Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuers [and the Guarantor]	<p>In purchasing Notes, investors assume the risk that the Issuers and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuers and the Guarantor becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuers and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuers' and the Guarantor's control. The Issuers and the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p> <ul style="list-style-type: none"> • risks connected with the Strategic Plan; • risks associated with the impact of the current macroeconomic uncertainties and the volatility of the markets on the Group's performance; • risks connected with the volatility of markets on the performance of the Group; • risks connected with the Group's activities in different geographical areas; • credit risk and risk of credit quality deterioration; • risks related to the income results of the Group for the years ended 31 December 2016; • risks associated with forbearance on non-performing loans; • risks associated with UniCredit's participation in the Atlante fund and the Atlante II fund; • risks associated with the Group's exposure to sovereign debt; • liquidity risk; • risks related to intra-group exposure; • market risks; • risks connected with interest rate fluctuations; • risks connected with exchange rates; • Risks associated with borrowings and evaluation methods of the assets and liabilities; • risks related to deferred taxes;

- risks connected with the interests in the capital of the Bank of Italy;
- counterparty risk in derivative and repo operations;
- risks connected with exercising the Goodwill Impairment Test and losses in value relating to goodwill;
- risks connected with existing alliances and joint ventures;
- risks connected with the performance of the property market;
- risks connected with pensions;
- risks connected with risk monitoring methods and the validation of such methods;
- risks relating to the IT systems management;
- risks connected with non-banking activities;
- risks connected with legal proceedings in progress and supervisory authority measures;
- risks arising from tax disputes;
- risks related to international sanctions with regard to sanctioned countries and to investigations and/or proceedings by the U.S. authorities;
- risks connected with the organizational and management model pursuant to Legislative Decree 231/2001 and the accounting administrative model pursuant to Law 262/2005;
- risks connected with Alternative Performance Indicators;
- risks connected with operations in the banking and financial sector;
- risks connected with the entry into force of new accounting principles and changes to applicable accounting principles;
- risks connected with the political and economic decisions of EU and Eurozone countries and the United Kingdom leaving the European Union (Brexit);
- implementation of Basel III and CRD IV;
- forthcoming regulatory changes;
- ECB Single Supervisory Mechanism;
- The bank recovery and resolution directive is intended to enable a range of actions to be taken in relation to credit institutions and investment firms considered to be at risk of failing. The taking of any such actions (or the perception that the taking of any such action may occur) could materially adversely affect the value of

		<p>any Notes and/or the rights of Noteholders;</p> <ul style="list-style-type: none"> • Implementation of BRRD in Luxembourg; • Implementation of BRRD in Ireland; • as of 2016 the UniCredit Group is subject to the provisions of the Regulation establishing the Single Resolution Mechanism; • the UniCredit Group may be subject to a proposed EU regulation on mandatory separation of certain banking activities; • the UniCredit Group may be affected by a proposed EU Financial Transactions Tax; and • any rating downgrades of UniCredit or other entities of the Group would increase the re-financing costs of the Group and may limit its access to the financial markets and other sources of liquidity.
<p>D.3</p>	<p>Key risks regarding the Notes</p>	<p>There are also risks associated with the Notes. These include a range of market risks (including that there may be no or only a limited secondary market in the Notes, that the value of an investor's investment may be adversely affected by exchange rate movements where the Notes are not denominated in the investor's own currency, that any credit rating assigned to the Notes may not adequately reflect all the risks associated with an investment in the Notes or may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency and that changes in interest rates will affect the value of Notes which bear interest at a fixed rate), the fact that the conditions of the Notes may be modified without the consent of the holder in certain circumstances, that the regulation and reform of “benchmarks” may adversely affect the value of Notes linked to such “benchmarks”, that the holder may not receive payment of the full amounts due in respect of the Notes as a result of amounts being withheld by the Issuer in order to comply with applicable law and that investors are exposed to the risk of changes in law or regulation affecting the value of Notes held by them.</p> <p>Key risks regarding to certain types of Notes</p> <p>Notes subject to optional redemption by the relevant Issuer: the relevant Issuer may be expected to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.</p> <p>If the relevant Issuer has the right to convert the interest rate on any Notes from a fixed rate to a floating rate, or vice versa, this may affect the secondary market and the market value of the Notes concerned.</p> <p>Notes which are issued at a substantial discount or premium may experience price volatility in response to changes in market interest rates.</p> <p>There are certain risks associated with investing in Senior Notes. These risks include the risk connected with the right of the Issuer to redeem the Senior Notes upon the occurrence of a MREL or TLAC Disqualification Event.</p>

