content, and all rights and obligations of the Issuer and the Security Holder may either be governed by the laws of the Federal Republic of Germany or by the laws of the Republic of Italy, as specified in the relevant Final Terms.

**Status of the Securities**

The obligations under the Securities constitute direct, unconditional and unsecured obligations of the Issuer and rank, unless provided otherwise by law, pari passu with all other unsecured unsubordinated present and future obligations of the Issuer.

**Publications**

The Base Prospectus, potential supplements and the respective Final Terms are available on the website(s) as specified in the respective Final Terms or on any successor website(s) (see below) in accordance with § 14 WpPG.

The Issuer does not intend to provide information following an issuance of Securities, unless the Terms and Conditions provide for an obligation to publish notices in certain cases. In such cases, a publication will be made on the Website(s) as specified in the Final Terms in accordance with § 6 of the General Conditions. The Issuer may replace these website(s) by any successor website(s) which again will be published by notice in accordance with § 6 of the General Conditions.

**Issue Price**

If the Issue Price per Security is specified prior to the start of the public offering, it will be set out in the Final Terms.

If the Issue Price per Security is determined after the start of the public offering, the Final Terms will specify the criteria or conditions, on the basis of which the Issue Price may be determined. In this case the Issue Price will be published after its specification on the website(s) as specified in the relevant Final Terms.

**Pricing**

The Issue Price as well as the bid and offer prices quoted by the Issuer during the term of the Securities are based on internal pricing models of the Issuer. They may contain, beside upfront and distribution fees, an expected margin for the Issuer. Generally, the margin may contain costs, which,
GENERAL INFORMATION ON THE SECURITIES

i.e., cover the Issuer's costs for structuring the Securities, risk hedging of the Issuer and the distribution.

**Selling concession or other concessions**

Selling concessions or other concessions may be charged as set out in the Final Terms.

**Placing and Distribution**

The Securities may be distributed by way of public or private placements and either by the Issuer or through financial intermediaries as agreed between the Issuer and the relevant financial intermediary and as stated in the applicable Final Terms.

**Admission to trading and listing of the Securities**

The Issuer may make an application to admit the Securities to trading on a regulated market (the Luxembourg Stock Exchange, Euronext Paris or any other regulated market in France, Italy or Luxembourg) or other equivalent market. In such a case the relevant Final Terms set out the regulated or other equivalent markets and the earliest date (if known) on which the Securities are or will likely be admitted to trading.

In addition, the relevant Final Terms will specify all the regulated or other equivalent markets, on which, to the knowledge of the Issuer, securities of the same class of securities are already admitted to trading.

The Issuer may also make an application to listing or trading of the Securities on another stock exchange, another market and/or trading system (including a multilateral trading facility (MTF)) which is not a regulated or other equivalent market. In this case the Final Terms may indicate the respective other stock exchange, other market and/or other trading system and the earliest date (if known) on which the Securities are or will likely be listed or traded on.

The Securities may also be issued without being admitted to trading, listed or traded on any regulated or other equivalent market, any other stock exchange, any other market and/or trading system.

Even if the Issuer makes such application there is no guarantee that this application will be granted or that an active trading will occur or develop. Furthermore, in case of an admission trading may only be single-sided (bid or ask prices).

**Potential investors**

The Securities may be offered to qualified investors and/or retail investors and/or institutional investors as stated in the Final Terms.

**Terms and conditions of the offer**

If applicable, the following details regarding the terms and conditions of the offer will be indicated in the Final Terms:

(i) day of the first public offer;

(ii) start of the new public offer;

(iii) information about the continuance of a public offer of Securities which have already been issued;

(iv) information about the increase of Securities which have already been issued;

(v) a subscription period;

(vi) the countr(y)(ies) where the offer(s) to the public takes place: France, Italy, and/or Luxembourg;

(vii) smallest transferable and/or tradable unit/lot/amount;

(viii) the conditions for the offer of the Securities;

(ix) possibility of an early termination of the public offer;

(x) the condition for the offer in relation to an admission for trading prior to the Issue Date
Offer during a subscription period

The Securities may be offered during a subscription period. For the purpose of acquisition, a potential investor has to make a subscription order to be forwarded to the Issuer during the Subscription Period. If specified in the Final Terms, the Securities may be continuously offered thereafter. The Issuer reserves the right to extend or shorten the subscription period or to withdraw the issue before the Issue Date during the subscription period for any reason. The Issuer has the right to accept or reject the subscription orders of potential investors in whole or in part, irrespective of whether or not the intended volume of the Securities to be placed is reached. The Issuer has the right to make allocations at its own discretion; whether and to what extent the Issuer exercises such right is subject to its own discretion. Potential investors who made purchase offers in the form of subscription orders may presumably be informed by the Issuer from the first Banking Day onwards following the end of the subscription period on the number of Securities allocated to them. Trading in the Securities may start prior to the notification of the allocation. In the case of Securities being offered to Italian consumers, the Final Terms may specify that subscription orders are subject to revocation rights applicable to the "door to door selling" and the "long distance technique selling" and the conditions of such revocation right.

Method and time limits for delivery of the Securities

The Securities are delivered in terms of co-ownership of the Global Note which will be kept in custody in case of Securities governed by German law.

The Securities are delivered in terms of ownership of an account held with an account holder which is an intermediary opening an account with and adhering to the Clearing System in case of Securities governed by Italian law.

Delivery is provided for against payment or free of payment or any other delivery method as specified in the Final Terms.
DESCRIPTION OF THE SECURITIES

Product Type 1: Discount Securities

General

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date. The price of the Security at the time of issue is lower than the current price of the Underlying multiplied by either the relevant Ratio or, respectively the Ratio Factor and if applicable by applying FX Exchange Rate. For this discount, the investor participates in the performance of the Underlying only up to the Maximum Amount.

In respect of their redemption, the Securities may be linked to Shares as well as Indices, a commodity or Fund Shares.

For Securities linked to Shares other than Group Shares as well as Fund Shares, it may be specified that redemption as at Final Payment Date is made

- for Securities with cash settlement, exclusively by payment of a Redemption Amount or
- for Securities with physical delivery, by cash settlement or by physical delivery of a certain quantity of the Underlying.

Securities linked to Group Shares, Indices or a commodity are always issued as Securities with cash settlement.

The Securities may be issued as non-Quanto, Quanto or Compo Securities.

Interest

The Securities do not bear interest.

Redemption

Redemption as at Final Payment Date depends on:

- the Cap and
- R (final).

The Cap is:

- specified in the respective Final Terms or
- equal to a specified percentage of R (initial).

The Maximum Amount or, respectively the method of its specification will be specified in the respective Final Terms

R (initial) means:

- for Securities where R (initial) has already been specified, the Reference Price specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
- for Securities with best-in observation, the highest Reference Price on the dates as specified in the respective Final Terms, or
- for Securities with worst-in observation, the lowest Reference Price on the dates as specified in the respective Final Terms.

R (final) means:

- for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
DESCRIPTION OF THE SECURITIES

- for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
- for Securities with best-out observation, the highest Reference Price on the dates as specified in the respective Final Terms, or
- for Securities with worst-out observation, the lowest Reference Price on the dates as specified in the respective Final Terms.

Redemption is made as follows:
- for Securities with cash settlement, by payment of the Redemption Amount or
- for Securities with physical delivery:
  - if R (final) is equal to or greater than the Cap, by payment of the Redemption Amount;
  - if R (final) is lower than the Cap, by delivery of the Underlying in a quantity expressed by the Ratio per Security. If the Ratio leads to a non-deliverable fraction of the Underlying, a cash amount expressed in the Specified Currency is paid instead in the amount corresponding to the value of the non-deliverable fraction of the Underlying.

The Redemption Amount is an amount in the Specified Currency that:
- for Securities with cash settlement, corresponds to R (final) multiplied by the Ratio, however, the Redemption Amount is not greater than the Maximum Amount; or
- for Securities with physical delivery, corresponds to the Maximum Amount.

The Ratio is specified in the respective Final Terms.

Upon the occurrence of a Call Event the Issuer may call and redeem the Securities early at their Cancellation Amount.

Product Type 2: Closed End Securities

General

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Redemption on the respective Redemption Date or the respective Call Date or the Final Payment Date depends on the Reference Price on the respective Observation Date.

In respect of their redemption and, in case of a distributing index as Underlying, the Dividend Amount, the Securities are linked to Indices (including a Reference Strategy Index), a commodity or Fund Shares.

The Securities are always issued as Securities with cash settlement.

The Securities may be issued as non-Quanto, Quanto or Compo Securities.

Interest

The Securities may be interest bearing at a fixed interest rate or non-interest bearing.

Dividend Amount

Security Holders of Securities that are linked to a distributing index as Underlying will receive a Dividend Amount at each Dividend Amount Payment Date. The Dividend Amount equals the Dividend Value of the Underlying for a certain Dividend Period multiplied by the Ratio.

Dividend Value and Dividend Period are specified in the respective Final Terms.

Redemption

Redemption depends on:

- whether the Redemption Right or the Regular Call Right is exercised or not and
- the Relevant Reference Price

Relevant Reference Price means
• if the Redemption Right is exercised, the Reference Price on the Observation Date immediately preceding the respective Redemption Date or
• if the Regular Call Right is exercised, the Reference Price on the Observation Date immediately preceding the respective Call Date, or
• if these rights are not exercised, the Reference Price on the Observation Date immediately preceding the Final Payment Date.

The Securities have a fixed term. However, they will be redeemed early if Security Holders exercise their Redemption Right or the Issuer exercises its Regular Call Right. Upon exercise of the aforementioned rights, Security Holders are entitled to the payment of the Redemption Amount at the respective Redemption Date or Call Date, as the case may be. If these rights have not been exercised, Security Holders are entitled to the payment of the Redemption Amount on the Final Payment Date.

The Redemption Amount corresponds to the Relevant Reference Price multiplied by the Ratio.

The Relevant Reference Price may be reduced by a Management Fee Adjustment, a Short Selling Fee Adjustment, an Index Calculation Fee Adjustment and/or a Quanto Fee Adjustment.

The Ratio may either be specified in the Final Terms or the Ratio may be determined as follows:

• the Ratio (initial) on the First Trade Date is specified in the Final Terms;
• on each Adjustment Date following the First Trade Date the Ratio may be adjusted by applying the Ratio Adjustment Factor where the Ratio Adjustment Factor is calculated taking into consideration, as the case may be, a Management Fee, a Short Selling Fee, an Index Calculation Fee, a Gap Risk Fee, a Dividend Tax Deduction and/or a Quanto Fee (in case of Quanto Closed End Securities).

The Redemption Amount will in no case be lower than zero.

Ratio, Gap Risk Fee (Adjustment), Index Calculation Fee (Adjustment), Short Selling Fee (Adjustment), Management Fee (Adjustment), Dividend Tax Deduction and Participation Factor Current will be specified in the relevant Final Terms.

Upon the occurrence of a Call Event the Issuer may call and redeem the Securities early at their Cancellation Amount.

**Product Type 3: Closed End Leverage Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Closed End Leverage Securities are securities whose underlying is a leverage index i.e. an index linked to the performance of a Reference Underlying disproportionally based on a (constant) Leverage Factor. The Security holders in turn participate disproportionally in the positive or negative performance of the Reference Underlying.

Redemption on the respective Redemption Date or the respective Call Date or the Final Payment Date depends on the Reference Price on the respective Observation Date.

In respect of their redemption, the Securities are linked to Indices.

The Securities are always issued as Securities with cash settlement.

The Securities may be issued as non-Quanto, Quanto or Compo Securities.

**Interest**

The Securities don’t bear interests.

**Redemption**

For Securities, redemption depends on:

• whether the Redemption Right or the Regular Call Right is exercised or not and
• the Relevant Reference Price
• the Ratio and the Ratio Adjustment Factor
Relevant Reference Price means

- if the Redemption Right is exercised, the Reference Price on the Observation Date immediately preceding the respective Redemption Date or
- if the Regular Call Right is exercised, the Reference Price on the Observation Date immediately preceding the respective Call Date or
- if these rights are not exercised, the Reference Price on the Observation Date immediately preceding the Final Payment Date.

Ratio means

- on the First Trade Date the Ratio (initial).
- on each Adjustment Date following the First Trade Date the Ratio shall be adjusted by applying the Ratio Adjustment Factor where the Ratio Adjustment Factor is calculated taking into consideration, as the case may be, a Management Fee, a Short Selling Fee, an Index Calculation Fee, a Gap Risk Fee, a Dividend Tax Deduction and/or a Quanto Fee (in case of Quanto Closed End Leverage Securities).

The Securities have a fixed term. However, they will be redeemed early if Security Holders exercise their Redemption Right or the Issuer exercises its Regular Call Right. Upon exercise of the aforementioned rights, Security Holders are entitled to the payment of the Redemption Amount at the respective Redemption Date or Call Date, as the case may be. If these rights have not been exercised, Security Holders are entitled to the payment of the Redemption Amount on the Final Payment Date.

The Redemption Amount corresponds to the Relevant Reference Price multiplied by the Ratio.

The Redemption Amount will in no case be lower than zero.

Ratio, Gap Risk Fee (Adjustment), Index Calculation Fee (Adjustment), Short Selling Fee (Adjustment), Management Fee (Adjustment), Dividend Tax Deduction and Participation Factor Current will be specified in the relevant Final Terms.

Upon the occurrence of a Call Event the Issuer may call and redeem the Securities early at their Cancellation Amount.

**Product Type 4: Open End Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

The redemption of the Securities at the respective Redemption Date following the exercise of the Redemption Right by the Security Holders or at the respective Call Date following the exercise of the Regular Call Right by the Issuer depends on the Relevant Reference Price. Relevant Reference Price is the Reference Price on the Observation Date immediately preceding the respective Redemption Date or Call Date, as the case may be. Each Banking Day may be the respective Redemption Date (if specified in the respective Final Terms) following the exercise of the Redemption Right by the Security Holders or the respective Call Date.

In respect of their redemption, the Securities may be linked to an Index (including a Reference Strategy Index), a commodity, a Futures Contract or a Fund Share.

The Securities are always issued as Securities with cash settlement.

The Securities may be issued as non-Quanto Securities, Quanto Securities or Compo Securities.

**Interest**

The Securities may be interest bearing at a fixed interest rate or non-interest bearing.

**Dividend Amount**

Security Holders of Securities that are linked to a distributing index as Underlying will in addition receive a Dividend Amount at each Dividend Amount Payment Date. The Dividend Amount equals the Dividend Value of the Underlying for a certain Dividend Period multiplied by the Ratio.

Dividend Value and Dividend Period are specified in the respective Final Terms.
**Redemption**

Upon Security Holders’ exercise of the Redemption Right or upon Issuer’s exercise of its Regular Call Right, the Security Holders will have the right to receive payment of the Redemption Amount on the respective Redemption Date or Call Date, as the case may be.

The Redemption Amount equals the Relevant Reference Price multiplied by the Ratio and, in the case of Securities linked to a Futures Contract as Underlying, a Participation Factor Current.

The Ratio may be adjusted as follows: the Ratio in the First Trade Date equals the Ratio (initial) as specified in the respective Final Terms. On each Adjustment Date following the First Trade Date the Ratio will be adjusted by the Ratio Adjustment Factor. The Ratio Adjustment Factor may be reduced by an Index Calculation Fee, a Short Selling Fee, a Management Fee a Quanto Fee and/or Dividend Tax Deduction.

The Relevant Reference Price, in the case of Securities linked to a Futures Contract as Underlying, multiplied by a Participation Factor Current, may be reduced by a Quanto Fee Adjustment, a Management Fee Adjustment, a Short Selling Fee Adjustment, and/or an Index Calculation Fee Adjustment.

In the case of Securities, which will be issued as Quanto Securities, the Redemption Amount will be converted into the Specified Currency by a conversion factor of 1:1.

In the case of Securities, which will be issued as Compo Securities, the Redemption Amount will be divided by an Exchange Rate for the conversion of the Underlying Currency into the Specified Currency or, respectively, multiplied by an Exchange Rate for the conversion of the Specified Currency into the Underlying Currency, as specified in the relevant Final Terms.

The Redemption Amount will in no case be lower than zero.

Ratio, Gap Risk Fee (Adjustment), Index Calculation Fee (Adjustment), Short Selling Fee (Adjustment), Management Fee (Adjustment), Dividend Tax Deduction and Participation Factor Current will be specified in the relevant Final Terms.

Upon the occurrence of a Call Event the Issuer may call and redeem the Securities early at their Cancellation Amount.

**Product Type 5: Open End Leverage Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls. The Underlying is a leverage index linked to the performance of a Reference Underlying. The Security holders in turn participate disproportionally (leveraged) in the positive or negative performance of the Reference Underlying.

Redemption on the respective Redemption Date by the Security Holder or on the Regular Call Day by the Issuer depends on the Reference Price on the respective Observation Date.

Relevant Reference Price is the Reference Price on the Observation Date immediately preceding the respective Redemption Date or Call Date, as the case may be. Redemption Date or Call Date may be any Banking Day, as specified in the respective Final Terms.

In respect of their redemption, the Securities are linked to Indices.

The Securities are always issued as Securities with cash settlement.

The Securities may be issued as non-Quanto, Quanto or Compo Securities.

**Interest**

The Securities do not bear interest.

**Redemption**

Upon Security Holders’ exercise of the Redemption Right or upon Issuer’s exercise of its Regular Call Right, the Security Holders will have the right to receive payment of the Redemption Amount on the respective Redemption Date or Call Date, as the case may be.
The Redemption Amount equals the Relevant Reference Price multiplied by the Ratio.

In the case of Securities, which will be issued as Quanto Securities, the Redemption Amount will be converted into the Specified Currency by a conversion factor of 1:1.

In the case of Securities, which will be issued as Compo Securities, the Redemption Amount will be divided by an Exchange Rate for the conversion of the Specified Currency into the Underlying Currency or, respectively, multiplied by an Exchange Rate for the conversion of the Underlying Currency into the Specified Currency, as specified in the relevant Final Terms.

The Redemption Amount will in no case be lower than zero.

On the First Trade Date the Ratio is the Ratio (initial), as specified the Final Terms. On each Adjustment Date following the First Trade Date the Ratio shall be adjusted by applying the Ratio Adjustment Factor. The Ratio Adjustment Factor is calculated taking into consideration, as the case may be, a Management Fee, a Short Selling Fee, an Index Calculation Fee, a Gap Risk Fee, a Dividend Tax Deduction and/or a Quanto Fee as well in the case of Quanto Open End Leverage Securities.

The Index Calculation Fee, the Management Fee, the Short Selling Fee, the Quanto Fee, the Gap Risk Fee and the Dividend Tax Deduction are specified in the relevant Final Terms.

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

**Product Type 6: Short Cash Collect Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying falls, the value of the Securities regularly rises. If the price of the Underlying rises, the value of the Securities regularly falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date. The Securities allow for the payment of an Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred.

In respect of their redemption, the Securities may be linked to Shares, Indices, Fund Shares or Currency Exchange Rates.

The Securities are always issued as Securities with cash settlement.

The Securities may be issued as non-Quanto or Quanto Securities.

**Interest**

The Securities do not bear interest.

**Additional Conditional Amount (k)**

Payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

Additional Conditional Amount Payment Event (k) means that the Reference Price is equal to or lower than the relevant Additional Conditional Amount Payment Level (k) on the relevant Observation Date (k). An Observation Date (k) can be either a specified date or any date within the Observation Period.

The Additional Conditional Amount (k), the Additional Conditional Amount Payment Level (k) and/or the method for its specification will be specified in the respective Final Terms.

Accordingly, the following applies:

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).
- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).
**Barrier Event**

A Barrier Event means that the Reference Price on any Barrier Observation Date, as the case may be, is either (i) equal to or greater, or (ii) greater than the Barrier.

The Barrier or the method for its determination will be specified in the relevant Final Terms.

**Redemption as at the Final Payment Date**

Redemption as at the Final Payment Date depends on:

- the occurrence of the Barrier Event and
- the Strike, and
- R (final).

In respect of the occurrence of a Barrier Event, see "Barrier Event" above.

R (initial) means:

- for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date.

R (final) means the Reference Price on the Final Observation Date.

If no Barrier Event has occurred, redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Maximum Amount.

The Maximum Amount (if applicable) will be specified in the respective Final Terms.

If a Barrier Event has occurred, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied by the difference of 2 minus the quotient of R (final) divided by the Strike.

The Strike or, as the case may be, the method of its specification, will be specified in the relevant Final Terms.

**Call Event**

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

**Product Type 7: Cash Collect Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date. The Securities allow (i) for the payment of an Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred and/or (ii) for the payment of an unconditional Additional Unconditional Amount (l) on each Additional Unconditional Amount Payment Date (l), as specified in the relevant Final Terms.

In respect of their redemption, the Securities may be linked to Shares as well as Indices, a commodity or Currency Exchange Rates.

For Securities linked to Shares other than Group Shares as well as Fund Shares, it will be specified in the relevant Final Terms that redemption on the Final Payment Date is made

- for Securities with cash settlement, exclusively by payment of a Redemption Amount, or
- for Securities with physical delivery, by cash settlement or by physical delivery of a certain quantity of the Underlying.

Securities linked to Group Shares, Indices, a commodity or Currency Exchange Rates are always issued as Securities with cash settlement.
The Securities may be issued as non-Quanto or Quanto Securities.

**Interest**

The Securities do not bear interest.

**Additional Conditional Amount (k)**

Payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

Additional Conditional Amount Payment Event (k) means that the Reference Price is equal to or greater than the relevant Additional Conditional Amount Payment Level (k) on the relevant Observation Date (k). An Observation Date (k) can be either a specified date or any date within the Observation Period or the respective Averaging Observation Dates relating to an Observation Date (k), as specified in the respective Final Terms.

The Additional Conditional Amount (k), the Additional Conditional Amount Payment Level (k) and/or the method for its specification will be specified in the respective Final Terms.

In the case of Securities (Memory), the following applies:

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k) less the sum of all Additional Conditional Amounts (k) already paid on the preceding Additional Conditional Amount Payment Dates (k).
- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

In the case of Cash Collect Securities (Memory + Consolidation), the following applies:

- If an Additional Conditional Amount Payment Event (k) has occurred the following shall apply:
  - The respective Additional Conditional Amount (k) plus the sum of all Additional Conditional Amounts (k) which have not been paid on the preceding Additional Conditional Amount Payment Dates (k) shall be paid on the Additional Conditional Amount Payment Date (k) immediately following the Observation Date (k) at which the Additional Conditional Amount Payment Event (k) has occurred (no Additional Conditional Amount (k) will be paid more than once); and
  - On each Additional Conditional Amount Payment Date (k) thereafter, the Additional Conditional Amount (k) with respect to such Additional Conditional Amount Payment Date (k) shall be paid without consideration of the occurrence of an Additional Conditional Amount Payment Event (k).
- If no Additional Conditional Amount Payment Event (k) has occurred, no Additional Conditional Amount (k) will be paid to the Security Holders on any Additional Conditional Amount Payment Date (k).

In case of the Securities with Additional Conditional Amount (k) (Consolidation), the following applies:

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) is paid on the respective Additional Conditional Amount Payment Date (k). On each Additional Conditional Amount Payment Date (k) thereafter, the Additional Conditional Amount (k) with respect to such Additional Conditional Amount Payment Date (k) shall be paid without consideration of the occurrence of an Additional Conditional Amount Payment Event (k).
- If no Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), no Additional Conditional Amount (k) is paid on the respective Additional Conditional Amount Payment Date (k).

In the case of Securities (Relax) the following applies:
DESCRIPTION OF THE SECURITIES

• If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

• If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

If, in the case of Securities (Relax) with consideration of a Barrier Event, as specified the relevant Final Terms, a Barrier Event has occurred (as described below) on or prior to an Observation Date (k), from then on no payment of any Additional Conditional Amount (k) will be made on any following Additional Conditional Amount Payment Date (k).

In the case of Securities (In Fine) the following applies:

• If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) shall be recorded.

• If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be recorded in respect to this date.

• The sum of all recorded Additional Conditional Amounts (k) shall be paid on the Final Payment Date.

Barrier Event

A Barrier Event means:

• for Securities with continuous Barrier observation that any published price or rate of the Underlying, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period in the case of continuous observation, as specified in the relevant Final Terms,

• for Securities with date-related Barrier observation that the Reference Price on any Barrier Observation Date, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier or

• for Securities with daily Barrier observation, that any Reference Price, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period or

• for Securities with final Barrier observation, that R (final) (s. below), as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier.

The Barrier or the method for its determination will be specified in the relevant Final Terms.

For Securities (Relax) without consideration of a Barrier Event, this restriction does not apply.

In the case of Securities where an unconditional Additional Unconditional Amount (l) will be specified in the relevant Final Terms, the Additional Unconditional Amount (l) will be paid independently from the occurrence of an Additional Conditional Amount Payment Event (k), on the respective Additional Unconditional Amount Payment Date (l).

Redemption as at the Final Payment Date

Redemption as at the Final Payment Date depends on:

• the occurrence of the Barrier Event and
• the Strike,
• the Participation Factor (if applicable) and
• R (final).

In respect of the occurrence of a Barrier Event, see "Barrier Event" above.

R (initial) means:

• for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
DESCRIPTION OF THE SECURITIES

- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
- for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

R (final) means:

- for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
- for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
- for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

If no Barrier Event has occurred, redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Maximum Amount.

The Maximum Amount (if applicable) will be specified in the respective Final Terms.

If a Barrier Event has occurred, redemption is made:

- for Securities with cash settlement by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied by the Participation Factor (if applicable) and R (final) divided by the Strike. If so specified in the respective Final Terms, the Redemption Amount will, however, not be greater than the Nominal Amount and not less that the Minimum Redemption Amount; or
- for Securities with physical delivery
  - if R (final) is equal to or greater than the Strike, by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount; or
  - if R (final) is lower than the Strike, by delivery of the Underlying in a quantity expressed by the Ratio per Security. If the Ratio leads to a non-deliverable fraction of the Underlying, a cash amount expressed in the Specified Currency is paid instead in the amount corresponding to the value of the non-deliverable fraction of the Underlying.

The Strike and the Ratio (if applicable), or, as the case may be, the method of their respective specification, will be specified in the relevant Final Terms.

The Participation Factor (if applicable) and the Minimum Redemption Amount (if applicable) will be specified in the relevant Final Terms, if applicable.

**Call Event**

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

**Product Type 8: Twin-Win Cash Collect Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. As far as the price of the Underlying is equal to or greater than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield), the value of the Securities generally rises, if the price of the Underlying rises or falls. If the price of the Underlying is lower than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield), the
value of the Securities generally rises, if the price of the Underlying rises, and falls, if the price of the Underlying falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date. The Securities allow (i) for the payment of an Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred and (ii) for the payment of an unconditional Additional Unconditional Amount (l) on each Additional Unconditional Amount Payment Date (l), as specified in the relevant Final Terms.

In respect of their redemption, the Securities may be linked to Shares, Fund Shares, Indices, a commodity or Currency Exchange Rates as Underlying, as specified in the relevant Final Terms. The Securities may be issued as non-Quanto or Quanto Securities.

**Interest**

The Securities do not bear interest.

**Additional Conditional Amount (k)**

Payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

Additional Conditional Amount Payment Event (k) means that the Reference Price on the relevant Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the following applies:
  - If the Reference Price on the relevant Observation Date (k) is greater than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Up and (ii) the difference of (1) the Reference Price on the relevant Observation Date (k) divided by R (initial) and (2) one.
  - If the Reference Price on the relevant Observation Date (k) is less than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Down and (ii) the difference of (1) one and (2) the Reference Price on the relevant Observation Date (k) divided by R (initial).

However, the Additional Conditional Amount is not less than the Minimum Additional Conditional Amount and is not greater than the Maximum Additional Conditional Amount, if so specified in the respective Final Terms.

The respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

The Maximum Additional Conditional Amount, the Minimum Additional Conditional Amount, the Additional Conditional Amount Payment Level (k) and/or the method for its specification will be specified in the respective Final Terms.

In the case of Twin-Win Cash Collect Securities with Additional Unconditional Amount (l), the Additional Unconditional Amount (l) will be paid in addition, whether or not the Additional Conditional Amount Payment Event (k) has occurred, on the respective Additional Unconditional Amount Payment Date (l).

The Additional Unconditional Amount (l) is specified in the respective Final Terms.

**Redemption**

The Securities will be redeemed by payment of the Redemption Amount on the Final Payment Date.

Redemption depends on:

- the occurrence of the Barrier Event and
- R (final).
**Barrier Event**

A Barrier Event means:

- for Securities with continuous Barrier observation that any published price or rate of the Underlying, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period in the case of continuous observation, as specified in the relevant Final Terms,
- for Securities with date-related Barrier observation that the Reference Price on any Barrier Observation Date, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier or
- for Securities with daily Barrier observation, that any Reference Price, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period or
- for Securities with final Barrier observation, that R (final) (s. below), as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier.

The Barrier or the method for its determination will be specified in the relevant Final Terms.

**Redemption Amount**

The “Redemption Amount” is determined as follows:

- If no Barrier Event has occurred, redemption is made by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.
- If a Barrier Event has occurred, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied by R (final) divided by R (initial).

R (initial) means:

- for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
- for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

R (final) means:

- for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
- for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
- for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

**Call Event**

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.
DESCRIPTION OF THE SECURITIES

Product Type 9: Twin-Win Lock-in Cash Collect Securities

General
The value of the Securities during their term depends decisively on the price of the Underlying. As far as the price of the Underlying is equal to or greater than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield), the value of the Securities generally rises, if the price of the Underlying rises or falls. If the price of the Underlying is lower than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield), the value of the Securities generally rises, if the price of the Underlying rises, and falls, if the price of the Underlying falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date and on the Reference Price on the relevant Observation Date (k). The Securities allow for the payment of a conditional Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred.

In respect of their redemption, the Securities may be linked to Shares, Fund Shares, Indices, a commodity or Currency Exchange Rates as Underlying, as specified in the relevant Final Terms.

The Securities may be issued as non-Quanto or Quanto Securities.

Interest
The Securities do not bear interest.

Additional Conditional Amount (k)
Payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

Additional Conditional Amount Payment Event (k) means that the Reference Price on the relevant Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the following applies:

- If the Reference Price on the relevant Observation Date (k) is greater than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Up and (ii) the difference of (1) the Reference Price on the relevant Observation Date (k) divided by R (initial) and (2) one.

- If the Reference Price on the relevant Observation Date (k) is less than R (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Down and (ii) the difference of (1) one and (2) the Reference Price on the relevant Observation Date (k) divided by R (initial).

However, the Additional Conditional Amount is not less than the Minimum Additional Conditional Amount and is not greater than the Maximum Additional Conditional Amount, if so specified in the respective Final Terms.

The respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Payment Date (k).

If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

The Maximum Additional Conditional Amount, the Minimum Additional Conditional Amount, the Additional Conditional Amount Payment Level (k) and/or the method for its specification will be specified in the respective Final Terms.

Redemption
The Securities will be redeemed by payment of the Redemption Amount on the Final Payment Date or on another date following the Final Observation Date, as specified in the relevant Final Terms.

Redemption as at the Final Payment Date upon automatic exercise depends on:
• the occurrence of the Barrier Event,
• the occurrence of the Lock-in Event, and
• R (final).

**Barrier Event**
A Barrier Event means:

• for Securities with continuous Barrier observation that any published price or rate of the Underlying, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period in the case of continuous observation, as specified in the relevant Final Terms,

• for Securities with date-related Barrier observation that the Reference Price on any Barrier Observation Date, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier or

• for Securities with daily Barrier observation, that any Reference Price, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period or

• for Securities with final Barrier observation, that R (final) (s. below), as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier.

The Barrier or the method for its determination will be specified in the relevant Final Terms.

**Lock-in Event**
A Lock-in Event means that the Reference Price on the relevant Observation Date (k) is either (i) equal to or higher, or (ii) higher than the Lock-in Level. An Observation Date (k) can be either a specified date or any date within the Observation Period or the respective Averaging Observation Dates relating to an Observation Date (k), as specified in the respective Final Terms.

The Lock-in Level or the method for its determination will be specified in the relevant Final Terms.

**Redemption Amount**
The "**Redemption Amount**" is determined as follows:

• If a Lock-in Event has occurred on any Observation Date (k) redemption is made by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.

• If no Lock-in Event and no Barrier Event has occurred, redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.

• If no Lock-in Event and a Barrier Event has occurred, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied by R (final) divided by R (initial).

R (initial) means:

• for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or

• for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or

• for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or

• for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or

• for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

R (final) means:

• for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or

• for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or

• for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

**Call Event**

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

**Product Type 10: Lock-in Cash Collect Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date and on the Reference Price on the relevant Observation Date (k). The Securities allow for the payment of a conditional Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred. In respect of their redemption, the Securities may be linked to Shares, Fund Shares, Indices, a commodity or Currency Exchange Rates as Underlying, as specified in the relevant Final Terms.

The Securities may be issued as non-Quanto or Quanto Securities.

**Interest**

The Securities do not bear interest.

**Additional Conditional Amount (k)**

Payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

Additional Conditional Amount Payment Event (k) means that the Reference Price on the relevant Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k). An Observation Date (k) can be either a specified date or any date within the Observation Period or the respective Averaging Observation Dates relating to an Observation Date (k), as specified in the respective Final Terms.

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

In the case of Lock-in Consolidation Cash Collect, the following applies: If a Lock-in Event (s. below) has occurred on any Observation Date (k) the Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k) and on any subsequent Additional Conditional Amount Payment Date (k), regardless if an Additional Conditional Amount Payment Event has occurred or not.

The Additional Conditional Amount (k), the Additional Conditional Amount Payment Level (k) and/or the method for its specification will be specified in the respective Final Terms.

**Redemption**

The Securities will be redeemed by payment of the Redemption Amount on the Final Payment Date. Redemption depends on:

- the occurrence of the Barrier Event,
• the occurrence of the Lock-in Event, and
• \( R \) (final).

