Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuers and the Guarantor	<p>In purchasing Notes, investors assume the risk that the Issuers and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuers and the Guarantor becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuers and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuers' and the Guarantor's control. The Issuers and the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p> <ul style="list-style-type: none"> • risks concerning liquidity which could affect the Group's ability to meet its financial obligations as they fall due; • the UniCredit Group's results of operations, business and financial condition have been and will continue to be affected by adverse macroeconomic and market conditions; • the European sovereign debt crisis has adversely affected, and may continue to, adversely affect the Group's results of operations, business and financial condition; • the Group has exposure to European sovereign debt; • financial regulators have requested that UniCredit Group companies reduce their credit exposure to other UniCredit Group entities, particularly their upstream exposure to UniCredit, which could have a material adverse effect on the way in which the UniCredit Group funds its operations and provides liquidity to members of the Group; • systemic risk could adversely affect the Group's business; • risks connected to an economic slowdown and volatility of the financial markets – credit risk; • the economic conditions of the geographic markets in which the Group operates have had, and may continue to have, adverse effects on the Group's results of operations, business and financial condition; • the fair values of the Group's structured credit products have been and may continue to be significantly reduced;

Element	Title	
		<ul style="list-style-type: none"> • deteriorating asset valuations resulting from poor market conditions may adversely affect the Group's future earnings; • intense competition, especially in the Italian market, where the Group has a substantial part of its businesses, could have a material adverse effect on the Group's results of operations and financial condition; • non-traditional banking activities expose the Group to additional credit risks; • unidentified or unanticipated risks, by their nature, might not be captured in the current Group's risk management policies; • fluctuations in interest and exchange rates may affect the Group's results; • changes in the Italian and European regulatory framework could adversely affect the Group's business; • the Group may be subject to increased capital requirements; • the Group may be subject to the provisions of the Recovery and Resolution Directive, once finalised and implemented, in the future; • Operational and IT risks are inherent in the Group's business; • any rating downgrades of UniCredit or other entities of the Group would increase the re-financing costs of the Group and may limit its access to the financial markets and other sources of liquidity; • as at the date of this Base Prospectus, there are certain legal proceedings pending against UniCredit and other companies belonging to the Group; • the Group is involved in pending tax proceedings; and • the Group may be unable to fully implement its 2010-2015 Strategic Plan.
D.3	Key risks regarding the Notes	<p>There are also risks associated with the Notes. These include a range of market risks (including that there may be no or only a limited secondary market in the Notes, that the value of an investor's investment may be adversely affected by exchange rate movements where the Notes are not denominated in the investor's own currency, that any credit rating assigned to the Notes may not adequately reflect all the risks associated with an investment in the Notes and that changes in interest rates will affect the value of Notes which bear interest at a fixed rate), the fact that the conditions of the Notes may be modified without the consent of</p>

Element	Title	
		<p>the holder in certain circumstances, that the holder may not receive payment of the full amounts due in respect of the Notes as a result of amounts being withheld by the Issuer in order to comply with applicable law and that investors are exposed to the risk of changes in law or regulation affecting the value of Notes held by them.</p> <p>Key risks regarding to certain types of Notes</p> <p>Notes subject to optional redemption by the relevant Issuer: the relevant Issuer may be expected to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.</p> <p>If the relevant Issuer has the right to convert the interest rate on any Notes from a fixed rate to a floating rate, or vice versa, this may affect the secondary market and the market value of the Notes concerned.</p> <p>Notes which are issued at a substantial discount or premium may experience price volatility in response to changes in market interest rates.</p> <p>There are certain risks associated with investing in Subordinated Notes. These risks include:</p> <ul style="list-style-type: none"> • an investor in Subordinated Notes assumes an enhanced risk of loss in the event of the relevant Issuer's insolvency as UniCredit and UniCredit Ireland obligations under Subordinated Notes will be unsecured and subordinated and will rank junior in priority of payment to Senior Liabilities; • under the Subordinated Guarantee, in the event of winding-up, dissolution, liquidation or bankruptcy (including, <i>inter alia</i>, <i>Liquidazione coatta amministrativa</i>, as described in Articles 80 to 94 of the Italian Banking Act) of UniCredit, the Subordinated Guarantee will rank in right of payment after unsubordinated unsecured creditors (including depositors) of UniCredit; • the regulatory classification of the Notes - although it is the Issuers' expectation that the Notes qualify as "Lower Tier II capital" or, as appropriate, "Tier 2 capital" there can be no representation that this is or will remain the case during the life of the Notes or that the Notes will be, if appropriate, grandfathered under the implementation of future EU capital requirement regulations; and • loss absorption - investors should be aware that

Element	Title	
		<p>Subordinated Notes may be subject to a write-down or conversion into common shares at the point of non-viability should the Bank of Italy, the Central Bank of Ireland or other authority or authorities having oversight of the relevant Issuer at the relevant time (the Relevant Authority) be given the power to do so, whether as a result of the implementation of RRD or otherwise. The Subordinated Notes issued under the Programme include provisions setting out that the obligations of the relevant Issuer under Subordinated Notes are subject to the powers of the Relevant Authority pursuant to applicable law and/or regulation in force from time to time.</p> <p>There are certain risks associated with investing in Inflation Linked Interest Notes. These risks include:</p> <ul style="list-style-type: none"> • potential investors in any such Notes should be aware that depending on the terms of the Inflation Linked Interest Notes they may receive no interest or a limited amount of interest; • Inflation Linked Interest Notes may be subject to certain disruption provisions or extraordinary event provisions and If the Calculation Agent determines that any such event has occurred this may delay valuations under and/or settlements in respect of the Notes and consequently adversely affect the value of the Notes; • the market price of Inflation Linked Interest Notes may be volatile and may depend on the time remaining to the maturity date or expiration and the volatility of the level of the inflation or consumer price index or indices; and • the level of the inflation or consumer price index or indices may be affected by the economic, financial and political events in one or more jurisdictions or areas. <p>There are certain risks associated with investing in Renminbi Notes. These risks include:</p> <ul style="list-style-type: none"> • the Renminbi is not freely convertible and there are significant restrictions on the remittance of the Renminbi into and outside the PRC which may affect the liquidity of the Notes; • there is only limited availability of Renminbi outside the PRC, which may affect the liquidity of the Notes and the relevant Issuer's ability to source Renminbi outside the PRC to service the Renminbi Notes; • an investment in Renminbi Notes is subject to exchange rate risk and interest rate risk; • an investment in Renminbi Notes is subject to interest rate risk;

Element	Title	
		<ul style="list-style-type: none"> an investment in Renminbi Notes is subject to risk of change in the regulatory regime governing the issuance of Renminbi Notes; payments in respect of the Renminbi Notes will only be made to investors in the manner specified in the Renminbi Notes. <p>The value of Fixed Rate Notes may be adversely affected by movements in market interest rates.</p> <p>Credit ratings assigned to the Issuers, the Guarantor or any Notes may not reflect all the risks associated with an investment in those Notes.</p>