There are certain risks associated with investing in Subordinated Notes. These risks include:

- an investor in Subordinated Notes assumes an enhanced risk of loss in the event of UniCredit's insolvency as UniCredit's obligations under Subordinated Notes will be unsecured and subordinated and will rank junior in priority of payment to Senior Liabilities;
- Subordinated Notes may be subject to loss absorption on any application of the general bail-in tool or at the point of non-viability of the Issuer. Investors should be aware that, in addition to the general bail-in tools, the bank recovery and resolution directive contemplates that Subordinated Notes may be subject to a write-down or conversion into common shares at the point of non-viability should the Bank of Italy or other authority or authorities having prudential oversight of the relevant Issuer at the relevant time (the **Relevant Authority**) be given the power to do so. The Subordinated Notes issued under the Programme include provisions setting out that the obligations of the relevant Issuer under such Subordinated Notes are subject to the powers of the Relevant Authority pursuant to applicable law and/or regulation in force from time to time; and
- the regulatory classification of the Notes - although it is the Issuers' expectation that the Notes qualify as "Tier 2 capital" there can be no representation that this is or will remain the case during the life of the Notes.

There are certain risks associated with investing in Inflation Linked Interest Notes. These risks include:

- potential investors in any such Notes should be aware that depending on the terms of the Inflation Linked Interest Notes they may receive no interest or a limited amount of interest;
- Inflation Linked Interest Notes may be subject to certain disruption provisions or extraordinary event provisions and if the Calculation Agent determines that any such event has occurred this may delay valuations under and/or settlements in respect of the Notes and consequently adversely affect the value of the Notes;
- the market price of Inflation Linked Interest Notes may be volatile and may depend on the time remaining to the maturity date or expiration and the volatility of the level of the inflation or consumer price index or indices; and
- the level of the inflation or consumer price index or indices may be affected by the economic, financial and political events in one or more jurisdictions or areas.

There are certain risks associated with investing in Renminbi Notes. These risks include:

- the Renminbi is not freely convertible and there are significant restrictions on the remittance of the Renminbi into and outside the PRC which may affect the liquidity of the Notes;

- there is only limited availability of Renminbi outside the PRC, which may affect the liquidity of the Notes and the relevant Issuer's ability to source Renminbi outside the PRC to service the Renminbi Notes;
- an investment in Renminbi Notes is subject to exchange rate risk;
- an investment in Renminbi Notes is subject to interest rate risk;
- an investment in Renminbi Notes is subject to risk of change in the regulatory regime governing the issuance of Renminbi Notes; and
- payments in respect of the Renminbi Notes will only be made to investors in the manner specified in the Renminbi Notes;
- The value of Fixed Rate Notes may be adversely affected by movements in market interest rates; and
- Credit ratings assigned to the Issuers, the Guarantor or any Notes may not reflect all the risks associated with an investment in those Notes.

Section E – Offer

Element	Title	
E.2b	Reasons for the offer and use of proceeds	<p>The net proceeds from each issue of Notes will be applied by the Issuers for their general corporate purposes, which include making a profit. If in respect of any particular issue other than making a profit and/or hedging certain risks, there is a particular identified use of proceeds, this will be stated in the applicable Final Terms.¹⁰</p> <p>[The net proceeds from the issue of Notes will be applied by the Issuer for its general corporate purposes, which include making a profit [and[]].</p>