\textbf{Barrier Event}

A Barrier Event means:

• for Securities with continuous Barrier observation that any published price or rate of the Underlying, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period in the case of continuous observation, as specified in the relevant Final Terms,
• for Securities with date-related Barrier observation that the Reference Price on any Barrier Observation Date, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier,
• for Securities with daily Barrier observation, that any Reference Price, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period
• for Securities with final Barrier observation, that \( R \) (final) (s. below), as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier.

\textbf{Lock-in Event}

A Lock-in Event means that the Reference Price on the relevant Observation Date (\( k \)) is either (i) equal to or higher, or (ii) higher than the Lock-in Level. An Observation Date (\( k \)) can be either a specified date or any date within the Observation Period or the respective Averaging Observation Dates relating to an Observation Date (\( k \)), as specified in the respective Final Terms.

The Lock-in Level or the method for its determination will be specified in the relevant Final Terms.

\textbf{Redemption Amount}

The “\textit{Redemption Amount}” is determined as follows:

• If a Lock-in Event has occurred on any Observation Date (\( k \)) redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.
• If no Lock-in Event and no Barrier Event has occurred, redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.
• If no Lock-in Event and a Barrier Event has occurred, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied by \( R \) (final) divided by \( R \) (initial).

\( R \) (initial) means:

• for Securities where \( R \) (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
• for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
• for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
• for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
• for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

\( R \) (final) means:

• for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
• for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
• for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
• for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

Call Event
Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

Product Type 11: Twin-Win Geared Put Cash Collect Securities

General
The value of the Securities during their term depends decisively on the price of the Underlying. As far as the price of the Underlying is equal to or greater than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield), the value of the Securities generally rises, if the price of the Underlying rises or falls. If the price of the Underlying is lower than the Additional Amount Payment Level and subject to the effect of other price influencing factors (such as expected volatility, interest rate, dividend yield), the value of the Securities generally rises, if the price of the Underlying rises, and falls, if the price of the Underlying falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date. The Securities allow for the payment of an Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred.

In respect of their redemption, the Securities may be linked to Shares, Fund Shares, Indices, a commodity or Currency Exchange Rates as Underlying, as specified in the relevant Final Terms.

The Securities may be issued as non-Quanto or Quanto Securities.

Interest
The Securities do not bear interest.

Additional Conditional Amount (k)
Payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

Additional Conditional Amount Payment Event (k) means that the Reference Price on the relevant Observation Date (k) is equal to or greater than the relevant Additional Conditional Amount Payment Level (k).

• If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the following applies:
  • If the Reference Price on the relevant Observation Date (k) is greater than \( R \) (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Up and (ii) the difference of (1) the Reference Price on the relevant Observation Date (k) divided by \( R \) (initial) and (2) one.
  • If the Reference Price on the relevant Observation Date (k) is less than \( R \) (initial) the Additional Conditional Amount (k) corresponds to the Nominal Amount multiplied with (i) the Participation Factor Down and (ii) the difference of (1) one and (2) the Reference Price on the relevant Observation Date (k) divided by \( R \) (initial).

However, the Additional Conditional Amount is not less than the Minimum Additional Conditional Amount and is not greater than the Maximum Additional Conditional Amount, if so specified in the respective Final Terms.

The respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).
DESCRIPTION OF THE SECURITIES

• If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

The Maximum Additional Conditional Amount, the Minimum Additional Conditional Amount, the Additional Conditional Amount Payment Level (k) and/or the method for its specification will be specified in the respective Final Terms.

Redemption

The Securities will be redeemed by payment of the Redemption Amount on the Final Payment Date or on another date following the Final Observation Date, as specified in the relevant Final Terms.

Redemption as at the Final Payment Date upon automatic exercise depends on:

- the Strike,
- the Participation Factor and
- R (final).

Redemption Amount

The “Redemption Amount” is determined as follows:

- If R (final) is equal to or greater than the Strike, redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.
- If R (final) is lower than the Strike, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied with the sum of 1 and the Participation Factor multiplied by the quotient of (1) the difference of R (final) and Strike and (2) R (initial).

R (initial) means:

- for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
- for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

R (final) means:

- for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
- for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
- for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

The Strike or, as the case may be, the method of its specification will be specified in the relevant Final Terms.

The Participation Factor will be specified in the relevant Final Terms, if applicable.

Call Event

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.
Product Type 12: Geared Put Cash Collect Securities

General
The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date. The Securities allow (i) for the payment of a conditional Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred.

In respect of their redemption, the Securities may be linked to Shares, Fund Shares, Indices, a commodity or Currency Exchange Rates as Underlying, as specified in the relevant Final Terms.

The Securities may be issued as non-Quanto or Quanto Securities.

Interest
The Securities do not bear interest.

Additional Conditional Amount (k)
Payment of the Additional Conditional Amount (k) depends on the occurrence of an Additional Conditional Amount Payment Event (k).

Additional Conditional Amount Payment Event (k) means that the Reference Price is equal to or greater than the relevant Additional Conditional Amount Payment Level (k) on the relevant Observation Date (k).

- If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).
- If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

The Additional Conditional Amount (k), the Additional Conditional Amount Payment Level (k) and/or the method for its specification will be specified in the respective Final Terms.

Barrier Event
A Barrier Event means:

- for Securities with continuous Barrier observation that any published price or rate of the Underlying, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period in the case of continuous observation, as specified in the relevant Final Terms,
- for Securities with date-related Barrier observation that the Reference Price on any Barrier Observation Date, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier,
- for Securities with daily Barrier observation, that any Reference Price, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period, or
- for Securities with final Barrier observation, that R (final) (s. below), as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier.

The Barrier or the method for its determination will be specified in the relevant Final Terms.

Redemption
The Securities will be redeemed by payment of the Redemption Amount on the Final Payment Date or on another date following the Final Observation Date, as specified in the relevant Final Terms.

Redemption as at the Final Payment Date upon automatic exercise depends on:

- the Strike,
DESCRIPTION OF THE SECURITIES

- the Participation Factor and
- R (final).

**Redemption Amount**

The "Redemption Amount" is determined as follows:

- If R (final) is equal to or greater than the Strike, redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.
- If R (final) is lower than the Strike, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the sum of the Nominal Amount multiplied with the sum of 1 and the Participation Factor multiplied by the quotient of (1) the difference of R (final) and Strike and (2) R (initial).

**R (initial) means:**

- for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
- for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

**R (final) means:**

- for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
- for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
- for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

The Strike or, as the case may be, the method of its specification will be specified in the relevant Final Terms.

The Participation Factor (if applicable) will be specified in the relevant Final Terms, if applicable.

**Call Event**

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

**Product Type 13: Geoscope Lock-in Cash Collect Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date and on the Reference Price on the relevant Observation Date (k). The Securities allow for the payment of an Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred.

In respect of their redemption, the Securities may be linked to Shares, Fund Shares, Indices, a commodity or Currency Exchange Rates as Underlying, as specified in the relevant Final Terms.
DESCRIPTION OF THE SECURITIES

The Securities may be issued as non-Quanto or Quanto Securities.

**Interest**

The Securities do not bear interest.

**Additional Conditional Amount (k)**

The Additional Conditional Amount (k) is equal to the Nominal Amount multiplied by the difference of (1) the Geometric Average Performance of the Underlying (k) and (2) one.

The Additional Conditional Amount (k) is not greater than the Maximum Additional Conditional Amount (k).

In the case of securities with a Minimum Additional Conditional Amount (k) the Additional Amount (k) is not less than the Minimum Additional Conditional Amount (k).

The Geometric Average Performance of the Underlying (k) is the nth (when "n" depends on the respective D (k)) root of the Performance of the Underlying (k), where the Performance of the Underlying (k) is the quotient between the Reference Price on the respective Observation Date (k), as the numerator, and R (initial) as denominator.

If a Lock-In Event has occurred on an Observation Date (k), the Maximum Additional Amount shall be paid on the corresponding Additional Conditional Amount Payment Date (k). Moreover, on all Additional Conditional Amount Payment Dates (k) following this Additional Conditional Amount Payment Date (k) the Maximum Additional Amount shall be paid regardless of the Geometric Average Performance of the Underlying (k).

The Minimum Additional Conditional Amount (k), the Maximum Additional Conditional Amount (k) and the Maximum Additional Amount will be specified in the relevant Final Terms.

**Lock-in Event**

A Lock-in Event means that the Geometric Average Performance of the Underlying (k) on an Observation Date (k) is either (i) equal to or higher, or (ii) higher than the Lock-in Factor.

The Lock-in Factor will be specified in the relevant Final Terms.

**Redemption**

The Securities will be redeemed by payment of the Redemption Amount on the Final Payment Date or on another date following the Final Observation Date, as specified in the relevant Final Terms.

Redemption as at the Final Payment Date upon automatic exercise depends on:

- the occurrence of the Lock-in Event, and
- R (final).

In respect of the occurrence of a Lock-in Event, see "Lock-in Event” above.

**Redemption Amount**

The "Redemption Amount" is determined as follows:

- If a Lock-in Event has occurred on any Observation Date (k) redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.

- If no Lock-in Event has occurred, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied by R (final) divided by R (initial). The Redemption Amount will, be not less than the Minimum Redemption Amount. The Minimum Amount may be less than the Nominal Amount.

R (initial) means:

- for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
DESCRIPTION OF THE SECURITIES

- for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

R (final) means:

- for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
- for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
- for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

The Minimum Redemption Amount will be specified in the relevant Final Terms.

**Call Event**

Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

**Product Type 14: Barrier Geoscope Lock-in Cash Collect Securities**

**General**

The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

Redemption on the Final Payment Date depends on the Reference Price on the Final Observation Date and on the Reference Price on the relevant Observation Date (k). The Securities allow for the payment of an Additional Conditional Amount (k) on each Additional Conditional Amount Payment Date (k), if an Additional Conditional Amount Payment Event (k) (as described below) has occurred.

In respect of their redemption, the Securities may be linked to Shares, Fund Shares, Indices, a commodity or Currency Exchange Rates as Underlying, as specified in the relevant Final Terms.

The Securities may be issued as non-Quanto or Quanto Securities.

**Interest**

The Securities do not bear interest.

**Additional Conditional Amount (k)**

The Additional Conditional Amount (k) is equal to the Nominal Amount multiplied by the difference of (1) the Geometric Average Performance of the Underlying (k) and (2) one.

The Additional Conditional Amount (k) is not greater than the Maximum Additional Conditional Amount (k).

In the case of securities with a Minimum Additional Conditional Amount (k) the Additional Amount (k) is not less than the Minimum Additional Conditional Amount (k).

The Geometric Average Performance of the Underlying (k) is the nth (when "n" depends on the respective D (k)) root of the Performance of the Underlying (k), where the Performance of the Underlying (k) is the quotient between the Reference Price on the respective Observation Date (k), as the numerator, and R (initial) as denominator.

If a Lock-In Event has occurred on an Observation Date (k), the Maximum Additional Amount shall be paid on the corresponding Additional Conditional Amount Payment Date (k). Moreover, on all Additional Conditional Amount Payment Dates (k) following this Additional Conditional Amount Payment Date (k) the Maximum Additional Amount shall be paid regardless of the Geometric Average Performance of the Underlying (k).
DESCRIPTION OF THE SECURITIES

The Minimum Additional Conditional Amount (k), the Maximum Additional Conditional Amount (k) and the Maximum Additional Amount will be specified in the relevant Final Terms.

**Lock-in Event**

A Lock-in Event means that the Geometric Average Performance of the Underlying (k) on an Observation Date (k) is either (i) equal to or higher, or (ii) higher than the Lock-in Factor.

The Lock-in Factor will be specified in the relevant Final Terms.

**Redemption**

The Securities will be redeemed by payment of the Redemption Amount on the Final Payment Date or on another date following the Final Observation Date, as specified in the relevant Final Terms.

Redemption as at the Final Payment Date upon automatic exercise depends on:

- the occurrence of the Barrier Event,
- the occurrence of the Lock-in Event, and
- R (final).

In respect of the occurrence of a Lock-in Event, see "Lock-in Event” above.

**Barrier Event**

A Barrier Event means:

- for Securities with continuous Barrier observation that any published price or rate of the Underlying, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period in the case of continuous observation, as specified in the relevant Final Terms,
- for Securities with date-related Barrier observation that the Reference Price on any Barrier Observation Date, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier,
- for Securities with daily Barrier observation, that any Reference Price, as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier during the Barrier Observation Period.
- The Barrier or the method for its determination will be specified in the relevant Final Terms or
- for Securities with final Barrier observation, that R (final) (s. below), as the case may be, is either (i) equal to or lower, or (ii) lower than the Barrier.

**Redemption Amount**

The “Redemption Amount” is determined as follows:

- If a Lock-in Event has occurred on any Observation Date (k) redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.
- If no Lock-in Event and no Barrier Event has occurred, redemption is made for all Securities by payment of a Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount.
- If no Lock-in Event and a Barrier Event has occurred, redemption is made by payment of the Redemption Amount in the Specified Currency, which corresponds to the Nominal Amount multiplied by R (final) divided by R (initial). If so specified in the respective Final Terms, the Redemption Amount will, be not less than the Minimum Redemption Amount. The Minimum Amount may be equal to the Nominal Amount or may be less than the Nominal Amount.

R (initial) means:

- for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
• for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
• for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

R (final) means:
• for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
• for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
• for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
• for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

The Minimum Redemption Amount (if applicable) will be specified in the relevant Final Terms.

Call Event
Upon the occurrence of a Call Event the Issuer may call and early redeem the Securities at their Cancellation Amount.

Product Type 15: Sprint (Cap) Securities

General
The value of the Securities during their term depends decisively on the price of the Underlying. If the price of the Underlying rises, the value of the Securities regularly rises. If the price of the Underlying falls, the value of the Securities regularly falls.

The redemption on the Final Payment Date depends on R (final) (as defined in C.19). If R (final) is greater than the Strike, the Security Holder participates, in proportion to the Participation Factor, in the Performance of the Underlying with regard to the Strike. Otherwise, the Security Holder participates in the Performance of the Underlying on a 1:1 basis. In any event, the payment is not greater than the Maximum Amount, if a Maximum Amount is specified in the Final Terms.

The Participation Factor is specified in the Final Terms.
In respect of the Redemption, the Securities are linked to Shares, Indices or a commodity as well as Fund Shares.

The Securities may be issued as non-Quanto, Quanto or Compo Securities.

Interest
The Securities do not bear interest.

Additional Unconditional Amount
In case of the Securities with an Additional Unconditional Amount, the Additional Unconditional Amount (l) will be paid on the respective Additional Unconditional Amount Payment Date (l).

The Additional Unconditional Amount (l) is specified in the respective Final Terms.

Redemption
Redemption as at the Final Payment Date depends on:
• the Strike and
• R (final).

The Strike
• is either specified in the Final Terms or
• corresponds to a specified percentage of R (initial).
R (initial)

R (initial) means:

- for Securities where R (initial) has already been specified, the price of the Underlying specified in the respective Final Terms, or
- for Securities with initial Reference Price observation, the Reference Price on the Initial Observation Date, or
- for Securities with initial average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Initial Observation Dates, or
- for Securities with best-in observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-in observation, the lowest Reference Price on the dates specified in the respective Final Terms.

R (final) means:

- for Securities with final Reference Price observation, the Reference Price on the Final Observation Date, or
- for Securities with final average observation, the equally weighted average (arithmetic mean) of the Reference Prices determined on the Final Observation Dates, or
- for Securities with best-out observation, the highest Reference Price on the dates specified in the respective Final Terms, or
- for Securities with worst-out observation, the lowest Reference Price on the dates specified in the respective Final Terms.

Redemption is made by the payment of the Redemption Amount in the Specified Currency.

If R (final) is greater than the Strike, the Redemption Amount is equal to

(i) the Nominal Amount
(ii) multiplied by the Strike Level plus
    (a) the Participation Factor multiplied by
    (b) the Performance of the Underlying minus the Strike Level.

If R (final) is equal to or less than the Strike, the Redemption Amount is equal to

(i) the Nominal Amount
(ii) multiplied by the Performance of the Underlying.

The Redemption Amount shall in no event be greater than the Maximum Amount, if a Maximum Amount is specified in the Final Terms.

The Performance of the Underlying means the quotient of R (final), as the numerator, and R (initial), as the denominator.

The Maximum Amount

- is either specified in the Final Terms or
- corresponds to a specified percentage of the Nominal Amount.

The Strike Level and the Participation Factor are specified in the respective Final Terms.

Upon the occurrence of a Call Event, the Issuer may call and early redeem the Securities at their Cancellation Amount.

[In the case of Securities where CBL and Euroclear Bank is specified in the Final Terms as Clearing System, the following applies:]

[In the case of Securities where Euroclear France is specified in the Final Terms as Clearing System, the following applies:]

[In the case of Securities where Euroclear Bank or another Clearing System is specified in the Final Terms, the following applies:]

2

Principal Paying Agent, Paying Agent, Calculation Agent

(1) Paying Agents: The "Principal Paying Agent" is [UniCredit Bank AG, Arabellastraße 12, 81925 Munich, Germany] [Citibank, N.A., London Branch, Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB, United Kingdom] [Insert name and address of other paying agent]. [The French Paying Agent for Euroclear France S.A. is CACEIS Bank S.A., 1-3 rue place Valhubert, 75206 Paris Cedex 13, France (the "French Paying Agent").] The Issuer
may appoint additional paying agents (the "Paying Agents") and revoke such appointment. The appointment and revocation shall be published pursuant to § 6 of the General Conditions.

(2) Calculation Agent: The "Calculation Agent" is [UniCredit Bank AG, Arabellastraße 12, 81925 Munich] [Insert name and address of other calculation agent].

(3) Transfer of functions: Should any event occur which results in the Principal Paying Agent[, French Paying Agent] or Calculation Agent being unable to continue in its function as Principal Paying Agent[, French Paying Agent] or Calculation Agent, the Issuer is obliged to appoint another bank of international standing as Principal Paying Agent[, French Paying Agent] or another person or institution with the relevant expertise as Calculation Agent. Any such transfer of the functions of the Principal Paying Agent[, French Paying Agent] or Calculation Agent shall be notified by the Issuer without undue delay pursuant to § 6 of the General Conditions.

(4) Agents of the Issuer: In connection with the Securities, the Principal Paying Agent[, the French Paying Agent], the Paying Agents and the Calculation Agent act solely as agents of the Issuer and do not assume any obligations towards or relationship of agency or trust for or with any of the Security Holders. The Principal Paying Agent[, the French Paying Agent] and the Paying Agents shall be exempt from the restrictions of § 181 German Civil Code ("Bürgerliches Gesetzbuch, "BGB").

§ 3

Taxes

No gross up: Payments in respect of the Securities shall only be made after deduction and withholding of current or future taxes, to the extent that such deduction or withholding is required by law. In this regard the term "Taxes" includes taxes, levies or governmental charges, regardless of their nature, which are imposed, levied or collected under any applicable system of law or in any country which claims fiscal jurisdiction by or for the account of any political subdivision thereof or government agency therein authorised to levy Taxes, including a withholding tax pursuant to Section 871(m) of the United States Internal Revenue Code of 1986 ("871(m) Withholding Tax").

The Issuer shall in any case be entitled to take into consideration the 871(m) Withholding Tax by applying the maximum tax rate as a flat rate (plus value added tax, if applicable). In no case the Issuer is obliged to compensate with respect to any Taxes deducted or withheld.

The Issuer shall report on the deducted and withheld Taxes to the competent government agencies, except, these obligations are imposed upon any other person involved, subject to the legal and contractual requirements of the respective applicable tax rules.

§ 4

Status

The obligations under the Securities constitute direct, unconditional and unsecured obligations of the Issuer and rank, unless provided otherwise by law, pari passu with all other unsecured unsubordinated present and future obligations of the Issuer.

§ 5

Substitution of the Issuer

(1) The Issuer may without the consent of the Security Holders, if no payment of principal or interest on any of the Securities is in default, at any time substitute the Issuer for any Affiliate of the Issuer as principal debtor in respect of all obligations of the Issuer under the Securities (the "New Issuer"), provided that

(a) the New Issuer assumes all obligations of the Issuer in respect of the Securities,
PART A – GENERAL CONDITIONS OF THE SECURITIES

(b) the Issuer and the New Issuer have obtained all necessary authorizations and may transfer to the Principal Paying Agent in the currency required hereunder and without being obligated to deduct or withhold taxes or other duties of whatever nature levied by the country, in which the New Issuer or the Issuer has its domicile or tax residence, all amounts required for the fulfilment of the payment obligations arising under the Securities,

(c) the New Issuer has agreed to indemnify and hold harmless each Security Holder against any tax, duty or other governmental charge imposed on such Security Holder in respect of such substitution and

(d) the Issuer guarantees proper payment of the amounts due under these Terms and Conditions.

For purposes of this § 5 (1) "Affiliate" means an affiliated company (verbundenes Unternehmen) within the meaning of Section 15 of the German Stock Corporation Act (Aktiengesetz).

(2) Notice: Any such substitution shall be notified in accordance with § 6 of the General Conditions.

(3) References: In the event of any such substitution, any reference in these Terms and Conditions to the Issuer shall be deemed to refer to the New Issuer. Furthermore, any reference to the country, in which the Issuer is domiciled or resident for taxation purposes shall be deemed to refer to the country of domicile or residence for taxation purposes of the New Issuer.

§ 6

Notices

(1) To the extent these Terms and Conditions provide for a notice pursuant to this § 6, these will be published on the Website for Notices (or another website communicated by the Issuer with at least six weeks advance notice in accordance with these provisions) and become effective vis-à-vis the Security Holders through such publication unless the notice provides for a later effective date. If and to the extent that binding provisions of effective law or stock exchange provisions provide for other forms of publication, such publications must be made in addition and as provided for.

Other publications with regard to the Securities are published on the Website of the Issuer (or any successor website, which is notified by the Issuer in accordance with the above paragraph).

(2) In addition, the Issuer may deliver all notices concerning the Securities to the Clearing System for communication by the Clearing System to the Security Holders. Any such notice shall be deemed to have been given to the Security Holders on the [seventh] day after the day on which the said notice was given to the Clearing System.

For the avoidance of doubt, any notice published on the Website for Notices which has become effective shall prevail the notice via the Clearing System.

§ 7

Issuance of additional Securities, Repurchase

(1) Issuance of additional Securities: The Issuer reserves the right from time to time without the consent of the Security Holders to issue additional Securities with identical terms and conditions (except for the issue date and the issue price), so that the same shall be consolidated and form a single series (the "Series") with this Tranche. The term "Securities" shall, in the event of such increase, also comprise all additionally issued Securities.

(2) Repurchase: The Issuer shall be entitled at any time to purchase Securities in the market or otherwise and at any price. Securities repurchased by the Issuer may, at the Issuer's discretion,
be held, resold or forwarded to the Principal Paying Agent for cancellation.

§ 8

Presentation Period

The presentation period provided in § 801 paragraph 1 sentence 1 BGB is reduced to ten years for the Securities.

§ 9

Partial Invalidity, Corrections

(1) Invalidity: Should any provision of these Terms and Conditions be or become invalid or unenforceable in whole or in part, the remaining provisions are not affected thereby. Any gap arising as a result of invalidity or unenforceability of these Terms and Conditions is to be filled with a provision that corresponds to the meaning and intent of these Terms and Conditions and is in the interest of the parties.

(2) Typing and calculation errors: Obvious typing and calculation errors or similar obvious errors in these Terms and Conditions entitle the Issuer to rescission vis-à-vis the Security Holders. The rescission must be declared without undue delay upon obtaining knowledge of such cause for rescission in accordance with § 6 of the General Conditions. Following such rescission by the Issuer, the Security Holder can instruct his depository bank to submit a duly completed redemption declaration to the Principal Paying Agent on a form available there and by giving all information and declarations required by the form (the "Redemption Declaration") and demand the refunding of the Acquisition Price against transfer of the Securities to the account of the Principal Paying Agent with the Clearing System. The Issuer will until at the latest 30 calendar days after receipt of the Redemption Declaration or the Securities by the Principal Paying Agent (whatever is the later date) make the Acquisition Price available to the Principal Paying Agent, which will transfer it to the account listed in the Redemption Declaration. With the payment of the Acquisition Price all rights deriving from the submitted Securities cease to exist.

(3) Offer to continue: The Issuer may combine the declaration of rescission pursuant to paragraph (2) above with an offer to continue the Securities under amended terms and conditions. The Security Holders will be informed of such an offer as well as the amended provisions together with the declaration of rescission in accordance with § 6 of the General Conditions. Such an offer is deemed to be accepted by the Security Holder (with the effect that the consequences of the rescission do not become effective) if the Security Holder does not within four weeks after the offer becoming effective pursuant to § 6 of the General Conditions demand the repayment of the Acquisition Price by submitting a duly completed Redemption Declaration via his depository bank to the Principal Paying Agent and the transfer of the Securities to the account of Principal Paying Agent with the Clearing System in accordance with paragraph (2) above. The Issuer will refer to this effect in the notice.

(4) Acquisition Price: As used in paragraphs (2) and (3) above, the "Acquisition Price" is the actual acquisition price paid by each Security Holder (as stated and confirmed in the Redemption Declaration) or the weighted arithmetic mean of the trading prices of the Securities, as determined by the Issuer in its reasonable discretion (§ 315 et seq. BGB), on the Banking Day preceding the declaration of rescission pursuant to paragraph (2) above, respectively, depending on which of these amounts is the higher one. If a market disruption pursuant to § 7 of the Special Conditions exists on the Banking Day preceding the declaration of rescission pursuant to paragraph (2) above, the last Banking Day preceding the rescission pursuant to paragraph (2) above on which no market disruption existed shall be decisive for the determination of the Acquisition Price in accordance with the preceding sentence.

(5) Incomplete or inconsistent provisions: The Issuer is entitled to correct or amend incomplete or inconsistent provisions in these Terms and Conditions in its reasonable discretion (§ 315 et seq. BGB). Only corrections and amendments that are reasonable for the Security Holders
taking into account the interests of the Issuer and that in particular do not materially impair the legal and financial situation of the Security Holders will be permitted. The Security Holders will be informed of such corrections and supplementations pursuant to § 6 of the General Conditions.

(6) **Adherence to corrected Terms and Conditions:** If the Security Holder was aware of typing or calculation errors or similar errors in these Terms and Conditions when purchasing the Securities, the Issuer is entitled to adhere to the Terms and Conditions amended accordingly irrespective of paragraphs (2) to (5) above.

§ 10

**Applicable Law, Place of Performance, Place of Jurisdiction**

(1) **Applicable law:** The Securities, as to form and content, and all rights and obligations of the Issuer and the Security Holder shall be governed by the laws of the Federal Republic of Germany.

(2) **Place of performance:** Place of performance is Munich.

(3) **Place of jurisdiction:** To the extent permitted by law, all legal disputes arising from or in connection with the matters governed by these Terms and Conditions shall be brought before the court in Munich.

[§ 11

**Waiver Right**

*Waiver Right:* Each Security Holder has the right to waive to the automatic exercise of the exercise right of the Securities held by it (subject as set out below). In this case, a duly completed waiver notice (a "**Waiver Notice**") must be delivered by facsimile to the Issuer prior to 10.00 a.m., Munich local time, on the Final Observation Date at the facsimile number set out in the section of the Base Prospectus titled Conditions of the Securities under "Form of Waiver Notice". The Security Holder must deliver the completed Waiver Notice to its depository bank which will be in charge of sending it by facsimile to the Issuer.

In the event that a Security Holder does not perform its obligations and so deliver, where applicable, a duly completed Waiver Notice in accordance with the provisions hereof, such Securities shall be exercised automatically and shall be repaid in the manner set out in the Terms and Conditions of these Securities, and the Issuer's obligations in respect of such Securities shall be discharged and no further liability in respect thereof shall attach to the Issuer.

The number of Securities specified in the Waiver Notice must be a multiple of the minimum exercise amount, otherwise such number of Securities so specified shall be rounded down to the preceding multiple of the minimum exercise amount and the Waiver Notice shall not be valid in respect of the Securities exceeding such rounded number of Securities.

The Issuer will, in its reasonable discretion (§ 315 et seq. BGB), determine whether the above conditions are satisfied and its determination will be final, conclusive and binding on the Issuer and on the Security Holder.

The Waiver Notice is irrevocable.

Neither the Principal Paying Agent nor the Issuer shall apply any charge for the renouncement to the exercise of the Securities. Any other taxes, duties and/or expenses, including any applicable depository charges, transaction or exercise charges, stamp duty, stamp duty reserve tax, issue, registration, securities transfer and/or other taxes or duties which may arise in connection with the renouncement of any Securities are payable by the Security Holders.]
PART A – GENERAL CONDITIONS OF THE SECURITIES

[Option 2: In the case of Securities governed by Italian law, the following applies:

§ 1
Form, Book Entry, Clearing System

[In the case of Securities without Nominal Amount, the following applies:

(1) Form: This tranche (the "Tranche") of securities (the "Securities") of UniCredit Bank AG (the "Issuer") will be issued as non-par value [notes] [certificates] in dematerialized registered form pursuant to these Terms and Conditions in the Specified Currency.]

[In the case of Securities with Nominal Amount, the following applies:

(1) Form: This tranche (the "Tranche") of securities (the "Securities") of UniCredit Bank AG (the "Issuer") will be issued as [notes] [certificates] in dematerialized registered form pursuant to these Terms and Conditions with a Nominal Amount in the Specified Currency.]

(2) Book Entry: The Securities are registered in the books of the Clearing System, in accordance with the Legislative Decree no. 58 of 24 February 1998, as amended (Testo Unico della Finanza, "Consolidated Law on Financial Intermediation") and with the rules governing central depositories, settlement services, guarantee systems and related management companies, issued by the Bank of Italy and by the Italian securities regulator 'Commissione Nazionale per le Società e la Borsa' (CONSOB) on 22 February 2008, as amended. No physical document of title will be issued to represent the Securities, without prejudice to the right of the Security Holder to obtain the issuance of the certification as per Sections 83-quinquies and 83-novies, paragraph 1, lett. b) of the Consolidated Law on Financial Intermediation. The transfer of the Securities operates by way of registration on the relevant accounts opened with the Clearing System by any intermediary adhering, directly or indirectly, to the Clearing System ("Account Holders"). As a consequence, the respective Security Holder who from time to time is the owner of the account held with an Account Holder will be considered as the legitimate owner of the Securities and will be authorised to exercise all rights related to them, in accordance with the Terms and Conditions of the Securities and applicable provisions of law.

§ 2
Principal Paying Agent, Paying Agent, Calculation Agent

(1) Paying Agents: The "Principal Paying Agent" is [UniCredit Bank AG, Arabellastraße 12, 81925 Munich, Germany] [Citibank, N.A., London Branch, Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB, United Kingdom] [Insert name and address of other paying agent]. [The French Paying Agent for Euroclear Finance S.A. is CACEIS Bank S.A., 1-3 rue place Valhubert, 75206 Paris Cedex 13, France (the "French Paying Agent").] The Issuer may appoint additional paying agents (the "Paying Agents") and revoke such appointment. The appointment and revocation shall be published pursuant to § 6 of the General Conditions.

(2) Calculation Agent: The "Calculation Agent" is [UniCredit Bank AG, Arabellastraße 12, 81925 Munich] [Insert name and address of other calculation agent].

(3) Transfer of functions: Should any event occur which results in the Principal Paying Agent, French Paying Agent or Calculation Agent being unable to continue in its function as Principal Paying Agent, French Paying Agent or Calculation Agent, the Issuer is obliged to appoint another bank of international standing as Principal Paying Agent, French Paying Agent or another person or institution with the relevant expertise as Calculation Agent. Any such transfer of the functions of the Principal Paying Agent, French Paying Agent or Calculation Agent shall be notified by the Issuer without undue delay pursuant to § 6 of the General Conditions.

(4) Agents of the Issuer: In connection with the Securities, the Principal Paying Agent, the Paying Agents and the Calculation Agent act solely on behalf of the Issuer and do not assume any
obligations towards or relationship of mandate or trust for or with any of the Security Holders. For the avoidance of doubt, Section 1395 of the Italian Civil Code (Codice Civile, "CC") shall not apply in respect of any acts of the Principal Paying Agent.

§ 3

Taxes

No gross up: Payments in respect of the Securities shall only be made after deduction and withholding of current or future taxes, to the extent that such deduction or withholding is required by law. In this regard the term "Taxes" includes taxes, levies or governmental charges, regardless of their nature, which are imposed, levied or collected under any applicable system of law or in any country which claims fiscal jurisdiction by or for the account of any political subdivision thereof or government agency therein authorised to levy Taxes, including a withholding tax pursuant to Section 871(m) of the United States Internal Revenue Code of 1986 ("871(m) Withholding Tax").

The Issuer shall in any case be entitled to take into consideration the 871(m) Withholding Tax by applying the maximum tax rate as a flat rate (plus value added tax, if applicable). In no case the Issuer is obliged to compensate with respect to any Taxes deducted or withheld.

The Issuer shall report on the deducted and withheld Taxes to the competent government agencies, except, these obligations are imposed upon any other person involved, subject to the legal and contractual requirements of the respective applicable tax rules.

§ 4

Status

The obligations under the Securities constitute direct, unconditional and unsecured obligations of the Issuer and rank, unless provided otherwise by law, pari passu with all other unsecured unsubordinated present and future obligations of the Issuer.

