- Production date of the KID: 14/05/2025

You are about to purchase a product that is not simple and may be difficult to understand.

1. WHAT IS THIS PRODUCT?

TYPE

An Over the Counter (OTC) derivative contract – Cross Currency Swap

TERM

The product has a fixed contractually agreed term and will terminate after 10 years.

OBJECTIVES

Cross Currency Swaps are used for managing interest rate and foreign exchange risks.

A Cross Currency Swap is an agreement between two contracting parties (client/UniCredit Bank GmbH) to exchange interest payments in two different currencies during the contractually agreed term. The agreed notional amounts of these currencies are exchanged optionally at the start date, and mandatory either in installments during the term or at the maturity of the swap. The interest payments are calculated on the notional amounts in the two currencies. The interest payments are exchanged at certain agreed dates. Terms of up to ten years are customary. The term of this agreement is divided into individual interest periods.

The following combinations for the exchange of the interest payments are possible: fixed versus fixed interest payments, floating versus floating interest payments and fixed versus floating interest payments. Any fixed interest rate is determined when the contracting parties enter into the swap. Any floating interest rate is based on a reference rate (if applicable plus a spread) in the respective currency (e.g. EURIBOR, USD-LIBOR). A reference rate is reset two banking days before the start of a respective interest period. Any reference rate with applicable periods (e.g. 3 month EURIBOR, 3 month USD-LIBOR) can be selected as base for the floating interest payments. If the floating interest rate and/or the fixed interest rate is negative, the direction of the respective interest payment changes.

Sample product terms are set out below and are based on legally predefined or realistic assumptions and may not match your specific contract details.

Term	10 years
Notional amount EUR	EUR 10,000
Notional amount USD	USD 11,112
Client pays in EUR (fixed interest rate)	3.05% p.a. annual payments day-count convention Act/360
Client receives in USD (floating interest rate)	USD SOFR annual payments day-count convention Act/360
Notional exchange	at the beginning and at the end of the swap term
Day-count convention	act/360 means: Interest days in the counter are based on the number of calendar days. The calendar year in the denominator is set for 360 days. 30/360 means: The calendar month consists of 30 interest days. The calendar year is set for 360 days.

INTENDED RETAIL INVESTOR

This product is designed for retail investors who

- hold this product for the contractually agreed term,
- are in the position to bear losses that may be unlimited and
- have comprehensive knowledge of and/or past experience with OTC derivatives and the financial markets.

2. WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

Be aware of currency risk. You may pay and/or receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make payments to pay for losses. The total loss you may incur may be significant.

This product does not include any protection from future market performance so you could incur significant losses.

If we are not able to pay you what is owed, you could incur significant losses.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		10 years		
Example notional amount:		EUR 10,000		
Scenarios		If you end after 1 year	If you end after 5 years	If you end after 10 years
Minimum scenario	There is no minimum guaranteed return. You may have to make further payments to cover losses.			
Stress scenario	What you might get back or pay after costs	EUR -411	EUR -717	EUR -6,230
	Average return/loss over notional amount each year	-4.1%	-1.4%	-6.2%
Unfavourable scenario	What you might get back or pay after costs	EUR -374	EUR 526	EUR 6,229
	Average return/loss over notional amount each year	-3.7%	1.1%	6.2%
Moderate scenario	What you might get back or pay after costs	EUR -308	EUR 1,472	EUR 22,111
	Average return/loss over notional amount each year	-3.1%	2.9%	22.1%
Favourable scenario	What you might get back or pay after costs	EUR -264	EUR 3,187	EUR 70,751
	Average return/loss over notional amount each year	-2.6%	6.4%	70.6%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back or pay.

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes, which have been calculated based on simulations using the past performance of the reference rate over the past 5 years. The stress scenario shows what you might get back or pay in extreme market circumstances.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will make a large loss if you do so.

3. WHAT HAPPENS IF UNICREDIT BANK GMBH IS UNABLE TO PAY OUT?

Counterparties of derivative transactions are exposed to the risk that UniCredit Bank GmbH becomes unable to discharge its obligations under the transaction, for example in the case of an insolvency (inability to pay or overindebtedness) or in the case resolution measures are taken by an authority against the credit institution. Such a decision to take resolution measures can, for example, be taken if the assets of the institution are less than its liabilities, where it is unable or will, in the near future, be unable to pay its debts or other liabilities as they fall due, or where it requires extraordinary public financial support. Where resolution measures are taken, the competent resolution authority can decide on an early termination of the derivative transaction. In the case such early termination results in a claim of the counterparty against the credit institution, the decision of the resolution authority can lead to a partial or complete reduction of the principal amount of this claim or in a conversion of this claim in to equity (shares or other types of equity).

If UniCredit Bank GmbH does not fulfil its obligations connected with the product or is unable to pay, you can lose part of or the full payout or can suffer an unlimited loss. This product is not protected by any deposit guarantee scheme, legal or otherwise, or any other type of guarantee.

4. WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- The product performs as shown in the moderate scenario.
- A notional amount of EUR 10,000

	If you end after 1 year	If you end after 5 years	If you end after 10 years
Total costs	EUR 870	EUR 750	EUR 600
Annual cost impact (*)	8.7%	1.5%	0.6%

(*) This illustrates how costs reduce your return in relation to the notional amount each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 22.7% before costs and 22.1% after costs.

COMPOSITION OF COSTS

One-off costs upon entry or exit	If you end after 1 year	
Entry costs	These costs are already included in the price you pay.	Up to EUR 600
Exit costs	These costs only apply if you exit before maturity (end of the agreed term).	EUR 270

5. HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 10 years

The recommended holding period corresponds to the contractually agreed term. You are not entitled to unilaterally terminate the product prematurely. However, the right of early termination may be agreed for one or both contracting parties. In the event of an agreed early termination, you will either receive or pay a compensation payment, which is made up of the market value of the product and the termination costs, including a margin earned by the bank. Significant additional costs may be incurred.

6. HOW CAN I COMPLAIN?

You can make complaints about the product, or about the behaviour of the issuer of the product or of the persons that provide advice regarding or who sell the product, on the following website www.onemarkets.de/KIDs-OTC, in writing (e.g. by letter or email) to UniCredit Bank GmbH at the following address: HypoVereinsbank - Member of UniCredit, UniCredit Bank GmbH, Beschwerdemanagement PPV9BM, 80311 Munich, Germany, E-mail address: Kundendialog@unicredit.de, website: www.hvb.de/beschwerdemanagement

7. OTHER RELEVANT INFORMATION