§ 5

Substitution of the Issuer

(1) The Issuer may without the consent of the Security Holders, if no payment of principal or interest on any of the Securities is in default, at any time substitute the Issuer for any Affiliate of the Issuer as principal debtor in respect of all obligations of the Issuer under the Securities (the "New Issuer"), provided that

(a) the New Issuer assumes all obligations of the Issuer in respect of the Securities,
(b) the Issuer and the New Issuer have obtained all authorizations and have satisfied all other conditions as necessary to ensure that the Securities are legal, valid and enforceable obligations of the New Issuer;
(c) the Issuer and the New Issuer may transfer to the Principal Paying Agent in the currency required hereunder and without being obligated to deduct or withhold taxes or other duties of whatever nature levied by the country, in which the New Issuer or the Issuer has its domicile or tax residence, all amounts required for the fulfilment of the payment obligations arising under the Securities,
(d) the New Issuer has agreed to indemnify and hold harmless each Security Holder against any tax, duty or other governmental charge imposed on such Security Holder in respect of such substitution and
(e) the Issuer irrevocably and unconditionally guarantees proper payment of the amounts due under these Terms and Conditions.
PART A – GENERAL CONDITIONS OF THE SECURITIES

For purposes of this § 5 (1) "Affiliate" means an affiliated company (verbundenes Unternehmen) within the meaning of Section 15 of the German Stock Corporation Act (Aktiengesetz).

(2) Notice: Any such substitution shall be notified in accordance with § 6 of the General Conditions.

(3) References: In the event of any such substitution, any reference in these Terms and Conditions to the Issuer shall be deemed to refer to the New Issuer. Furthermore, any reference to the country, in which the Issuer is domiciled or resident for taxation purposes shall be deemed to refer to the country of domicile or residence for taxation purposes of the New Issuer.

§ 6 Notices

(1) To the extent these Terms and Conditions provide for a notice pursuant to this § 6, these will be published on the Website for Notices (or another website communicated by the Issuer with at least six weeks advance notice in accordance with these provisions) and become effective vis-à-vis the Security Holders through such publication unless the notice provides for a later effective date or such later effective date is otherwise required under applicable law. If and to the extent that binding provisions of effective law or stock exchange provisions provide for other forms of publication, such publications must be made in addition and as provided for.

Other publications with regard to the Securities are published on the Website of the Issuer (or any successor website, which is notified by the Issuer in accordance with the above paragraph).

(2) In addition, the Issuer may deliver all notices concerning the Securities to the Clearing System for communication by the Clearing System to the Security Holders. Any such notice shall be deemed to have been given to the Security Holders on the [seventh] [●] [day] [Banking Day] after the day on which the said notice was given to the Clearing System.

Any notice published on the Website for Notices which has become effective shall prevail the notice via the Clearing System.

§ 7 Issuance of additional Securities, Repurchase

(1) Issuance of additional Securities: The Issuer reserves the right from time to time without the consent of the Security Holders to issue additional Securities with identical terms and conditions (except for the issue date and the issue price), so that the same shall be consolidated and form a single series (the "Series") with this Tranche. The term "Securities" shall, in the event of such increase, also comprise all additionally issued Securities.

(2) Repurchase: The Issuer shall be entitled at any time to purchase Securities in the market or otherwise and at any price. Securities repurchased by the Issuer may, at the Issuer's discretion, be held, resold or forwarded to the Principal Paying Agent for cancellation.

§ 8

(intentionally omitted)

§ 9

Partial Invalidity, Corrections

(1) Invalidity: Should any provision of these Terms and Conditions be or become invalid or unenforceable in whole or in part, the remaining provisions are not affected thereby. Any gap
PART A – GENERAL CONDITIONS OF THE SECURITIES

arising as a result of invalidity or unenforceability of these Terms and Conditions is to be filled with a provision that corresponds to the meaning and intent of these Terms and Conditions and is in the interest of the parties.

(2) **Typing and calculation errors, inaccuracies and inconsistencies:** The Issuer may amend these Terms and Conditions without having to obtain the prior consent of the Security Holders, provided that such amendments (i) do not prejudice the rights or interests of the Security Holders and (ii) are aimed at correcting a manifest or obvious error, or at removing inaccuracies or inconsistencies from the text. Any notices to the Security Holders relating to the amendments referred to in the previous sentence shall be made in accordance with Section 6 of these Terms and Conditions.

§ 10

**Applicable Law, Choice of Forum**

(1) **Applicable law:** The Securities, as to form and content, and all rights and obligations thereunder shall be governed by the laws of the Republic of Italy.

(2) **Choice of Forum:** To the extent permitted by law, all disputes arising from or in connection with the matters governed by these Terms and Conditions shall be brought before the Tribunal of Milan, Italy.

[§ 11

**Waiver Right**

Waiver Right: Each Security Holder has the right to waive to the automatic exercise of the exercise right of the Securities held by it (subject as set out below). In this case, a duly completed waiver notice (a "Waiver Notice") must be delivered by facsimile to the Issuer prior to 10.00 a.m., Munich local time, on the Final Observation Date at the facsimile number set out in the section of the Base Prospectus titled Conditions of the Securities under "Form of Waiver Notice". The Security Holder must deliver the completed Waiver Notice to its depository bank which will be in charge of sending it by facsimile to the Issuer.

In the event that a Security Holder does not perform its obligations and so deliver, where applicable, a duly completed Waiver Notice in accordance with the provisions hereof, such Securities shall be exercised automatically and shall be repaid in the manner set out in the Terms and Conditions of these Securities, and the Issuer's obligations in respect of such Securities shall be discharged and no further liability in respect thereof shall attach to the Issuer.

The number of Securities specified in the Waiver Notice must be a multiple of the minimum exercise amount, otherwise such number of Securities so specified shall be rounded down to the preceding multiple of the minimum exercise amount and the Waiver Notice shall not be valid in respect of the Securities exceeding such rounded number of Securities.

The Issuer will determine whether the above conditions are satisfied in compliance with the provisions of this Section 11, and in any case in good faith and in accordance with the relevant market practices. The Issuer’s determination made pursuant to the above will be final, conclusive and binding on both the Issuer and on the Security Holder.

The Waiver Notice is irrevocable.

Neither the Principal Paying Agent nor the Issuer shall apply any charge for the renouncement to the exercise of the Securities. Any other taxes, duties and/or expenses, including any applicable depository charges, transaction or exercise charges, stamp duty, stamp duty reserve tax, issue, registration, securities transfer and/or other taxes or duties which may arise in connection with the renouncement of any Securities are payable by the Security Holders.]

(the "Special Conditions")

[Special Conditions that apply for particular product types:

Product Type 1: Discount Securities

[In the case of Discount Securities, the following applies:

§ 1

Definitions

"Adjustment Event" means [each of the following events]:

[In the case of a share or a depository receipt as Underlying, the following applies:

(a) each measure taken by the company that has issued the Underlying or by a third party, which would – due to a change in the legal and economic position, in particular a change in the company's fixed assets and capital, affect the Underlying not only immaterially (in particular capital increase against cash contribution, issuance of securities with options or conversion rights into shares, capital increase with company funds, distribution of special dividends, share splits, merger, liquidation, nationalisation); whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(b) an early termination performed by the Determining Futures Exchange of the there traded Derivatives of the Underlying;

(c) an adjustment performed by the Determining Futures Exchange of the there traded Derivatives of the Underlying;

(d) [a Hedging Disruption occurs;

(e)] any event which is economically equivalent to one of the above-mentioned events with regard to its consequences on the Underlying: whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith].]

[In the case of an index as Underlying, the following applies:

(a) changes in the relevant Index Concept or the calculation of the Underlying, that result in a new relevant Index Concept or calculation of the Underlying being no longer economically equivalent to the original relevant Index Concept or the original calculation of the Underlying; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(b) the calculation or publication of the Underlying is finally discontinued, or replaced by another index (the "Index Replacement Event");

(c) due to circumstances for which the Issuer is not responsible, the Issuer is no longer entitled to use the Underlying as basis for the calculations or, respectively, specifications described in the Terms and Conditions of these Securities (a "Index Usage Event"); an Index Usage Event is also the termination of the license to use the Underlying due to an unacceptable increase in license fees;
PART C – SPECIAL CONDITIONS OF THE SECURITIES – Product Type 1

(d) any event which is economically equivalent to one of the above-mentioned events with regard to its consequences on the Underlying; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith].]

In the case of a commodity as Underlying, the following applies:

[(a) any changes in the Relevant Trading Conditions of the Underlying that lead to a situation where, as a result of the change, the changed trading conditions are no longer economically equivalent to the Relevant Trading Conditions prior to the change; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(b) a Hedging Disruption occurs.]

In the case of a fund share (other than an ETF) as Underlying, the following applies:

(a) changes are made with respect to the Fund without the consent of the Calculation Agent which affect the ability of the Issuer to hedge its obligations under the Securities, in particular changes with respect to (i) the risk profile of the Fund, (ii) the investment objectives or investment strategy or investment restrictions of the Fund, (iii) the currency of the Fund Shares, (iv) the method of calculating the NAV or (v) the timetable for the subscription, issue, redemption or transfer of the Fund Shares; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(b) requests for the issue, redemption or transfer of Fund Shares are executed only partially or not at all;

(c) fees, premiums, discounts, charges, commissions, taxes or similar fees are levied for the issue or redemption of Fund Shares; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(d) the Fund or Management Company or a provider of fund services appointed for this purpose by the Fund or Management Company fails to publish the NAV as scheduled or in accordance with normal practice;

(e) a change in the legal form of the Fund;

(f) a change of significant individuals in key positions at the Management Company or in Fund Management; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(g) (i) a change in the legal, accounting, tax or regulatory treatment of the Fund or of the Management Company; or (ii) the suspension, cancellation, revocation or absence of the accreditation or registration of the Fund or of the Management Company; or (iii) the suspension, cancellation, revocation or absence of an authorisation of the Fund by the relevant authority; or (iv) the initiation of investigatory proceedings by the supervisory authorities, a conviction by a court or an order by a competent authority relating to the activities of the Fund, the Management Company or a Fund Services

Provider, or of individuals in key positions at the Management Company or in the Fund Management as a result of misconduct, a violation of the law or for similar reasons; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(h) a breach by the Fund or the Management Company of the investment objectives, the investment strategy or the investment restrictions of the Fund that is material, or a breach of statutory or regulatory requirements by the Fund or the Management Company; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(i) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) which requires the Issuer, in relation to the subscription, redemption or holding of Fund Shares, (i) to create a reserve or provision, or (ii) to increase the amount of regulatory capital held by the Issuer with respect to complying with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities to an extent that is significant in comparison with the conditions applying on the First Trade Date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(j) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) as a result of which compliance by the Issuer with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities would become unlawful or impracticable or would entail substantially higher costs; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(k) an increase in the proportion of the volume held by the Issuer alone or together with a third party with which the Issuer enters into a hedging transaction with respect to the Securities beyond [Insert relevant percentage]% of the Fund Shares outstanding;

(l) the Issuer is required to consolidate the Fund as a result of accounting or other regulations;

(m) the sale or redemption of the Fund Shares for reasons beyond the control of the Issuer and not relating to the Securities, provided that this is not solely for the purpose of entering into or unwinding hedging transactions;

(n) an event or circumstance that has or could have the following effects: (i) the suspension of the issuance of additional Fund Shares or of the redemption of existing Fund Shares or (ii) the reduction of the number of Fund Shares of a shareholder in the Fund for reasons outside the control of that shareholder or (iii) the subdivision, consolidation or reclassification of the Fund Shares or (iv) payments in respect of a redemption of Fund Shares being made partly or wholly by means of a distribution in kind instead of for cash or (v) the creation of side pockets for segregated assets; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(o) the Management Company or a Fund Services Provider discontinues its services for the Fund or loses its accreditation, registration, approval or authorisation and is not
immediately replaced by another services provider which is of similarly good standing; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(p) (i) an order or valid resolution for a winding-up, dissolution, termination, liquidation or an event with similar effects in relation to the Fund or the Fund Shares, (ii) the initiation of composition, bankruptcy or insolvency proceedings, a demerger or spin-off, a reclassification or consolidation, such as a change in the share class of the Fund or the merger of the Fund into or with another fund, (iii) a requirement to transfer all the Fund Shares to a trustee, liquidator, insolvency administrator or similar office-holder or (iv) the legal prohibition of transfers of the Fund Shares by the shareholders;

(q) the initiation of composition, bankruptcy, insolvency, dissolution or comparable proceedings with respect to the Fund or the Management Company;

(r) the Issuer loses the right to use the Fund as the Underlying for the Securities;

(s) a change in the tax laws and regulations or a change in case law or the administrative practice of the tax authorities which has negative consequences for the Issuer or a Security Holder; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(t) no notification is given of the bases of taxation for the Fund in accordance with the applicable provisions of the German Investment Tax Act (Investmentsteuergesetz, "InvStG") or the Fund or the Management Company has announced that no notification of the bases of taxation will be given in accordance with the applicable provisions of the InvStG in the future;

(u) changes in the investment or distribution policy of the Fund which could have a substantial negative effect on the amount of the Fund's distributions as well as distributions which diverge significantly from the Fund's normal distribution policy to date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(v) the Fund or the Management Company or a company affiliated to it breaches the agreement entered into with the Issuer in relation to the Fund in a significant respect or terminates that agreement; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(w) the Fund or the Management Company, contrary to normal practice to date, fails to provide the Calculation Agent with information that the latter reasonably considers necessary to enable it to monitor compliance with the Fund's investment guidelines or restrictions in a timely manner; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(x) the Fund or the Management Company fails to provide the Calculation Agent with the audited statement of accounts and, where relevant, the half-yearly report as soon as possible after receiving a corresponding request; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(y) any other event that could have a noticeable adverse effect on the NAV of the Fund or the ability of the Issuer to hedge its obligations under the Securities on more than a temporary basis; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(z) the NAV is no longer published in the Underlying Currency;

(aa) if the Issuer does not receive any of the following information: (i) upon request a report on at least an annual basis to enable an assessment of the assets and liabilities, income and operations over the reporting period or (ii) a list of the investments held by the Fund and their weighting and, if the Fund invests in other funds, the corresponding positions of the investments held by these funds and their weighting on the next following Banking Day[.][.]

[In the case of a fund share as Underlying and where the volatility is an Additional Adjustment Event, the following applies:

(bb) the occurrence of an Additional Adjustment Event.]

[In the case of an ETF as Underlying, the following applies:

(a) changes are made with respect to the Fund without the consent of the Calculation Agent which affect the ability of the Issuer to hedge its obligations under the Securities, in particular changes with respect to (i) the risk profile of the Fund, (ii) the investment objectives or investment strategy or investment restrictions of the Fund, (iii) the currency of the Fund Shares, (iv) the method of calculating the NAV or (v) the timetable for the subscription, issue, redemption or transfer of the Fund Shares; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(b) requests for the issue or purchase, redemption or sale or transfer of Fund Shares are executed only partially or not at all;

(c) fees, premiums, discounts, charges, commissions, taxes or similar fees are levied for the issue or redemption of Fund Shares; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(d) the Fund or the Management Company or a provider of fund services appointed for this purpose by the Fund or the Management Company fails to publish the NAV as scheduled or in accordance with normal practice;

(e) a change in the legal form of the Fund;

(f) the quotation of the Underlying at the Relevant Exchange is finally ceased and no Substitute Exchange could be determined; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];
(g) a change of significant individuals in key positions at the Management Company or in the Fund Management; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(h) an early termination performed by the Determining Futures Exchange of the traded Derivatives of the Underlying;

(i) (i) a change in the legal, accounting, tax or regulatory treatment of the Fund or of the Management Company; or (ii) the suspension, cancellation, revocation or absence of the accreditation or registration of the Fund or of the Management Company; or (iii) the suspension, cancellation, revocation or absence of an authorisation of the Fund by the relevant authority; or (iv) the initiation of investigatory proceedings by the supervisory authorities, a conviction by a court or an order by a competent authority relating to the activities of the Fund, the Management Company or a Fund Services Provider, or of individuals in key positions at the Management Company or in the Fund Management as a result of misconduct, a violation of the law or for similar reasons; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(j) a breach by the Fund or the Management Company of the investment objectives, the investment strategy or the investment restrictions of the Fund that is material or a breach of statutory or regulatory requirements by the Fund or the Management Company; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(k) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) which requires the Issuer, in relation to the subscription, redemption or holding of Fund Shares, (i) to create a reserve or provision, or (ii) to increase the amount of regulatory capital held by the Issuer with respect to complying with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities to an extent that is significant in comparison with the conditions applying on the First Trade Date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(l) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) as a result of which compliance by the Issuer with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities would become unlawful or impracticable or would entail substantially higher costs; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(m) an increase in the proportion of the volume held by the Issuer alone or together with a third party with which the Issuer enters into a hedging transaction with respect to the Securities beyond [Insert relevant percentage]% of the Fund Shares outstanding;

(n) the Issuer is required to consolidate the Fund as a result of accounting or other regulations;
(o) the sale or redemption of the Fund Shares for reasons beyond the control of the Issuer and not relating to the Securities, provided that this is not solely for the purpose of entering into or unwinding hedging transactions;

(p) an event or circumstance that has or could have the following effects: (i) the suspension of the issuance of additional Fund Shares or of the redemption of existing Fund Shares or (ii) the reduction of the number of Fund Shares of a shareholder in the Fund for reasons outside the control of that shareholder or (iii) the subdivision, consolidation or reclassification of the Fund Shares or (iv) payments in respect of a redemption of Fund Shares being made partly or wholly by means of a distribution in kind instead of for cash or (v) the creation of side pockets for segregated assets; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(q) the Management Company or a Fund Services Provider discontinues its services for the Fund or loses its accreditation, registration, approval or authorisation and is not immediately replaced by another services provider which is of similarly good standing; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(r) (i) an order or valid resolution for a winding-up, dissolution, termination, liquidation or an event with similar effects in relation to the Fund or the Fund Shares, (ii) the initiation of composition, bankruptcy or insolvency proceedings, a demerger or spin-off, a reclassification or consolidation, such as a change in the share class of the Fund or the merger of the Fund into or with another fund, (iii) a requirement to transfer all the Fund Shares to a trustee, liquidator, insolvency administrator or similar office-holder or (iv) the legal prohibition of transfers of the Fund Shares by the shareholders;

(s) the initiation of composition, bankruptcy, insolvency, dissolution or comparable proceedings with respect to the Fund or the Management Company;

(t) the Issuer loses the right to use the Fund Share as the Underlying for the Securities;

(u) a change in the tax laws and regulations or a change in case law or the administrative practice of the tax authorities which has negative consequences for the Issuer or a Security Holder; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(v) no notification is given of the basis of taxation for the Fund in accordance with the applicable provisions of the German Investment Tax Act (Investmentsteuergesetz, "InvStG") or the Fund or the Management Company has announced that no notification of the bases of taxation will be given in accordance with the applicable provisions of the InvStG in the future;

(w) changes in the investment or distribution policy of the Fund which could have a substantial negative effect on the amount of the Fund's distributions as well as distributions which diverge significantly from the Fund's normal distribution policy to date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(x) the Fund or the Management Company or a company affiliated to it breaches the agreement entered into with the Issuer in relation to the Fund in a significant respect or terminates that agreement; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its
reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by 
Italian law, insert: acting in accordance with relevant market practice and in good 
faith];

(y) the Fund or the Management Company, contrary to normal practice to date, fails to 
provide the Calculation Agent with information that the latter reasonably considers 
necessary to enable it to monitor compliance with the Fund’s investment guidelines or 
restrictions in a timely manner; whether this is the case shall be determined by the 
Calculation Agent [in the case of Securities governed by German law, insert: in its 
reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by 
Italian law, insert: acting in accordance with relevant market practice and in good 
faith];

(z) the Fund or the Management Company fails to provide the Calculation Agent with the 
audited statement of accounts and, where relevant, the half-yearly report as soon as 
possible after receiving a corresponding request; whether this is the case shall be 
determined by the Calculation Agent [in the case of Securities governed by German 
law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities 
governed by Italian law, insert: acting in accordance with relevant market practice and 
in good faith];

(aa) any other event that could have a noticeable adverse effect on the NAV of the Fund or 
the ability of the Issuer to hedge its obligations under the Securities on more than a 
temporary basis; whether this is the case shall be determined by the Calculation Agent 
[in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting 
in accordance with relevant market practice and in good faith];

(bb) the NAV is no longer published in the Underlying Currency;

(cc) the occurrence of an Additional Adjustment Event.

The Calculation Agent is under no obligation to monitor whether or not one of the events 
referred to above has occurred.

[In the case of a Fund Share as Underlying and where the volatility is an Additional Adjustment Event, 
the following applies:

"Additional Adjustment Events” means:

[that the Historic Volatility of the Underlying exceeds a volatility level of [Insert]%.

The "Historic Volatility of the Underlying” is calculated on a Calculation Date on the basis 
of the daily logarithmic returns of the NAV over the immediately preceding [Insert number of 
days] Calculation Dates in each case using the following formula:

$$
\sigma(t) = \sqrt{\frac{1}{P} \sum_{p=1}^{P} \left[ \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) \right] - \frac{1}{P} \times \left( \sum_{q=1}^{P} \ln \left( \frac{NAV(t-q)}{NAV(t-q-1)} \right) \right)^2} \times \sqrt{252}
$$

Where:
"t" is the relevant Calculation Date;
"P" is [Insert number of days];
"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation 
Date preceding the relevant Calculation Date (t);
"ln [x]“ denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on a relevant Calculation Date using the daily 
returns of the NAV for the most recent [Insert number of days] Calculation Dates and 
standardised to produce an annual volatility level. The return is defined as the logarithm of the
change in the NAV between two consecutive Calculation Dates in each case. The volatility
determined using this method may not exceed a volatility level of [Insert]%.

[that the difference between the Historic Volatility of the Underlying and the Historic
Volatility of the Benchmark on both, a Calculation Date and a Benchmark Calculation Date
exceeds [Insert]%.

The "Historic Volatility of the Underlying" is calculated on any day that is a Calculation
Date and a Benchmark Calculation Date on the basis of the daily logarithmic returns of the
Underlying over the immediately preceding [Insert number of days] Calculation Dates which are also Benchmark Calculation Dates in each case using the following formula:

\[
s(t) = \sqrt{\frac{\sum_{p=1}^{P} \left[ \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) - \frac{1}{P} \times \sum_{q=1}^{q} \ln \left( \frac{NAV(t-q)}{NAV(t-q-1)} \right) \right]^2}{P-1} \times \sqrt{252}}
\]

Where:
"t" is the relevant Calculation Date which is also a Benchmark Calculation Date;
"P" is [Insert number of days];
"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation
Date preceding the relevant Calculation Date (t);
"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on any day that is a Calculation Date and a
Benchmark Calculation Date using the daily returns of the Underlying for the most recent
[Insert number of days] Calculation Dates which are also Benchmark Calculation Dates and
standardised to produce an annual volatility level. The return is defined as the logarithm of the
change in the NAV between two consecutive Calculation Dates which are also Benchmark Calculation Dates in each case.

The "Historic Volatility of the Benchmark" is calculated on any day that is a Benchmark
Calculation Date and a Calculation Date on the basis of the daily logarithmic returns of the
Benchmark over the immediately preceding [Insert number of days] Benchmark Calculation Dates which are also Calculation Dates in each case using the following formula:

\[
s(t) = \sqrt{\frac{\sum_{p=1}^{P} \left[ \ln \left( \frac{BRP(t-p)}{BRP(t-p-1)} \right) - \frac{1}{P} \times \sum_{q=1}^{q} \ln \left( \frac{BRP(t-q)}{BRP(t-q-1)} \right) \right]^2}{P-1} \times \sqrt{252}}
\]

Where:
"t" is the relevant Benchmark Calculation Date which is also a Calculation Date;
"P" is [Insert number of days];
"BRP (t-k)" (with k = p, q) is the Benchmark Reference Price on the k-th Benchmark
Calculation Date preceding the relevant Benchmark Calculation Date (t);
"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on any day that is a Benchmark Calculation
Date and a Calculation Date using the daily returns of the Benchmark for the most recent
[Insert number of days] Benchmark Calculation Dates and standardised to produce an annual
volatility level. The return is defined as the logarithm of the change in the Benchmark Reference Price between two consecutive Benchmark Calculation Dates in each case.]

[In the case of a Fund Share as Underlying and where the volatility is an Additional Adjustment Event, the following applies:

"Additional Adjustment Events" means:

[that the Historic Volatility of the Underlying exceeds a volatility level of [Insert]%.

The "Historic Volatility of the Underlying" is calculated on a Calculation Date on the basis of the daily logarithmic returns of the NAV over the immediately preceding [Insert number of days] Calculation Dates in each case using the following formula:

$$
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \left( \frac{\text{NAV}(t-p)}{\text{NAV}(t-p-1)} \right) - \frac{1}{P} \sum_{q=1}^{P} \ln \left( \frac{\text{NAV}(t-q)}{\text{NAV}(t-q-1)} \right) \right)^2}{P-1}} \times \sqrt{252}
$$

Where:

"t" is the relevant Calculation Date;

"P" is [Insert number of days];

"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation Date preceding the relevant Calculation Date (t);

"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on a relevant Calculation Date using the daily returns of the NAV for the most recent [Insert number of days] Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the change in the NAV between two consecutive Calculation Dates in each case. The volatility determined using this method may not exceed a volatility level of [Insert]%.

[that the difference between the Historic Volatility of the Underlying and the Historic Volatility of the Benchmark on both, a Calculation Date and a Benchmark Calculation Date exceeds [Insert]%.

The "Historic Volatility of the Underlying" is calculated on any day that is a Calculation Date and a Benchmark Calculation Date on the basis of the daily logarithmic returns of the Underlying over the immediately preceding [Insert number of days] Calculation Dates which are also Benchmark Calculation Dates in each case using the following formula:

$$
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \left( \frac{\text{NAV}(t-p)}{\text{NAV}(t-p-1)} \right) - \frac{1}{P} \sum_{q=1}^{P} \ln \left( \frac{\text{NAV}(t-q)}{\text{NAV}(t-q-1)} \right) \right)^2}{P-1}} \times \sqrt{252}
$$

Where:
"t" is the relevant Calculation Date which is also a Benchmark Calculation Date;

"P" is [Insert number of days];

"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation Date preceding the relevant Calculation Date (t);

"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on any day that is a Calculation Date and a Benchmark Calculation Date using the daily returns of the Underlying for the most recent [Insert number of days] Calculation Dates which are also Benchmark Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the change in the NAV between two consecutive Calculation Dates which are also Benchmark Calculation Dates in each case.

The "Historic Volatility of the Benchmark" is calculated on any day that is a Benchmark Calculation Date and a Calculation Date on the basis of the daily logarithmic returns of the Benchmark over the immediately preceding [Insert number of days] Benchmark Calculation Dates and standardised to produce an annual volatility level.

The return is defined as the logarithm of the change in the Benchmark Reference Price between two consecutive Benchmark Calculation Dates in each case.

\[
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \left( \frac{BRP(t-p)}{BRP(t-p-1)} \right) \right) - \frac{1}{P} \times \left( \sum_{q=1}^{Q} \ln \left( \frac{BRP(t-q)}{BRP(t-q-1)} \right) \right)^2}{P-1}} \times \sqrt{252}
\]

Where:

"t" is the relevant Benchmark Calculation Date which is also a Calculation Date;

"P" is [Insert number of days];

"BRP (t-k)" (with k = p, q) is the Benchmark Reference Price on the k-th Benchmark Calculation Date preceding the relevant Benchmark Calculation Date (t);

"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on any day that is a Benchmark Calculation Date and a Calculation Date using the daily returns of the Benchmark for the most recent [Insert number of days] Benchmark Calculation Dates and standardised to produce an annual volatility level.

*In the case of Closed End Leverage Securities and Open End Leverage Securities, the following applies:*

\[
\text{Redemption Amount} = \max(\text{Relevant Reference Price}; 0) \times \text{Ratio} \times \text{FX} (\text{final}) \\
\]

(2) **Dividend Amount:** The Dividend Amount \((k)\) (with \(k = 1, 2, \ldots\)) equals an amount in the Specified Currency, which is calculated by the Calculation Agent at the respective Dividend Observation Date \((k)\) (with \(k = 1, 2, \ldots\)) as follows:

\[
\text{Dividend Amount} (k) = \text{Dividend Value} (k) \times \text{Ratio} \\
\]

(For the calculation of the Dividend Amount one index point corresponds to one unit of the Underlying Currency (e.g. EUR 1.00 for Euro or USD 1.00 for US-Dollar).)

The method of calculation of the Dividend Amount is subject to adjustments and market disruptions pursuant to § 7, § 8 and § 9 of the Special Conditions.

BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(h) a breach by the Fund or the Management Company of the investment objectives, the investment strategy or the investment restrictions of the Fund that is material, or a breach of statutory or regulatory requirements by the Fund or the Management Company; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(i) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) which requires the Issuer, in relation to the subscription, redemption or holding of Fund Shares, (i) to create a reserve or provision, or (ii) to increase the amount of regulatory capital held by the Issuer with respect to complying with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities to an extent that is significant in comparison with the conditions applying on the First Trade Date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(j) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) as a result of which compliance by the Issuer with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities would become unlawful or impracticable or would entail substantially higher costs; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(k) an increase in the proportion of the volume held by the Issuer alone or together with a third party with which the Issuer enters into a hedging transaction with respect to the Securities beyond [Insert relevant percentage]% of the Fund Shares outstanding;

(l) the Issuer is required to consolidate the Fund as a result of accounting or other regulations;

(m) the sale or redemption of the Fund Shares for reasons beyond the control of the Issuer and not relating to the Securities, provided that this is not solely for the purpose of entering into or unwinding hedging transactions;

(n) an event or circumstance that has or could have the following effects: (i) the suspension of the issuance of additional Fund Shares or of the redemption of existing Fund Shares or (ii) the reduction of the number of Fund Shares of a shareholder in the Fund for reasons outside the control of that shareholder or (iii) the subdivision, consolidation or reclassification of the Fund Shares or (iv) payments in respect of a redemption of Fund Shares being made partly or wholly by means of a distribution in kind instead of for cash or (v) the creation of side pockets for segregated assets; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(o) the Management Company or a Fund Services Provider discontinues its services for the Fund or loses its accreditation, registration, approval or authorisation and is not immediately replaced by another services provider which is of similarly good
standing; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(p) (i) an order or valid resolution for a winding-up, dissolution, termination, liquidation or an event with similar effects in relation to the Fund or the Fund Shares, (ii) the initiation of composition, bankruptcy or insolvency proceedings, a demerger or spin-off, a reclassification or consolidation, such as a change in the share class of the Fund or the merger of the Fund into or with another fund, (iii) a requirement to transfer all the Fund Shares to a trustee, liquidator, insolvency administrator or similar office-holder or (iv) the legal prohibition of transfers of the Fund Shares by the shareholders;

(q) the initiation of composition, bankruptcy, insolvency, dissolution or comparable proceedings with respect to the Fund or the Management Company;

(r) the Issuer loses the right to use the Fund as the Underlying for the Securities;

(s) a change in the tax laws and regulations or a change in case law or the administrative practice of the tax authorities which has negative consequences for the Issuer or a Security Holder; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(t) no notification is given of the bases of taxation for the Fund in accordance with the applicable provisions of the German Investment Tax Act (Investmentsteuergesetz, "InvStG") or the Fund or the Management Company has announced that no notification of the bases of taxation will be given in accordance with the applicable provisions of the InvStG in the future;

(u) changes in the investment or distribution policy of the Fund which could have a substantial negative effect on the amount of the Fund's distributions as well as distributions which diverge significantly from the Fund's normal distribution policy to date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(v) the Fund or the Management Company or a company affiliated to it breaches the agreement entered into with the Issuer in relation to the Fund in a significant respect or terminates that agreement; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(w) the Fund or the Management Company, contrary to normal practice to date, fails to provide the Calculation Agent with information that the latter reasonably considers necessary to enable it to monitor compliance with the Fund's investment guidelines or restrictions in a timely manner; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(bb) the NAV is no longer published in the Underlying Currency;

(cc) the occurrence of an Additional Adjustment Event.

The Calculation Agent is under no obligation to monitor whether or not one of the events referred to above has occurred.

[In the case of a Fund Share as Underlying and where the volatility is an Additional Adjustment Event, the following applies:]

"Additional Adjustment Events" means:

[that the Historic Volatility of the Underlying exceeds a volatility level of [Insert]%.

The "Historic Volatility of the Underlying" is calculated on a Calculation Date on the basis of the daily logarithmic returns of the NAV over the immediately preceding [Insert number of days] Calculation Dates in each case using the following formula:

\[
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left[ \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) - \frac{1}{P} \sum_{q=1}^{P} \ln \left( \frac{NAV(t-q)}{NAV(t-q-1)} \right) \right]^2}{P-1}} \times \sqrt{252}
\]

Where:

"t" is the relevant Calculation Date;

"P" is [Insert number of days];

"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation Date preceding the relevant Calculation Date (t);

"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on a relevant Calculation Date using the daily returns of the NAV for the most recent [Insert number of days] Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the
change in the NAV between two consecutive Calculation Dates in each case. The volatility
determined using this method may not exceed a volatility level of [Insert]%.

[that the difference between the Historic Volatility of the Underlying and the Historic
Volatility of the Benchmark on both, a Calculation Date and a Benchmark Calculation Date
exceeds [Insert]%.

The "Historic Volatility of the Underlying" is calculated on any day that is a Calculation
Date and a Benchmark Calculation Date on the basis of the daily logarithmic returns of the
Underlying over the immediately preceding [Insert number of days] Calculation Dates which are also Benchmark Calculation Dates in each case using the following formula:

\[
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) - \frac{1}{P} \times \sum_{q=1}^{Q} \ln \left( \frac{NAV(t-q)}{NAV(t-q-1)} \right) \right)^2}{P-1}} \times \sqrt{\frac{252}{P-1}}
\]

Where:
"t" is the relevant Calculation Date which is also a Benchmark Calculation Date;
"P" is [Insert number of days];
"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation
Date preceding the relevant Calculation Date (t);
"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on any day that is a Calculation Date and a
Benchmark Calculation Date using the daily returns of the Underlying for the most recent
[Insert number of days] Calculation Dates which are also Benchmark Calculation Dates and
standardised to produce an annual volatility level. The return is defined as the logarithm of the
change in the NAV between two consecutive Calculation Dates which are also Benchmark Calculation Dates in each case.

The "Historic Volatility of the Benchmark" is calculated on any day that is a Benchmark
Calculation Date and a Calculation Date on the basis of the daily logarithmic returns of the
Benchmark over the immediately preceding [Insert number of days] Benchmark Calculation Dates which are also Calculation Dates in each case using the following formula:

\[
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \left( \frac{BRP(t-p)}{BRP(t-p-1)} \right) - \frac{1}{P} \times \sum_{q=1}^{Q} \ln \left( \frac{BRP(t-q)}{BRP(t-q-1)} \right) \right)^2}{P-1}} \times \sqrt{\frac{252}{P-1}}
\]

Where:
"t" is the relevant Benchmark Calculation Date which is also a Calculation Date;
"P" is [Insert number of days];
"BRP (t-k)" (with k = p, q) is the Benchmark Reference Price on the k-th Benchmark
Calculation Date preceding the relevant Benchmark Calculation Date (t);
"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on any day that is a Benchmark Calculation Date and a Calculation Date using the daily returns of the Benchmark for the most recent
[Insert number of days] Benchmark Calculation Dates and standardised to produce an annual
volatility level. The return is defined as the logarithm of the change in the Benchmark Reference Price between two consecutive Benchmark Calculation Dates in each case.]

*In the case of a share or a depository receipt as Underlying, the following applies:*

(a) each measure taken by the company that has issued the Underlying or by a third party, which would – due to a change in the legal and economic position, in particular a change in the company’s fixed assets and capital – affect the Underlying not only immaterially (in particular capital increase against cash contribution, issuance of securities with options or conversion rights into shares, capital increase with company funds, distribution of special dividends, share splits, merger, liquidation, nationalisation); whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(b) an early termination performed by the Determining Futures Exchange of the there traded Derivatives of the Underlying;

(c) an adjustment performed by the Determining Futures Exchange of the there traded Derivatives of the Underlying,
(d) [a Hedging Disruption occurs;
(e)] any event which is economically equivalent to one of the above-mentioned events with regard to its consequences on the Underlying; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith].

[In the case of an index as Underlying, the following applies:

(a) changes in the relevant Index Concept or the calculation of the Underlying, that result in a new relevant Index Concept or calculation of the Underlying being no longer economically equivalent to the original relevant Index Concept or the original calculation of the Underlying; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];
(b) the calculation or publication of the Underlying is finally discontinued, or replaced by another index (the "Index Replacement Event");
(c) due to circumstances for which the Issuer is not responsible, the Issuer is no longer entitled to use the Underlying as basis for the calculations or, respectively, specifications described in the Terms and Conditions of these Securities (a "Index Usage Event"); an Index Usage Event is also the termination of the license to use the Underlying due to an unacceptable increase in license fees;
(d) [a Hedging Disruption occurs;
(e)] any event which is economically equivalent to one of the above-mentioned events with regard to its consequences on the Underlying; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith].

[In the case of a commodity as Underlying, the following applies:

[(a)] any changes in the Relevant Trading Conditions of the Underlying that lead to a situation where as a result of the change, the changed trading conditions are no longer economically equivalent to the Relevant Trading Conditions prior to the change; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(b) a Hedging Disruption occurs].

[In the case of a fund share (other than an ETF) as Underlying, the following applies:

(a) changes are made with respect to the Fund without the consent of the Calculation Agent which affect the ability of the Issuer to hedge its obligations under the Securities, in particular changes with respect to (i) the risk profile of the Fund, (ii) the investment objectives or investment strategy or investment restrictions of the Fund, (iii) the currency of the Fund Shares, (iv) the method of calculating the NAV or (v) the timetable for the subscription, issue, redemption or transfer of the Fund Shares; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];
(b) requests for the issue, redemption or transfer of Fund Shares are executed only partially or not at all;

(c) fees, premiums, discounts, charges, commissions, taxes or similar fees are levied for the issue or redemption of Fund Shares; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(g) (i) a change in the legal, accounting, tax or regulatory treatment of the Fund or of the Management Company; or (ii) the suspension, cancellation, revocation or absence of the accreditation or registration of the Fund or of the Management Company; or (iii) the suspension, cancellation, revocation or absence of an authorisation of the Fund by the relevant authority; or (iv) the initiation of investigatory proceedings by the supervisory authorities, a conviction by a court or an order by a competent authority relating to the activities of the Fund, the Management Company or a Fund Services Provider, or of individuals in key positions at the Management Company or in the Fund Management as a result of misconduct, a violation of the law or for similar reasons; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(h) a breach by the Fund or the Management Company of the investment objectives, the investment strategy or the investment restrictions of the Fund that is material, or a breach of statutory or regulatory requirements by the Fund or the Management Company; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(i) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) which requires the Issuer, in relation to the subscription, redemption or holding of Fund Shares, (i) to create a reserve or provision, or (ii) to increase the amount of regulatory capital held by the Issuer with respect to complying with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities to an extent that is significant in comparison with the conditions applying on the First Trade Date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(j) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) as a result of which compliance by the Issuer with the terms of the agreements it has entered into for the purpose of hedging its obligations under the Securities would become unlawful or impracticable or would entail substantially higher costs; whether this is the case shall be determined by the Calculation Agent [in
the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(k) an increase in the proportion of the volume held by the Issuer alone or together with a third party with which the Issuer enters into a hedging transaction with respect to the Securities beyond [Insert relevant percentage]% of the Fund Shares outstanding;

(l) the Issuer is required to consolidate the Fund as a result of accounting or other regulations;

(m) the sale or redemption of the Fund Shares for reasons beyond the control of the Issuer and not relating to the Securities, provided that this is not solely for the purpose of entering into or unwinding hedging transactions;

(n) an event or circumstance that has or could have the following effects: (i) the suspension of the issuance of additional Fund Shares or of the redemption of existing Fund Shares or (ii) the reduction of the number of Fund Shares of a shareholder in the Fund for reasons outside the control of that shareholder or (iii) the subdivision, consolidation or reclassification of the Fund Shares or (iv) payments in respect of a redemption of Fund Shares being made partly or wholly by means of a distribution in kind instead of for cash or (v) the creation of side pockets for segregated assets; whether the conditions are fulfilled shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(o) the Management Company or a Fund Services Provider discontinues its services for the Fund or loses its accreditation, registration, approval or authorisation and is not immediately replaced by another services provider which is of similarly good standing; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(p) (i) an order or valid resolution for a winding-up, dissolution, termination, liquidation or an event with similar effects in relation to the Fund or the Fund Shares, (ii) the initiation of composition, bankruptcy or insolvency proceedings, a demerger or spin-off, a reclassification or consolidation, such as a change in the share class of the Fund or the merger of the Fund into or with another fund, (iii) a requirement to transfer all the Fund Shares to a trustee, liquidator, insolvency administrator or similar office-holder or (iv) the legal prohibition of transfers of the Fund Shares by the shareholders;

(q) the initiation of composition, bankruptcy, insolvency, dissolution or comparable proceedings with respect to the Fund or the Management Company;

(r) the Issuer loses the right to use the Fund as the Underlying for the Securities;

(s) a change in the tax laws and regulations or a change in case law or the administrative practice of the tax authorities which has negative consequences for the Issuer or a Security Holder; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(t) no notification is given of the bases of taxation for the Fund in accordance with the applicable provisions of the German Investment Tax Act (Investmentsteuergesetz, "InvStG") or the Fund or the Management Company has announced that no notification of the bases of taxation will be given in accordance with the applicable provisions of the InvStG in the future;

(u) changes in the investment or distribution policy of the Fund which could have a substantial negative effect on the amount of the Fund's distributions as well as
distributions which diverge significantly from the Fund's normal distribution policy to date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(v) the Fund or the Management Company or a company affiliated to it breaches the agreement entered into with the Issuer in relation to the Fund in a significant respect or terminates that agreement; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(w) the Fund or the Management Company, contrary to normal practice to date, fails to provide the Calculation Agent with information that the latter reasonably considers necessary to enable it to monitor compliance with the Fund's investment guidelines or restrictions in a timely manner; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(cc) the occurrence of an Additional Adjustment Event].

The Calculation Agent is under no obligation to monitor whether or not one of the events referred to above has occurred.]
In the case of a Fund Share as Underlying and where the volatility is an Additional Adjustment Event, the following applies:

"Additional Adjustment Events" means:

[that the Historic Volatility of the Underlying exceeds a volatility level of [Insert]%.

The "Historic Volatility of the Underlying" is calculated on a Calculation Date on the basis of the daily logarithmic returns of the NAV over the immediately preceding [Insert number of days] Calculation Dates in each case using the following formula:

\[
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) \right)^2}{p-1} \times \frac{1}{\sqrt{252}}} 
\]

Where:

"t" is the relevant Calculation Date;

"P" is [Insert number of days];

"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation Date preceding the relevant Calculation Date (t);

"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on a relevant Calculation Date using the daily returns of the NAV for the most recent [Insert number of days] Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the change in the NAV between two consecutive Calculation Dates in each case. The volatility determined using this method may not exceed a volatility level of [Insert]%.

[that the difference between the Historic Volatility of the Underlying and the Historic Volatility of the Benchmark on both, a Calculation Date and a Benchmark Calculation Date exceeds [Insert]%.

The "Historic Volatility of the Underlying" is calculated on any day that is a Calculation Date and a Benchmark Calculation Date on the basis of the daily logarithmic returns of the Underlying over the immediately preceding [Insert number of days] Calculation Dates which are also Benchmark Calculation Dates in each case using the following formula:

\[
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) \right)^2}{p-1} \times \frac{1}{\sqrt{252}}} 
\]

Where:

"t" is the relevant Calculation Date which is also a Benchmark Calculation Date;

"P" is [Insert number of days];

"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation Date preceding the relevant Calculation Date (t);

"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on any day that is a Calculation Date and a Benchmark Calculation Date using the daily returns of the Underlying for the most recent [Insert number of days] Calculation Dates which are also Benchmark Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the change in the NAV between two consecutive Calculation Dates which are also Benchmark Calculation Dates in each case.

The "Historic Volatility of the Benchmark" is calculated on any day that is a Benchmark Calculation Date and a Calculation Date on the basis of the daily logarithmic returns of the
Benchmark over the immediately preceding \[\text{[Insert number of days]}\] Benchmark Calculation Dates which are also Calculation Dates in each case using the following formula:

\[
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left( \ln \frac{BRP(t-p)}{BRP(t-p-1)} \right) - \frac{1}{P} \times \left( \sum_{q=1}^{q} \ln \frac{BRP(t-q)}{BRP(t-q-1)} \right)^2}{P-1}} \times \sqrt{252}
\]

Where:

"t" is the relevant Benchmark Calculation Date which is also a Calculation Date;

"P" is \[\text{[Insert number of days]}\];

"BRP (t-k)" (with \(k = p, q\)) is the Benchmark Reference Price on the \(k\)-th Benchmark Calculation Date preceding the relevant Benchmark Calculation Date \((t)\);

"\(\ln [x]\)" denotes the natural logarithm of \(x\).

The degree of variation (volatility) is estimated on any day that is a Benchmark Calculation Date and a Calculation Date using the daily returns of the Benchmark for the most recent \[\text{[Insert number of days]}\] Benchmark Calculation Dates and standardised to produce an annual volatility level. (2) **Additional Conditional Amount (k):** If an Additional Conditional Amount Payment Event (k) has occurred on an Observation Date (k), the respective Additional Conditional Amount (k) will be paid on the respective Additional Conditional Amount Payment Date (k) pursuant to the provisions of § 6 of the Special Conditions.

The "**Additional Conditional Amount (k)" is specified as follows:

(i) If R(k) is greater than R (initial) the Additional Conditional Amount (k) is calculated according to the following formula:

\[
\text{Additional Conditional Amount (k)} = \text{Nominal Amount} \times \text{Participation Factor Up} \times (R (k) / R \text{ (initial)}) - 1
\]

(ii) If R(k) is less than R (initial) the Additional Conditional Amount (k) is calculated according to the following formula:

\[
\text{Additional Conditional Amount (k)} = \text{Nominal Amount} \times \text{Participation Factor Down} \times (1 - (R \text{ (k) / R \text{ (initial)})})
\]

[The Additional Conditional Amount (k) is not less than the Minimum Additional Conditional Amount [and no greater than the Maximum Additional Conditional Amount].] [The Additional Conditional Amount (k) is not greater than the Maximum Additional Conditional Amount.]

If no Additional Conditional Amount Payment Event (k) has occurred on this respective Observation Date (k), no Additional Conditional Amount (k) will be paid on the corresponding Additional Conditional Amount Payment Date (k).

[In the case of Securities with an unconditional Additional Amount, the following applies:

(2) **Additional Conditional Amount (k):** The Additional Conditional Amount (k) will be paid on the respective Additional Conditional Amount Payment Date (k) pursuant to the provisions of § 6 of the Special Conditions and calculated or specified by the Calculation Agent as follows:

\[
\text{Additional Conditional Amount (k)} = \text{Nominal Amount} \times \text{Geometric Average Performance of the Underlying (k)} - 1
\]

[The Additional Conditional Amount (k) is not less than the respective Minimum Additional Conditional Amount (k).]

The Additional Conditional Amount (k) is not greater than the Maximum Additional Conditional Amount (k).

If a Lock-In Event has occurred on an Observation Date (k), the Maximum Additional Amount shall be paid on the corresponding Additional Conditional Amount Payment Date (k). Moreover, on all Additional Conditional Amount Payment Dates (k) following this Additional Conditional Amount Payment Date (k) the Maximum Additional Amount shall be paid regardless of the Geometric Average Performance of the Underlying (k).]

§ 3

**Redemption**

[In the case of Securities with cash settlement, the following applies:

**Redemption:** The Securities shall be redeemed by payment of the Redemption Amount on the [[fifth]●] Banking Day immediately following the] [Final Observation Date] [Final Payment Date] pursuant to the provisions of § 6 of the Special Conditions.]

229
[In the case of Securities with physical delivery, the following applies:]

Redemption: The Securities shall be redeemed either

(i) if no Barrier Event has occurred or if a Barrier Event has occurred and \( R \) (final) is equal to or greater than the Strike by payment of the Redemption Amount on the Final Payment Date pursuant to the provisions of § 6 of the Special Conditions, or

(ii) if a Barrier Event has occurred and if \( R \) (final) is lower than the Strike by delivery of the Underlying in a quantity expressed by the Ratio per Security. If the Ratio leads to a non-deliverable fraction of the Underlying, a cash amount expressed in the Specified Currency will be paid instead in the amount of the value of the non-deliverable fraction of the Underlying (the "Supplemental Cash Amount") which is calculated from the Reference Price on the Final Observation Date multiplied by the non-deliverable fraction of the Underlying [and divided by FX (final)] [and multiplied by FX (final)].]

§ 4

Redemption Amount

Redemption Amount: The Redemption Amount corresponds to an amount in the Specified Currency calculated or specified by the Calculation Agent as follows:

[Product Type 7: Cash Collect Securities]

[In the case of Cash Collect Securities with cash settlement, the following applies:]

- If no Barrier Event has occurred the Redemption Amount corresponds to the Maximum Amount.

- If a Barrier Event has occurred, the Redemption Amount is specified according to the following formula:

\[
\text{Redemption Amount} = \text{Nominal Amount} \times \text{Participation Factor} \times \frac{R \text{ (final)}}{\text{Strike}}
\]

However, in this case the Redemption Amount is not greater than the Maximum Amount [In the case of Cash Collect with Floor (Put Spread), the following applies; and no less than the Minimum Redemption Amount].]

[In the case of Cash Collect Securities with physical delivery, the following applies:]

- If no Barrier Event has occurred the Redemption Amount corresponds to the Maximum Amount.

- If a Barrier Event has occurred and if \( R \) (final) is equal to or greater than the Strike, the Redemption Amount corresponds to the Nominal Amount.]

[Product Type 8: Twin-Win Cash Collect]

- If no Barrier Event has occurred the Redemption Amount corresponds to the Nominal Amount.

- If a Barrier Event has occurred, the Redemption Amount is specified according to the following formula:

\[
\text{Redemption Amount} = \text{Nominal Amount} \times \frac{R \text{ (final)}}{R \text{ (initial)}}
\]

[Product Type 9: Twin-Win Lock-in Cash Collect and Product Type 10: Lock-in Cash Collect]

- If a Lock-in Event has occurred on any Observation Date \( k \), the Redemption Amount corresponds to the Nominal Amount.

- If no Lock-in Event has occurred and no Barrier Event has occurred, the Redemption Amount corresponds to the Nominal Amount.

- If no Lock-in Event has occurred and a Barrier Event has occurred, the Redemption is specified according to the following formula:
Redemption Amount = Nominal Amount x R (final) / R (initial).]

[Product Type 11: Twin-Win Geared Put Cash Collect and Product Type 12: Geared Put Cash Collect
- If R (final) is equal to or greater than the Strike, the Redemption Amount corresponds to the Nominal Amount.
- If R (final) is lower than the Strike, the Redemption Amount is specified according to the following formula:
  Redemption Amount = Nominal Amount x (1 + (Participation Factor x ((R (final) – Strike)/ R (initial)))).

[Product Type 13 and 14: Geoscope Lock-In Cash Collect and Barrier Geoscope Lock-In Cash Collect
- If a Lock-In Event has occurred the Redemption Amount corresponds to the Nominal Amount.
  [In the case of Barrier Geoscope Lock-In Cash Collect, the following applies:
  - If no Lock-In Event has occurred and if no Barrier Event has occurred, the Redemption Amount corresponds to the Nominal Amount.]
  - If no Lock-in Event has occurred [In the case of Barrier Geoscope Lock-In Cash Collect, the following applies: and a Barrier Event has occurred], the Redemption Amount is specified according to the following formula:
    Redemption Amount = Nominal Amount x R (final) / R (initial)

[In the case of Securities with Floor, the following applies:
  The Redemption Amount in this case is not less than the Minimum Redemption Amount.]

(t) the Issuer loses the right to use the Fund Share as the Underlying for the Securities;

(u) a change in the tax laws and regulations or a change in case law or the administrative practice of the tax authorities which has negative consequences for the Issuer or a Security Holder; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(v) no notification is given of the basis of taxation for the Fund in accordance with the applicable provisions of the German Investment Tax Act (Investmentsteuergesetz, "InvStG") or the Fund or the Management Company has announced that no notification of the bases of taxation will be given in accordance with the applicable provisions of the InvStG in the future;

(w) changes in the investment or distribution policy of the Fund which could have a substantial negative effect on the amount of the Fund's distributions as well as distributions which diverge significantly from the Fund's normal distribution policy to date; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(x) the Fund or the Management Company or a company affiliated to it breaches the agreement entered into with the Issuer in relation to the Fund in a significant respect or terminates that agreement; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];
(y) the Fund or the Management Company, contrary to normal practice to date, fails to provide the Calculation Agent with information that the latter reasonably considers necessary to enable it to monitor compliance with the Fund’s investment guidelines or restrictions in a timely manner; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(z) the Fund or the Management Company fails to provide the Calculation Agent with the audited statement of accounts and, where relevant, the half-yearly report as soon as possible after receiving a corresponding request; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(aa) any other event that could have a noticeable adverse effect on the NAV of the Fund or the ability of the Issuer to hedge its obligations under the Securities on more than a temporary basis; whether this is the case shall be determined by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith];

(bb) the NAV is no longer published in the Underlying Currency;

(cc) the occurrence of an Additional Adjustment Event.

The Calculation Agent is under no obligation to monitor whether or not one of the events referred to above has occurred.

[In the case of Securities where the volatility is an Additional Adjustment Event:]

"Additional Adjustment Event" means:

[that the Historic Volatility of the Underlying exceeds a volatility level of [Insert]%.

The "Historic Volatility of the Underlying" is calculated on a Calculation Date on the basis of the daily logarithmic returns of the NAV over the immediately preceding [Insert number of days] Calculation Dates using the following formula:

$$
\sigma(t) = \sqrt{\frac{\sum_{p=1}^{p} \left[ \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) \right] \cdot \frac{1}{P} \times \sum_{q=1}^{q} \ln \left( \frac{NAV(t-q)}{NAV(t-q-1)} \right)}{P - 1} \times \frac{252}{\text{Insert number of days}}}.
$$

Where:

"t" is the relevant Calculation Date;

"P" is [Insert number of days];

"NAV (t-k)" (with k = p, q) is the NAV of the Underlying on the k-th Calculation Date preceding the relevant Calculation Date (t);

"ln [x]" denotes the natural logarithm of x.

The degree of variation (volatility) is estimated on a relevant Calculation Date using the daily returns of the NAV for the most recent [Insert number of days] Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the change in the NAV between two consecutive Calculation Dates in each case. The volatility determined using this method may not exceed a volatility level of [Insert]%.

[that the difference between the Historic Volatility of the Underlying and the Historic Volatility of the Benchmark on both, a Calculation Date and a Benchmark Calculation Date exceeds [Insert]%.

239
The "Historic Volatility of the Underlying" is calculated on any day that is a Calculation Date and a Benchmark Calculation Date on the basis of the daily logarithmic returns of the Underlying over the immediately preceding [Insert number of days] Calculation Dates which are also Benchmark Calculation Dates in each case using the following formula:

\[ \sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left[ \ln \left( \frac{NAV(t-p)}{NAV(t-p-1)} \right) - \frac{1}{P} \times \left( \sum_{q=1}^{P} \ln \left( \frac{NAV(t-q)}{NAV(t-q-1)} \right) \right) \right]^2 \times \sqrt{252}}{P-1}} \]

Where:
- \( t \) is the relevant Calculation Date which is also a Benchmark Calculation Date;
- \( P \) is [Insert number of days];
- \( \text{NAV} (t-k) \) (with \( k = p, q \)) is the NAV of the Underlying on the k-th Calculation Date preceding the relevant Calculation Date (t);
- \( \ln [x] \) denotes the natural logarithm of \( x \).

The degree of variation (volatility) is estimated on any day that is a Calculation Date and a Benchmark Calculation Date using the daily returns of the Underlying for the most recent [Insert number of days] Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the change in the NAV between two consecutive Calculation Dates which are also Benchmark Calculation Dates in each case.

The "Historic Volatility of the Benchmark" is calculated on any day that is a Benchmark Calculation Date and a Calculation Date on the basis of the daily logarithmic returns of the Benchmark over the immediately preceding [Insert number of days] Benchmark Calculation Dates which are also Calculation Dates in each case using the following formula:

\[ \sigma(t) = \sqrt{\frac{\sum_{p=1}^{P} \left[ \ln \left( \frac{BRP(t-p)}{BRP(t-p-1)} \right) - \frac{1}{P} \times \left( \sum_{q=1}^{P} \ln \left( \frac{BRP(t-q)}{BRP(t-q-1)} \right) \right) \right]^2 \times \sqrt{252}}{P-1}} \]

Where:
- \( t \) is the relevant Benchmark Calculation Date which is also a Calculation Date;
- \( P \) is [Insert number of days];
- \( \text{BRP} (t-k) \) (with \( k = p, q \)) is the Benchmark Reference Price on the k-th Benchmark Calculation Date preceding the relevant Benchmark Calculation Date (t);
- \( \ln [x] \) denotes the natural logarithm of \( x \).

The degree of variation (volatility) is estimated on any day that is a Benchmark Calculation Date and a Calculation Date using the daily returns of the Benchmark for the most recent [Insert number of days] Benchmark Calculation Dates and standardised to produce an annual volatility level. The return is defined as the logarithm of the change in the Benchmark Reference Price between two consecutive Benchmark Calculation Dates in each case.

["Administrator" means the Administrator [specified in § 2 of the Product and Underlying Data] [of the Fund]. § 5

[Redemption Right of the Security Holders, Issuer’s Regular Call Right, Issuer’s Extraordinary Call Right]

[In the case of Closed End, Closed End Leverage, Open End and Open End Leverage Securities, the following applies:]

(1) **Redemption Right of the Security Holders:** Each Security Holder may demand redemption of the Securities pursuant to the provisions of § 4 (1) of the Special Conditions against delivery of the Securities to the account of the Principal Paying Agent No. [Insert account number] with the Clearing System to the Issuer's order (the "Redemption Right") at [each Banking Day][the last Banking Day of the [month][months] of [Insert month(s)] of each year] starting on the First Redemption Date [until the Final Payment Date (excluding)] (each such date a "Redemption Date").

The exercise of the Redemption Right shall be declared by the Security Holder by transmission of a duly completed form (the "Redemption Notice"), available at the offices of the Issuer during normal business hours, to the Issuer at least [Insert notice period] Banking Days prior to the designated Redemption Date.

The Redemption Notice shall include in particular:

(a) the name and the address of the Security Holder, with sufficiently conclusive proof of ownership to the Principal Paying Agent that such Security Holder at the time of such notice is a holder of the respective Securities;

(b) the security identification number and the number of Securities in relation to which the Redemption Right shall be exercised;

(c) the cash account held by a bank to which the Redemption Amount is to be transferred.

If the number of Securities stated in the Redemption Notice deviates from the number of Securities transferred to the Principal Paying Agent, the Redemption Notice shall be deemed to have been submitted for the number of Securities corresponding to the smaller of the two numbers. Any remaining Securities are transferred back to the Security Holder at the latter's expense and risk.

No Redemption Right so exercised may be revoked or withdrawn.

(2) **Issuer’s Regular Call Right:** The Issuer may at [each Banking Day][the last Banking Day of the [month][months] of [Insert month(s)] of each year] starting on the First Call Date [until the Final Payment Date (excluding)] (each such date a "Call Date") call the Securities completely but not partially (the "Regular Call Right") and redeem them pursuant to § 4 (1) of the Special Conditions.

The Issuer shall give notice of such call at least [Insert notice period] prior to the relevant Call Date pursuant to § 6 of the General Conditions. Such notice shall be irrevocable and shall specify the relevant Call Date.

The Redemption Right of the Security Holders remains unaffected until the last Redemption Date immediately preceding the Call Date.

[In the case of Securities with Issuer’s Extraordinary Call Right, the following applies:]

(3) **Issuer's extraordinary call right:** Upon the occurrence of a Call Event the Issuer may call the Securities extraordinarily by giving notice pursuant to § 6 of the General Conditions and redeem the Securities at their Cancellation Amount. Such call shall become effective at the time indicated in the notice. [In the case of Securities governed by German law, insert: The application of §§ 313, 314 BGB remains reserved.]

The "Cancellation Amount" shall be the fair market value of the Securities as of [the tenth Banking Day] [insert days] before the extraordinary call becomes effective, determined by the
Calculation Agent [In the case of Securities governed by German law, insert: in its reasonable
discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert:
acting in accordance with relevant market practice and in good faith] under then prevailing
circumstances.

The determination of the fair market value is based on the economic equivalent of the Issuer’s
payment obligations to the Security Holders consistent with the provisions for the redemption
profile, interest or other additional amounts of the Securities that would otherwise be due after
the day on which the extraordinary call becomes effective and which is adjusted for taking into
consideration the following parameters as of [the [tenth] [insert number of days] Banking Day
before] [the day when] the extraordinary call becomes effective: the price of the Underlying,
the remaining time to maturity, the estimated volatility, the expected dividends (if applicable),
the current market interest rate as well as the interest spread associated with the credit default
risk of the Issuer and any other relevant market parameter that can influence the value of the
Securities. The Cancellation Amount will be paid within five Banking Days following the date
as of which the extraordinary call becomes effective, or at the date specified in the above
mentioned notice, as the case may be, pursuant to the provisions of § 6 of the Special
Conditions.

In the case of Securities without a Redemption Right of the Security Holders, an Issuer’s Regular Call
Right and an Issuer’s Extraordinary Call Right, the following applies:

(intentionally omitted)]

§ 6

Payments[, Deliveries]

[In the case of Securities where the Specified Currency is the Euro, the following applies:

(1) Rounding: The amounts payable under these Terms and Conditions shall be rounded up or
down to the nearest EUR 0.01, with EUR 0.005 being rounded upwards.]

[In the case of Securities where the Specified Currency is not Euro, the following applies:

(1) Rounding: The amounts payable under these Terms and Conditions shall be rounded up or
down to the smallest unit of the Specified Currency, with 0.5 of such unit being rounded
upwards.]

(2) Business day convention: If the due date for any payment under the Securities (the "Payment
Date") is not a Banking Day then the Security Holders shall not be entitled to payment until
the next following Banking Day. The Security Holders shall not be entitled to further interest
or other payments in respect of such delay.

(3) Manner of payment, discharge: All payments shall be made to the Principal Paying Agent.
The Principal Paying Agent shall pay the amounts due to the Clearing System to be credited to
the respective accounts of the depository banks and to be transferred to the Security Holders.
The payment to the Clearing System shall discharge the Issuer from its obligations under the
Securities in the amount of such a payment.

[In the case of Securities governed by German law, the following shall apply:

(4) Interest of default: If the Issuer fails to make payments under the Securities when due, the
amount due shall bear interest on the basis of the default interest rate established by law. Such
accrual of interest starts on the day following the due date of that payment (including) and
ends on the effective date of the payment (including).]

[In the case of Securities governed by Italian law, the following shall apply:

(4) Interest of default: If the Issuer fails to make payments under the Securities when due, the
amount due shall bear interest on the basis of the legal interest rate ('Saggio degli Interessi
legali'), pursuant to Section 1284 CC, without prejudice to any other mandatory provisions
under Italian law. Such accrual of interest starts on the day following the due date of that payment (including) and ends on the effective date of the payment (including).

[In the case of Securities with physical delivery, the following applies:

(5) **Delivery:** The Delivery of the Underlying and the payment of a Supplemental Cash Amount shall be made within five Banking Days after the Final Payment Date (the "Delivery Period") to the Clearing System for credit to the accounts of the relevant depository banks of the Security Holders. All costs, incl. possible custody fees, exchange turnover taxes, stamp taxes, transaction fees, other taxes or levies (together the "Delivery Costs"), incurred as a result of the delivery of the Underlying, shall be borne by the respective Security Holder. Subject to the provisions of these Terms and Conditions, the Underlying shall be delivered at the Security Holder's own risk. If the Final Payment Date of a delivery or payment is not a Banking Day, such delivery or payment shall be made on the next following Banking Day. Such delay will not constitute any entitlement to interest or other payments. The Issuer shall not be obliged to forward to the Security Holders any notifications or documents of the issuer of the Underlying that were provided to the Issuer prior to such delivery of the Underlying, even if such notifications or other documents refer to events that occurred after delivery of the Underlying. During the Delivery Period the Issuer shall not be obliged to exercise any rights under the Underlying. The Issuer shall be entitled to claim in an Underlying that exist prior to or on the Final Payment Date, provided that the day, on which the Underlying is traded for the first time on the Relevant Exchange "ex" of such claim, falls on or prior to such Final Payment Date.

(6) **Transaction Disturbance:** If, as determined by the Calculation Agent [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB).] [In the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith], an event outside of the Issuer's control, which results in the Issuer not being able to deliver the Underlying pursuant to the Terms and Conditions of these Securities (a "Transaction Disturbance") and this Transaction Disturbance has occurred prior to delivery of the Underlying and continues to exist on the Final Payment Date, then the first day of the Delivery Period shall be postponed to the next Banking Day, on which no Transaction Disturbance exists. The Security Holders shall be notified accordingly pursuant to § 6 of the General Conditions. The Security Holders shall not be entitled to interest payment or other amounts, if a delay in the delivery of the Underlying occurs in accordance with this paragraph. The Issuer shall not be liable in this respect. In the event of a Transaction Disturbance, the Securities may, [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB) of the Issuer and the Calculation Agent] [In the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith by the Issuer and the Calculation Agent] be redeemed at the Cash Value of the Redemption Price. The "Cash Value of the Redemption Price" is an amount determined by the Calculation Agent [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB).] [In the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] on the basis of the stock exchange or market price of the Underlying on the Final Observation Date or, should such stock exchange or market prices not be available, the volume weighted average of the stock exchange or market prices in a representative period or, should such volume weighted average not be available, an amount determined by the Calculation Agent [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB).] [In the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith].]

§ 7

**Market Disruptions**

(1) **Postponement:** Notwithstanding the provisions of § 8 of the Special Conditions, if a Market
Disruption Event occurs on an [Observation Date][Roll Over Date], the respective [Observation Date][Roll Over Date] will be postponed to the next following Calculation Date on which the Market Disruption Event no longer exists.[FX [Observation]|(initial)|[(final)][Calculation] Date will be postponed accordingly.] [Insert in the case of Securities with an averaging observation: If, as a result of such a postponement, several Observation Dates fall on the same day, then each of those Observation Dates shall be deemed to be an Observation Date for averaging purposes.]

[If a FX Market Disruption Event occurs on a FX Observation Date, the respective FX Observation Date will be postponed to the next following FX Calculation Date on which the FX Market Disruption Event no longer exists.]

Any Payment Date relating to such [Observation Date][Roll Over Date] [or FX Observation Date, as the case may be] shall be postponed if applicable. Interest shall not be payable due to such postponement.

(2) Discretionary valuation: Should the Market Disruption Event continue for more than [Insert number of Banking Days] consecutive Banking Days the Calculation Agent shall determine [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] the respective Reference Price required for the calculations or, respectively, specifications described in the Terms and Conditions of these Securities. Such Reference Price shall be determined in accordance with prevailing market conditions at [Insert time and financial centre] on this [Insert number of following Banking Day] Banking Day, taking into account the economic position of the Security Holders.

[If within these [Insert number of Banking Days] Banking Days traded Derivatives of the Underlying expire and are settled on the Determining Futures Exchange, the settlement price established by the Determining Futures Exchange for the there traded Derivatives will be taken into account in order to conduct the calculations or, respectively, specifications described in the Terms and Conditions of these Securities. In that case, the expiration date for those Derivatives is the respective [Observation Date][Roll Over Date].]

[Should the FX Market Disruption Event continue for more than [Insert number of Banking Days] consecutive Banking Days, the Calculation Agent shall determine [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB).] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] the respective FX. The FX required for the calculations or, respectively, specifications described in the Terms and Conditions of these Securities shall be determined in accordance with prevailing market conditions at [Insert time and financial centre] on this [Insert number of following Banking Day] Banking Day, taking into account the economic position of the Security Holders.]

[In the case of Closed End Securities and Open End Securities linked to an index as Underlying, for which “Distributing Index” is specified in the column “Index Type” of the relevant table in § 2 of Part B – Product and Underlying Data, the following applies:]

(3) Dividend Market Disruption: Notwithstanding the provisions of § 8 of the Special Conditions, if a Dividend Market Disruption Event occurs on a Dividend Observation Date, the respective Dividend Observation Date will be postponed to the next following Calculation Date on which the Dividend Market Disruption Event no longer exists.

Should the Dividend Market Disruption Event continue for more than [Insert number of Banking Days] consecutive Banking Days, the Calculation Agent shall determine [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB).] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] the respective Theoretical Cash Component for the respective Dividend Observation Date. The Theoretical Cash Component required for the calculation of the Dividend Amount shall be determined in accordance with prevailing market conditions at [Insert time and financial centre] on this [Insert number of following Banking Day] Banking Day, taking into account the economic position of the Security Holders.
PART C – SPECIAL CONDITIONS OF THE SECURITIES – All Product Types

Any Payment Date relating to such Dividend Observation Date shall be postponed if applicable. No interest is due because of such postponement.

[In the case of a share or a depository receipt as Underlying, the following applies:

§ 8

Adjustments, Replacement Specification

(1) Adjustments: Upon the occurrence of an Adjustment Event the Terms and Conditions of these Securities (in particular the Underlying, the Ratio and/or all prices of the Underlying, which have been specified by the Issuer) and/or all prices of the Underlying determined by the Calculation Agent on the basis of the Terms and Conditions of these Securities shall be adjusted in such a way that the economic position of the Security Holders remains unchanged to the greatest extent possible. Such adjustments shall be made by the Calculation Agent [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith]. Any such adjustment will be performed taking into consideration any adjustments made by the Determining Futures Exchange to the there traded Derivatives linked to the Underlying, and the remaining term of the Securities as well as the latest available price of the Underlying. If the Calculation Agent determines that, pursuant to the rules of the Determining Futures Exchange, no adjustments were made to the Derivatives linked to the Underlying, the Terms and Conditions of these Securities regularly remain unchanged. The exercised adjustments and the date of the first application shall be notified pursuant to § 6 of the General Conditions.

(2) Replacement Specification: If a price of the Underlying published by the Relevant Exchange pursuant to the Terms and Conditions of these Securities will subsequently be corrected and the correction (the "Corrected Value") will be published by the Relevant Exchange after the original publication, but still within one Settlement Cycle, then the Calculation Agent will notify the Issuer of the Corrected Value without undue delay and shall again specify and publish the respective value by using the Corrected Value (the "Replacement Specification") pursuant to § 6 of the General Conditions.

(3) [In the case of Securities governed by German law, insert: The application of §§ 313, 314 BGB remains reserved.]

[In the case of an index as Underlying, the following applies:

§ 8

Index Concept, [Adjustments, Replacement Underlying,] New Index Sponsor and New Index Calculation Agent, Replacement Specification

(1) Index Concept: The basis for the calculations or, respectively, specifications of the Calculation Agent described in the Terms and Conditions of these Securities shall be the Underlying with its provisions currently applicable, as developed and maintained by the Index Sponsor, as well as the respective method of calculation, determination, and publication of the price of the Underlying (the "Index Concept") applied by the Index Sponsor. This shall also apply if during the term of the Securities changes are made or occur in respect of the Index Concept, or if other measures are taken, which have an impact on the Index Concept, unless otherwise provided in the below provisions.

(2) Adjustments: Upon the occurrence of an Adjustment Event the Terms and Conditions of these Securities [if necessary] (in particular the [respective] Underlying, the Ratio and/or all prices of the [respective] Underlying, which have been specified by the Calculation Agent) and/or all prices of the [respective] Underlying determined by the Calculation Agent on the basis of the Terms and Conditions of these Securities shall be adjusted in such a way that the economic position of the Security Holders remains unchanged to the greatest extent possible. Such adjustments shall be made by the Calculation Agent [in the case of Securities governed by
PART C – SPECIAL CONDITIONS OF THE SECURITIES – All Product Types

German law, insert: in its reasonable discretion (§ 315 et seq. BGB) [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith]. Any such adjustment will be performed taking into consideration any adjustments made by the Determining Futures Exchange to the traded Derivatives linked to the Underlying, and the remaining term of the Securities as well as the latest available price of the [respective] Underlying. If the Calculation Agent determines that, pursuant to the rules of the Determining Futures Exchange, no adjustments were made to the Derivatives linked to the [respective] Underlying, the Terms and Conditions of these Securities regularly remain unchanged. The exercised adjustments and the date of the first application shall be notified according to § 6 of the General Conditions.

(3) Replacement Underlying: In cases of an Index Replacement Event or an Index Usage Event, the adjustment pursuant to paragraph (2) is usually made by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] determining, which index should be used in the future as Underlying (the "Replacement Underlying"). If necessary, the Calculation Agent will make further adjustments to the Terms and Conditions of these Securities (in particular to the Underlying, the Ratio and/or all prices of the Underlying, which have been specified by the Issuer) and/or all prices of the Underlying determined by the Calculation Agent pursuant to the Terms and Conditions of these Securities in such a way that the economic position of the Security Holders remains unchanged to the greatest extent possible. The Replacement Underlying and the adjustments made as well as the time of its first application will be published in accordance with § 6 of the General Conditions. From the first application of the Replacement Underlying on, any reference to the replaced Underlying in the Terms and Conditions of these Securities shall be deemed to refer to the Replacement Underlying.

(4) New Index Sponsor and New Index Calculation Agent: If the Underlying is no longer determined by the Index Sponsor but rather by another person, company or institution (the "New Index Sponsor"), then all calculations or, respectively, specifications described in the Terms and Conditions of these Securities shall occur on the basis of the Underlying as determined by the New Index Sponsor. In this case, any reference to the replaced Index Sponsor in the Terms and Conditions of these Securities shall be deemed to refer to the New Index Sponsor. If the Underlying is no longer calculated by the Index Calculation Agent but rather by another person, company or institution (the "New Index Calculation Agent"), then all calculations or, respectively, specifications described in the Terms and Conditions of these Securities shall occur on the basis of the Underlying as calculated by the New Index Calculation Agent. In this case, any reference to the replaced Index Calculation Agent in the Terms and Conditions of these Securities shall be deemed to refer to the New Index Calculation Agent.

(5) Replacement Specification: If a price of the Underlying published by the Index Sponsor or the Index Calculation Agent, as the case may be, pursuant to the Terms and Conditions of these Securities will subsequently be corrected and the correction (the "Corrected Value") will be published by the Index Sponsor or the Index Calculation Agent, as the case may be, after the original publication, but still within one Settlement Cycle, then the Calculation Agent will notify the Issuer of the Corrected Value without undue delay and shall again specify and publish pursuant to § 6 of the General Conditions the relevant value by using the Corrected Value (the "Replacement Specification").

(6) In the case of a commodity as Underlying, the following applies:

§ 8

Relevant Trading Conditions, Adjustments, Replacement Reference Market

(1) Relevant Trading Conditions: The basis for the calculations or, respectively, specifications of
the Calculation Agent described in the Terms and Conditions of these Securities shall be the Underlying taking in consideration

(a) the method of price determination,
(b) the trading conditions (in particular in terms of the quality, the quantity and the currency of trading) and
(c) other value determining factors,

applicable on the Reference Market in respect of the Underlying (together the "Relevant Trading Conditions"), unless otherwise provided in below provisions.

(2) **Adjustments:** Upon the occurrence of an Adjustment Event the Terms and Conditions of these Securities (in particular the Underlying, the Ratio and/or all prices of the Underlying, which have been specified by the Calculation Agent) and/or all prices of the Underlying determined by the Calculation Agent on the basis of the Terms and Conditions of these Securities shall be adjusted in such a way that the economic position of the Security Holders remains unchanged to the greatest extent possible. Such adjustments shall be made by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith]. Any such adjustment will be performed taking into consideration any adjustments made by the Determining Futures Exchange to the there traded Derivatives linked to the Underlying, and the remaining term of the Securities as well as the latest available price of the Underlying. If the Calculation Agent determines that, pursuant to the rules of the Determining Futures Exchange, no adjustments were made to the Derivatives linked to the Underlying, the Terms and Conditions of these Securities regularly remain unchanged. The exercised adjustments and the date of the first application shall be notified according to § 6 of the General Conditions.

(3) **Replacement Reference Market:** In the event of

(a) a final discontinuation of the trading in the Underlying at the Reference Market,
(b) a material change of the market conditions at the Reference Market or
(c) a material limitation of the liquidity of the Underlying at the Reference Market,

with the trading in the same commodity being continued on another market without restrictions, the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] shall determine that such other market will be used in the future as Reference Market (the "Replacement Reference Market"). If necessary, the Calculation Agent will make further adjustments to the Terms and Conditions of these Securities (in particular to the Underlying, the Ratio and/or all prices of the Underlying, which have been specified by the Issuer) and/or all prices of the Underlying determined by the Calculation Agent pursuant to the Terms and Conditions of these Securities in order to account for any difference in the method of price determination and the trading conditions applicable to the Underlying on the Replacement Reference Market (in particular in terms of the quality, the quantity and the currency of trading) (together the "New Relevant Trading Conditions"), as compared to the original Relevant Trading Conditions. The Replacement Reference Market and the performed adjustments and the time that it is first applied will be published in accordance with § 6 of the General Conditions. Commencing with the first application of the Replacement Reference Market, any reference to the replaced Reference Market in the Terms and Conditions of these Securities shall be deemed to refer to the Replacement Reference Market.

(4) [In the case of Securities governed by German law, insert: The application of §§ 313, 314 BGB remains reserved.]
In the case of Open End Securities and Open End Leverage Securities linked to a futures contract as Underlying, the following applies:

§ 8

Contract Specifications, Adjustments, Replacement Underlying, Replacement Reference Market

(1) **Contract Specifications:** The basis for the calculations or, respectively, specifications of the Calculation Agent described in the Terms and Conditions of these Securities shall be the Underlying under consideration of

(a) the method of price determination,

(b) the trading conditions (in particular in terms of the quality, the quantity and the currency of trading),

(c) the delivery month and

(d) other value determining factors,

applicable on the Reference Market in respect of the Underlying (together the "**Contract Specifications**"), unless otherwise provided in below provisions.

(2) **Adjustments:** Upon the occurrence of an Adjustment Event the Terms and Conditions of these Securities (in particular the Underlying, the Ratio and/or all prices of the Underlying, which have been specified by the Calculation Agent) and/or all prices of the Underlying determined by the Calculation Agent on the basis of the Terms and Conditions of these Securities shall be adjusted in such a way that the economic position of the Security Holders remains unchanged to the greatest extent possible. Such adjustments shall be made by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith]. The Calculation Agent will take into account [the adjustments of the Derivatives linked to the Underlying actually performed by the Determining Futures Exchange and] the remaining term of the Securities as well as the latest available price of the Underlying. [If the Calculation Agent determines that, pursuant to the rules of the Determining Futures Exchange, no adjustments are made to the Derivatives linked to the Underlying, the Terms and Conditions of these Securities will regularly remain unchanged.] The exercised adjustments and the date of the first application shall be notified according to § 6 of the General Conditions.

(3) **Replacement Reference Market:** In the event of

(a) a final discontinuation of the trading in the Underlying at the Reference Market,

(b) a material change of the market conditions at the Reference Market or

(c) a material limitation of the liquidity of the Underlying at the Reference Market,

with the trading being continued in another futures contract linked to the same commodity as the underlying on another market without restrictions, the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] shall determine that such other futures contract (the "**Replacement Underlying**") and such other market will be used in the future as Reference Market (the "**Replacement Reference Market**"). If necessary, the Calculation Agent, moreover, will make further adjustments to the Terms and Conditions of these Securities (in particular to the Underlying, the Ratio and/or all prices of the Underlying, which have been specified by the Issuer) and/or all prices of the Underlying determined by the Calculation Agent pursuant to the Terms and Conditions of these Securities to account for any difference in the method of price determination and the trading conditions applicable to the Replacement Underlying on the Replacement Reference Market (in particular in terms of the quality, the quantity, the currency of trading and the delivery month) (together the "**New Relevant Trading Conditions**"), as compared to the original Relevant Trading Conditions. The Replacement Underlying, the Replacement Reference Market, the performed adjustments and
the time that it is first applied will be published in accordance with § 6 of the General Conditions. Commencing with the first application of the Replacement Underlying and the Replacement Reference Market, any reference to the substituted Underlying and to the substituted Reference Market in the Terms and Conditions of these Securities shall be deemed to refer to the Replacement Underlying and Replacement Reference Market.

[In the case of a fund share as Underlying, the following applies:]

§ 8

Adjustments[, Replacement Underlying,]

Replacement Management Company[, Replacement Specification]

(1) Adjustments: Upon the occurrence of an Adjustment Event the Terms and Conditions (in particular the Underlying, the Ratio and/or all prices of the Underlying specified by the Issuer) and/or all prices of the Underlying determined by the Calculation Agent on the basis of these Terms and Conditions shall be adjusted in such a way that the financial position of the Security Holders remains unchanged to the greatest extent possible. Such adjustments shall be made by the Calculation Agent [in the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith]. For this purpose, the Calculation Agent will take into account the remaining term of the Securities as well as the latest available price of the Underlying. In making the adjustment, the Calculation Agent will take into account additional direct or indirect costs incurred by the Issuer in the course of or in connection with the respective Adjustment Event, including, inter alia, taxes, retentions, deductions or other charges borne by the Issuer. The exercised adjustments and the date of the first application shall be notified according to § 6 of the General Conditions

(2) Replacement Underlying: In cases of a Fund Replacement Event, the adjustment usually entails the Calculation Agent [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [in the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] determining which Fund or Fund Share should be used in the future as the Underlying (the "Replacement Underlying"). If necessary, the Calculation Agent will make further adjustments to these Terms and Conditions (in particular to the Underlying, the ratio and/or all prices of the Underlying specified by the Issuer) and/or all prices of the Underlying determined by the Calculation Agent pursuant to these Terms and Conditions in such a way that the financial position of the Security Holders remains unchanged to the greatest extent possible. The Replacement Underlying and the adjustments made as well as the time of their initial application will be published in accordance with § 6 of the General Conditions. Commencing with the first application of the Replacement Underlying, any reference to the Underlying in these Terms and Conditions shall be deemed to refer to the Replacement Underlying, unless the context provides otherwise.

[In the case of Securities where the Replacement Specification takes place within the Settlement Cycle:]

(2) [(3)] Replacement Specification: If a [NAV][Reference Price], as used by the Calculation Agent pursuant to these Terms and Conditions, is subsequently corrected and the correction (the "Corrected Value") is published by the Management Company after the original publication but still within a Settlement Cycle, then the Calculation Agent will notify the Issuer of the Corrected Value without undue delay and shall specify the relevant value again using the Corrected Value (the "Replacement Specification") and publish it pursuant to § 6 of the General Conditions. However, if the Calculation Agent is informed of the Corrected Value less than two Banking Days prior to the date on which a payment is to be made whose amount is determined wholly or partly with reference to this price of the Underlying, then the relevant value will not be specified again.]
PART C – SPECIAL CONDITIONS OF THE SECURITIES – All Product Types

[In the case of Securities where the Replacement Specification takes place independently of the Settlement Cycle:

[(2)] [(3)] Replacement Specification: If a [NAV][Reference Price], as used by the Calculation Agent pursuant to these Terms and Conditions, is subsequently corrected and the correction (the "Corrected Value") is published by the Management Company after the original publication but prior to the Final Payment Date, then the Calculation Agent will notify the Issuer of the Corrected Value without undue delay and shall specify the relevant value again using the Corrected Value (the "Replacement Specification") and publish it pursuant to § 6 of the General Conditions. However, if the Calculation Agent is informed of the Corrected Value less than two Banking Days prior to the date on which a payment is to be made whose amount is determined wholly or partly with reference to this price of the Underlying, then the relevant value will not be specified again.]

[(3)] [(4)] If the Underlying is no longer calculated by the Management Company but by another person, company or institution (the "Replacement Management Company"), each and every reference to the Management Company in these Terms and Conditions shall be deemed, depending on the context, to refer to the Replacement Management Company.

[(4)] [(5)] [In the case of Securities governed by German law, insert: The application of §§ 313, 314 BGB remains reserved.]]

[In the case of a Currency Exchange Rate as Underlying or in the case of Quanto Securities with physical delivery and in the case of Compo Securities, the following applies:

§ 9

New Fixing Sponsor, Replacement Exchange Rate

(1) New Fixing Sponsor: In the event that [the Underlying] [at least one component of the Underlying] [the [FX] Exchange Rate] [FX] [FX (1) and/or FX (2)] [FX Exchange Rate (1) and/or FX Exchange Rate (2)] is no longer determined and published by the Fixing Sponsor or, in case of a not only immaterial modification in the method of determination and/or publication of the Underlying [of at least one of the components of the Underlying] [the [FX] Exchange Rate] [of FX (1)] [of FX (1) and/or FX (2)] [FX Exchange Rate (1) and/or FX Exchange Rate (2)] by the Fixing Sponsor (including the time of the determination and/or publication), the Calculation Agent has the right [in particular,] to determine the calculations or, respectively, specifications of the Calculation Agent described in the Terms and Conditions of these Securities on the basis of the determinations and publications by another person, company or institution (the "New Fixing Sponsor"). The Calculation Agent shall determine [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB).] [In the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] whether such event occurs and which other person, company or institution shall act as the New Fixing Sponsor (the "New Fixing Sponsor"). The New Fixing Sponsor and the time of its first application shall be published pursuant to § 6 of the General Conditions. In this case, any reference to the replaced Fixing Sponsor in the Terms and Conditions of these Securities shall be deemed to refer to the New Fixing Sponsor.

(2) Replacement Exchange Rate: In the event that [the FX Exchange Rate] [the [official] fixing [of at least one component of the Underlying]] [FX] [FX (1) and/or FX (2)] [FX Exchange Rate (1) and/or FX Exchange Rate (2)] is no longer determined and published, the calculations or, respectively, specifications described in the Terms and Conditions of these Securities shall occur on the basis of price of the [Underlying] [respective component of the Underlying] [FX] Exchange Rate] [FX] [FX (1) and/or FX (2)] [FX Exchange Rate (1) and/or FX Exchange Rate (2)] determined and published on the basis of another method, which will be determined by the Calculation Agent [In the case of Securities governed by German law, insert: in its reasonable discretion (§ 315 et seq. BGB)] [In the case of Securities governed by Italian law, insert: acting in accordance with relevant market practice and in good faith] (the "Replacement Exchange Rate"). [If necessary, the Calculation Agent will make further
adjustments to the Terms and Conditions of these Securities (in particular to the determination or to the method of the calculation of [the Ratio] and/or [all prices of the Underlying or of its components determined by the Issuer]) and/or all prices of the Underlying or of its components determined by the Calculation Agent pursuant to the Terms and Conditions on the basis of the Terms and Conditions in such way that the financial position of the Security Holders remains unchanged to the greatest extent possible. The Replacement Exchange Rate and the time of its first application shall be published pursuant to § 6 of the General Conditions. In this case, any reference to [the replaced FX Exchange Rate] [the [official] fixing [of the respective component] of the Underlying] [the replaced [FX]] [to the replaced FX (1) and/or FX (2)] [to the replaced FX Exchange Rate (1) and/or FX Exchange Rate (2)] in the Terms and Conditions of these Securities shall be deemed to refer to the Replacement Exchange Rate.

(3) [In the case of Securities governed by German law, insert: The application of §§ 313, 314 BGB remains reserved.]

1. DESCRIPTION OF HVB VERMÖGENSDEPOT WACHSTUM FLEX INDEX II

In the version of 14 November 2018

The following Index Description outlines the key data for the "HVB Vermögensdepot Wachstum Flex Index II" (the "VDP II Index") compiled by the Issuer. This description is subject to amendments or adjustments from time to time after the date of this Base Prospectus in relation to which the Issuer will publish a related supplement to this Base Prospectus.

The HVB VERMÖGENSDEPOT WACHSTUM FLEX INDEX II (WKN A1PHN2 / ISIN DE000A1PHN28) (the "Index") is an index developed and designed by UniCredit Bank AG, Munich, Germany, or any successor thereto (the "Index Sponsor") and calculated by UniCredit Bank AG, Munich, Germany, or any successor determined by the Index Sponsor (the "Index Calculation Agent") in Euro (the "Index Currency") in accordance with the index rules set out below (the "Index Rules") whose objective is to participate in the performance of the Reference Fund, while aiming to control the degree of variation (volatility) of the Reference Portfolio (the "Objective of the Index").

Section A. - Definitions, general information

I. Definitions

For the purposes of this description (the "Index Description"), the following terms have the following meanings:

Definitions regarding the Index:

"Hedging Transactions" means one or more trades, transactions or investments (especially securities (including Fund Shares), options, futures, derivatives and foreign currency transactions, repos or securities lending transactions or other instruments or measures) which are required for an Issuer and/or any Hedging Party to hedge price risks or other risks at standalone or portfolio basis arising from obligations with regard to the Index or with regard to Debt Securities or other financial instruments linked to the Index. The Index Calculation Agent will determine in its reasonable discretion (§ 315 of the German Civil Code (Bürgerliches Gesetzbuch; "BGB")) whether any such Hedging Transactions are required.

"Banking Day" means each day (other than a Saturday or Sunday) on which the principal domestic clearance system customarily used to settle trades regarding the Index Components and the Trans-European Automated Real-time Gross settlement Express Transfer System (TARGET2) are open.

"Issuer" means an issuer of Debt Securities or other financial instruments linked to the Index.

"Hedging Party" means the Index Calculation Agent (as at the Index Start Date). The Index Calculation Agent is entitled at any time to appoint another person or company to act as Hedging Party (the "Successor Hedging Party"). The appointment of a Successor Hedging Party will be published in accordance with Section F. - Publication of this Index Description.

"Index(t)" means the Index Value at Index Valuation Date t. Index (t) is calculated by the Index Calculation Agent for every Index Valuation Date t in accordance with the provisions set forth in Section C. - Calculation of the Index of this Index Description.

"Index Components" means the Fund Shares and the Money Market Investment included in the Index at any given time.

"Index Valuation Date" means any Banking Day that is a Reference Index Calculation Date and on which it is actually possible to issue and redeem Fund Shares as described in the Fund Documents.

"Index Start Date" means 1 June 2012.

"Index Initial Value" means 100.00.

"Index Value" means the value (expressed in euro) of the Index on any given Index Valuation Date as calculated by the Index Calculation Agent.
"Money Market Investment" means a hypothetical investment in cash and money market instruments from the European single currency area. The performance of this investment is reflected by the Reference Index.

"Hypothetical Investor" means a company incorporated in Germany and holding Fund Shares of the Reference Fund.

"Reference Portfolio" means a hypothetical portfolio of a Hypothetical Investor which contains both Fund Shares and the Money Market Investment in variable weightings. The Reference Portfolio has a value at the Index Start Date equal to the Index Initial Value (expressed in euro).

"Debt Securities" means all outstanding debt securities of a company affiliated with the Index Sponsor (section 15 of the German Stock Corporation Act (Aktiengesetz)) at a given time for which payment of principal and/or interest depends on the performance of the Index.

"t_j" means the j-th Index Valuation Date. The Index Start Date is shown as t_0, previous Index Valuation Dates are shown as negative indices and subsequent Index Valuation Dates as positive indices, resulting in (…, t_2, t_1, t_0, t_1, t_2, …).

"t*_j" or "Reinvestment Date" means, in relation to a Distribution, the second Index Valuation Date immediately following the relevant Distribution Payment Date.

Definitions regarding the Reference Fund:

"Investment Adviser" means UniCredit Bank AG (at the Index Start Date). The Management Company may appoint a different person or company to act as Investment Adviser at any time.

"Distribution" means a cash distribution with Ex-date after 14 November 2018 which the Reference Fund would pay per Fund Share to the Hypothetical Investor on a Distribution Payment Date.

"Distribution Payment Date" means, in relation to a Distribution, the day on which such Distribution would be received by the Hypothetical Investor.

"d(t_j)" means either (i) d(t*_j) on each Index Valuation Date t_j between any Ex-Date (inclusive) and the corresponding Reinvestment Date t*_j (exclusive) or (ii) zero on any other Index Valuation Date t_j.

"d(t*_j)" means the value (in Euro) of the relevant Distribution (less costs and taxes, if any, incurred by the Hypothetical Investor in relation to the Distribution) as at the Ex-Date immediately preceding the relevant Reinvestment Date t*_j.

"Custodian Bank" means CACEIS Bank S.A., Germany Branch and/or any other company appointed by the Management Company to perform custodial, accounting, settlement or similar services for the Reference Fund.

"Ex-Date" means, in relation to a Distribution, the first day on which the Net Asset Value is published by the Management Company, having been reduced by that Distribution.

"Fund Share" or "Fund Shares" means a share or shares in the Reference Fund (WKN A0M035 / ISIN DE000A0M0358 / Bloomberg HVBPRWP GR Equity).

"Fund Documents" means the annual and the half-yearly report, the prospectus (including fund rules), the key investor information and all other documents of the Reference Fund which specify the terms and conditions of the Reference Fund and the Fund Shares, as amended. The Fund Documents, as amended, are available on the website www.amundi.de (or any successor site). The information contained therein is also maintained by UniCredit Bank AG, LCD6L3, Arabellastrasse 14, 81925 Munich, Germany, to be issued to the public free of charge during normal business hours.

"Management Company" means Amundi Deutschland GmbH (formerly: Pioneer Investments Kapitalanlagegesellschaft mbH), which manages the Reference Fund.

"Net Asset Value" or "NAV" means the official net asset value for a Fund Share, as published by the Management Company and at which it is actually possible to issue and redeem Fund Shares.

"n(t_j)" means the distribution factor for the Index Valuation Date t_j. On the Index Start Date t_0, a value of 1.00 is set for the distribution factor (n(t_0)). Thereafter, the distribution factor is recalculated by the Index Calculation Agent on each Reinvestment Date t*_j, in accordance with the provisions set out in
Section C. - II. Adjustment of the Distribution Factor of this Index Description. On Valuation Dates where no recalculation of the distribution factor takes place, the distribution factor is given by the distribution factor of the immediately preceding Index Valuation Date.

"\(\tilde{n}(t^*)\)" means the distribution factor \(n(t^j)\) immediately prior to the Reinvestment Date \(t^*_j\).

"NAV(t^j)" means the Net Asset Value of a Fund Share on Index Valuation Date \(t^j\).

"NAV^A(t^j)" means the Net Asset Value of a Fund Share on Reinvestment Date \(t^*_j\).

"NAV^A(t^j)" means the Net Asset Value of a Fund Share on Index Valuation Date \(t^j\), after taking into account all Distributions made and reinvested since 14 November 2018, if applicable, up to such Index Valuation Date \(t^j\), which is calculated by the Index Calculation Agent in accordance with the formula specified in Section C. - I. Calculation of the Index Value of this Index Description.

"Reference Fund" means Vermögensdepot privat 70 (formerly: HVB Vermögensdepot privat Wachstum PI).

"Auditor" means PricewaterhouseCoopers GmbH and/or any other auditing firm appointed by the Management Company to audit the Reference Fund and its annual financial statements.

Definitions regarding the Reference Index:

"Reference Index" means the HVB 3 Months Rolling Euribor Index (WKN A0QZBZ / ISIN DE000A0QZBZ6 / Reuters .HVB3MRE / Bloomberg HVB3MRE Index), as determined and calculated by UniCredit Bank AG (the "Reference Index Sponsor").

"Reference Index Calculation Agent" means UniCredit Bank AG, Munich, Germany.

"Reference Index Calculation Date" means each day (other than a Saturday or Sunday) on which the Trans-European Automated Real-time Gross settlement Express Transfer System (TARGET2) is open.

"Reference Index Description" means the description defining the method used to calculate the Reference Index, as amended. The Reference Index Description is available on the website www.onemarkets.de (or any successor site).

"Reference Index Value" means the value (expressed in Euro) of the Reference Index calculated by the Reference Index Calculation Agent on the basis of the method described in the Reference Index Description at any Reference Index Calculation Date.

"RIV(t^j)" means the Reference Index Value on Index Valuation Date \(t^j\).

"Synthetic Dividend" or "Div" means a rate by which the performance of the Reference Index is reduced. The Synthetic Dividend is 1.55% per annum (Div = 1.55%).

II. General information

Where information is provided in this Index Description with respect to the Reference Fund, such information is based exclusively on information taken from the Fund Documents and from the website of the Management Company. The responsibility of the Index Calculation Agent is limited to reproducing such publicly available information accurately and to ensuring that no facts are omitted that would otherwise result in a false, incomplete or misleading representation herein to the extent that this is evident for the Index Calculation Agent and to the extent that this is demonstrable for the Index Calculation Agent from the information published by the Management Company. In particular, neither the Index Sponsor nor the Index Calculation Agent nor any other person or company that provides services in connection with the Index accepts any responsibility for the correctness or completeness of the present description and the underlying information or for the event that any circumstances have arisen that could impair its correctness or completeness. The information herein is given as at 14 November 2018. For further and current information regarding the Reference Fund, please refer to the website of the Management Company www.amundi.de (or any successor site).

When calculating the Index Value, the Index Calculation Agent must rely upon statements, confirmations, computations, assurances and other information provided by third parties, the correctness and reliability of which it largely does not verify and for the correctness of which it accepts no responsibility. Any inaccuracies contained in such information may have an impact on the
calculation of the Index Value without any fault attaching to the Index Calculation Agent. The Index Calculation Agent has no obligation to verify this information independently.

The Index exists exclusively in the form of sets of data records and does not convey any direct or indirect legal or beneficial interest or ownership in the Index Components. Each of the allocations described herein within the Reference Portfolio is only carried out hypothetically by modifying such records. The Index Calculation Agent, any Issuer and the Hedging Party are under no obligation to directly or indirectly acquire the Index Components.

Section B. - General information regarding the Index

I. Objective of the Index

The Index reflects the performance of the Reference Portfolio.

The economic objective of the Reference Portfolio is to participate in the performance of the Reference Fund, while aiming to control the degree of variation (volatility) of the Reference Portfolio. To this end, the participation in the Reference Fund will be reduced in part or in full in the event of high volatility of the Reference Fund (adjusted for distributions), and the participation in the Money Market Investment will be increased accordingly. Conversely, the participation in the Money Market Investment will be reduced in part or in full in the event of low volatility of the Reference Fund, and the participation in the Reference Fund will be increased accordingly.

However, there is no guarantee that the Reference Portfolio and hence the Index will achieve the objectives described here.

For the purposes of calculating the Index, the Money Market Investment is reflected by the Reference Index.

II. Index Sponsor and Index Calculation Agent

The Index Sponsor compiles the Index by selecting the Index Components and by determining the method used to calculate and publish the Index Value (the "Index Concept").

The Index Calculation Agent conducts all calculations, determinations and definitions with the regard to the Index in accordance with this Index Description, and monitors and updates certain index data for this purpose.

The Index Calculation Agent may at any time in its sole discretion seek advice from third parties with regard to its obligations described herein. The Index Calculation Agent may resign at any time, provided that, for as long as Debt Securities are still outstanding, the resignation will take effect only if (i) a successor Index Calculation Agent is appointed, (ii) such successor Index Calculation Agent accepts the appointment, and (iii) the successor Index Calculation Agent assumes the rights and obligations of the Index Calculation Agent. Such replacement of the Index Calculation Agent will be published in accordance with Section F. - Publication of this Index Description.

The Index Calculation Agent will act with the due care of a prudent businessman (Sorgfalt eines ordentlichen Kaufmannes) in carrying out all calculations, determinations and definitions with regard to the Index in accordance with this Index Description. The Index Sponsor and the Index Calculation Agent accept no liability except in the event of wilful misconduct or gross negligence.

Neither the Index Sponsor nor any other person related to the Index acts in any fiduciary or advisory capacity for any holder of Debt Securities.

Section C. - Calculation of the Index

I. Calculation of the Index Value

The Index Value (\(\text{Index}(t_j)\)) is calculated by the Index Calculation Agent for each Index Valuation Date \(t_j\) (where \(j = 1, 2, \ldots\)) after the Index Start Date in accordance with the following formula:

\[
\text{Index}(t_j) = \text{Index}(t_{j-1}) \times \left[ 1 + w(t_{j-1}) \times \text{Return}_1(t_j) + \left( 1 - w(t_{j-1}) \right) \times \text{Return}_2(t_j) \right],
\]

where the return on the Reference Fund since the previous Index Valuation Date (\(\text{Return}_1(t_j)\)) is calculated as follows:
PART C – SPECIAL CONDITIONS OF THE SECURITIES – All Product Types

\[ \text{Return}_1(t_j) = \frac{\text{NAV}^A(t_j) - \text{NAV}^A(t_{j-1})}{\text{NAV}^A(t_{j-1})}, \]

with

\[ \text{NAV}^A(t_j) = n(t_j) \times \left( \text{NAV}(t_j) + d(t_j) \right), \]

and the return on the Money Market Investment is calculated as follows on the basis of the Reference Index and reduced by the proportionate Synthetic Dividend since the previous Index Valuation Date (Return$_2(t_j)$):

\[ \text{Return}_2(t_j) = \frac{\text{RIV}(t_j) - \text{RIV}(t_{j-1})}{\text{RIV}(t_{j-1})} - \frac{\text{Div}}{360} \times \Delta(t_{j-1}, t_j), \]

where

"\( w(t_{j+1}) \)" denotes the weighting of the Reference Fund (as defined in Section C. - III. Dynamic Allocation Rules below), calculated for the Index Valuation Date \( t_{j+1} \);

"\( \Delta(t_{j+1}, t_j) \)" denotes the number of calendar days from Index Valuation Date \( t_{j+1} \) (exclusive) to Index Valuation Date \( t_j \) (inclusive).

Under normal circumstances, the Index Value at an Index Valuation Date is calculated on the following Banking Day (each an "Index Calculation Date") after the Index Calculation Agent has received the relevant Net Asset Value of the Reference Fund.

II. Adjustment of the Distribution Factor

On each Reinvestment Date \( t^*_j \), the distribution factor \( n(t^*_j) \) is recalculated by the Index Calculation Agent in a way so that it notionally equals a reinvestment of the present value (in Euro) of the related Distribution (less costs and taxes, if any, incurred by the Hypothetical Investor) in Fund Shares. Expressed as a formula, this means:

\[ n(t^*_j) = \tilde{n}(t^*_j) + \frac{\tilde{n}(t^*_j) \times d(t^*_j)}{\text{NAV}(t^*_j)}. \]

III. Dynamic Allocation Rules

The weighting of the Index Components in the Reference Portfolio is redetermined on each Index Valuation Date \( t_j \) (where \( j = 0, 1, 2, \ldots \)) as follows ("Dynamic Allocation"):

First, the Index Calculation Agent calculates the realised degree of variation (realised volatility) of the Reference Fund (adjusted for distributions) \( (\sigma_R(t_j)) \), using the daily returns of the Reference Fund over a period of twenty Index Valuation Dates, and derives an annual volatility level from this realised volatility. The period observed commences twenty-two Index Valuation Dates prior to the relevant Index Valuation Date and ends two Index Valuation Dates prior to the relevant Index Valuation Date. Daily Return is the logarithm of the change in the Net Asset Value between two consecutive Index Valuation Dates.

The realised volatility of the Reference Fund on each Index Valuation Date \( t_j \) (where \( j = 0, 1, 2, \ldots \)) is calculated as follows:

\[ \sigma_R(t_j) = \sqrt{\frac{1}{19} \sum_{p=0}^{19} \left( \ln \left( \frac{\text{NAV}^A(t_{j-p-2})}{\text{NAV}^A(t_{j-p-3})} \right) \right)^2 - \frac{1}{20} \times \left( \sum_{p=0}^{19} \ln \left( \frac{\text{NAV}^A(t_{j-p-2})}{\text{NAV}^A(t_{j-p-3})} \right) \right)^2} \times \sqrt{252}, \]

where

"\( \ln[x] \)" denotes the natural logarithm of \( [x] \).

Next, the Index Calculation Agent determines the weighting of the Reference Fund for the corresponding Index Valuation Date \( t_j \) \( (w(t_j)) \) using the following Allocation Table and the realised volatility of the Reference Fund calculated in accordance with the formula described above. The
greater the realised volatility of the Reference Fund, the lower the weighting of the Reference Fund and vice versa.

When performing the Dynamic Allocation, the Index Calculation Agent will take into account the possibilities of the Hypothetical Investor to subscribe or redeem Fund Shares (where appropriate taking into consideration subscription and redemption periods of the Reference Fund). This may lead to a delayed or gradual implementation of Dynamic Allocation.

The Dynamic Allocation may be spread across several Banking Days where necessary in order to reduce resulting influences on the development of the price of the Reference Fund and/or its components. Such influences may occur in particular if Dynamic Allocation would lead to the Hedging Party having to buy or sell Fund Shares with a total value of more than 5% of the fund volume in order to enter into or unwind relevant Hedging Transactions or if the market conditions for the components of the Reference Fund generally deteriorate, in particular with regard to their liquidity, or the Reference Fund exercises its right to partially execute redemption requests. The Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether it is necessary to spread the Dynamic Allocation across several Banking Days.

The Index Calculation Agent carries out its obligations described herein on the relevant Banking Days. Where it is necessary to carry out one of the obligations described herein on a different Banking Day, the Index Calculation Agent will postpone the relevant obligation to this other Banking Day. The Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether the requirements of such postponement are met.

**Section D. - Extraordinary adjustments and market disruptions**

**I. General extraordinary adjustments**

*Adjustment with regard to the Reference Fund*

Should the Index Calculation Agent determine that one or more Fund Events have occurred, the Index Calculation Agent will, if necessary, adjust the Index Concept in such a way that the financial position of the Hypothetical Investor remains unchanged to the greatest extent possible (the "Reference Fund Adjustment"). The Index Calculation Agent will determine the type and scope of any measures required for this purpose in its reasonable discretion (§ 315 BGB).

In the context of such Reference Fund Adjustment, the Index Calculation Agent may specifically:

a) replace the Reference Fund and the Fund Shares, in full or in part, with a fund and fund shares with economically equivalent liquidity, distribution policy and investment strategy (the "Successor Reference Fund", and its shares the "Successor Fund Shares") in the amount of the proceeds of the liquidation of the relevant Reference Fund within ten Banking Days of the day on which the liquidation proceeds would have been received in part or in full by the Hypothetical Investor. In this event, each reference to the Reference Fund or the Fund Shares will be deemed to refer to the Successor Reference Fund or the Successor Fund Shares, as applicable;

b) replace the Reference Fund with an index determined in the reasonable discretion (§ 315 BGB) of the Index Calculation Agent (the "Successor Index") within ten Banking Days.
Days of the day on which the proceeds of the liquidation of the relevant Reference Fund would have been received in part or in full by the Hypothetical Investor; or

c) adjust any provision of the Index Concept, the adjustment of which is appropriate to account for the economic effect of the Fund Event

(where necessary also adjusting the weighting of the Index Components now included in the Index). Any such Reference Fund Adjustment will be published in accordance with Section F. - Publication of this Index Description.

The Management Company will take the remuneration that the Index Calculation Agent receives from the Management Company in its function as Investment Adviser into account in its internal pricing models by means of lower costs for the earnings mechanism in its function as Hedging Party. This remuneration is not distributed to the holders of Debt Securities or reinvested in the Index. Should the Reference Fund be replaced in accordance with (a) or (b) resulting in the loss or the reduction of the remuneration received by the Index Calculation Agent in its function as Investment Adviser to the Successor Reference Fund, the Index Calculation Agent will introduce a Synthetic Dividend on the return of the Fund Shares, i.e. the Return1 (as defined in Section C. - Calculation of the Index Value of this Index Description) is reduced by the Synthetic Dividend as an annual percentage on a daily basis in the same way as Return2 is calculated. This Synthetic Dividend (i) amounts to 1.55% p.a. in the case of a Successor Index, or (ii) in the case of a Successor Reference Fund, is calculated as the difference between 1.55% p.a. and the anticipated reduced trailer fee for holdings of the Successor Reference Fund as an annual percentage. It will, however, not exceed 1.55% p.a. The introduction of a Synthetic Dividend and its amount will be published in accordance with Section F. - Publication of this Index Description.

"Fund Event" means any of the following events:

a) changes are made in any of the Fund Documents without the consent of the Index Calculation Agent which affect the ability of the Issuer and/or the Hedging Party to maintain its Hedging Transactions, in particular changes with respect to (i) the risk profile of the Reference Fund, (ii) the investment objectives or investment strategy or investment restrictions of the Reference Fund, (iii) the currency of the Fund Shares, (iv) the relevant method of calculating the Net Asset Value, or (v) the timetable for the subscription, redemption or transfer of Fund Shares; the Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether any such change has occurred;

b) requests for the redemption, subscription or transfer of Fund Shares are not or only partially executed;

c) fees, premiums, discounts, charges, commissions, taxes or similar fees are levied for the issue or redemption of Fund Shares (other than such fees, premiums, discounts, charges, commissions, taxes or similar fees existing at the date the Reference Fund was included in the Index);

d) the Management Company fails to publish the Net Asset Value as scheduled or in accordance with normal practice or as specified in the Fund Documents;

e) a change in the legal form of the Reference Fund;

f) a change of key persons in key positions of the Management Company or the fund management;

g) (i) any change in the legal, accounting, tax or regulatory treatment of the Reference Fund or the Management Company; or (ii) the suspension, cancellation, revocation or absence of registration or approval of the Reference Fund or the Management Company; or (iii) the revocation of a relevant authorisation or licence for the Reference Fund or the Management Company by a competent authority; or (iv) the initiation of a regulatory investigation, conviction by a court or an order by a competent authority relating to the activities of the Reference Fund, the Management Company, other service providers that perform their services for the Reference Fund, or of individuals in key positions as a result of misconduct, a violation of the law or for similar reasons;
h) a breach of the investment objectives or investment restrictions of the Reference Fund (as defined in the Fund Documents), and a breach by the Reference Fund or the Management Company of statutory or regulatory provisions;

i) a change in laws or regulations or in their implementation or interpretation (whether formally or informally) which (i) requires the Hedging Party, in relation to the subscription, redemption or holding of Fund Shares, to create a reserve, provision or similar, or (ii) increases the amount of regulatory capital to be held by the Hedging Party with respect to its Hedging Transactions to an extent that is significant in comparison with the conditions applying on the Index Start Date; the Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether any such change has occurred;

j) an increase in the proportion of the volume held by the Hedging Party alone or together with a third party with which the Hedging Party in turn enters into Hedging Transactions beyond 35% of the outstanding Fund Shares in the Reference Fund;

k) the Hedging Party is required to consolidate the Reference Fund as a result of accounting or other regulations;

l) the sale or redemption of Fund Shares for mandatory reasons for the Hedging Party, provided that this is not solely for the purpose of entering into or unwinding Hedging Transactions;

m) an event or circumstance that has or could have the following effects: (i) the suspension of the issuance of additional Fund Shares or of the redemption of existing Fund Shares, (ii) the reduction of the number of Fund Shares of a shareholder in the Reference Fund for reasons outside the control of that shareholder, (iii) the subdivision, consolidation or reclassification of the Fund Shares, (iv) payments in respect of a redemption of Fund Shares being made partly or wholly by means of a distribution in kind instead of for cash, or (v) the creation of so-called side pockets for segregated assets of the Reference Fund;

n) the Management Company, the Auditor, the Investment Adviser, the Custodian Bank or any other service provider that performs its services for the Reference Fund ceases to act in such capacity or loses its accreditation, registration, approval or authorisation and is not immediately replaced by another service provider of the similarly good standing;

o) (i) an order or valid resolution for a winding-up, dissolution, termination, liquidation or an event with similar effects in relation to the Reference Fund or the Fund Shares, (ii) the initiation of settlement, bankruptcy or insolvency proceedings, a demerger or spin-off, a reclassification or consolidation, such as a change in the share class of the Reference Fund or the merger of the Reference Fund into or with another fund, (iii) a requirement to transfer all the Fund Shares to a trustee, liquidator, insolvency administrator or similar office-holder, or (iv) the legal prohibition of transfers of the Fund Shares by the shareholders;

p) the initiation of settlement, bankruptcy, insolvency, dissolution or comparable proceedings with respect to the Management Company;

q) the Index Calculation Agent loses the right to use the Reference Fund as the basis for the calculation, determination and publication of the Index;

r) the aggregate net assets under management of the Reference Fund fall below a value of EUR 500 million;

s) a change in the tax laws and regulations or in their implementation or interpretation which has negative consequences for an Issuer, the Hedging Party or a holder of Debt Securities in the reasonable discretion (§ 315 BGB) of the Index Calculation Agent;

t) no relevant data is provided for the calculation of the taxable basis for the Reference Fund in accordance with § 5 (1) of the German Investment Tax Act (Investmentsteuergesetz, "InvStG") or the Reference Fund or the Management Company has announced that no relevant data will be provided in accordance with § 5 (1) InvStG in the future;

u) distributions which diverge significantly from the Reference Fund's normal distribution policy;
v) changes in the investment or distribution policy of the Reference Fund which could have a substantial negative effect on the amount of the Reference Fund's distributions;

w) the Reference Fund or the Management Company fails to pay the remuneration agreed with the Investment Adviser, discontinues such payment unlawfully or reduces such payment unlawfully;

x) the Reference Fund or the Management Company or a company affiliated with it breaches the agreement entered into with the Index Calculation Agent, an Issuer or the Hedging Party in relation to the Reference Fund in a significant respect or terminates that agreement;

y) the Reference Fund or the Management Company, contrary to normal practice to date, fails to provide the Index Calculation Agent with information that the latter reasonably considers necessary to enable it to monitor compliance with the Reference Fund's investment guidelines or restrictions in a timely manner;

z) the Reference Fund or the Management Company fails to provide the Index Calculation Agent with the audited statement of accounts and, where relevant, the half-yearly report as soon as possible after receiving a corresponding request;

aa) any other event that could have a noticeable adverse effect on the Net Asset Value of the Reference Fund or the ability of the Hedging Party to hedge its obligations under the Hedging Transactions on more than a temporary basis to the extent that the financial position of a Hypothetical Investor or of the Hedging Party or of the holders of Debt Securities or other financial instruments linked to the Index suffers a significant adverse change as a result, as determined by the Index Calculation Agent in its reasonable discretion (§ 315 BGB).

The Index Calculation Agent is under no obligation to monitor whether or not one of the events referred to above has occurred. The determination of a Fund Event will be published in accordance with Section F. - Publication of this Index Description.

Adjustment with regard to the Reference Index

Should the Index Calculation Agent determine that one or more Index Events have occurred, the Index Calculation Agent will, if necessary, adjust the Index Concept in such a way that the financial position of the Hypothetical Investor remains unchanged to the greatest extent possible (the "Reference Index Adjustment"). The Index Calculation Agent will determine the type and scope of any measures required for this purpose in its reasonable discretion (§ 315 BGB).

In the context of such Reference Index Adjustment, the Index Calculation Agent may specifically:

a) replace the Reference Index with a new index (the "Successor Reference Index") using a methodology that is economically equivalent to the greatest extent possible (including in particular the tracking of rolling money market returns). However, the Successor Reference Index may use differing application periods for the Reference Rates and differing rolling intervals. In this event, each reference to the Reference Index will be deemed to refer to the Successor Reference Index;

b) adjust any provision of the Index Concept, the adjustment of which is appropriate to account for the economic effect of the Index Event

(where necessary also adjusting the weighting of the Index Components now included in the Index).

"Index Event" means any of the following events occurring on or after the Index Start Date:

a) changes or modifications are made to the method of calculation, determination and publication of the Reference Index, as described in the Reference Index Description, without the consent of the Index Calculation Agent which affect the ability of the Hedging Party to hedge its obligations under the Hedging Transactions (in particular changes with respect to (i) the risk profile of the Reference Index, or (ii) the Reference Index is no longer calculated in euro); the Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether any such change or modification has occurred;
PART C – SPECIAL CONDITIONS OF THE SECURITIES – All Product Types

b) the historic 30-day volatility of the Reference Index exceeds a volatility level of 2.5%; where $\sigma_{EI}(t_j)$ means the annualised volatility calculated on the basis of the daily logarithmic changes in the value of the Reference Index over the immediately preceding 30 Reference Index Calculation Dates of the Reference Index on a Banking Day (t). $\sigma_{EI}(t_j)$ is calculated in accordance with the following formula:

$$\sigma_{EI}(t_j) = \sqrt{\frac{\sum_{p=0}^{29} \left( \ln \left( \frac{\text{RIV}(t_j-p)}{\text{RIV}(t_j-p-1)} \right) \right)^2}{29} - \frac{1}{30} \left( \sum_{p=0}^{29} \ln \left( \frac{\text{RIV}(t_j-p)}{\text{RIV}(t_j-p-1)} \right) \right)^2} \times \sqrt{252},$$

Where:

"\ln[x]" denotes the natural logarithm of [x];

c) the calculation or publication of the Reference Index is discontinued;

d) the Reference Index no longer, in the reasonable discretion (§ 315 BGB) of the Index Calculation Agent, corresponds to the objective of a low-risk investment that is free of currency risk for the Hypothetical Investor;

e) any other event that, in the reasonable discretion (§ 315 BGB) of the Index Calculation Agent, could have a noticeable adverse effect on the Reference Index Value or the ability of the Hedging Party to hedge its obligations under the Hedging Transactions on more than a temporary basis.

The Index Calculation Agent is under no obligation to monitor whether or not one of the events referred to above has occurred. The determination of an Index Event will be published in accordance with Section F. - Publication of this Index Description.

Termination of the Index

The Index Calculation Agent has the right to temporarily suspend the calculation of the Index following the occurrence of one or more Fund Events and/or one or more Index Events.

Should an adjustment of the Index Concept not be possible or not be reasonable for the Hypothetical Investor, the Index Calculation Agent has the right to permanently discontinue the calculation of the Index at any time; the Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether the relevant requirements are met.

II. Adjustment of the Net Asset Value

In the following cases, the Index Calculation Agent will, for the purposes of calculating the Index Value, adjust the Net Asset Value of the Reference Fund published by the Management Company to account for the economic effects of the relevant events on the Index:

a) charges or fees are levied in connection with the issue or redemption of Fund Shares;

b) a Hypothetical Investor would not have received the aggregate proceeds from the redemption of Fund Shares within the usual period or the period specified in the Fund Documents; or

c) in the event of (i) a manifest error, (ii) the incorrect publication of the Net Asset Value, or (iii) if a Net Asset Value determined and published by the Management Company, as used by the Index Calculation Agent as the basis for the calculation, determination and publication of the Index, is subsequently corrected. In cases (ii) and (iii), the Index Calculation Agent will, where necessary, again determine the relevant Net Asset Value (the "Corrected Net Asset Value") and again calculate the Index Value on the basis of the Corrected Net Asset Value, taking into account the situation of a Hypothetical Investor.

The Index Calculation Agent will determine the extent of any necessary adjustments to the Net Asset Value in its reasonable discretion (§ 315 BGB). When adjusting the Net Asset Value, the Index Calculation Agent will take into account the fact that proceeds from the reduction of a Reference Fund may only be allocated to the Reference Index (and vice versa) after the Hypothetical Investor would have received the respective proceeds from the disposal of the Reference Fund or the money market component.
III. Adjustment of the value of the Reference Index

In the following cases, the Index Calculation Agent will, for the purposes of calculating the Index Value, adjust the Reference Index Value of the Reference Index published by the calculation agent of the Reference Index to account for the economic effects of the relevant events on the Index:

a) in the event of a manifest error in the calculation of the Reference Index Value;

b) in the event of the incorrect publication of the Reference Index Value; or

c) if a Reference Index Value determined and published by the Reference Index Sponsor, as used by the Index Calculation Agent as the basis for the calculation of the Index, is subsequently corrected.

The Index Calculation Agent will determine the extent of any necessary adjustments to the Reference Index Value in its reasonable discretion (§ 315 BGB). In cases b. and c., the Index Calculation Agent will, where necessary, again determine the relevant Reference Index Value (the "Corrected Reference Index Value") and again calculate the Index Value on the basis of the Corrected Reference Index Value.

IV. Adjustment of the Distribution

In case that the data in relation to a Distribution (amount of the Distribution, Distribution Payment Date, Ex-Date) is not available via the data provider system Bloomberg at the latest on the Index Valuation Date immediately preceding the relevant Ex-Date, then the Index Calculation Agent will re-determine the Index Value and the adjustment of the distribution factor pursuant to the relevant formulas after the data has been published. The dynamic allocation rules will only be applied to such extent that the Index Calculation Agent takes into account only the information that would be available via Bloomberg to the Hypothetical Investor at the time at which the Hypothetical Investor would have been required to submit subscription or redemption order for Fund Shares in order to replicate a reallocation of the Reference Portfolio taking into account, as the case may be, subscription and redemption notice periods, respectively.

V. Market Disruption Events

a) If the Hypothetical Investor is not able to subscribe for or redeem Fund Shares on an Index Valuation Date, whether because the subscription or redemption of Fund Shares has been suspended or no Net Asset Value has been published for the Reference Fund or such publication will be delayed (a "Reference Fund Market Disruption Event"), the Index Calculation Agent will postpone the calculation, determination and publication of the Index (specifically including the performance of Dynamic Allocation) until such time as the Reference Fund Market Disruption Event ends. The Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether the relevant requirements are met.

If the Reference Fund Market Disruption Event continues for more than thirty Banking Days, the Index Calculation Agent will make an estimate of the Net Asset Value taking into account the then prevailing market conditions and the possibilities of the Hypothetical Investor to sell Fund Shares in the market, in order to perform a calculation, determination and publication of the Index (specifically including the performance of Dynamic Allocation), provided that a data basis is available which is sufficient for the purposes of such estimate. The Index Calculation Agent will determine in its reasonable discretion (§ 315 BGB) whether a sufficient data basis is available. The estimate will be based on a commercially reasonable assessment.

b) If a Reference Index Value that is required for the calculation, determination and publication of the Index has not been published on an Index Valuation Date, or such publication will be delayed, the Index Calculation Agent will, in order to calculate the required price of the Reference Index, apply the calculation method described in the description of the Reference Index taking into account the most recently available value of the Reference Index.
Section E. - Corrections
The Index Calculation Agent may correct or amend contradictory or incomplete provisions in the Index Description in accordance with the provisions applicable to the relevant Debt Securities or the relevant other financial instruments linked to the Index.

Section F. - Publication
The Index Value is published by the Index Calculation Agent on the website www.onemarkets.de, the Reuters page .UCGRVDW2 and on Bloomberg under the ticker UCGRVDW2 Index.

All determinations made by the Index Calculation Agent in its reasonable discretion (§ 315 BGB) will be published in accordance with the terms and conditions of the relevant Debt Securities or the relevant other financial instruments linked to the Index.

Section G. - Governing law
This Index Description is governed by German law.
2. DESCRIPTION OF HVB VERMÖGENSDEPOT WACHSTUM FLEX INDEX III

In the version of 14 November 2018

The following Index Description outlines the key data for the "HVB Vermögensdepot Wachstum Flex Index III" (the "HVB Vermögensdepot Wachstum Flex Index III") compiled by UniCredit Bank AG. This description is subject to amendments or adjustments from time to time.

The HVB Vermögensdepot Wachstum Flex Index III (WKN A163YC / ISIN DE000A163YC2) (the "Index") is an index developed and designed by UniCredit Bank AG, Munich, Germany, or any successor thereto (the "Index Sponsor") and calculated by UniCredit Bank AG, Munich, Germany, or any successor determined by the Index Sponsor (the "Index Calculation Agent") in accordance with the index rules set out below (the "Index Rules") whose objective is to participate in the performance of the Reference Fund, while aiming to control the frequency and degree of variation in the value (volatility) of the Reference Portfolio (the "Objective of the Index").

Section A. - Definitions, general information

I. Definitions

For the purposes of this description (the "Index Description"), the following terms have the following meanings:

Definitions regarding the Index:

"Banking Day" means each day (other than a Saturday or Sunday) on which the principal domestic clearance system customarily used to settle trades regarding the Index Components and the Trans-European Automated Real-time Gross settlement Express Transfer System (TARGET2) are open.

"Debt Securities" means all outstanding debt securities of a company affiliated with the Index Sponsor (Section 15 of the German Stock Corporation Act (Aktiengesetz)) at a given time for which payment of principal and/or interest depends on the performance of the Index.

"Fund Event" means any event defined as a Fund Event in Section D. - I. General Extraordinary Adjustments of this Index Description.

"Hedging Party" means the Index Sponsor (as at the Index Start Date). The Index Sponsor is entitled at any time to appoint another person or company to act as Hedging Party (the "Successor Hedging Party"). The appointment of a Successor Hedging Party will be published in accordance with Section F. - Publication of this Index Description.

"Hedging Transactions" means one or more trades, transactions or investments (especially securities (including Fund Shares), options, futures, derivatives and foreign currency transactions, repos or securities lending transactions or other instruments or measures) which are required for an Issuer and/or any Hedging Party to hedge price risks or other risks at standalone or portfolio basis arising from obligations with regard to the Index or with regard to Debt Securities or other financial instruments linked to the Index (i.e. financial instruments whose payments are linked to the performance of the Index). The Index Sponsor will determine in its reasonable discretion (§ 315 of the German Civil Code (Bürgerliches Gesetzbuch; "BGB")) whether any such Hedging Transactions are required.

"Hypothetical Investor" means, in relation to any Fund Shares, a hypothetical investor holding such Fund Shares which (i) has the legal form of a company incorporated in Germany and is a credit institution licensed under Section 32 of the German Banking Act (Kreditwesengesetz, KWG) and (ii) is deemed, with respect to the rights and obligations, to have the position of an investor in Fund Shares on the relevant Index Valuation Date, as determined in the Fund Documents, and (iii) is deemed to have the possibilities of such an investor in relation to the subscription and redemption of Fund Shares as at the relevant Index Valuation Date.

"Index Components" means the Fund Shares and the Reference Index included in the Index at any given time.
"Index Event" means any event defined as an Index Event in Section D. - I. General Extraordinary Adjustments of this Index Description.

"Index Initial Value" means 100.00.

"Index Start Date" means 24 August 2015.

"Index Valuation Date" means any Banking Day that is a Reference Index Calculation Date and on which it is actually possible to issue and redeem Fund Shares as described in the Fund Documents.

"Index Value" means the value (expressed in Euro) of the Index on any given Index Valuation Date as calculated by the Index Calculation Agent.

"Index(t)" means the Index Value at Index Valuation Date t. Index (t) is calculated by the Index Calculation Agent for every Index Valuation Date t in accordance with the provisions set forth in Section C. - Calculation of the Index of this Index Description.

"Issuer" means an issuer of Debt Securities.

"Money Market Investment" means a hypothetical investment in cash and money market instruments from the European single currency monetary area. The performance of this investment is reflected by the Reference Index.

"Reference Portfolio" means a hypothetical portfolio of the Hypothetical Investor which contains both Fund Shares and the Money Market Investment in variable weightings. The Reference Portfolio has a value at the Index Start Date equal to the Index Initial Value (expressed in euro).

"t" means the j-th Index Valuation Date. The Index Start Date is labelled with t0, previous Index Valuation Dates are labelled with negative indices and subsequent Index Valuation Dates are labelled with positive indices, resulting in (…, t2, t1, t0, t1, t2, …).

"t-p" is the p-th Index Valuation Date prior to the Index Valuation Date t.

"t-p-2" is the second Index Valuation Date prior to the Index Valuation Date t-p.

"Reinvestment Date" means, in relation to a Distribution, the second Index Valuation Date immediately following the relevant Distribution Payment Date.

Definitions regarding the Reference Fund:

"Auditor" means PricewaterhouseCoopers GmbH and/or any other auditing firm appointed by the Management Company to audit the Reference Fund and its annual financial statements.

"Custodian Bank" means CACEIS Bank S.A., Germany Branch and/or any other company appointed by the Management Company to perform depository, accounting, settlement or similar services for the Reference Fund.

"d(t)" means either (i) d(t*) on each Index Valuation Date t between any Ex-Date (inclusive) and the corresponding Reinvestment Date t* (exclusive) or (ii) zero on any other Index Valuation Date t.

"d(t*)" means the value (in Euro) of the relevant Distribution (less costs and taxes, if any, incurred by the Hypothetical Investor in relation to the Distribution) as at the Ex-Date immediately preceding the relevant Reinvestment Date t*.

"Distribution" means a cash distribution with Ex-date after 14 November 2018 which the Reference Fund would pay per Fund Share to the Hypothetical Investor on a Distribution Payment Date.

"Distribution Payment Date" means, in relation to a Distribution, the day on which such Distribution would be received by the Hypothetical Investor.

"Ex-Date" means, in relation to a Distribution, the first day on which the Net Asset Value is published by the Management Company, having been reduced by that Distribution.

"Fund Documents" means the annual report and the half-yearly report, the prospectus (including the management regulations, terms and conditions), the key investor information and all other documents of the Reference Fund which specify the terms and conditions of the Reference Fund and the Fund Shares, in each case in the respective valid version. The Fund Documents, in the respective valid
version, are available on the website www.amundi.de (or any successor site). The information contained therein is also available free of charge at UniCredit Bank AG, LCD6L3, Arabellastraße 14, 81925 Munich, Germany, during normal business hours.

"Fund Management" means the persons responsible for portfolio management and/or risk management of the Reference Fund.

"Fund Service Providers" are the Auditor, the Investment Advisor, the Custodian Bank and the Management Company.

"Fund Share" or "Fund Shares" means a unit or share or units or shares in the Reference Fund (WKN A0M035 / ISIN DE000A0M0358 / Bloomberg HVBPRWP GR Equity).

"Investment Adviser" means UniCredit Bank AG (at the Index Start Date). The Management Company may appoint a different person or company to act as Investment Adviser for the Reference Fund at any time.

"Management Company" means Amundi Deutschland GmbH (formerly: Pioneer Investments Kapitalanlagegesellschaft mbH), which manages the Reference Fund.

"n(tj)" means the distribution factor for the Index Valuation Date tj. On the Index Start Date t0, a value of 1.00 is set for the distribution factor (n(t0)). Thereafter, the distribution factor is recalculated by the Index Calculation Agent on each Reinvestment Date t*j in accordance with the provisions set out in Section C. - II. Adjustment of the Distribution Factor of this Index Description. On Valuation Dates where no recalculation of the distribution factor takes place, the distribution factor is given by the distribution factor of the immediately preceeding Index Valuation Date.

"n(t*)j" means the distribution factor n(tj) immediately prior to the Reinvestment Date t*j.

"NAV(tj)" means the Net Asset Value of a Fund Share on Index Valuation Date tj.

"NAV(tj+1)" means the Net Asset Value of a Fund Share on Index Valuation Date tj+1.

"NAV(t*)j" means the Net Asset Value of a Fund Share on Reinvestment Date t*j.

"NAV(tj)" means the Net Asset Value of a Fund Share on Index Valuation Date tj, after taking into account all Distributions made and reinvested since 14 November 2018, if applicable, up to such Index Valuation Date tj, which is calculated by the Index Calculation Agent in accordance with the formula specified in Section C. - I. Calculation of the Index Value of this Index Description.

"NAV(tj+1)" means the Net Asset Value of a Fund Share on Index Valuation Date tj+1, after taking into account all Distributions made and reinvested since 14 November 2018, if applicable, up to such Index Valuation Date tj+1, which is calculated by the Index Calculation Agent in accordance with the formula specified in Section C. - I. Calculation of the Index Value of this Index Description.

"NAV(tj+p-2)" means the Net Asset Value of a Fund Share on Index Valuation Date tj+p-2, after taking into account all Distributions made and reinvested since 14 November 2018, if applicable, up to such Index Valuation Date tj+p-2, which is calculated by the Index Calculation Agent in accordance with the formula specified in Section C. - I. Calculation of the Index Value of this Index Description.

"NAV(tj+p-3)" means the Net Asset Value of a Fund Share on Index Valuation Date tj+p-3, after taking into account all Distributions made and reinvested since 14 November 2018, if applicable, up to such Index Valuation Date tj+p-3, which is calculated by the Index Calculation Agent in accordance with the formula specified in Section C. - I. Calculation of the Index Value of this Index Description.

"Net Asset Value" or "NAV" means the official net asset value for a Fund Share, as published by the Management Company and at which it is actually possible to issue and redeem Fund Shares.

"Reference Fund" means Vermögensdepot privat 70 (formerly: HVB Vermögensdepot privat Wachstum PI).

Definitions regarding the Reference Index:

"Reference Index Calculation Agent" means UniCredit Bank AG, Munich, Germany.
"Reference Index Calculation Date" means each day (other than a Saturday or Sunday) on which the Trans-European Automated Real-time Gross settlement Express Transfer System (TARGET2) is open.

"Reference Index Description" means the description of the Reference Index. The respective valid version of the Reference Index Description is published on the website www.onemarkets.de (or any successor site).

"Reference Index Structuring Fee" or "FRI" means a rate by which the performance of the Reference Index is reduced. The Reference Index Structuring Fee is 1.47% per annum (FRI = 1.47%).

"Reference Index Value" means the value (expressed in Euro) of the Reference Index calculated by the Reference Index Calculation Agent on the basis of the method described in the Reference Index Description at any Reference Index Calculation Date.

"Reference Index" means the HVB 3 Months Rolling Euribor Index (WKN A0QZBZ / ISIN DE000A0QZBZ6 / Reuters .HVB3MRE / Bloomberg HVB3MRE Index), as determined and calculated by UniCredit Bank AG (the "Reference Index Sponsor").

"RIV(tj)" means the Reference Index Value on Index Valuation Date tj.

"RIV(tj-1)" means the Reference Index Value on Index Valuation Date tj-1.

II. General information, Disclaimer

The information regarding the Reference Fund included in this Index Description is intended solely to inform investors intending to buy Debt Securities and does not constitute a solicitation to buy Fund Shares. Each investor must make its own assessment of the merits of the Reference Fund. When calculating the Index Value, the Index Calculation Agent must rely upon statements, confirmations, computations, assurances and other information provided by third parties, the correctness and reliability of which it largely does not verify and for the correctness of which it accepts no responsibility. Any inaccuracies contained in such information may have an impact on the calculation of the Index Value without any fault attaching to the Index Calculation Agent. Neither the Index Sponsor nor the Index Calculation Agent has any obligation to verify this information independently.

The Index exists exclusively in the form of sets of data records and does not convey any direct or indirect legal or beneficial interest or ownership in the Index Components. Each of the allocations described herein within the Reference Portfolio is only carried out hypothetically by modifying such records. Neither the Index Sponsor nor the Index Calculation Agent, any Issuer or the Hedging Party is under any obligation to directly or indirectly acquire the Index Components. Fees or rebates, if any, received by the Index Sponsor in its capacity as Hedging Party from the Management Company in relation to holdings in the Reference Fund or fees that the Index Sponsor receives in its capacity as Investment Adviser from the Management Company will not be distributed to the holders of Debt Securities or reinvested in the Index, but will be taken into account by the Index Sponsor in its capacity as Hedging Party in its internal pricing models by means of lower costs for the earnings mechanism. Distributions made by the Reference Fund will not be distributed to the holders of Debt Securities.

Section B. - General information regarding the Index

I. Objective of the Index

The Index reflects the performance of the Reference Portfolio.

In order to pursue the Objective of the Index, the participation in the Reference Fund will be reduced partially or completely if the Reference Fund (adjusted for distributions) exhibits a high volatility (volatility is an indicator of the frequency and degree of variation in value), and the participation in the Money Market Investment will be increased accordingly. Conversely, the participation in the Money Market Investment will be reduced partially or completely if the Reference Fund shows a low volatility, and the participation in the Reference Fund will be increased accordingly.

However, there is no guarantee that the Reference Portfolio and hence the Index will achieve the objectives described here.
II. Index Sponsor and Index Calculation Agent

The Index Sponsor creates the Index by selecting the Index Components and by determining the method used to calculate and publish the Index Value (the "Index Concept"). The Index Sponsor will make any decisions, determinations and specifications with regard to the Index in its reasonable discretion (§ 315 BGB).

The Index Calculation Agent conducts all calculations with regard to the Index in accordance with this Index Description, and monitors and maintains certain index data for this purpose. The Index Calculation Agent will act with the due care of a prudent businessman (Sorgfalt eines ordentlichen Kaufmannes) in performing its duties in accordance with this Index Description. The Index Sponsor and the Index Calculation Agent accept no liability except in the event of wilful misconduct or gross negligence.

The Index Calculation Agent may at any time seek advice from third parties with regard to its obligations described herein. The Index Calculation Agent may resign at any time, provided that, for as long as Debt Securities are still outstanding, the resignation will take effect only if (i) a successor Index Calculation Agent is appointed by the Index Sponsor, (ii) such successor Index Calculation Agent accepts the appointment, and (iii) the successor Index Calculation Agent assumes the rights and obligations of the Index Calculation Agent. Such replacement of the Index Calculation Agent will be published in accordance with Section F. - Publication of this Index Description.

Neither the Index Sponsor nor any other person related to the Index acts in any fiduciary or advisory capacity for any holder of Debt Securities.

Section C. - Calculation of the Index

I. Calculation of the Index Value

The Index Value (Index(t_j)) is calculated by the Index Calculation Agent for each Index Valuation Date t_j (where j = 1, 2, …) after the Index Start Date in accordance with the following formula:

\[ \text{Index} (t_j) = \text{Index} (t_{j-1}) \times \left( 1 + w(t_{j-1}) \times \text{Return}_1 (t_j) + (1-w(t_{j-1})) \times \text{Return}_2 (t_j) \right) \]

where the return of the Reference Fund since the previous Index Valuation Date (referred to as Return_1(t_j)) is calculated as follows:

\[ \text{Return}_1 (t_j) = \frac{NAV^A (t_j) - NAV^A (t_{j-1})}{NAV^A (t_{j-1})} \]

with

\[ NAV^A (t_j) = n(t_j) \times \left( NAV (t_j) + d(t_j) \right) \]

and the return of the Money Market Investment is calculated on the basis of the Reference Index and reduced by the proportionate Reference Index Structuring Fee since the previous Index Valuation Date t_{j-1} (referred to as Return_2(t_j)), as follows:

\[ \text{Return}_2 (t_j) = \frac{RIV (t_j) - RIV (t_{j-1})}{RIV (t_{j-1})} - \frac{F_{RI}}{360} \times \Delta(t_{j-1}, t_j) \]

where

"w(t_{j-1})" denotes the weighting of the Reference Fund (as defined in Section C. - III. Dynamic Allocation Rules below), calculated for the Index Valuation Date t_{j-1};

"\( \Delta(t_{j-1}, t_j) \)" denotes the number of calendar days from Index Valuation Date t_{j-1} (exclusive) to Index Valuation Date t_j (inclusive).

Under normal circumstances, the Index Value at an Index Valuation Date is calculated on the following Banking Day (each an "Index Calculation Date") after the Index Calculation Agent has received the relevant Net Asset Value of the Reference Fund.
II. Adjustment of the Distribution Factor

On each Reinvestment Date $t^*_j$, the distribution factor $n(t^*_j)$ is recalculated by the Index Calculation Agent in a way so that it notionally equals a reinvestment of the present value (in Euro) of the related Distribution (less costs and taxes, if any, incurred by the Hypothetical Investor) in Fund Shares. Expressed as a formula, this means:

$$n(t^*_j) = \tilde{n}(t^*_j) + \frac{\tilde{n}(t^*_j) \times d(t^*_j)}{NAV(t^*_j)}.$$  

III. Dynamic Allocation Rules

The weighting of the Index Components in the Reference Portfolio is redetermined on each Index Valuation Date $t_j$ (where $j = 0, 1, 2, \ldots$) as follows ("Dynamic Allocation"):

Firstly, the Index Calculation Agent calculates the realised degree of variation (realised volatility) of the Reference Fund (adjusted for distributions) ($\sigma_R(t_j)$), using the continuous daily returns of the Reference Fund over a period of twenty consecutive Index Valuation Dates which is normalised to an annual figure for the volatility. The period observed (the "Volatility Period") commences with the 21st Index Valuation Date prior to the relevant Index Valuation Date $t_j$ and ends with the second Index Valuation Date prior to the relevant Index Valuation Date $t_j$. Continuous daily return means the logarithm of the change in the Net Asset Value between two consecutive Index Valuation Dates.

The realised volatility of the Reference Fund on each Index Valuation Date $t_j$ (where $j = 0, 1, 2, \ldots$) is calculated as follows:

$$\sigma_R(t_j) = \sqrt{\frac{1}{19} \sum_{p=0}^{19} \left( \frac{\ln\left( \frac{NAV^A(t_{j-p-2})}{NAV^A(t_{j-p-3})} \right)}{10} \right)^2 \times \frac{\ln\left( \frac{NAV^A(t_{j-p-2})}{NAV^A(t_{j-p-3})} \right)}{252}}$$

where

"Ln[x]" denotes the natural logarithm of a value $x$.

Next, the Index Calculation Agent determines the weighting of the Reference Fund for the corresponding Index Valuation Date $t_j$ (w($t_j$)) using the following Allocation Table and the realised volatility of the Reference Fund calculated in accordance with the formula described above. The greater the realised volatility of the Reference Fund, the lower the weighting of the Reference Fund and vice versa.

"Allocation Table":

<table>
<thead>
<tr>
<th>Realised volatility of the Reference Fund $\sigma_R(t_j)$</th>
<th>Weighting w($t_j$)</th>
</tr>
</thead>
<tbody>
<tr>
<td>$\sigma_R(t_j) &lt; 6.00%$</td>
<td>100%</td>
</tr>
<tr>
<td>$6.00% \leq \sigma_R(t_j) &lt; 6.25%$</td>
<td>96%</td>
</tr>
<tr>
<td>$6.25% \leq \sigma_R(t_j) &lt; 6.50%$</td>
<td>92%</td>
</tr>
<tr>

<td>80%</td>
</tr>
<tr>
<td>$7.50% \leq \sigma_R(t_j) &lt; 7.75%$</td>
<td>78%</td>
</tr>
</tbody>
</table>
When performing the Dynamic Allocation, the Index Calculation Agent will take into account the possibilities of the Hypothetical Investor to subscribe or redeem Fund Shares (where appropriate taking into consideration subscription and redemption periods of the Reference Fund or if the Reference Fund makes use of provisions which result in a partial execution of subscription or redemption requests). This may result in a delayed or gradual implementation of Dynamic Allocation.

The Index Calculation Agent carries out its obligations described herein on the relevant Banking Days. Where it is necessary to carry out one of the obligations described herein on a different Banking Day,
the Index Calculation Agent will postpone the relevant obligation to this other Banking Day. The
Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether this is necessary.

Section D. - Extraordinary Adjustments and Market Disruptions

I. General Extraordinary Adjustments

Adjustments with regard to the Reference Fund

If the Index Sponsor determines the occurrence of one or more Fund Events, then it will, if necessary,
adjust the Index Concept in such a way that the economic position of the Hypothetical Investor
remains unchanged to the greatest extent possible (the ”Reference Fund Adjustment”). The Index
Sponsor will determine the type and scope of any measures required for this purpose in its reasonable
discretion (§ 315 BGB).

In the context of such Reference Fund Adjustment, the Index Sponsor may specifically:

a. replace the Reference Fund and the Fund Shares, in full or in part, with a fund and fund units or
shares with commercially equivalent liquidity, distribution policy and investment strategy (the
"Successor Reference Fund", and its units or shares the "Successor Fund Shares") in the
amount of the liquidation proceeds of the Reference Fund that the Hypothetical Investor would
have received within ten Banking Days of the day on which the liquidation proceeds would have
been received in part or in full by the Hypothetical Investor. In this event, each reference to the
Reference Fund or the Fund Shares will be deemed to refer to the Successor Reference Fund or the
Successor Fund Shares, as applicable;

b. replace the Reference Fund with an index having a commercially equivalent investment strategy
(the "Successor Index") in the amount of the liquidation proceeds of the Reference Fund that the
Hypothetical Investor would have received within ten Banking Days of the day on which the
liquidation proceeds would have been received in part or in full by the Hypothetical Investor. In
this event, each reference to the Reference Fund or the Fund Shares will be deemed to refer to the
Successor Index, each reference to the Net Asset Value will be deemed to refer to the official
closing price of the Successor Index, and each reference to the Management Company will be
deemed to refer to the index sponsor of the Successor Index; or

c. adjust any provision of the Index Concept, the adjustment of which is appropriate to account for
the economic effect of the Fund Event;

(where necessary also adjusting the weighting of the Index Components now included in the Index).
Any such Reference Fund Adjustment will be published in accordance with Section F. - Publication
of this Index Description.

Should the Reference Fund be replaced in accordance with a. or b. resulting in the loss or the reduction
of the remunerations received by the Index Sponsor in its function as Hedging Party from the
Management Company in relation to any holdings in the Reference Fund or in its capacity as
Investment Adviser, the Index Calculation Agent will introduce a structuring fee on the return of the
Fund Shares, i.e. the Return1 (as defined in Section C. - I. Calculation of the Index Value of this Index
Description) is reduced by this structuring fee, the structuring fee being expressed as an annual
percentage, on a daily basis in the same way as Return2 is calculated. This structuring fee (i) amounts
to 1.47% p.a. in the case of a Successor Index, or (ii) in the case of a Successor Reference Fund, is
calculated as the difference between 1.47% p.a. and the expected reduced management fee rebate for
holdings of the Successor Reference Fund expressed as an annual percentage. The structuring fee will
not exceed 1.47% p.a. The introduction of such a structuring fee and its level will be published in
accordance with Section F. - Publication of this Index Description.

"Fund Event” means any of the following events:

a. changes are made in any of the Fund Documents without the consent of the Index Sponsor
which affect the ability of the Hedging Party to maintain its Hedging Transactions, in
particular changes with respect to (i) the risk profile of the Reference Fund, (ii) the investment
objectives or investment strategy or investment restrictions of the Reference Fund, (iii) the
currency of the Fund Shares, (iv) the method of calculating the Net Asset Value, or (v) the
timetable for the subscription, issue, redemption and/or transfer of Fund Shares; the Index
Sponsor will determine in its reasonable discretion (§ 315 BGB) whether any such change has occurred;

b. requests for the redemption, subscription or transfer of Fund Shares are not or only partially executed;

c. fees, premiums, discounts, charges, commissions, taxes or similar fees are levied for the issue or redemption of Fund Shares (other than such fees, premiums, discounts, charges, commissions, taxes or similar fees existing at the date the Reference Fund was included in the Index);

d. the Reference Fund or the Management Company or the Fund Service Provider appointed for this purpose by the Reference Fund or the Management Company fails to publish the Net Asset Value as scheduled or in accordance with normal practice or as specified in the Fund Documents;

e. a change in the legal form of the Reference Fund;

f. a change of key persons in key positions of the Management Company or the Fund Management;

g. (i) any change in the legal, accounting, tax or regulatory treatment of the Reference Fund or the Management Company; or (ii) the suspension, cancellation, revocation or absence of the authorisation or registration of the Reference Fund or the Management Company; or (iii) the suspension, cancellation, revocation or absence of a distribution authorisation for the Reference Fund or the Management Company by the competent authority; or (iv) the initiation of investigatory proceedings by supervisory authorities, conviction by a court or an order by a competent authority relating to the activities of the Reference Fund, the Management Company, a Fund Service Provider, or of individuals in key positions as a result of misconduct, a violation of the law or for similar reasons;

h. a material breach by the Reference Fund or the Management Company of the investment objectives, the investment strategy or the investment restrictions of the Reference Fund (as defined in the Fund Documents) and a breach by the Reference Fund or the Management Company of statutory or regulatory provisions; the Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether any such breach has occurred;

i. a change in laws or regulations or in their implementation or interpretation (whether formally or informally) which requires the Hedging Party, in relation to the subscription, redemption or holding of Fund Shares, (i) to create a reserve or provision, or (ii) to increase the amount of regulatory capital to be held by the Hedging Party with respect to its Hedging Transactions to an extent that is significant in comparison with the conditions applying on the Index Start Date; the Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether any such change has occurred;

j. a change in laws or regulations or in their implementation or interpretation (whether formally or informally) which would make it unlawful or impracticable for the Hedging Party to maintain its Hedging Transactions or which would result in significantly increased costs; the Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether any such change has occurred;

k. the proportion of the volume held by the Hedging Party alone or together with a third party with which the Hedging Party in turn enters into Hedging Transactions is more than 20% of the outstanding Fund Shares of the Reference Fund;

l. the Hedging Party is required to consolidate the Reference Fund as a result of accounting or other regulations;

m. the sale or redemption of Fund Shares for mandatory reasons for the Hedging Party, provided that this is not solely for the purpose of entering into or unwinding Hedging Transactions;

n. an event or circumstance that has or could have the following effects: (i) the suspension of the issuance of additional Fund Shares or of the redemption of existing Fund Shares, (ii) the reduction of the number of Fund Shares of an investor in the Reference Fund for reasons
outside the control of that investor, (iii) the subdivision, consolidation or reclassification of the Fund Shares or any other measure that has a diluting or concentrative effect on the theoretical value of a Fund Share, (iv) payments in respect of a redemption of Fund Shares being made partly or wholly by means of a distribution in kind instead of for cash, or (v) the creation of so-called side pockets for segregated assets of the Reference Fund;

o. the Management Company or a Fund Service Provider discontinues its services for the Reference Fund or loses its licence, registration, approval or authorisation and is not immediately replaced by another service provider which in the reasonable discretion of the Index Sponsor (§ 315 BGB) is of similarly good standing;

p. (i) an order or valid resolution for a winding-up, dissolution, termination, liquidation or an event with similar effects in relation to the Reference Fund or the Fund Shares, (ii) the initiation of settlement, bankruptcy or insolvency proceedings, a demerger or spin-off, a reclassification or consolidation, such as a change in the share class of the Reference Fund or the merger of the Reference Fund into or with another fund, (iii) a requirement to transfer all the Fund Shares to a trustee, liquidator, insolvency administrator or similar office-holder, or (iv) the legal prohibition of transfers of the Fund Shares by investors;

q. the initiation of settlement, bankruptcy, insolvency, dissolution or comparable proceedings with respect to the Management Company;

r. the Index Sponsor loses the right to use the Reference Fund as the basis for the calculation, determination and publication of the Index;

s. the aggregate net assets under management of the Reference Fund fall below a value of EUR 500 million;

t. a change in the tax laws and regulations or in their implementation or interpretation which has negative consequences for an Issuer or the Hedging Party in the reasonable discretion (§ 315 BGB) of the Index Sponsor;

u. no notification is given of the bases of taxation for the Reference Fund in accordance with the applicable provisions of the German Investment Tax Act (Investmentsteuergesetz; "InvStG") or any successor legislation or the Reference Fund or the Management Company has announced that no notification of the bases of taxation will be given in accordance with the applicable provisions of the InvStG or any successor legislation in the future;

v. changes in the investment or distribution policy of the Reference Fund which could have a substantial negative effect on the amount of the Reference Fund's distributions or distributions that diverge significantly from the Reference Fund's normal distribution policy to date;

w. the Reference Fund or the Management Company or a company affiliated with it breaches the agreement entered into with the Index Sponsor, an Issuer or the Hedging Party in relation to the terms and conditions for the subscription or redemption of Fund Shares or any fees agreed in connection with any holdings of Fund Shares held by the Index Sponsor in its capacity as Hedging Party in a significant respect or terminates that agreement;

x. the Reference Fund or the Management Company, contrary to normal practice to date, fails to provide the Index Sponsor with information that the latter reasonably considers necessary to enable it to monitor the Reference Fund’s compliance with the Reference Fund's investment guidelines or restrictions in a timely manner;

y. the Reference Fund or the Management Company fails to provide the Index Sponsor with the audited annual report and, where relevant, the half-yearly report as soon as possible after receiving a corresponding request;

z. any other event that could have a noticeable adverse effect on the Net Asset Value of the Reference Fund or the ability of the Hedging Party to hedge its obligations under the Hedging Transactions on more than a temporary basis;

to the extent that the financial position of a Hypothetical Investor or of the Hedging Party or of the holders of Debt Securities suffers a significant adverse change as a result, as determined by the Index Sponsor in its reasonable discretion (§ 315 BGB).
Neither the Index Sponsor nor the Index Calculation Agent is under any obligation to monitor whether or not one of the events referred to above has occurred. The determination of a Fund Event will be published in accordance with Section F. - Publication of this Index Description.

Adjustments with regard to the Reference Index

If the Index Sponsor determines the occurrence of one or more Index Events, it will, if necessary, adjust the Index Concept in such a way that the economic position of the Hypothetical Investor remains unchanged to the greatest extent possible (the "Reference Index Adjustment"). The Index Sponsor will determine the type and scope of any measures required for this purpose in its reasonable discretion (§ 315 BGB).

In the context of such Reference Index Adjustment, the Index Sponsor may specifically:

a. replace the Reference Index with a new index (the "Successor Reference Index") that has a methodology that is economically equivalent to the greatest extent possible (including in particular the tracking of a money market investment, using rolling money market returns). However, the Successor Reference Index may use differing tenors for the Reference Rates and differing rolling intervals. In this event, each reference to the Reference Index will be deemed to refer to the Successor Reference Index;

b. adjust any provision of the Index Concept, the adjustment of which is appropriate to account for the economic effect of the Index Event;

(where necessary also adjusting the weighting of the Index Components now included in the Index).

"Index Event" means any of the following events occurring on or after the Index Start Date:

a. changes or modifications are made to the method of calculation, determination and publication of the Reference Index, as described in the Reference Index Description, without the consent of the Index Sponsor which affect the ability of the Hedging Party to hedge its obligations under the Hedging Transactions (in particular changes with respect to (i) the risk profile of the Reference Index, or (ii) the Reference Index is no longer calculated in euro); the Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether any such change or modification has occurred;

b. the historic 30-day volatility of the Reference Index exceeds a volatility level of 2.5%; where \( \sigma_{EI}(t_j) \) means the annualised volatility calculated on the basis of the daily logarithmic changes in the value of the Reference Index over the immediately preceding 30 Reference Index Calculation Dates of the Reference Index on a Banking Day \( t \). \( \sigma_{EI}(t_j) \) is calculated in accordance with the following formula:

\[
\sigma_{EI}(t_j) = \sqrt{\frac{\sum_{p=0}^{29} \left( \ln \left( \frac{RIV(t_{j-p})}{RIV(t_{j-p-1})} \right) \right)^2 - \frac{1}{30} \times \left( \sum_{p=0}^{29} \ln \left( \frac{RIV(t_{j-p})}{RIV(t_{j-p-1})} \right) \right)^2}{29}} \times \sqrt{252}
\]

Where:

"\( \ln[x] \)" denotes the natural logarithm of a value \( x \);

"\( \text{RIV}(t_{j-q}) \)" means the Reference Index Value on the \( q \)-th Index Valuation Date prior to the Index Valuation Date \( t_j \).

c. the calculation or publication of the Reference Index is discontinued;

d. the Reference Index no longer corresponds to the objective of a low-risk investment that is free of currency risk for the Hypothetical Investor. The Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether this is the case;

e. any other event that, in the reasonable discretion (§ 315 BGB) of the Index Sponsor, could have a noticeable adverse effect on the Reference Index Value or the ability of the Hedging Party to hedge its obligations under the Hedging Transactions on more than a temporary basis.
Neither the Index Sponsor nor the Index Calculation Agent is under any obligation to monitor whether or not one of the events referred to above has occurred. The determination of an Index Event will be published in accordance with Section F. - Publication of this Index Description.

Termination of the Index

The Index Sponsor has the right to temporarily suspend the calculation of the Index following the occurrence of one or more Fund Events and/or one or more Index Events.

Should an adjustment of the Index Concept not be possible or not be reasonable for the Hypothetical Investor or the investors in any Debt Securities, the Index Sponsor has the right to permanently discontinue the calculation of the Index at any time; the Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether the relevant requirements are met.

II. Adjustment of the Net Asset Value

In the following cases, the Index Sponsor will, for the purposes of calculating the Index Value, adjust the Net Asset Value of the Reference Fund published by the Management Company:

a. charges or fees are levied in connection with the issue or redemption of Fund Shares;

b. a Hypothetical Investor would not have received the full proceeds from the redemption of Fund Shares within the usual period or the period specified in the Fund Documents; or

c. in the event of (i) the publication of an incorrect Net Asset Value, or (ii) if a Net Asset Value determined and published by the Management Company, as used by the Index Calculation Agent as the basis for the calculation, determination and publication of the Index, is subsequently corrected.

In cases a. and b., the Index Sponsor will adjust the relevant Net Asset Value to replicate the economic effects of the relevant events on the Index; in case c. (i), the Index Sponsor will adjust the relevant Net Asset Value to account for the economic effects of the relevant events on the Index; and in case c. (ii), the Index Calculation Agent will, where necessary, again determine the relevant Net Asset Value (the “Corrected Net Asset Value”) and recalculate the Index Value on the basis of the Corrected Net Asset Value, taking into account the situation of a Hypothetical Investor.

The Index Sponsor will determine the type and extent of any necessary adjustments to the Net Asset Value in its reasonable discretion (§ 315 BGB). When adjusting the Net Asset Value, the Index Sponsor will take into account the fact that proceeds from the reduction of a Reference Fund may only be allocated to the Reference Index (and vice versa) after the Hypothetical Investor would have received the respective proceeds from the disposal of the Reference Fund or the Money Market Investment.

III. Adjustment of the value of the Reference Index

In the following cases, the Index Calculation Agent will, for the purposes of calculating the Index Value, adjust the Reference Index Value of the Reference Index published by the Reference Index Calculation Agent of the Reference Index to account for the economic effects of the relevant events on the Index:

a. in the event of an error in the calculation of the Reference Index Value identified by the Index Sponsor or the Index Calculation Agent;

b. in the event of the publication of an incorrect Reference Index Value; or

c. if a Reference Index Value determined and published by the Reference Index Sponsor, as used by the Index Calculation Agent as the basis for the calculation of the Index, is subsequently corrected.

The Index Sponsor will determine the type and extent of any necessary adjustments to the Reference Index Value in its reasonable discretion (§ 315 BGB). In case c., the Index Calculation Agent will, where necessary, again determine the relevant Reference Index Value (the “Corrected Reference Index Value”) and recalculate the Index Value on the basis of the Corrected Reference Index Value.
IV. Adjustment of the Distribution

In case that the data in relation to a Distribution (amount of the Distribution, Distribution Payment Date, Ex-Date) is not available via the data provider system Bloomberg at the latest on the Index Valuation Date immediately preceding the relevant Ex-Date, then the Index Calculation Agent will re-determine the Index Value and the adjustment of the distribution factor pursuant to the relevant formulas after the data has been published. The dynamic allocation rules will only be applied to such extend that the Index Calculation Agent takes into account only the information that would be available via Bloomberg to the Hypothetical Investor at the time at which the Hypothetical Investor would have been required to submit subscription or redemption order for Fund Shares in order to replicate a reallocation of the Reference Portfolio taking into account, as the case may be, subscription and redemption notice periods, respectively.

V. Market Disruption Events

a. If the Hypothetical Investor is not able to subscribe for or redeem Fund Shares on an Index Valuation Date, whether because the subscription or redemption of Fund Shares has been suspended or no Net Asset Value has been published for the Reference Fund or such publication will be delayed (a "Reference Fund Market Disruption Event"), the Index Calculation Agent will postpone the calculation, determination and publication of the Index (specifically including the realisation of the Dynamic Allocation) until such time as the Reference Fund Market Disruption Event ends. The Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether the relevant requirements are met. If the Reference Fund Market Disruption Event continues for more than thirty Banking Days, the Index Calculation Agent will make an estimate of the Net Asset Value taking into account the then prevailing market conditions and the possibilities of the Hypothetical Investor to sell Fund Shares in the market, in order to calculate the Index (specifically including the realisation of the Dynamic Allocation), provided that a data basis is available which is sufficient for the purposes of such estimate. The Index Sponsor will determine in its reasonable discretion (§ 315 BGB) whether a sufficient data basis is available. The estimate will be based on a commercially reasonable assessment.

b. If a Reference Index Value that is required for the calculation, determination and publication of the Index has not been published on an Index Valuation Date, or such publication will be delayed, the Index Calculation Agent will, in order to calculate the required price of the Reference Index, apply the calculation method described in the description of the Reference Index taking into account the most recently available value of the Reference Index.

Section E. - Corrections

The Index Sponsor may correct or amend contradictory or incomplete provisions in the Index Description in accordance with the provisions applicable to the relevant Debt Securities.

Section F. - Publication

The Index Value is published by the Index Calculation Agent on the website www.onemarkets.de, the Reuters page .UCGRVDW3 and on Bloomberg under the ticker UCGRVDW3 Index. All determinations made by the Index Sponsor or the Index Calculation Agent in their reasonable discretion (§ 315 BGB) will be published in accordance with the terms and conditions of the relevant Debt Securities.

Section G. - Governing law

This Index Description is governed by German law.

TAXES

The following section discusses certain tax issues associated with the purchase, ownership and disposal of the Securities. The discussion is limited to certain tax issues in France, Italy and Luxembourg.

In addition, it is not intended as a comprehensive discussion of all possible tax consequences under those legal systems. It is quite possible that there are other tax considerations that may be relevant when making a decision to invest in the Securities. As each Security may be subject to different tax treatment due to the special conditions of the issue in question as indicated in the Final Terms, the following section also contains only very general information on the possible tax treatment. In particular, the discussion does not take into account special aspects or circumstances that may be relevant to the individual investor. It is based on the tax laws in effect in France, Italy and Luxembourg on the date of this Base Prospectus. These laws are subject to change. Such changes can also be made retroactively.

The taxation of income from the securities also depends on the concrete terms and conditions of the securities and the individual tax situation of each investor.

The issuer assumes no responsibility for deducting any withholding taxes.

Investors and interested parties are urgently advised to consult their tax advisor with regard to taxation in their particular case.

International Exchange of Information

Based on the "OECD Common Reporting Standard (CRS)” states, which have committed themselves to apply the OECD Common reporting Standards (“Participating States”), exchange information with respect to financial accounts held by persons in an other Participating State. The same applies to Member States of the European Union. Based on the extended Mutual Assistance Directive 2011/16/EU (amended by Directive 2014/107/EU and by Directive 2018/822/EU) Member States exchange information with respect to certain reporting accounts of persons domiciled in an other Member State. Investors should obtain information and/or seek advice on further developments.

Financial Transaction Taxes

European Financial Transaction Tax

The European Commission has issued a draft directive (the "Commission Proposal") for a common system of financial transaction tax ("FTT") in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Portugal, Slovenia and Slovakia (the "Participating Member States"). However, Estonia decided not to take part in the discussions anymore. Luxembourg decided not to participate in the Commission proposal.

The scope of the Commission Proposal is very broad and the proposal could, insofar as it is introduced, under certain conditions apply to specific security transactions (especially secondary market transactions).

The proposed FTT is subject to negotiations between the Participating Member States with respect to the exact form and the timing. It may therefore be altered prior to any implementation. Additional EU Member States may decide to join while Participating Member States might propose changes or cancel their participations.

Besides a possible FTT, France and Italy have already introduced its own financial transaction tax.

Investors are advised to seek professional advice regarding financial transaction taxes.
French Financial Transaction Taxes

France decided the introduction of a French Financial Transaction Tax (FFTT) by law of 14 March 2012 (see. Art. 5 of Law no. 2012-354). Taxable is the purchase and certain corporate actions of French equities, ADRs and certificates if these

- are admitted for trading on a regulated French, European or foreign market and
- if the acquisition justifies a transfer of ownership (e.g. pecuniary deposit transfer, exercise of an option/ of a forward contract, swap or assignment of securities against pecuniary) and
- were issued by a company whose registered office is located in France and its market capitalization had exceeded 1 billion euros on December 1 of the year preceding the tax year.

Italian Financial Transaction Taxes

In 2012, the Italian Parliament has passed the law on Italian Financial Transaction Tax (IFTT) "Law no. 228/2012". Effective since 1 March 2013, the acquisition of

- Stocks of Italian limited companies whose capitalization exceeds EUR 500 million and
- other equity instruments of these public limited companies (this includes e.g. DRs)

is taxable. The tax is payable for the relevant products regardless of the transaction location or the legal seat of the parties involved.

According to the law, the taxation of derivatives is carried out since 1 September 2013. Concerning derivatives the IFTT arises for both contracting parties (buyer- and seller-party).

France

The following is a general description of certain French withholding tax consequences relating to the Securities. It does not purport to be a description of general French tax considerations relating to the Securities. Prospective investors are advised to consult their own professional advisors to obtain information about the tax consequences of the acquisition, ownership, disposition or redemption of the Securities. Only personal advisors are in a position to adequately take into account special tax aspects of the particular Securities in question as well as the investor's personal circumstances and any special tax treatment applicable to the investor. This summary is based on French law as in force as of the date of this Base Prospectus. The laws and their interpretation by the tax authorities may change and such changes may have retroactive effect.

Withholding tax

Income paid or accrued on the Securities, to the extent such Securities are not issued by an Issuer incorporated in France or otherwise acting through a French permanent establishment, is not, in principle, mandatorily subject to withholding tax in France.

However, as from January 1st 2018, according to articles 125 A and 125 D of the French Tax Code ("FTC"), French resident individual taxpayers receiving interest on debt instruments from France or from abroad, such as the Securities, are subject to a non-definitive withholding tax ("prélèvement à la source obligatoire non libératoire de l’impôt sur le revenu") at the rate of 12.8% (plus social contributions at the aggregate rate of 17.2%). The 12.8% levy is a prepayment of income tax; it is credited against the individual income tax due and is reimbursed if it exceeds the individual income tax due. If the paying agent of the interest is located in France, such paying agent must file the related tax return and perform the payment of the levy (article 125 A, I of the FTC). If the paying agent is not located in France, the filing and the payment of the levy is to be made by the beneficial owner of the

interest. In the case the paying agent is located in a European Union Member State, Iceland, Norway or Liechtenstein, the filing and the payment of the levy may be performed by the paying agent located in such State upon request of the beneficial owner (article 125 D, IV of the FTC).

**Other tax considerations**

Concerning prospective purchasers of Securities who are French resident for tax purposes or who would hold Securities through a permanent establishment or a fixed base in France, please note that transactions involving the Securities, including any purchase or disposal of, or other dealings in the Securities and any transaction involved in the exercise and settlement of the Securities, may have French tax consequences.

The tax consequences regarding notably interest, premium on redemption, any other proceeds from the Securities and capital gains, as the case may be, may depend, amongst other things, upon the status of the prospective purchaser (i.e. legal entities or individuals) and on the specific terms and conditions of the relevant Securities.

**EU Savings Directive and tax information exchange**

The EU Savings Directive has been implemented into French law under article 242 ter of the FTC and articles 49 I ter to 49 I sexies of Annex III to the FTC, which imposes on paying agents based in France an obligation to report to the French tax authorities certain information with respect to interest payments made to beneficial owners domiciled in another Member State, including, among other things, the identity and address of the beneficial owner and a detailed list of the different categories of interest paid to that beneficial owner. Similar obligations may apply as a result of the implementation of other tax information exchange mechanisms such as FATCA or the OECD standard of interstate exchange of information ("CRS") or the European automatic exchange of information ("DAC 2")21.

**Italy**

This section contains a brief summary on tax implications related to the Securities for Italian tax laws purposes. This summary does not purport to exhaustively describe all possible tax aspects and does not deal with particular situations which may of relevance for specific potential investors. It is based on the currently valid Italian tax legislation, case law and regulations of the tax authorities, as well as their respective interpretation as of the date of this Base Prospectus, all of which may be amended from time to time. Such amendments may also be effected with retroactive effect and may negatively impact the tax consequences described below. Potential purchasers of the Securities should consult with their legal and tax advisors to check tax implications of their possible investment in the Securities.

This section does not constitute a tax advice and does not purport to be a comprehensive description of all the tax considerations which may be relevant to a decision to subscribe for, purchase, own or dispose of the Securities and does not purport to deal with the tax consequences applicable to all categories of investors, some of which may be subject to special rules.

**Tax Treatment of the Securities**

**Interest and other proceeds - Securities that qualify as “obbligazioni o titoli similari alle obbligazioni” (bonds)**

For income tax purposes, debentures similar to bonds are defined as securities that incorporate an unconditional obligation to pay, at maturity, an amount not less than their nominal value (i.e., the issuer is legally obliged to reimburse the principal amount to the bond holder) and that do not give any right to directly or indirectly participate in the management of the relevant issuer or of the business in relation to which they are issued. Pursuant to Legislative Decree No. 239 of April 1, 1996 ("Decree No. 239"), as amended and restated, and pursuant to Art. 44 paragraph 2(c) of Presidential Decree No.

---

917 of December 22, 1986 ("Decree No. 917"), as amended and restated, in general, interest and other proceeds (including the difference between the redemption amount and the issue price) in respect of securities that qualify as bonds or debentures similar to bonds and that are issued by a non-Italian resident issuer may be subject to final Italian substitutive tax if owed to beneficial owners resident in Italy for tax purposes, depending on the legal status of the beneficial owners.

**Italian Resident Security Holders Applicability of Substitutive Tax**

In particular, pursuant to Decree No. 239, as amended and restated, payments of interest and other proceeds in respect of securities that qualify as "bonds" to Italian resident beneficial owners (either when interest and other proceeds are paid or when payment thereof is obtained by a beneficial owner on a transfer of Securities) will be subject to final substitutive tax at a rate of 26.0% in Italy if made to Italian resident beneficial owners that are: (i) private individuals holding Securities not in connection with an entrepreneurial activity (unless they have entrusted the management of their financial assets, including the Securities, to an Italian authorised financial intermediary and have opted for the Risparmio Gestito regime ("Asset Management" regime) provided for by Article 7 of Legislative Decree No. 461 of November 21, 1997 ("Decree No. 461"); (ii) Italian resident non-commercial partnerships; (iii) public and private entities, other than companies, not carrying out commercial activities as their exclusive or principal activity; (iv) entities exempt from corporate income tax.

In case the Securities are held by an individual or by an entity indicated above under (iii), in either case in connection with an entrepreneurial activity, interest and other proceeds relating to the Securities will be subject to the substitutive tax and will be included in the relevant beneficial owner's income tax return. As a consequence, the interest and other proceeds will be subject to the ordinary income tax and the substitutive tax may be recovered as a deduction from the income tax due. The 26.0% substitutive tax will be applied by the Italian resident qualified financial intermediaries as defined by Italian law that will intervene, in any way, in the collection of interest and other proceeds on the Securities or in the transfer of the Securities.

If interest and other proceeds on the Securities are not collected through an Italian resident qualified intermediary as defined by Italian law and as such no substitutive tax is levied, the Italian resident beneficial owners listed above under (i) to (iv) will be required to include interest and other proceeds in their yearly income tax return and subject them to final substitute tax at a rate of 26.0%, unless an option is allowed and made for a different regime.

**Italian Resident Security Holders Substitutive Tax Not Applicable**

Pursuant to Decree No. 239, as amended and restated, payments of interest and other proceeds in respect of Securities that qualify as 'bonds' to Italian resident beneficial owners will not be subject to the substitutive tax at the rate of 26.0% if made to beneficial owners that are: (i) Italian resident individuals holding Securities not in connection with entrepreneurial activity who have entrusted the management of their financial assets, including the Securities, to an Italian authorised financial intermediary and have opted for the Asset Management regime; (ii) Italian resident collective investment funds, SICAVs and SICAFs (the "Italian Resident Undertaking for Collective Investment") and pension funds referred to in Legislative Decree No. 124 of April 21, 1993; (iii) Italian resident real estate investment funds; (iv) Italian resident corporations or permanent establishments in the Republic of Italy of non-resident corporations to which the Securities are effectively connected; (v) Italian resident partnerships carrying out a commercial activity to which the Securities are effectively connected; or (vi) public and private entities, other than companies, carrying out commercial activities and holding Securities in connection with the same commercial activities.

If the Securities are part of an investment portfolio managed on a discretionary basis by an Italian authorised intermediary and the beneficial owner of the Securities has opted for the Asset Management regime, the annual substitute tax at a rate of 26.0% (the "Asset Management Tax") applies on the increase in value of the managed assets accrued, even if not realised, at the end of each tax year (such increase includes interest and other proceeds accrued on Securities). The Asset Management Tax is applied on behalf of the taxpayer by the managing authorised intermediary.

Interest and other proceeds accrued on the Securities held by Italian resident corporations, commercial partnerships, individual entrepreneurs holding the Securities in connection with entrepreneurial activities or permanent establishments in Italy of non-resident corporations to which the Securities are
effectively connected, are included in the taxable base for the purposes of: (i) corporate income tax (imposta sul reddito delle società, "IRES") at 24% or (ii) individual income tax (imposta sul reddito delle persone fisiche, "IRPEF"), at progressive rates ranging from 23.0% to 43.0%, plus local surcharges, if applicable; under certain circumstances, such interest is included in the taxable basis of the regional tax on productive activities (imposta regionale sulle attività produttive, "IRAP"), at a general rate of 3.9% (regions may vary the rate up to 0.92%).

Italian Resident Undertakings for Collective Investment are not subject to tax on accrued interest and other proceeds, unless provided by specific provisions of law. In such cases, withholding taxes are applied as final withholding taxes. In particular, pursuant to Article 73, paragraph 5-quinquies, of Decree No. 917, Italian Resident Undertaking for Collective Investment are considered as a taxable person for IRES purposes, though the income realised (with only few exceptions) is exempt from taxation.

Italian resident pension funds are subject to a 20% annual substitutive tax (the "Pension Fund Tax") in relation to the increase in value of the managed assets accrued at the end of each tax year.

Any positive difference between the nominal amount of the Securities and their issue price is deemed to be interest for tax purposes. To ensure payment of interest and other proceeds in respect of the Securities without application of the substitutive tax, where allowed, investors indicated here above under (i) to (vi) must be the beneficial owners of payments of interest and other proceeds on the Securities and timely deposit the Securities, together with the coupons relating to such Securities, directly or indirectly, with an Italian authorised financial intermediary as defined by Italian law.

Non-Italian Resident Security Holders

Interest and other proceeds paid on Securities by the non-Italian resident Issuer to a beneficial owner who is not resident in Italy for tax purposes, without a permanent establishment in Italy to which the Securities are effectively connected, should not be subject to any Italian taxation. In any case an Italian resident bank or intermediary, as defined by Italian law, intervenes in the payment of interest and other proceeds on the Securities, to ensure payment of interest and other proceeds without application of Italian taxation a non-Italian resident Security Holder may be required to produce to the Italian bank or other intermediary as defined by Italian law a self-declaration certifying to be the beneficial owner of payments of interest and other proceeds on the Securities and not to be resident in Italy for tax purposes.

Tax treatment of Securities that do not qualify as bonds'

The following applies to Securities containing a derivative agreement (or similar mechanism) in the relevant terms and conditions.

Securities whose proceeds (a) do not qualify as proceeds from bonds (‘obbligazioni’) or debentures similar to bonds (‘titoli similari alle obbligazioni’) pursuant to Art. 44 of the TUIR, but (b) qualify as Redditi diversi (sundry income) pursuant to Article 67 of Decree No. 917 may fall under the joint provisions of Article 67 Decree No. 917 and Article 5 of Decree No. 461, and further amendments thereof, according to which, proceeds and capital gains, arising from both the exercise and the sale for money consideration of the Securities, are subject to the substitutive tax of 26.0%. Charges and capital losses arising from the exercise and the sale of the Securities are deductible in accordance with the modalities indicated below; premiums paid on the Securities contribute to create the income of the financial year in which the Securities are exercised or alienated.

Capital Gains Tax

Any capital gains realised by Security Holders that are (a) Italian resident corporations; (b) Italian resident commercial partnerships; (c) permanent establishments in Italy of foreign corporations to which the Securities are effectively connected; or (d) Italian resident individuals carrying out a commercial activity, as to any capital gains realised within the scope of the commercial activity carried out, upon the sale for consideration or redemption of the Securities will be treated for the purpose of IRES and of IRPEF as part of the taxable business income of Security Holders (and, in certain cases, depending on the status of the Security Holders, may also be included in the taxable basis of IRAP), and it will, therefore, be subject to tax in Italy according to the relevant tax provisions.
Italian Resident Security Holders

Pursuant to Decree No. 461, any capital gains realised by Italian resident individuals holding Securities not in connection with entrepreneurial activity and certain other persons upon the sale for consideration or redemption of the Securities would be subject to a "substitutive tax" at the current rate of 26.0%. Under the tax declaration regime, which is the standard regime for taxation of capital gains realised by Italian resident individuals not engaged in entrepreneurial activity, the "substitutive tax" on capital gains will be chargeable, on a cumulative basis, on all capital gains, net of any incurred capital loss. These individuals must report overall capital gains realised in any tax year, net of any relevant incurred capital loss, in the annual tax declaration to be filed with the Italian tax authorities for such year and pay the "substitutive tax" on such gains together with any balance on income tax due for such year. Capital losses in excess of capital gains may be carried forward against capital gains realised in any of the four succeeding tax years.

As an alternative to the tax declaration regime, Italian resident individual Security Holders not in connection with entrepreneurial activity may elect to pay the "substitutive tax" separately on capital gains realised on each sale or redemption of the Securities (the Risparmio Amministrato regime or "Managed Portfolio" regime). Such separate taxation of capital gains is allowed subject to: (i) the Securities being deposited with Italian banks, società di intermediazione mobiliare (SIM) or certain authorised financial intermediaries; and (ii) an express election for the Managed Portfolio regime being made promptly in writing by the relevant Security Holder. The financial intermediary, on the basis of the information provided by the taxpayer, accounts for the "substitutive tax" in respect of capital gains realised on each sale or redemption of Securities (as well as in respect of capital gains realised at the revocation of its mandate), net of any incurred capital loss, and is required to pay the relevant amount to the Italian tax authorities on behalf of the taxpayer, deducting a corresponding amount from proceeds to be credited to the Security Holder. Under the Managed Portfolio regime, where a sale or redemption of Securities results in capital loss, such loss may be deducted from capital gains subsequently realised in the same tax year or in the following tax years up to the fourth year.

Any capital gains realised by Italian resident individuals holding Securities not in connection with entrepreneurial activity may have elected for the Asset Management regime will be included in the computation of the annual increase in value of the managed assets accrued, even if not realised, at year end, subject to the substitutive tax at the current rate of 26.0% to be applied on behalf of the taxpayer by the managing authorised financial intermediary.

Any capital gains realised by Security Holders who are Italian Resident Undertakings for Collective Investments are not subject to tax. Any capital gains realised by Security Holders who are Italian resident pension funds will be included in the computation of the taxable basis of Pension Fund Tax.

Non-Italian Resident Security Holders

The 26.0% final "substitutive tax" may in certain circumstances be payable on capital gains realised upon sale for consideration or redemption of Securities by non-Italian resident persons or entities without a permanent establishment in Italy to which the Securities are effectively connected, if the Securities are held in Italy. However, even if the Securities are held in Italy and regardless of the provisions set forth by any applicable double taxation treaty, pursuant to Article 23 of Decree No. 917, any capital gains realised, by non-Italian residents without a permanent establishment in Italy to which the Securities are effectively connected, through the sale for consideration or redemption of Securities are exempt from taxation in Italy to the extent that the Securities are listed on a regulated market in Italy or abroad and in certain cases subject to filing of required documentation. In case the Securities are not listed on a regulated market in Italy or abroad (1) as to capital gains realised by non-Italian resident of the Securities with no permanent establishment in Italy to which the Securities are effectively connected are exempt from the substitutive tax in Italy on any capital gains realised upon sale for consideration or redemption of the Securities if (a) they are beneficial owners resident, for tax purposes, in a country which recognizes the Italian tax authorities' right to an adequate exchange of information, the so called "white list" or (b) non-Italian foreign institutional investors established in a "white list" country. (2) In any event, non-Italian resident persons or entities without a permanent establishment in Italy to which the Securities are effectively connected that may qualify for applicability of benefit from a double taxation treaty with Italy, providing that capital gains realised upon the sale or redemption of the Securities are to be taxed only in the country of tax residence of the
recipient, will not be subject to the "substitutive tax" in Italy on any capital gains realised upon sale for consideration or redemption of Securities.

**Atypical securities**

According to the provisions of the Conditions of the Securities, it is possible that Securities may be qualified as 'atypical' securities pursuant to Article 5 of Law Decree No. 512 of 30 September 1983 as implemented by Law No. 649 of 25 November 1983. In this event, payments relating to Securities may be subject to an Italian withholding tax, levied at the rate of 26.0%.

The withholding tax is levied by the Italian intermediary appointed by the Issuer, intervening in the collection of the relevant income or in the negotiation or repurchasing of the Securities.

**Inheritance and Gift Taxes**

The transfer by inheritance or gift of the Securities is subject to the inheritance and gift tax at the following rates: (i) 4% if the transfer is made to spouses and direct descendants or ancestors; in this case, the transfer to each beneficiary is subject to taxation on the value (if any) exceeding Euro 1,000,000; (ii) 6% if the transfer is made to brothers and sisters; in this case, the transfer to each beneficiary is subject to taxation on the value (if any) exceeding Euro 100,000; (iii) 6% if the transfer is made to relatives up to the fourth degree, to persons related by direct affinity as well as to persons related by collateral affinity up to the third degree; and (iv) 8% in all other cases. If the transfer is made in favour of persons with severe disabilities, taxation will apply only on the value (if any) of the transaction exceeding Euro 1,500,000.

**Tax Monitoring Obligations**

Italian resident individuals, partnerships (other than società in nome collettivo, società in accomandita semplice or similar partnerships) not carrying out commercial activities, not commercial trusts, professional associations and public and private entities, other than companies, not carrying out commercial activities will be required to report in their yearly income tax return (Modello Redditi - Persone Fisiche, RW section), for tax monitoring purposes, the amount of Securities (and of other investments held abroad and foreign financial assets generating foreign source income taxable in Italy) directly or indirectly held (i.e. when the above-mentioned subjects qualify as the beneficial owner of the Securities) over each tax year. This also is the case if at the end of the tax year the Securities (or other investments held abroad and foreign financial assets generating foreign source income taxable in Italy) are no longer held by the above-mentioned subjects. The above subjects will however not be required to comply with the above reporting requirements in respect of Securities deposited for management or administration with qualified Italian financial intermediaries as defined by Italian law and in respect of contracts entered into through the intervention of financial intermediaries, upon condition that the items of income derived from the Securities are collected through the intervention of and subject to withholding tax or substitute tax levied by the same financial intermediaries.

**Stamp duty and Tax on financial activities held abroad**

The extended stamp duty on all kind of financial activities ("Stamp Duty") is applicable on all kind of financial assets, including the Securities held with the intervention of Italian financial intermediaries. The tax is levied at 0.2% rate (with a limit up to Euro 14,000 for holders different from individual) on the fair market value or, if failing, on the book or redemption value as at 31 December of each year. Stamp Duty is generally applied by the Italian financial intermediary, if such entity intervene in the administration/management of the Securities. The tax on financial activities held abroad (so called "IVAFE") is applicable on the value of financial assets held abroad Italy by Italian tax resident individuals without the intervention of Italian financial intermediaries. The tax is applied at a rate equal to 0.2%, on the fair market value as at 31 December of each year. IVAFE should be applicable in case the financial activities do not fall within the Stamp Duty scope. The tax is calculated, disclosed in the yearly tax return and paid by the individual directly.

**Transfer tax**

The Law no. 228 as of December 24, 2012 introduced a stamp duty on certain financial transactions (the "Tobin Tax"). In general terms the Tobin Tax applies to transactions, even if executed abroad,
TAXES

involving shares, bonds converted in shares and equity financial instruments issued by both listed and non-listed companies resident in Italy and derivatives substantially underlying such securities. Tobin Tax is applied at a rate of 0.2% on transactions regarding shares and other participating instruments issued by Italian resident companies. The tax rate is reduced down to 0.1% if the transfer is executed on regulated financial markets or through multilateral negotiation systems. Tobin Tax on transactions in derivative financial instruments shall be due in a fixed amount (ranging from Euro 0.01875 to Euro 200 depending on both the typology and the notional value of the instrument) and is payable by both the counterparties to the transaction, regardless of their place of residence and the place where the transactions have been executed.

Luxembourg

This section provides a general description of withholding tax procedures in Luxembourg in connection with the securities. This description is not to be regarded as a comprehensive analysis of all tax considerations in connection with the securities in Luxembourg or elsewhere. Prospective buyers of the securities should consult their own tax advisors with regard to the countries whose tax laws may be relevant to buying, holding and selling the securities and receiving interest, capital and/or other amounts in connection with them and on the impact of these actions under Luxembourg tax law. This summary is based on the laws in effect at the date of this prospectus. The information in this section is limited to issues pertaining to withholding tax; prospective investors should not apply the information provided below to other areas, for example questions of the legality of transactions in securities.

Withholding tax and self-assessment

Under current Luxembourg laws, all interest, premium, capital and any other proceeds payments made by the Issuer in connection with holding, selling, redeeming or repurchasing the Securities can be made without deducting or withholding any amounts for or on account of taxes of any kind imposed, charged, retained or assessed by Luxembourg or a Luxembourg municipality, or a tax authority of Luxembourg or the municipality, with the possible exception of taxes due under FATCA.

Investors not resident in Luxembourg

Pursuant to the Luxembourg law of 25 November 2014, which entered into force on 1 January 2015, the withholding tax system introduced by the Luxembourg law of 21 June 2005 for the implementation of the EU Savings Directive (the "Implementation Laws") and several treaties with certain dependent or associated territories (the "Territories") has been abolished. The Luxembourg law of 21 June 2005 in itself was only abolished on 1 January 2016 by the Luxembourg law of 23 July 2016. Thus, Luxembourg no longer applies the previous system of withholding tax, and instead engages in the automatic exchange of information under the provisions of the expanded EU Administrative Cooperation Directive.

In this context, Luxembourg paying agents (within the meaning of the Law of 23 July 2016) are required to report to the competent Luxembourg authorities all interest income and comparable income credited or disbursed to (or in the interests of) private individuals or so-called established entities resident or established in another member state of the European Union or the Territories as of 1 January 2015. The above-mentioned responsible Luxembourg authority will forward the information thus received on interest income or comparable income to the competent authorities of the state of residence of the natural person or the state in which the entity is established or exists. The definition of comparable income within the meaning of the Law of 23 July 2016 includes interest arising or realised in connection with the disposal, reimbursement or redemption of claims.

Investors resident in Luxembourg

Under the Luxembourg law of 23 December 2005 as amended (the "Law of 23 December 2005"), a withholding tax of 20% applies for interest income (i.e. interest income within the meaning of the Implementation Laws, with certain exceptions) and similar income paid out by Luxembourg paying agents (within the meaning of the law of 23 July 2016) to natural persons resident in Luxembourg who are the economic beneficiaries of the payments. The same applies to interest and similar income
collected by them in the direct interests of such persons. The party owing the withholding tax is the Luxembourg paying agent.

Moreover, under the Law of 23 December 2005, natural persons resident in Luxembourg may opt for self-assessment for their private asset management and pay a 20% levy if they are the economic beneficiaries of interest payments paid by a paying agent located in another member state of the European Economic Area or a state or territory that has entered into a treaty referring directly to the EU Savings Directive (such as the Territories). The decision to pay the 20% levy must apply to all interest payments made by paying agents to the economic beneficiary resident in Luxembourg during the entire calendar year.

The above-mentioned 20% withholding tax and the 20% levy applies as fully paid if the natural persons resident in Luxembourg are engaged in the management of their personal assets.

**U.S. Withholding Tax**

**Payments under index-linked Securities and equity-linked Securities may be subject to U.S. withholding tax**

Section 871(m) of the US Internal Revenue Code ("IRC") and the provisions issued thereunder stipulate that for certain financial instruments (such as for the Securities) a withholding tax (of up to 30% depending on the application of income tax treaties) may be imposed if the payment (or deemed payment) on the financial instruments is contingent upon, or determined by reference to, the payment of a dividend from sources within the United States.

Pursuant to these US legal provisions, certain payments (or deemed payments) under certain equity-linked instruments that refer to the performance of US equities or certain indices that contain US equities, as an Underlying, shall be treated as dividend equivalents ("Dividend Equivalents") and shall be subject to U.S. withholding tax of 30% (or a lower income tax treaty rate). **This tax liability may apply even if pursuant to the terms and conditions of the Securities no actual dividend-related amount is paid or a dividend-related adjustment is made and thus investors can only determine with difficulty or not at all any connection to the payments to be made in respect of the Securities.**

It is thus possible that these US provisions also apply to the Securities, particularly if an Underlying contains dividends from sources within the United States (e.g. US equities or certain indices that contain US equities). In such case US withholding tax may be due, pursuant to the relevant US provisions, on payments (or deemed payments) made in respect of Securities issued (or whose features have been modified significantly) after 1 January 2017 (however, the implementation rules issued for the US provisions stipulate that the tax liability will be phased in, not commencing until 1 January 2021 for some securities).

The Issuer or the custodian of the Security Holder is entitled to deduct from payments made under the Securities any withholding tax accrued in relation to payments made under the Securities. Furthermore, the Issuer is entitled to take any tax liability pursuant to section 871(m) of the IRC into account in original and continuous pricing of the Securities and to comply with the withholding obligation using provisions that have to be made accordingly. In case of Securities which allow for a deduction of fees, the withholding tax in accordance with section 871(m) of the IRC applied to dividend payments made in relation to the underlying or its components, reduces the reference price and, therefore, the redemption amount paid under the Securities. Investors should note that compliance with tax liability in this manner precludes the issue of tax certificates for tax payments rendered for individual investors and that no potential tax refund pursuant to the relevant US provisions may be claimed either. Moreover, a 30% tax rate is generally applied, also when taking account of the tax liability in continuously adjusting amounts, due to the necessity of using a uniform rate for all investors in all cases mentioned. A double taxation may occur in relation to payments made under the Securities.

If, on the basis of section 871(m) of the IRC, an amount of interest, principal or other payments on the Securities is deducted or withheld, neither the Issuer nor any paying agent, the custodian of the Security Holder or any other person pursuant to the terms and conditions of the Securities would be obliged to pay additional amounts to the Security Holders as a result of the deduction or withholding,
in which case the Security Holders would thus potentially receive less interest or principal than expected. In the worst case, any payments to be made in respect of the Securities would be reduced to zero.

**Payments under the Securities may be subject to withholding tax pursuant to the Foreign Account Tax Compliance Act (FATCA)**

Sections 1471-1474 of the United States Internal Revenue Code of 1986, as amended ("IRC") (commonly referred to as "FATCA"), generally impose a new reporting regime and a 30% withholding tax with respect to certain US-source payments (including dividends and interest) and with respect to gross proceeds from the disposition of property that may produce such US-source interest and dividends, and certain payments made by entities that are classified as financial institutions under FATCA, such as banks, insurance companies and many funds and capital markets issuers. A financial institution which is not exempted from the FATCA regime must either (i) enter into an agreement with the Internal Revenue Service (an "FFI Agreement") or (ii) comply with the terms of an applicable intergovernmental agreement ("IGA") regarding the implementation of FATCA to avoid the imposition of the 30% withholding tax. Under an FFI Agreement or an applicable IGA, a financial institution will be required to identify, disclose and report information on its direct and indirect US account holders (including certain non-US account holders with US ownership).

On 31 May 2013, the Federal Republic of Germany entered into an IGA with the United States. Under this IGA, as currently drafted, a financial institution that is treated as resident in Germany and that complies with the requirements of the respective IGA will not be subject to FATCA withholding on payments it receives and will not be required to withhold on payments of non-U.S. source income. As a result, the Issuer does not expect payments made on or with respect to the Securities to be subject to withholding under FATCA.

No assurance can be given that withholding under FATCA will not become relevant with respect to payments made on or with respect to the Securities in the future. You should consult with your US tax advisor for further information regarding the potential impact of FATCA.
GENERAL INFORMATION

Selling Restrictions

General

No action has been or will be taken in any jurisdiction by the Issuer that would permit a public offering of the Securities, or possession or distribution of any offering material in relation thereto, in any country or jurisdiction where action for that purpose is required other than the approval of the Base Prospectus by the BaFin and a notification to the countries set forth in the Final Terms under "Terms and conditions of the offer". No offers, sales or deliveries of any Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and will not impose any obligation on the Issuer other than the approval and notification(s) mentioned above.

European Economic Area

In relation to each member state of the European Economic Area (each a "Member State"), the Securities may not be offered to the public in that relevant Member State (the "Relevant Member State"), except that an offer of the Securities to the public may be made in that Relevant Member State:

(a) if the Final Terms in relation to the Securities specify that an offer of those Securities may be made in the Relevant Member State in accordance with the EU Prospectus Legislation (as defined below) and the conditions of the offer applicable to the offer of the Securities set out in the Base Prospectus or in the relevant Final Terms, as the case may be, in the period beginning and ending on the dates specified in such Final Terms, provided that the Issuer has consented in writing to the use of the Base Prospectus for the purpose of such offer;

(b) at any time if it is addressed solely to qualified investors as defined in the EU Prospectus Legislation (the "Qualified Investors");

(c) at any time if it is addressed to fewer than 150 natural or legal persons (other than Qualified Investors) per Member State, subject to obtaining the prior consent of the Issuer or the relevant person or entity placing or offering the Securities nominated by the Issuer for any such offer; and/or

(d) at any time in any other circumstances falling within a Prospectus Exemption (as defined below),

provided that no such offer of Securities referred to in (b) to (d) above shall require the Issuer to publish a prospectus pursuant to Article 3 of the EU Prospectus Legislation or supplement the Base Prospectus at least one banking day prior to the respective offer.

For the purposes of this provision, the expression an "offer of Securities to the public" in relation to any Securities in any Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe the Securities.

On 20 July 2017 the Regulation (EU) 2017/1129 (the "Prospectus Regulation") has entered into force and shall in its major parts apply as from 21 July 2019 (the "Effective Date"). Therefore, as from the Effective Date, any reference in this paragraph to the Prospectus Directive shall be read as a reference to the Prospectus Regulation, as applicable from time to time.

The expression "Prospectus Exemptions" means Article 3 (2) (a) to (d) of the Prospectus Directive or Article 1 (4) of the Prospectus Regulation, as applicable, and includes any additional exemptions and implementation measures applicable in the Relevant Member State.
United States of America

(a) The Securities have not been and will not be registered under the Securities Act of 1933, as amended ("Securities Act"), and, except as provided in the applicable Final Terms with respect to Securities with a maturity on the issue date of one year or less, may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in accordance with Regulation S under the Securities Act or pursuant to another exemption from, or in a transaction otherwise not subject to, the registration requirements of the Securities Act.

(b) Any person when purchasing the Securities agrees with the Issuer and, if different, the seller of such Securities that (i) it will not at any time offer, sell, resell or deliver, directly or indirectly, any Securities so purchased in the United States or to, or for the account or benefit of, any U.S. person, (ii) it is not purchasing any Securities for the account or benefit of any U.S. person and (iii) it will not make offers, sales, re-sales or deliveries of any Securities (otherwise acquired), directly or indirectly, in the United States or to, or for the account or benefit of, any U.S. person.

Authorisation

The establishment of the Programme and the issue of Securities under the Programme were duly authorised by the Group Asset/Liability Committee (ALCO), a subcommittee of the Management Board of HVB, on 17 April 2001. The full EUR 50,000,000,000 authorisation amount of this Programme may also be applied by other base prospectuses of HVB, however, the aggregate utilised amount of this Programme together with any other base prospectuses of HVB under this Programme will not exceed EUR 50,000,000,000.

Availability of Documents

Copies of the following documents will be available for collection in the English language, free of charge, at the offices of the Issuer and of BNP Paribas Securities Services, Luxembourg Branch in its capacity as listing agent for the Securities during usual business hours on any weekday (except Saturdays and public holidays):

(1) articles of association of the Issuer,
(2) the consolidated annual reports in respect of the fiscal years ended 31 December 2016 of the HVB Group,
(3) the consolidated annual reports in respect of the fiscal years ended 31 December 2017 of the HVB Group,
(4) the unconsolidated annual financial statements of the Issuer in respect of the fiscal year ended 31 December 2017 prepared in accordance with the German Commercial Code (Handelsgesetzbuch),
(5) the unaudited consolidated results of HVB Group as of 30 June 2018,
(6) the forms of the Global Notes,
(7) the Final Terms and
(8) the Agency Agreement, as amended and restated.

For the validity of this Base Prospectus, all documents whose information has been incorporated by reference in this Base Prospectus will be available for collection in the English language, free of charge, at the offices of UniCredit Bank AG (Arabellastraße 12, 81925 Munich).

Clearing System

Securities may be cleared, separately or jointly, through Euroclear Bank SA/NV as operator of the Euroclear system (1 Boulevard du Roi Albert II, 1210 Brussels, Belgium) ("Euroclear Bank"), Clearstream Banking société anonyme, Luxembourg (42 Avenue JF Kennedy, L-1855 Luxembourg, Luxembourg) ("Clearstream Banking SA" or "CBL"), Clearstream Banking AG, Frankfurt am Main (Mergenthalerallee 61, 65760 Eschborn, Germany) ("Clearstream Banking AG" or "CBF"), Euroclear France SA (66 Rue de la Victoire, 75009 Paris, France) ("Euroclear France") Monte Titoli S.p.A., Piazza degli Affari no. 6, Milan, Italy ("Monte Titoli") and/or any alternative clearing system.
as specified in the Final Terms. The appropriate security identification codes for each Series of Securities will be contained in the Final Terms. The Issuer may decide to deposit, or otherwise arrange for the clearance of, Securities issued under the Programme with or through an alternative clearing system. The relevant details of such alternative clearing system will be specified in the Final Terms.

Agents

Principal Paying Agents under the Programme are UniCredit Bank AG, Arabellastraße 12, 81925 Munich, Germany and (for Securities deposited with Clearstream Banking SA and Euroclear Bank) Citibank, N.A., London Office, Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB, United Kingdom.

The French Paying Agent for Euroclear France S.A. is CACEIS Bank S.A., 1-3 rue place Valhubert, 75206 Paris Cedex 13, France.

Calculation Agent under the Programme is UniCredit Bank AG, Arabellastraße 12, 81925 Munich, Germany.

Luxembourg Listing Agent under the Programme is BNP Paribas Securities Services, Luxembourg Branch, 60, avenue J.F. Kennedy, L-1855 Luxembourg.

The Issuer may decide to appoint another Principal Paying Agent and/or Calculation Agent for the Securities issued under the Base Prospectus. The relevant details of such alternative Principal Paying Agent and/or Calculation Agent will be specified in the Final Terms.

Significant Changes in HVB’s Financial Position and Trend Information

The performance of HVB Group will depend on the future development on the financial markets and the real economy in 2018 as well as other remaining imponderables. In this environment, HVB Group will continuously adapt its business strategy to reflect changes in market conditions and carefully review the management signals derived from this on a regular basis.

There has been (i) no significant change in the financial position of the HVB Group which has occurred since 30 June 2018, and (ii) no material adverse change in the prospects of the HVB Group since 31 December 2017, the date of its last published audited financial statements.

Interest of Natural and Legal Persons involved in the Issue/Offer

Any of the Distributors and their affiliates may be customers of, and borrowers from the Issuer and its affiliates. In addition, any of such Distributors and their affiliates may have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for the Issuer and its affiliates in the ordinary course of business. Therefore, the Distributors and their affiliates may have a particular interest in the Issuer’s economic success and the continuance of their business relationship with the Issuer.

With regard to trading of the Securities the Issuer has a conflict of interest being also the Market Maker on a regulated or other equivalent market(s), if indicated in the Final Terms; moreover a relevant regulated or other equivalent market(s), is organized and managed by a company in which UniCredit S.p.A. – the Holding Company of UniCredit Bank AG as the Issuer – has a stake in. If applicable, such market will be indicated in the Final Terms. The Issuer is also the arranger of the Securities, if so specified in the Final Terms. The Issuer or any of their affiliates may also act as a Calculation Agent or Paying Agent, if so specified in the Final Terms.

Besides, conflicts of interest in relation to the Issuer or the persons entrusted with the offer may arise for the following reasons which may result in a decision to the Security Holder’s disadvantage:

- The Issuer specifies the Issue Price.
- The Issuer and one of its affiliates act as Market Maker of the Securities (however, no such obligation exists).
- Distributors may receive inducements from the Issuer.
- The Issuer, any Distributor and any of their affiliates act as Calculation Agent or Paying Agent in relation to the Securities.
- From time to time, the Issuer, any Distributor and any of its affiliates may be involved in
transactions on their own account or on the account of their clients, which affect the liquidity or the price of the Underlying or its components.

• The Issuer, any Distributor and its affiliates may issue securities in relation to the Underlying or its components on which already other securities have been issued.

• The Issuer, any Distributor and any of its affiliates may possess or obtain material information about the Underlying or its components (including publicly not accessible information) in connection with its business activities or otherwise.

• The Issuer, any Distributor and any of their affiliates may engage in business activities with the issuer of the Underlying or its components, its affiliates, competitors or guarantors.

• The Issuer, any Distributor and any of their affiliates may also act as a member of a syndicate of banks, as financial advisor or as bank of a sponsor or issuer of the Underlying or its components.

• The Issuer or one of its affiliates may act as index sponsor, index calculation agent, index advisor or index committee.

• The Issuer or one of its affiliates may act as an investment advisor or manager of a fund used as Underlying.

• The Underlying may be issued by UniCredit S.p.A. (a company of UniCredit Group) or another company belonging to the UniCredit Group, to which also the Issuer of the Securities belongs.

Third Party Information
Where information has been sourced from a third party, the Issuer confirms that to the best of its knowledge this information has been accurately reproduced and that so far as the Issuer is aware and able to ascertain from information published by such third party no facts have been omitted which would render the reproduced information inaccurate or misleading.

To the extent additional information is included in the Final Terms (for example, with regard to information about the Underlying), the respective source for the corresponding information is stated at the relevant place.

Reference may also be made to websites for information about the Underlying and the respective Final Terms. These websites can be used as a source of information for the description of the Underlying. The Issuer assumes no warranty for the accuracy of the content and the completeness of the data shown on the websites.

Use of Proceeds and Reasons for the Offer
The net proceeds from each issue of Securities by the Issuer will be used for its general corporate purposes, i.e. making profit and/or hedging certain risks.
